"TWO CARLOADS OF FINE PIANOS..."

Just received direct from the Eastern factories.
E. W. PYNE who went East to purchase pianos has already purchased two carloads which have just arrived. These pianos represent the choice of many different factories, and afford as large an assortment to select from as can be found in Southern California, including MATHUSHEK, KNABE, EVERETT, CABLE, HARWARD, PYNE BROS., MILTON, HOWARD, LUIGI, RICCA, and the KRKAUER; also many other well-known makes. Sold on easy payments, and at prices that defy competition as buying and shipping in large quantities direct from the Eastern factories for cash, together with our low rent, enables us to make prices far under our competitors.

Don't fail to see our instruments and get our prices if you are interested.

PYNE MUSIC CO.

NEW RURAL DELIVERY RULES.

Acceptance of Outside Employment Discouraged by the Postoffice Department.
Ordered: Hereafter rural letter-carriers shall not act as agents, salesmen or solicitors for express companies, letter-box manufacturers, wholesale houses, corporations or firms, nor engage in any business or avocation which would interfere with the proper performance of their official duties. They may act as news agents, sell newspapers or periodicals on their own account, or accept and collect subscriptions for the same. When carriers receive newspapers or periodicals by express or by other means outside the mails to be sold or delivered on their routes, they, as news agents, will be required to pay postage on such matter at the second-class rate of postage (1 cent per pound), except in the case of country papers, which are mailed free to subscribers residing in the county in which they are published.
This order is not intended to prohibit carriers from performing various private commissions for the accommodation of the patrons on their routes, so long as it does not interfere with the regular and prompt performance of their duties.

CHARLES EMMORY SMITH, Postmaster-General.
This is the order issued by the Postmaster-General, to become effective at once. While apparently the order is designed to cut the rural free-delivery carrier off from outside employment in connection with his work for the Government, such is not the declared purpose of the order so far as the department is concerned. Its primary object, as stated by department officials, is to stop the peddling of liquor by the carriers. While not presuming to pose as the sponsor for the character of its employees in minor positions, the department does not propose that any of the Government machinery shall in any way be used in the promotion of the liquor traffic.
The order is also designed to meet what has been bitterly complained of for months by small dealers in the cities near rural free-delivery routes. Letters by the score have been received at the department to indicate that the carriers are acting as the paid agents of express companies and other concerns. Big department stores are using the carriers, and they are not only delivering goods for them, but solicit and take orders. In this they are doing the work of the Government, built up a business which warrants them carrying in their conveyances a regular stock of goods needed by patrons of their routes. This tends to injure the small country merchants and to impair the service by creating long delays in the delivery of the mails. The original idea of the department in allowing the carriers to secure outside employment, in connection with their routes, was to make up in a way for the small pay which they received. Now their condition is greatly improved, and the department will from this time discountage outside employment. It is not the intention, however, to prevent the carriers from attending to any small commissions which may be given them by patrons along their routes, or to prevent them acting as newspaper agents, but a rigid rule will be enforced to prevent them occasional delays in mail delivery and collection.

CHAMPLIN'S ODD FELLOWSHIP

Further Mention of the Exercises on the Fifth Anniversary of His Induction Into the Order.
EDITOR GAZETTE:—Anaheim Lodge, No. 199, I. O. O. F., had a more than usually interesting meeting on the occasion of the fifth anniversary of the initiation into Odd Fellowship of S. W. Champlin, a charter member of the local lodge, and one of the brightest and best-posted Odd Fellows in the State. Many brothers were present from Santa Ana, Orange, Westminster and Whittier. It is not often the "boys" get a chance to celebrate such an occasion, and they made the most of the opportunity. The going out of the electric lights at midnight conveyed no hint to them that it was time to adjourn, and the festivities did not lag under the comparatively feeble glare of the oil lamps.
Bro. Champlin was made an Odd Fellow in 1881, in Kellogg Lodge, in Western New York. He is rather uncertain as to the month and day when the event took place, a fact which is not surprising, as the memory of most of us as to occurrences fifty years ago is rather hazy. He joined the lodge at San Bernardino by and in 1888, and in January, 1892, he took a prominent part in instituting Anaheim Lodge, and has been a member thereof ever since, devoting much of his time to its advancement and progress. As Special Deputy Grand Sir, he instituted a lodge at Tucson, Arizona, on February 22d, 1891; and during his long career in the fraternity, he has filled almost all the important offices with honor to himself and satisfaction to the members.
On the assumption that a man who has passed three score years and ten occasionally gets that "tired feeling" about which we read so much, his brethren celebrated the anniversary by presenting to him a handsome cushioned easy-chair, a receipt for \$40 advance dues, and an envelope which gave forth a jingling metallic sound as it was handed to him by Bro. Tedford of Santa Ana, who made an eloquent presentation address in the unavoidable absence of Bro. McElroy, who was slated for the pleasing duty. Bro. Champlin was permitted to rest but a few moments in the chair when he was forced to abandon its luxurious ease by Bro. Geo. Peters of Santa Ana, who required him to stand up while he delivered a speech and an elaborately worked head-rest, made by the ladies, was placed for the pleasing duty. Bro. Champlin was permitted to rest but a few moments in the chair when he was forced to abandon its luxurious ease by Bro. Geo. Peters of Santa Ana, who required him to stand up while he delivered a speech and an elaborately worked head-rest, made by the ladies, was placed for the pleasing duty.

Fumigation Law.

The recent decision of the Supreme Court sustaining the constitutionality of the fruit inspection law of 1897 is a case brought from Riverside county is one of great importance to the fruit interests of the State. Under this law, which provides that when an orchard whose trees are infested with scale refuse to fumigate them the Horticultural Commissioners may do the work and make him pay the costs. The Commissioners fumigated the orchard of Alfred Butcher and rendered him a bill for \$157, which he refused to pay. Suit was brought in the Superior Court to enforce payment and it resulted in a decision by the judge in favor of the defendants. The case was taken to the Supreme Court on appeal, and now that court has reversed the decision of the lower court and sustained the validity of the law. If the bill and costs of the suit are not paid by defendant his orchard may be sold to satisfy the judgment.

This is an important decision, since it establishes the power of the State to compel orchardists to keep their trees free of pests and sustains the practical confiscation of the orchards if necessary to accomplish this end. Much of the failure to eradicate insect pests has been due to the refusal of the owner of the failure of a few growers to give their trees the necessary attention. This neglect not only causes loss to the neglectful grower himself, but to all his neighbors and to the State as a whole, because of the effect upon fruit both as to quality and quantity. In such cases drastic measures are the only effective ones, and these have always been opposed on the ground that the State has no right to invade the private property of individuals so to confiscate it. Even the condemnation of infected fruit in the markets or in transit is opposed on the same ground, that a person cannot be deprived of his property without due process of law. The decision of the Supreme Court will do much to promote the strict enforcement of the laws we have and to create a public sentiment in favor of still more effective ones.

