PRODUCTION OF MINERALS BY COUNTIES

Report of the State Mineralogist Showing Yield of Precious Metals—What Counties of South Produced

State Mineralogist Lewis E. Aubury reports the yield and value of the mineral substances of California for 1901 as follows, as per returns received at the state mining bureau, San Francisco, in answer to inquiries sent to producers:

Antimony..	50 tons	$8,350
Asbestos....	110 tons	4,400
Asphalt.....	21,364 tons	312,219
Bituminous r	24,052 tons	66,354
Borax (crude and refined	22,221 tons	982,380
Cement.....	71,800 tons	159,842
Chrome.....	130 tons	1,950
Brick.....	130,766 M	860,488
Pottery.....	55,679 tons	39,144
Coal.....	150,724 tons	401,772
Copper.....	34,931,785 lbs	5,501,782
Fullers e'th	1,000 tons	19,500
Glass sand..	4,500 tons	15,750
Gold.....		16,989,044
Granite....	214,943 cu. ft.	519,285
Graphite....	64 tons	4,480
Gypsum.....	3,875 tons	38,750
Lead.....	720,500 tons	28,820
Lithia Mica .	1,100 tons	27,500
Lime.....	317,383 bbls	334,688
Limestone..	76,937 tons	99,445
Macadam..	360,883 tons	313,974
Manganese.	425 tons	4,405
Magnesite..	4,726 tons	43,057
Marble....	2,945 cu. ft	4,630
Mineral pt	325 tons	875
" water	1,555,328 gals	559,057
Natural gas		92,034
Paving blks	1,920 M	41,075
Petroleum..	7,710,315 bbls	2,961,102
Platinum ...	250 ozs	3,200
Pyrites.....	4,578 tons	18,429
Quartz sand	500 tons	500
" crystals	4,000 lbs	17,500
Quicksilver	26,720 flasks	1,285,014
Rubble.....	169,513 tons	327,063
Salt.....	126,218 tons	366,376
Sandstone ..	226,741 cu. ft.	192,132
Serpentine.	89 cu. ft.	890
Soda.....	8,000 tons	400
Silver.....		1,229,356
Slate.....	5,100 squares	38,250
Soapstone...	10 tons	119
Tourmaline	500 lbs	20,000
Turquoise...	500 lbs	20,000
Total.....		$34,355 981

In the previous year the product was valued at $32,622,945, so that the increase for 1901 is $1,733,036.

The total value of metallic substances for 1901 was $25,052,796, an increase of $1,294,066. This includes gold, silver, mineral paint, quicksilver, antimony, copper, lead, manganese, platinum and chrome. Silver is given in coining value. The bureau has never independently collected statistics of precious metal output, but has used totals and distribution by county, as obtained at the U. S. mint, San Francisco, where they have the advantage of verification by figures of receipts at U. S. mint and assay offices, and private refineries and smelters throughout the United States.

The total value of non-metallic substances was $6,923,201; an increase of $746,044. This includes borax, coal, mineral waters, salt, asbestos, gypsum, magnesite, pyrites, lithia-mica, fullers earth, quartz crystals, soda, tourmaline and turquoise.

The total value of hydro-carbons and gasses was $3,432,709, a decrease of $1,080,242, including asphalt, bituminous rock, natural gas and petroleum. The gas is given in value of that commercially utilized. The petroleum price is the average per barrel f. o. b. at the wells or stations in each county. The decrease is due to the low prices for oil prevailing last year. The product was much larger, but prices much lower than previous year.

The total value of structural materials was $2,947,275, an increase of $373,202. This includes brick and pottery clays, hydraulic cement, lime and limestone, macadam, rubble and concrete rock, paving blocks, marble, granite, sandstone, serpentine, slate, quartz sand and glass sand.

The relative value of the principal mineral products of the state is as follows: 1st, gold; 2d, copper; 3d, petroleum; 4th, quicksilver; 5th, silver; 6th, borax.

