### DAILY, GREETINGS TO OUR READERS

Lord, when we pray, "Thy kingdom come,"
Then fold our hands, without a care
For souls whom Jesus died to save,
We do but mock Thee with our prayer.

### Science Is Learning About Universe

Modern science takes nothing for granted. It is searching out the hidden things in every direction—in every field of knowledge. More is known about the universe today than ever before. And ever the quest of additional knowledge goes on. The eclipse of the sun, on Monday, was put under more elaborate scrutiny by science than ever before was employed to bring (orth secrets of the universe while the face of the great ort was obscured by the moon's shadow. By means of intensive observations and photographs, it may be possible to learn much about the structure of the sun and about its physical status, and how this reacts upon the earth.

And thus science marches on, achieving triumph after trumph, and adding vasily to the sum total of human knowledge.
God has written wonderounly and avesomely in His universe.
He permits man partially to draw back the veil and to gaze upon
the marvels of His creation.

The American necespaper press is one of the greatest powers for good in all the world today.

### Haste and Hustle for 1924 Convention!

If San Francisco is to get one of the great national conven-tions in 1924 it must bestir itself and California and the Pacific West must support the Bay City with 2set. Already announce-uent comes unofficially, but with show of accuracy, that Chi-rago is to get the Bepublican antional convention near year. And coupled with this is news that strenuous efforts are being made to take the Democratic national convention to St. Louis. Other lities will bid spiritedly for the honor of enterthining these big political assemblages.

political assemblages.

This is an honor worth seeking by California. San Francisco entertained the 1920 national Democratic convention with great success and credit. This was the first demonstration of the capability of a Pacific Goast city to care for a big political conclave to the satisfaction of all concerned. Delegates and visitors were delighted. California hospitality and resourcefulness, and California thinks and scenery captivated them. And it was demonstrated that bringing a national convention to the Pacific Coast did not wreck the party.

California should try earnestly and sealously to get one or both of the 1924 conventions. Should these efforts fail, the groundwork would be laid for getting one or both of the big assemblages in 1922.

The United States has one distinction of which it has no res-nto be proud—it leads all nations in the number and serious-case of violent crimes. Better enforcement of law is needed to uniteract this. Also more thorough inculcating of morals into