A city minister was recently handed a notice to be read from his pulpit. Accompanying it was a clipping from a newspaper bearing upon the matter. The clergyman started to read the extract and found that it began: "Take Kemp's Balsam, the best cough cure." This was hardly what he had expected, and, after a moment's hesitation, he turned it over, and found on the other side the matter intended for the reading.

TO WAR ON INSECT PESTS.

Southern California Horticultural Commissioners to Keep Out Infested Nursery Stock.
Horticultural Commissioner Huntington has returned from the meeting of the Horticultural Commissioners of Southern California, held at Riverside some days ago.
All the counties were represented, with the exception of Santa Barbara. The association decided to meet on September 1 in San Diego.
At the Riverside meeting, after an extended discussion of the quarantine and other laws bearing on the subject of insect pests, the following resolutions were finally adopted unanimously:
First—All shipments of nursery stock, plants, etc., must be accompanied by a certificate attached to the package, signed by an inspector or a commissioner, certifying that the shipments are apparently free from infection, whether they be to points within this county or to points in other counties.
Second—Railroads and other freight officers and all common carriers must not accept nursery stock, plants, etc., for shipment, unless a tag certificate is attached thereto, attesting that the consignment is apparently free from insect or other infection, and signed by the authority of the County Horticultural Commission.
Third—All nurseries, tree dealers and florists in the county are hereby prohibited from purchasing or receiving for sale on commission, or otherwise, any kind or character of nursery or florist stock, unless same is accompanied by a tag certificate or general certificate of cleanliness of stock, issued by order of the County Horticultural Commission, in accordance with the preceding law.
Fourth—That no certificate of disinfection or cleanliness of nursery stock be issued by any commissioner or inspector unless such stock is apparent, on thorough inspection by such commissioner or inspector, to be free and clear from insect pests of every kind or character.
Fifth—That this association deems it necessary that all insects that are now deemed pests shall be destroyed before taking out of the nursery, and that the owner be notified to eradicate such pests before said trees leave the nursery, and that each nursery be inspected at least once a year.
Sixth—WHEREAS, The insect pest known as phylloxera of the vine has gained a foothold in Northern California; and
WHEREAS, To the best of the knowledge and belief of this association, the said insect pest cannot at present be found in the seven southern counties of California; therefore, be it
Resolved, That the boards of supervisors of said southern counties be requested to pass an ordinance quarantining against the said pest north of the northern boundary of San Luis Obispo, Kern and San Bernardino counties, and other localities known to be infested with said pest.
Considerable discussion was held on the quarantine laws against the white fly; but as Los Angeles county had a law which imposed a tax of \$50 per month, and had other provisions that were practically prohibitory, while some other counties had no law at all, action was deferred until a future meeting.
The Russian thistle was also discussed, but some thought it was not exactly in line with insect pests, and no action was taken.
The resolutions were ordered to take effect September 1, with the understanding that the commissioners from each county would have to enact them separately.

Fruit Prices Up.

Prices of fruit and vegetables, especially the former, are going up at a rapid rate. Representatives of all the shipping companies have received instructions to gather up all fruit and vegetables available at the lowest price procurable. Their first purchases were at lower prices, but as soon as the growers discovered the folly of the purchasers and the reasons, they raised prices, and are holding them more firm.
The big demand is caused by a failure of these crops in the Mississippi Valley from drought and heat. There is a red-hot demand for vegetables that will stand transportation. Prices have doubled in some instances. There are going to be worth lots of money, from present indications. The local shipping agencies are buying spot-cash fruit on eastern orders and rushing it to Kansas City and Omaha. The schedule of prices has varied, but it is probable the increase thus far has been about 30 per cent.

Wants Bonus.

The Interurban railway asks a bonus of \$5,000 from Orange to run its line through that town. This amount, it is considered, is too large for the town to raise, and the road will probably be constructed on the lines mapped out some time ago, viz., from Santa Ana to the river bridge, and thence in the most direct route to this city.
Orange people have held several railroad meetings of late to protest against being left off the main line, but the railway people seem disinclined to change the route.

Nasal Catarrh quickly yields to treatment by Ely's Cream Balm, which is agreeably aromatic. It is received through the nostrils, cleanses and heals the whole surface over which it diffuses itself. Druggists sell it. The trial size is only 10 cents. Test it and you are sure to continue the treatment.

To accompany those who are partial to the use of atomizers in applying liquids into the nasal passages for catarrhal troubles, the proprietors prepare Cream Balm in liquid form, which will be known as Ely's Liquid Cream Balm. Price including the spraying tube is 75 cents. Druggists or by mail. The liquid form embodies the medicinal properties of the solid preparation.

Announcement.

To accompany those who are partial to the use of atomizers in applying liquids into the nasal passages for catarrhal troubles, the proprietors prepare Cream Balm in liquid form, which will be known as Ely's Liquid Cream Balm. Price including the spraying tube is 75 cents. Druggists or by mail. The liquid form embodies the medicinal properties of the solid preparation.

Forestry and Drouth.

On the first day of last month a bureau of forestry came into existence as a part of the agricultural department. Formerly forestry in its national bearings was looked after by a division; now it is a bureau consisting of three divisions. Public sentiment in behalf of systematic forestry has grown fast, and practical steps to advance it have been taken by several states as well as by Congress. The forestry appropriation allowed by Congress for the new fiscal year is \$185,440, against \$38,520 three years ago. During the same time the personnel has been increased from eleven in the forestry division to 125 in the forestry bureau. In this work the departments of the interior and agriculture are cordially co-operating. Some of their expert representatives are now in the West and have been present at the trans-Mississippi congress held in Colorado. Their mission is to recommend plans to properly manage and extend the forests of the country and devise a general scheme of irrigation in the arid region. In his last annual report Secretary Mitchell gave the number of forest reservations created by presidential proclamation as thirty-eight, embracing an area of 46,772,129 acres. Since then the secretary has secured another reservation of 35,000 acres, in the heart of the Wichita mountains, in Oklahoma.
The Western states especially this year have suffered from an insufficient rainfall. In the spring the ground was dryer than usual, and a severe drouth, not yet broken, set in with the beginning of hot weather. A few showers here and there, but too light to be of much benefit. There will be a loss of hundreds of millions in corn, oats, hay and potatoes, while the usual abundant vegetable crop, so important to health and cheap living, is scanty and poor. Great masses of algalga, headed all over large areas and usual rain conditions seem powerless to make an impression upon them. In some localities the water supply has failed. Every observer knows that the wholesale removal of forests modifies the climate and impairs the water supply. In some parts of the world immense districts have been reduced to sterility by the complete destruction of the forest growth. No Sahara have yet been created in the United States, but the reckless slashing of trees in all directions will bring about that result unless the havoc is stopped by scientific forestry.
Forestry is the best friend, not the enemy, of the lumber interests of this country. The forester cuts trees as well as grows them, but does it intelligently. He differs from the reckless lumberman by looking after reproduction while taking off the harvest. It has been proposed to make an Appalachian forest reservation at the headwaters of certain rivers that flow through Virginia, the Carolinas, Georgia, Alabama and Tennessee, and a report on the subject says: "One problem is whether, by the destruction of this magnificent forest area, the streams now furnishing water power to vast industries, having hundreds of undeveloped powers and feeding many of our great rivers shall be shrunk to insignificance or dried up." The trans-Mississippi congress passed a resolution in favor of the construction by the United States government of reservoirs and canals to reclaim arid lands, and national and state storage dams to increase the rainfall. With this movement forestry in all its branches is inseparably connected. The key to the battle against drouth is forestry and irrigation.