The relative rank of the counties of the state, in point of mineral production, is given in the following table. In each case the value given includes that of all the mineral substances combined produced in the respective counties for the year. Some counties produce in addition to gold and silver, five, six or seven other substances, while other counties which produce little or no gold or silver, produce in large quantities, quicksilver, mineral oils, copper, lead, asphalt, structural materials, etc. The figures include aggregate value of all mineral products, including precious metals. These latter are based, as stated, upon U. S. mint returns for the year. The term "unapportioned" includes total value of such substances as are grouped to avoid disclosing private business, as in the case of single operations in a single county. In the large and complete table just published in Bulletin No. 25 by the State Mining bureau, from which these figures are taken, the amount and value of each substance in the respective counties is set forth. It is therefore necessary in some cases to place the figures in the "unapportioned" column.

RELATIVE RANK OF COUNTIES.

1.	Shasta	$6,737,571
2.	Kern	2,423,918
3.	Calaveras	2,355,372
4.	Nevada	2,145,840
5.	Amador	1,888,191
6.	San Bernardino	1,844,239
7.	Tuolumne	1,710,171
8.	Los Angeles	1,642,591
9.	Siskiyou	1,067,451
10.	Placer	1,025,184
11.	Butte	879,767
12.	Alameda	786,366
13.	Trinity	752,280
14.	Inyo	668,618
15.	Sierra	576,182
16.	Mariposa	542,975
17.	Mono	522,911
18.	Napa	516,388
19.	San Diego	514,522
20.	Fresno	480,696
21.	Santa Clara	421,150
22.	Plumas	403,832
23.	Madera	400,825
24.	Ventura	350,570

43.	Monterey	50,169
44.	Stanislaus	29,169
45.	Alpine	27,747
46.	San Mateo	15,725
47.	Solano	12,600
48.	Merced	12,453
49.	Mendocino	10,720
50.	Del Norte	10,612
51.	Lassen	6,100
52.	Tehama	6,000
53.	Kings	5,000
54.	Yolo	2,300
55.	Unapportioned	23,280
Total		$34,355,981

All the asbestos produced in California in 1901 was in Riverside county, and all the antimony from Kern county. Asphalt was produced in the counties of Kern, Los Angeles, San Luis Obispo, San Mateo, Santa Clara, Santa Barbara and Ventura. Quite a quantity was derived from the refining of petroleum. Bituminous rock was quarried in San Benito, San Luis Obispo and Santa Cruz counties. The borax was produced in Inyo, San Bernardino and Ventura counties. Brick clays were utilized in the counties of Alameda, Amador, Butte, Colusa, Fresno, Humboldt, Kern, Inyo, Los Angeles, Riverside, Madera, Marin, Mendocino, Sacramento, San Bernardino, San Diego, San Luis Obispo, San Mateo, Santa Barbara, Santa Clara, Shasta, Sonoma, Ventura counties. Clay for pottery, etc., came from Amador, Los Angeles, Placer, Riverside and Santa Cruz. The hydraulic cement all came from San Bernardino county, and all the chrome from Shasta.

Coal was mined in Amador, Alameda, Contra Costa, Monterey, Orange and Riverside counties. Copper was produced in the counties of Alameda, Alpine, Amador, Calavaras, Fresno, Inyo, Kern, Mariposa, Madera, Merced, Mono, Nevada, Placer, San Bernardino, Sacramento, Shasta, Stanislaus and Trinity. While only eight counties produced copper in 1890, 18 counties made a product of that material last year, showing the growth of this industry.

All the fullers earth comes from Kern, and all the glass sand from Monterey county. Gold was mined in 35 counties of the state and silver was produced in 26 counties. Granite was quarried for building purposes, curbing, etc., in the counties of Madera, Placer, Riverside, Sacramento, San Bernardino, San Diego, Shasta, Trinity and Tulare. Graphite was only mined in Sonoma county.

Gypsum was derived from the counties of Orange, Riverside and Los Angeles. Lithia-micas from San Diego, and lead from Inyo, Kern, Mariposa, Mono, San Bernardino and Tuolumne.

Lime was quarried and burned in the counties of Butte, El Dorado, Kern, Mono, Riverside, San Bernardino, Santa Cruz, Shasta and Solano; and limestone was quarried for beet sugar factories, fluxing, paving, etc., in Monterey, Napa, San Bernardino, Santa Cruz and Solano. Macadam was quarried in the counties of Alameda, Los Angeles, Marin, Monterey, Sacramento, San Benito, San Bernardino, San Francisco, San Mateo, Santa Clara, Solano and Sonoma.