Married.

Miss Josephine Bennercheidt, daughter of Mr. and Mrs. Carl Bennercheidt, was married on Wednesday, July 24th, to Charles McMillan of Los Angeles. The ceremony was performed by Justice Shanley, at the residence of the bride's parents. Only relatives and a few personal friends were present. At the conclusion of the ceremony congratulations were extended the happy couple by all. The groom is employed as cook in a Los Angeles restaurant, and is a young man of upright and industrious habits. The bride is a well known young lady of this city and number her friends on all sides. The newly wedded couple will reside in Los Angeles.

RICH BEETS AT LOS ALAMITOS

Highest Percentage of Saccharine and Purity Ever Recorded—Per. cent. Noted.
Harvesting beets at the Los Alamitos factory began July 17th, and slicing three days later. The delivery has been slow, only about 1,600 tons coming in during the week. The average of sugar percentage is remarkable. Some tests are as high as 22 to 25 per cent, with a purity of 92 and 93, the whole average of sugar content being 18.4 per cent, and an average purity of 94.
The early predictions regarding tonnage bid fair to be more than realized, as shown by the harvest experience so far.
The 4-ton scale at the weigh station has been replaced by one with a capacity of six tons to accommodate heavily laden wagons taking away beet pulp. The popular price of 10 cents per ton loaded on wagons at the factory, for beet pulp, has been made to beet-raisers, many of whom are availing themselves of the opportunity to lay in a supply for their dairy stock while the factory is running. Ceto, oil, meal, lime and other products are being shipped. The stream of beets running in at one end of the factory and the stream of sugar pouring out at the other end, have now commenced in earnest, with the prospect of continuing for the next three or four months.
J. Ross Clark, the general manager, now makes frequent visits to the factory, accompanied by J. F. Miller, secretary.
H. C. Lawrence, who has succeeded G. S. Dyer, is proving a popular and efficient superintendent.
F. K. Edwards, chief engineer, with a corps of helpers, has brought the machinery up to a high state of perfection, one new feature being the installation of an electric dynamo and motor for general power purposes throughout the factory.
Mr. A. M. Mosser was formerly chemist here and spent two weeks at Benton Harbor, Mich. He is in charge of the chemical department this year. The shift foremen are J. Evans Miller and Frank E. Norton, who have been with the factory since the beginning of things.
John R. and Roy Smith are expert sugar boilers, and are turning out strikes of sugar equal to the finest this factory ever produced. Higher praise than this could not be given for the product.
The new and popular station agent, J. E. Cannon, is also express agent and telegraph messenger.

DAILY AVERAGES.

	Purity.	Sugar.
July 17	83.7	18.4
July 18	83.0	19.2
July 19	83.5	18.1
July 20	84.5	18.1

July 23	85.4	19.0
July 24	85.6	18.5

Increased Exports.

Exports from the United States to all American countries and the islands south of her boundaries, show a marked increase in the fiscal year just ended. They exceed those of any other year in the history of American commerce. This statement, just made by the Treasury Bureau of Statistics, is especially interesting in view of various efforts being made for closer business, commercial and transportation relations between the United States and its neighbors to the south. New lines of steamship companies have been put on between the Pacific Coast of the United States and the western coast of Mexico and Central and South America.
A recently published statement indicates that the great financial interests of the United States have obtained control of the nearly completed transoceanic line connecting Argentina with Chile. The establishment of additional direct steamship lines between the eastern coast of the United States and South American ports is under discussion, and the opening of an all-Indian canal would give a straight line of water communication from the eastern coast of the United States to the western coast of South America. All these movements in the direction of closer relations between the United States and its southern neighbors add interest to the announcement that our exports to those countries in 1900 are larger than those of any preceding year.

The growth of exports from the United States to Central and South America have not kept pace in the past with the growth in other directions. The total exports to South America in 1900 were no more than those of 1890, being in each of those years in round numbers, \$38,000,000, while the same statement holds good with reference to Central America, the total exports from the United States to Central American States being 1890 and 1900, in each round number, \$5,000,000. To Mexico and the West Indies, our exports in the decade, 1890 to 1900, show the greatest increase, being: To the West Indies, in 1890, \$33,000,000, and in 1900, \$47,000,000, and to Mexico in 1890, \$13,000,000 and in 1900, \$34,000,000.
The fiscal year 1900 was no more than a much greater increase of our sales to our neighbors to the southward than any preceding years. The total exports to Mexico, Central and South America, and the West Indies in 1899 were \$102,000,000 in 1900, \$127,000,000, and in 1901, \$128,000,000. In round numbers, thus the figures of 1901 are \$25,000,000 greater than those of 1899, while the 1899 figures are only \$1,000,000 greater than those of 1898.

Farmers' Institutes.

Farmers' institutes are to be held at Glendale, Buena Vista and Westwood during this month. In addition to Prof. Anderson, dairy instructor at Berkeley, Dr. Longstrech will be on hand, and will give valuable information regarding alfalfa and how to treat it.

Only 50 Cents

to make your baby strong and well. A fifty cent bottle of Scott's Emulsion will change a sickly baby to a plump, rosy child. Only one cent a day, think of it. It's as nice as cream. Send for a free sample, and try it. SCOTT'S EMULSION, CHEMISTS, 109-115 Pearl Street, New York. 2c and 5c bottles all druggists.

SAN BERNARDINO seems to have dropped Hubbel for congress, and is now engaged in booming Major Prescott, of Redlands, recently returned from the Philippines. Prescott was the other day tendered a welcome home by his Redlands enthusiasts, the occasion being understood to be the launching of his congressional boomlet. Meanwhile the Riverside boys are preparing to trot out Cap'n Daniels, who permitted the nomination to slip through his fingers at the Newport convention, where Needham, who was comparatively unknown outside his own county, won the coveted honor by stupid discussions among the southern delegates. However, it is thought Daniels came near the nomination that year that he will again. Senator Nutt of San Diego forms an element of the contest which must be reckoned with. He will have strong support from his own county, and is by knowing ones regarded as particularly available timber. Senator Smith of Kern will also be in the running, and is calculated to make it interesting for his opponents.

That Orange county will have a candidate now seems doubtful. Many Republicans have suggested the name of Judge Ballard, who would prove in many ways an ideal candidate, but we believe he would rather succeed himself as Superior Judge than enter the lists as a congressional aspirant. With no candidate from Orange county, there would remain Prescott of San Bernardino, Daniels of Riverside and Nutt of San Diego as candidates from the counties which furnish the majorities, without which all candidates are out of the reckoning. The question arises: Which of these gentlemen should have the preference over the others; or shall the nomination go to Smith of Kern?

The sentiment of party workers south is that the four southern counties, which roll up the majorities that elect, should name the candidate, especially as the district has been for two terms past represented by a man from the northernmost county of the district. But if the same dissensions continue—San Bernardino against Riverside; San Diego ready to take advantage of the fight, and standing for its own candidate or a northern man, and Orange county the only county in the south for harmony—if these things continue, then it looks like Smith. But the convention is a long way off yet.

A SPIRITED fight has developed over the postoffice. During the week petitions have been in circulation asking the appointment of A. H. Cargill and Joseph Hatfield. Postmaster Littlefield is also an aspirant to succeed himself, and it is said a fourth candidate for the office is ready to butt in. Wise ones say that Cargill has the pole, and is going fast.

A FIRST-CLASS fruit market will find a splendid opening awaiting it in this city. There is none such here, and hardly a day elapses that good business does not offer such an establishment. There is no place in town where an orange can be purchased, although thousands of carloads are produced on all sides of us. Calls are frequently heard for pineapples, bananas, and other tropical fruits; but the nearest stands handling these are at Santa Ana and Los Angeles. A neat and cleanly kept place of the kind, where fruits, berries, nuts and melons might be procured, would undoubtedly do a good business.

THE special summer meeting of the American Forestry association for 1901 will be held at Denver, Colorado, Tuesday, Wednesday and Thursday, August 27th-29th, in affiliation with the American Association for the Advancement of Science.

There will be two sessions daily, at 10 a. m. and 2:30 p. m., which will be held in the Denver High School building, and, in addition, an open evening meeting, in the Central Presbyterian church, Wednesday, August 28th, at 8 p. m. At the latter there will be short addresses by Hon. Thomas M. Patterson, Hon. Thomas F. Walsh, Hon. Platt Rogers and others, followed by an illustrated lecture by Gifford Pinchot, Forester of the United States Department of Agriculture, entitled "The Government and the Forest Reserves."

HENRY OXNARD FOR SENATOR

Said to Have Come out Against Perkins—What Walter Bacon Says.

Henry T. Oxnard, the beet-sugar refiner, appears to wear a Senatorial toga, and it is said he intends to enter the race against Senator Perkins. The management of his campaign in the south is reported to have been placed in the hands of Walter R. Bacon. Some of Bacon's statements are significant.

"While I have received no intimation from Mr. Oxnard or any of his friends that he is or intends to become a candidate for the United States Senate," said Bacon in Los Angeles the other day, "I will say that he is one of the brightest men in California and would certainly make an excellent Senator. Mr. Oxnard is a personal friend of mine, but I have not had a conversation with him for the past six months and certainly have not been asked to become his political sponsor. If Mr. Oxnard intends to make a fight for the Senatorship this would certainly be the right time to attempt to win a seat in the Senate."

"If Mr. Oxnard intends to make a fight for the Senatorship this would certainly be the right time to attempt to win a seat in the Senate," said Bacon in Los Angeles the other day, "I will say that he is one of the brightest men in California and would certainly make an excellent Senator. TALKED OF WALNUT DISEASES

Fullerton-Placentia Farmers' Club Discusses the Question at Mr. Twombly's.

The Fullerton-Placentia Farmers' club held an interesting session at Mr. Twombly's residence on Saturday afternoon. The subject for discussion was "The Walnut Disease." Prof. Pierce of Santa Ana was expected to be present and discuss the subject, but was unable to attend.

The committee appointed to interview him reported that a bill was passed last winter by Congress, whereby the work of the division is organized under the Department of Plant Industry, and that the appropriation for small salary, under the department at Fullerton, was found to be in a better condition than before to give the walnut fungi careful study. He has been notified from Washington that he is at liberty to select an assistant, who must be a graduate of a land-grant (agricultural) college, and enter the department at a small salary, with the prospect of something better in the future. He outlined plans for work hereafter along these lines as follows:

(1) Testing the efficiency of sprays in selected walnut orchards.
(2) Study of orchards to locate resistant trees.
(3) Propagating resistant roots to graft on.

Prof. Pierce asks the co-operation of growers, and suggests that associations throughout Southern California assist him. For a root that will resist the disease he hopes to obtain a hybrid across of wild stock with the English walnut. He wrote to arrange any plans which may seem best relative to conducting experiments for the prevention of walnut disease, or in search of resistant varieties.

Mr. Staley was of opinion the only thing growers could do was to get some sort of trees that would resist the fungus; that it injured young grafted trees more than old ones. Prof. Twombly said the growth is a bacterial disease that invades the stock in this country; that there is no fungus on the walnuts in any part of Europe. It is not known whether it is best to get a resistant tree by working through the root or through the top.

Horticultural Commissioner Huntington said the fungi are a plant growth, and are hard on young grafted trees. There is also a fungus growth on the roots of some trees. He has noticed that trees along irrigation ditches and orchards that were watered often showed the disease more than others. Some growers believed the disease was worse on young trees, while others stated it was just as bad in the older orchards.

A resolution was adopted favoring the naming of roads and improving the same; to request the Supervisors to appoint a committee to arrange the roads for naming; to suggest names; and to report upon the value, the desirability and the cost of having the roads blocked and the houses numbered, with suggestions for beautifying streets and planting and maintaining suitable shade trees thereon. Other farmers' clubs are requested to act accordingly. A resolution was also passed that all bicycle paths at present existing, or that may hereafter be created, either by public or private enterprise, be extended to the protection of the public, in other places, and that it is the duty of the proper authorities to enact such laws as shall make it a misdemeanor to drive or ride a horse upon them or intentionally injure them in any manner.

Their Secret is Out. All Saddleville, Ky., was curious to learn the cause of the vast improvement in the health of Mrs. S. P. Whitaker, who had for a long time, endured untold suffering from a chronic bronchitis, cough, and asthma. It's all due to Dr. King's New Discovery," writes her husband, "It completely cured her and also cured our little granddaughter of a chronic cough and asthma. It positively cures Coughs, Colds, La Grippe, Bronchitis, all Throat and Lung troubles. Guaranteed bottles 50c each. Trial bottles free at all druggists.

STANDARD TIME. To Ascertain and Promulgate It is a Costly Task. "What time is it?" Few questions are more common than this, and yet each day the United States government goes to a great expense in giving it an official answer. To ascertain the instant when it is noon on the seventy-sixth meridian, the standard time, is a task of no small importance. The astronomical observatory in Washington computes the true time, which is then transmitted by electricity to every important city and town.

About five minutes before the Washington all the telegraph companies cut off all their regular business except on lines where there were more than one line, and then the time is transmitted by electricity to every important city and town. About five minutes before the Washington all the telegraph companies cut off all their regular business except on lines where there were more than one line, and then the time is transmitted by electricity to every important city and town.

M. H. Truman to Elsie S. Truman—Lots 21, 22, and 23, block B, W. W. Martin's addition to Tustin; \$1.
B. F. Draper and Mollie Draper, his wife, to Joseph W. Baker—24 of SE 1/4 of NW 1/4 of Sec. 8-4-11; \$1000.
Santa Ana Cemetery Co. to A. H. Lawrence—W 1/2 lot 1, block 6, Sec. 7, Santa Ana cemetery; \$25.
M. A. Baker and Lena M. Baker, his wife, to John T. Smith—S 1/4 of NW 1/4 of NE 1/4 of Sec. 21-5-10, 20 acres; \$650.
R. E. Hewitt et al., by Sheriff, to Charles C. Campbell—10 acres in lot 1, block D, Grey tract; \$912.15.
H. L. Chandler and V. A. Chandler, his wife, to Frank H. Hollister—E 1/2 of lot 7, Travis tract; \$10.
John P. Hutchins, Administrator, to John H. Mitchell—Lots 9 and 10, block 1, Baldwin's addition to Santa Ana; \$150.
Frank Fry and Altha M. Fry, his wife, to John H. Mitchell—Lots 9 and 10, block 1, Baldwin's addition to Santa Ana; \$150.

SHERWOOD TALKS ABOUT AN INJUNCTION

Threatens One in That Right of Way Matter, Until Stockholders Can Get Acquainted With It.

EDITOR GAZETTE.—Now that Armur has passed judgment on my intellectual and moral attainments, and has me ostracized, anatomized, criticized, riven, wickerized, paralyzed, etc., etc., we will consider the matter settled for the present, and pass on to matters of interest to the people at large. Mr. Lippincott, too, is probably able to take care of himself in case he ever hears of the matter. My only interest in the matter is akin to that feeling which prompts a man to kick a cur that is always snarling at the heels of every one that does not please him.

So Armur does not know what "passed up" means. He surely ought to for that is "What happened to Armur" at the last supervisory election.

I am very glad to hear that Armur articles on the water question and things in general exhausted the editors of the Post as well as the Gazette. But I wish he would tell us if he thinks it was proper to utilize the information acquired by our engineers and lawyers to further his private interests. Perhaps, though, he did not give up more information than I really must read them) he does in his articles in the GAZETTE. In which case I apologize profusely in advance.

I feared that no one had ever mentioned that matter of the right of way. That was exactly why I brought it up. In fact I would like to have the whole matter discussed, for during the trial I have been a director of the U. W. I have only been able to catch a single glimpse of the elusive thing, and that was not his fault. I may not vote to give Armur our right of way, but I can tell him what I will do. If he attempts to force this thing through secretly, and with no opposition, discussion, as was done in the Durkee deal, I will see that he is presented with one of the latest styles of injunctions, that will hold him level, until the stockholders have a look at it. Some of us have had enough of that way of doing business.

Armur appears to have slipped his trail on the Interurban R. R., and run off the track. I do wish, however, that he could find time to tell us why he never discovered that artesian basin on Chino creek, capable of producing 1500 inches of water in 90 days (at \$500 per inch). I suppose, though, he would prefer to discuss other people's shortcomings.

If he has any space left he would be only too glad to hear again the story of the great \$100,000 Newberry checkmate.

I understand that the open season for proxies is again approaching in the regions south of the city. Please Armur can tell us how the game is looking, and what the prospects are for a good bag. I have a suspicion that he is trying to use me for a decoy. Some one was telling me the other day that Armur has only a nominal interest in his company, one or two shares or something like that; and that his activity in water matters is prompted by a spirit of philanthropy. However, that may be I hope he will "fish, cut bait, or go ashore," for the weather is warm. Respectfully yours,

G. W. SHERWOOD.

Bloomer Girls.

Oh see the Bloomer Girls! Did you see the Bloomer Girl fall on Frank Dyer, as she put him out between first and second?

Did you see the Bloomer Girl fall out the boys and throw them out while napping at first?

Some people say it was the greatest game of ball ever played in Anaheim. Score, 6 to 5 in favor of the Girls. The Anaheim boys were too glib to think of defeating them.

Joe Backs wore his best smile as he stepped into the pitcher's box. He had the girls hypnotized by that smile from that start.

"If you hit my face it will stop," said one of the girls, as she ducked an in-shoot.

The home team was composed of Joe Wagner, Welborn Wallop, Nick Hugo, Joe Backs, Bob Rimpau, Frank Dyer, Murray Paschall, Bob Mills and Steve Hignup.

Among the names of the Bloomer Girls was Carrie Nation, who played left field. She did not bring her hatchet along.

Attendance, 300, with about half as many kids in the surrounding tree tops.

GOES TO JAIL.

Joe Lopez (accent on second syllable, according to the able District Attorney) languishes in the County Jail as a result of inability to raise \$300 bail imposed by Judge Shanley for rolling a drunk. Lopez robbed one Cooper of Clair, who was asleep in rear of Conrad's saloon. He secured several dollars, as well as other articles of value; but when he tugged at his victim's watch chain, the latter awoke and chased him. Lopez succeeded in eluding his pursuer, and early next morning showed up in the best-dressed of Los Alamitos, where he went to work (Lopez boasts). This is said to be the first work attempted by him in a long time. He was arrested and brought back to town. The stolen property having been in part returned by his brother, and this being his first offense, Lopez was given a chance to plead guilty to petty larceny. This, he refused to do. He secured counsel and resisted a charge of grand larceny. District Attorney Williams (who could not pronounce his name) went after him, and had no difficulty in holding him to appear before the higher court. Lopez is good for a couple of years or so in San Quentin.

No Rain.

Monday afternoon was considerably like a winter's day. The sky was overcast with clouds and a warm breeze blew up from the southeast. It looked and felt like rain. The weather bureau predicted showers. But no rain fell. One old-timer said he saw the time when it rained here on the Fourth of July.

High School.

Contractors McWilliams and Dunn have a force of ten mechanics upon the new high school building. The flooring is laid, and the studding is in place. Work upon the exterior will begin this week, at the completion of which the force will go upon the roof.

CONRAD'S BREWERY SOLD AGAIN?

Brewmaster of the San Diego Brewery Looked Over the Works with a View to Buying.

Rumors have been current for a day or two past that Conrad's brewery is about to pass into the control of new owners. It was common rumor yesterday afternoon that the transfer was likely to be consummated any day this week.

Charles Kressman, brewmaster of the San Diego brewery, is the man who is supposed to be at the head of the new syndicate anxious to erect a brewery in Anaheim. He was in town a day or two ago, and looked over the brewery with a view to reporting to his associates relative to the purchase of the property.

Associated with Kressman is Colonel Ganahl, a St. Louis capitalist, who is desirous of erecting a brewery either at Anaheim or San Bernardino. After Kressman looked over Conrad's brewery, he reported that it would require at least \$18,000 to put it in good repair.

The floors are rotten, and the upright wooden beams should, he reported, be replaced by iron supports.

The ice machine is out of date and in need of repair.

Kressman is the brewer who has made the reputation of the San Diego brewery, and before taking hold of Conrad's brewery insists on new machinery and thorough repairs from one end to the other.

It is known the brewery is, and has for years past been for sale. Conrad has lost his trade in this city, as well as in Los Angeles and elsewhere. Out of nine saloons within the corporate limits of this city, five handle other beers, and they do the bulk of the trade.

One is located at the brewery, and another is owned by Conrad up town. He bought it out some weeks ago, when other parties were after it with a view to putting in Eastern beer. Of the other two saloons handling his beer, one is in imminent peril of becoming away from him for various well-known reasons, one of them being that Conrad sells "schmoons" for a nickel at his saloon, whereas other places have to retail theirs at a dime.

Conrad once supplied every saloon in town with beer. Owing to deterioration and other circumstances, his customers gradually fell away from him until he now has but a small part of his former trade. Most of the beer sold in town is of outside manufacture. Some months ago Baron Kuhnrich of the East Side brewery of Los Angeles had a notion of buying the outfit, but after looking it over concluded it was only fit for a man's house, and made an offer for it as such. The trade fell through.

The brewery, once a scene of activity, has fallen away in its business until now beer is brewed only once a week.

Kressman has been assured by the retailers, so it was said yesterday, that they would patronize him if he produced beer equal to the San Diego brew, which is acknowledged to be the equal of any brewed in the United States. If he should turn out such beer there is no doubt he would speedily regain the trade of every retailer in town.

Kressman and Ganahl were yesterday in San Bernardino. The San Diego brewery ships two carloads of beer to San Bernardino weekly. Each car contains 80 barrels, so the San Bernardino people consume 160 barrels, or 320 halves, every week. Anaheim doesn't do as well as that, but there was more than \$1000 worth of beer sold here on the Fourth. Anaheim sends to Los Angeles \$600 for beer monthly.

Kressman and Ganahl were yesterday in Anaheim in a day or two, when it will be finally determined whether Conrad's brewery will be bought by them. It is known they are favorably impressed with Anaheim, and if a purchase is not made, there may be a possibility of their erecting a new brewery here.

Back From the East.

A. S. Bradford returned last week from his trip East, during which time he visited the Pan-American Exposition at Buffalo, as well as the cities of New York, Boston and other points of interest. At Buffalo he found it necessary to procure spectacles, which he now wears. At Boston he lost a hand-satchel containing numerous articles of value. He was in a street car, and missed the satchel when he alighted. The happy couple will leave on the evening train for Los Angeles, where they will make their future home.

Marriage.

Miss Mabel C. Middleham, daughter of Mr. and Mrs. W. F. Middleham of this city, will be married on Sunday afternoon at 2 o'clock to Albert Waldo Brown of Fullerton. Only the families of the high contracting parties will be present. The officiating clergyman will be Dr. J. M. Roberts, the bride's grandfather, of Los Angeles. The happy couple will leave on the evening train for Los Angeles, where they will make their future home.

Peaches.

Peter Weisel has a force of 300 hands at work at the canning upon peaches, several carloads having arrived from Fresno county. Peaches hereabout are turning out better than was expected earlier in the season, and a fair crop is expected. Four hundred hands can find employment at the cannery.

Victor Montgomery of Santa Ana

has brought suit in the Superior Court against Julius Broussau, of Los Angeles, who has been his partner in the practice of the law. The complaint alleges that Broussau has collected \$2300 in fees due the firm, and appropriated the money to his own use. Court is asked to dissolve the partnership, appoint a receiver and restrain Broussau from interfering with the debts, money, property or effects of the copartnership.

What a Tale It Tells.

If that mirror of yours shows a wretched, sallow complexion, a jaundiced look, mottled patches and blotches on the skin, it's liver trouble; but Dr. King's New Life Pills regulate the liver, purify the blood, give clear skin, rosy cheeks, rich complexion. Only 25c at all druggists.

PROF. PIERCE ON LOSS OF GRAPEVINES

Conditions of Santa Clara County Vineyards Far More Serious than Was Anticipated.

Newton B. Pierce, pathologist in charge of the Pacific Coast laboratory, at Santa Ana, has prepared an article upon Santa Clara county vines, which he finds in serious condition, due to several causes. We quote from his observations as follows:

For upward of two years letters of inquiry have been received at the Pacific Coast laboratory from leading vine-growers relative to the loss of vines in the Santa Clara valley. Considerable numbers of vines have been falling, apparently independent of the action of phylloxera, and many have died. The present season has shown a great increase of this trouble, and many requests have come to hand for a personal examination of the conditions as they now exist. In view of this general interest and widely expressed desire, a preliminary examination of the vineyards was made during the latter part of June. The condition of the vineyards was found to be far more serious than was anticipated, many thousands of acres of vines presenting a short growth and large numbers of vines dead and rapidly dying.

The cause responsible for the present condition of these vineyards are several: (1) The region has suffered from three years of drought; (2) phylloxera is found more or less generally distributed in portions of the affected district; (3) two successive frosts have injured the young growth this year, and resulted in a late growth or an entire absence of growth; and (4) some unknown influence has resulted in an injury to large numbers of vines over a wide area and in a manner strongly reminding one of the effects of the California vine disease. That drought is not alone responsible for the serious condition of the vineyards is evident from the fact that vines which were irrigated during the past dry seasons are also suffering, and from the further fact that vines which had done fairly well during the three dry years, but which are at present in a deplorable condition. Phylloxera is likewise not responsible for the new and general phenomena of disease observed, as large tracts of vines not infested by this insect are suffering seriously. The third influence, frost, has produced marked effects, which will not be wholly overcome before fall, and in some instances may account for the death of certain stocks. The cold of the past spring cannot, however, be properly held responsible for all of the trouble seen, as some of the vineyards were seriously affected last year.

Whether the undetermined injurious influence noted in these vineyards is the same as that which has destroyed tens of thousands of acres of vines in Southern California and thousands of acres in the upper Sacramento valley, the California vine disease has been found a difficult matter to settle at this time. The two main reasons for this are: First, the cause of the California vine disease is unknown; second, there are so many injurious influences at work at present in the vineyards of the Santa Clara valley that the effects arising from any one cause are obscured, and confused with those due to other entirely different influences.

Owing to these facts the writer will not express an opinion at this time as to the presence or absence of the California vine disease in that district, but will make an effort to again carefully review the situation at the time of vintage, during which period the characters of the named malady are best recognized. It is hoped that by that time the action of frost and of dry seasons will have been largely overcome, so that the effects of any permanent influence, such as phylloxera or the California vine disease, will stand out more distinctly and admit of more certain diagnosis. In this connection it may be well to suggest that all affected vines be left at least until next winter before removal, as many vines injured by frost will undoubtedly improve and produce good crops during the present summer.

Although it is unsafe to pass upon the nature or identity of certain inducing phenomena affecting the Santa Clara vineyards, certain observations have already been made which it is thought may properly be recorded at this time, and which may point a way out of the present serious situation. It has been widely observed that many old Mission vineyards are rapidly dying throughout the Santa Clara valley in advance of many other varieties. This is in harmony with the past action of the California vine disease in the vineyards of Southern California and at Vina, in the Sacramento valley. A close second to the Mission vine is the Maturo, a variety widely grown in the Santa Clara valley. The marked susceptibility of this variety to the present trouble has already been generally noted by the growers of the region affected. In spite of the fact that the Maturo is one of our roots it has been carefully noted that this variety when grown on the Rupestris St. George root is doing well. Mr. Paul Mason, of San Jose, first called my attention to this exceedingly significant fact. At the suggestion of this gentleman I visited and carefully inspected the Lefranc vineyard south of San Jose. In this vineyard, as noted elsewhere throughout the valley, the Maturo variety appears to be rapidly dying where growing on its own roots. On the same place, however, is a block of Maturo vines grafted on Rupestris St. George roots, which vines have made a fine growth, are the picture of health and have set a fair crop of grapes. These Maturo tops are four years old and the Rupestris St. George roots are six years old. The roots were grafted in nursery when two years old, left in nursery one year longer and then set in vineyard, hence the vines are now three years in vineyard.

We have here a case where the tender Maturo variety has lived through the much discussed influence of the three dry years just passed, through the action of phylloxera and frost, besides having withstood the other wide-spread and destructive influence, the effects of which are so observable among the Maturo vines on their own roots. While it is well to continue our

Water Increases.

Secretary Krick reports a largely increased volume of water on the north side, so much so that the Tuffee reservoir is hardly able to hold the stream which empties into it at night. Zanero Brunworth of the city system has been notified that beginning last night (Wednesday) he will be given an increased stream. The cause of the increase is rain which has fallen in the foothills up the river, as well as cloudy weather which has prevailed of mornings for some time past. The increase is very acceptable to irrigators and orchardists from one end of the district to the other.

Incorporation.

Articles of incorporation have been filed in the county clerk's office by the Santa Ana and Long Beach railway, capitalized at \$250,000. The directors are S. H. Finley, C. F. Mansur and Dr. T. Clark of Santa Ana; P. C. Sturges of Redlands; and P. C. Sturges of Los Angeles. The company proposes to build a standard-gauge railroad between Santa Ana and Long Beach, a distance of 25 miles, and have the road ready for hauling freight in time for next year's celery crop.

The Queen Shoe.

The Queen Shoe is the greatest piece of footwear for the money in the country. It makes the foot look small and neat, and is for sale at Chas. Federman's.

SENATOR CLARK'S GREAT ENTERPRISE

Work Soon to Begin on the Salt Lake Railway—Fleet of Ships for San Pedro and the Orient.

United States Senator W. A. Clark, accompanied by his brother, J. Ross Clark, passed through this city on Monday morning, on his way to Los Alamitos, to pay his first visit to his sugar factory at that point.

Sensor Clark is in California for the purpose of conferring with his associates relative to the early beginning of work upon the Salt Lake railroad.

Sensor Clark has no hesitancy in saying that his railroad enterprise is progressing as favorably as could be expected. He reiterated that the San Pedro, Los Angeles & Salt Lake railroad is to be built, and the work of construction will be pushed as fast as it can be done.

"Despite all reports to the contrary," said the Senator, "we are to build our railroad between Salt Lake and Los Angeles. It will be about 770 miles long. So far we are paying cash for the work. A bond issue may come later on. A considerable work is in progress. In Nevada 300 men are grading 60 miles of roadbed in the district known as the Meadow Valley wash. This is some forty miles west of the Utah line. The 60 miles being graded ran almost south toward the California line.

"Three surveying parties are at work in Utah. One party is surveying in the Tintic district, near Bolter summit. The two other parties are running a line out from Salt Lake by the way of Garfield Beach, Stockton and the Rush valley, in Toiyabe county.

"In California we will soon have surveys made through the Cajon and Morongo passes. The latter pass is north-east of Redlands. Cajon pass is north of San Bernardino, and the Santa Fe already has a road through it. We are about ready to begin building out from Los Angeles to Redlands. The rails have been ordered, and, excepting in spots, the right of way has been secured. We hope soon to close condemnation suits for the remainder of the right of way. On the road already built between Los Angeles and San Pedro 75-pound rails have been put down.

"The plan of Mr. Harriman to extend the Oregon Short line from Salt Lake to Los Angeles does not in any way hamper us. Once our line is completed we will have no fear of not getting an Eastern outlet at Salt Lake. Our road will develop a great volume of local traffic, because it will penetrate local mining sections of Utah, Nevada and this State."

SALT LAKE, Utah, July 27.—The Herald tomorrow will say: The San Pedro road is not to stop at the San Pedro harbor. By the time the last spike has been driven a fleet of ocean liners will be flying the flag of the Hawaiian Island Navigation company as an adjunct to the road. These steamers will ply between San Pedro harbor, Honolulu, Yokohama, China and the Philippines, and a controlling interest in the stock will be owned by several of the steamers already there. The line will control the San Pedro, Los Angeles & Salt Lake railroad.

R. C. Kereens of St. Louis, who reached Salt Lake from California yesterday, said that the company was now being formed.

"Many details yet remain to be perfected," said Mr. Kereens, "but the steamship line is a certainty. There are to be ten large steamers for passenger and freight traffic, and they will be second to none in the Oriental trade."

"The steamers will work in conjunction with the road and be practically a part of the same corporation. We have several of the steamers already there. They are in the transport service at present, but by the time we need them for our service the carrying of goods will be about completed."

TROUT.

J. E. Vaughn of Santa Ana has received word from W. H. Shibley, superintendent of the distribution of rainbow trout in this State, that the consignment of 25,000 trout for Orange county will be here August 1. The fish will be delivered at El Toro on the south-bound Santa Fe train. Wagons, suitably arranged, will be at the depot to meet the train, and the fish will be hurried to the mountain streams.

Oscar Heald is over from Pasadena

attending to various business interests. His place at West Anaheim is in charge of his son Leslie. He resides with his family at Pasadena, where his son Burton attends Throop college.

Mr. Heald is administrator of the Swope estate and is of opinion the property belonging to the estate will soon be sold.

Mr. and Mrs. Peter Syre celebrated their wedding on Monday, and were remembered by their friends of the Turner society, who called to wish them many happy returns of the day and to present them with suitable gifts.

Mr. Henry Strodtfog who has been visiting her mother, Mrs. Fay, for some weeks past, departed on Tuesday for her home in Jerome, A. T., accompanied by Miss Adella Strodtfog.

Mrs. C. Hylmer and her son Louis,

of San Francisco, are visiting friends in town after an absence of some years. They are guests at the Commercial.

Rud Bents who has been in bed six weeks with typhoid pneumonia is convalescing, and will doubtless soon be able to be about.

John Danson and Stephen Rimpau

leave for Berkeley shortly to enter the University.

Dr. Hill was over from Santa Ana

Tuesday afternoon on a brief business mission.

PERSONAL MENTION.

Judge Langley was over from Santa Ana on Monday afternoon.

Pat Seale and Oscar Renner are rustling at the Landing.

Peter Weisel, Esq., departed some days ago for the East and Europe.

Frederick Middleham is lending a helping hand at Federman's during the midsummer rush.

Doc Hansen is home from San Francisco visiting his folks on Orange-blossom avenue.

City Attorney Chynoweth was down from Los Angeles on Tuesday attending to legal business.

Walter Crowther is looked for to arrive today from his trip to the Pan-American and other points East.

Miss Addie Wallop is visiting friends at Capistrano, and will renew acquaintances at San Diego before returning.

Mrs. Thorp is here from San Francisco, visiting her parents, Mr. and Mrs. Jno. Hanna of Miraflores. She is accompanied by her young son.

Charley Allgeyer was in from Brookhurst yesterday. He reports the walnut and other crops looking well. Nut trees promise a large yield.

Mrs. Robinson who has been ill with diphtheria at the Del Campo is recovering. The attack was a light one, and she will probably soon be about again.

Ernest Kossert is spending a few weeks in Strawberry Valley, where he finds his health is improving. Theo. Deidrich, who went to the valley with him, has returned.

Arthur Lewis and family are spending a couple of weeks at the valley. During his absence his place as city electrical engineer is being filled by his brother Fred.

Col. R. J. Northam and bride passed through town on Monday morning. The Southern Pacific passenger from the north, on their way to the Colonel's country seat at Los Bolinas.

John Everhart was in town yesterday with a party of oil men, having returned late the previous evening from the oil territory at Horseshoe Bend. He expects to begin drilling operations shortly.

Max Jacobson has returned to his home in Santa Ana from Colusa, where he recently went to visit his mother, who has just arrived from Germany, and whom he had not seen in fifteen years.

Welborn Wallop leaves next week for Berkeley to enter the University. His brother William, who graduated from the Polytechnic School, is now the bookkeeper for one of the most prominent firms in Oakland.

W. T. Turner of this city will be married today at Pasadena to Miss Edna Young of that city. The newly married couple will arrive this evening and will go to house-keeping in the Derge cottage on Broadway.

Guy Duckworth, son of Postmaster Duckworth of Los Angeles, who graduated last year from the State Normal school at Los Angeles, has been appointed principal of Bolca school. He is at present engaged in weighing boats at Los Angeles for the Chino sugar factory.

J. B. Heatus of Los Angeles was in town in company of Isaac Lyon on Monday. Mr. Heatus represents M. Levy, who has been in business in Los Angeles since 1854. The old man is 82 years old, and has a record of never having paid more than 100 cents on the dollar. So Beatus says. Good for Levy.

Miss Rose Davis of San Francisco visited in Anaheim one day last week. She was the guest of Mrs. Koenig. She has been spending several weeks with relatives and friends in Los Angeles and Santa Ana, and came to Anaheim to meet with old friends.

Lloyd Bailey is expected to arrive next week from Mazatlan. He has arrived in San Francisco, where he is attending to business matters. He will probably be accompanied by his brother, Neill E. Bailey. Both will remain in town a couple of days visiting relatives and friends, and will then proceed to Phoenix, A. T., to pay a short visit to their parents.

B. Pittman of the Southern Pacific was in town between trains on Monday morning, arriving at the north on the S. P. and continuing on his way south on the Santa Fe a half hour later. "Do you travel on the Santa Fe too?" he was asked.

"Oh, yes, I do like to take those chances; but sometimes I have to." And he caught an electric car for the depot.

E. J. Barrett has been enjoying a lay-off during the week, the Rincon Oil company having abandoned its well up the canyon and pulled up the casing. The hole was drilled to a depth of 1,500 feet, and at one time indications seemed to be favorable for a good strike. Mr. Barrett will probably soon get into the harness again.

Rev. Kohlenberger informs us the newspaper social given by the Methodist church at the residence of Mr. Schumacher on Friday evening was thoroughly enjoyable in every respect. John Eymann acted as editor in chief, and presided over the deliberations of the evening. Mrs. Eymann, attired in a costume made of newspaper, was introduced as the editor's assistant. Members of the church submitted essays upon the art of making newspapers, and Rev. Kohlenberger presided over the original poem. Refreshments were served, and it was after midnight when the party dispersed.

MONEY

can be borrowed on more favorable terms from the SAVINGS, LOAN AND BUILDING ASSOCIATION OF ANAHEIM than from any similar institution in the State.

A Home Institution... conducted by home men. If you want to borrow money at a low rate to pay off your present mortgage, or to build a new home, or to improve your present one, address or call on

Fred A. Backs, Jr., Secretary, Anaheim.