Manganese came mainly from Alameda, with a small quantity from Plumas. Magnesite was mined in Alameda, Napa, Stanislaus, Sonoma, Santa Clara and Tulare counties. All the marble quarried was from Amador county, and all the mineral paint from Calaveras and Stanislaus counties.

Mineral waters were bottled and sold from springs in the counties of Butte, Colusa, Contra Costa, Fresno, Humboldt, Lake, Mendocino, Monterey, Napa, Santa Barbara, San Benito, San Luis Obispo, Santa Clara, Shasta, Siskiyou, Solano, Sonoma and Tehama.

Natural gas was commercially utilized in Los Angeles, Santa Barbara, San Joaquin and Sacramento counties. Paving blocks were quarried and made in San Bernardino, Solano and Sonoma counties.

Petroleum was derived from the counties of Fresno, Kern, Los Angeles, Orange, Santa Barbara and Ventura. Platinum was found in small quantities in several counties, the most of it in Trinity. Pyrites came from Alameda and Nevada counties; quartz crystals from Calavaras; and quartz from Riverside.

Quicksilver was produced in the counties of Colusa, Lake, Napa, San Benito, San Luis Obispo, Santa Clara, Shasta, Sonoma and Trinity. Rubble was quarried in Alameda, Madera, Marin, Los Angeles, Monterey, Placer, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, Santa Barbara and Ventura.

Salt came from Alameda, Colusa, Los Angeles, Riverside, San Mateo and San Diego counties. Sandstone was quarried in Colusa, Santa Barbara, Santa Clara, Ventura and Yolo counties. The serpentine all came from Los Angeles county; the soda from Inyo; slate from El Dorado; soapstone from Los Angeles; tourmaline from San Diego; and turquoise from San Bernardino county.

As far as the "banner" counties are concerned in the different mineral products, the following is the record for 1901, with the values of material for the county named:

Alameda leads in coal ($262,272), manganese ($423), pyrites ($18,000) and salt ($321,136). Amador leads in marble ($4,630); Calaveras in quartz crystals ($17,500); Colusa in sandstone ($80,032) and El Dorado in slate ($38,250). Inyo leads in lead ($24,040) and soda ($400,000). Kern leads in antimony ($8,350), fuller's earth ($19,500) and petroleum ($1,131,616). Los Angeles leads in brick clays ($264,825), gypsum ($35,500), serpentine ($890) and soapstone (119). Monterey leads in glass sand

Continued on Fourth page.

ARTFUL DODGER SHERWOOD IN HIS INFINITE VARIETY

Would Like to Be Tracy, Would Like to Be County Surveyor, Would Like to Build the Reservoir—Will Probably Get It in the Neck

Mr. Bronco Sherwood rushes into print again, in the columns of the esteemed Fullerton Bunghole. Bronco is the hombre who, as president of the Anaheim Union Water company, some weeks ago accused the irrigators of the Santa Ana Valley Irrigation company with appropriating more than their share of the water in the river, after an equitable division had been made. He advised that a measuring wier be placed in the other fellows' ditch. When they demurred, he talked about shotguns and things, having a pronounced speck of blood in his eye. Now he wants to be Tracy; presumably to fall afoul of Bro. Armor some dark night and compel him to shave him, at the point of his horse pistol. Bronco is eager to build the Yorba reservoir, now that he has got Kellogg out of the way, and seems to consider himself as in a fair way to fall legatee to the emoluments of the engineer's office in charge of the job. In this the stockholders, to whom he refers so feelingly, will probably, instead of complying with his request, impart to him an extremely close shave, without the persuasive powers of the horse pistol aforesaid. Bronco also wants to be county surveyor. Instead of this, the voters, who are familiar with his devious course upon the reservoir, will give him a Salt river shampoo, with an appropriate curl to his whiskers, so they might know him when they see him again. And Bronco wants, evidently, to be "retained in control" of water affairs. In this he will probably get a shower bath, with an accompanying rub-down after the performance. His letter to our esteemed contemporary, the Bungless Orifice, is to the following effect:

"I have perused the last two issues of the ANAHEIM GAZETTE and noted the unkind remarks showered upon my devoted head, and also the faint echo from far across the sandwash. Whether or not I would like to 'lift the topnot' of the esteemed E. G., there is no doubt in the world what he is after. Has the campaign opened? Armor states that he has had 'assurances' that Sherwood will not be in 'control' of the board next year. Kellogg threatens a director that he will 'get it' where the chicken got the axe, and that the next issue will be Kellogg and anti-Kellogg; and now the E. G. comes sailing down the wind on the same tack. The spectacle of this formidable triumvirate advancing in close order, preceded by my good friend—— bearing aloft several unsigned petitions as a banner, and followed by the flurried cohorts of West Anaheim, is enough to strike terror to the stoutest stomach. Would that I could change places with Tracy! But there is a slight hope that the stockholders may have something to say in the matter, and not leave the matter of 'control' entirely to outsiders. I would humbly suggest, moreover, to the E. G. that if he begins too soon his ammunition is likely to get out of date, in these swift times, before the battle really begins. Some of it shows signs of decay already.

"'We do not impugn their motives—we say they are good men led astray by the man they have blindly followed in considering this all-important matter' [the reservoir]. I quote the E. G.'s left-handed apology to the Anaheim directors. A motion will be entertained that he be given further time to put the matter in better shape.

"The fact that I have been doing the small amount of engineering necessary at a nominal expense to the company, instead of employing some one from abroad, who would spend half his time coming and going and charge expenses and $8 or $10 per diem, seems to weigh heavily on the editor's mind; or, is it possible—have we been blind—have we in our midst a nachul bawn' engineer? And is it the aim of those masterly editorial dissertations on the Yorba reservoir to call attention to this fact? This must be investigated. What need of employing expensive consulting engineers from abroad when we have in our midst one who can tell us just what ought to be done without ever having seen the site; and for nothing, too. I hereby give notice that I file discovery claim No. 1 on this mine of knowledge, and will begin my assessment work by asking him how he figures out that the water impounded in the Yorba reservoir would cost only $80 per inch. G. W. SHERWOOD."

Marriage

Miss Arline Hawley and Terrel Jasper of Santa Ana were married some days ago at the home of the bride's parents, Mr. and Mrs. A. E. Hawley. Rev. McClain W. Davis of the First Presbyterian church officiated. The young people are well known and a host of friends extended best wishes. A feature of the wedding was receipt of messages of congratulation from President Roosevelt and W. J. Bryan. Invitations were sent to the two distinguished gentlemen and their wives. Mr. Bryan's regrets were typewritten over his own autograph, while the President's message was more formal and was without the signature.

What a Tale it Tells

If that mirror of yours shows a wretched, sallow complexion, a jaundiced look, moth patches and blotches on the skin, it's liver trouble; but Dr. King's New Life Pills regulate the liver, purify the blood, give clear skin, rosy cheeks, rich complexion. Only 25c at Hatzfeld's drugstore.

Use Allen's Foot-Ease in Your Gloves.

A lady writes: "I shake Allen's Foot-Ease into my gloves and rub a little on my hands. It saves my gloves by absorbing perspiration. It is a most dainty toilet powder." We invite the attention of physicians and nurses to the absolute purity of Allen's Foot-Ease. Dr. W. C. Abbott, editor of the Chicago Clinic says: "It is a grand preparation; I am using it constantly in my own practice." All drug and shoe stores sell it, 25c. Sample sent FREE. Address Allen S. Olmsted, Le Roy, New York. p1

MONTHLY EXPENSE ACCOUNT OF WATER COMPANY

Cleaning the Ditch System and Making New Measuring Gates—Finance Committee's Report

ANAHEIM, July 31, 1902.

To the board of directors of the Anaheim Union Water company—Gentlemen: The following is my report for the month of July, 1902.

Regular employes	$450 00
Cleaning Fullerton b'nch ditches	116 37
Cleaning Anaheim " "	64 75
Cleaning moss above Horseshoe Bend and scraping sand to deepen intake at head of Cajon canal	99 25
Cleaning moss on Cajon canal between Horseshoe Bend and reservoir	190 50
Labor on intake of Anaheim ditch or canal	11 00
Cleaning moss and weeds on same	33 00
Yorba reservoir investigation	19 50
Baling out and repairing Hatfield pipe-line; labor on same	17 75
Cement used on same: 2 barrels Colton at $2 85	5 70
Repairing gates different places on lateral ditches	11 25
New gates made and placed under instructions from measurement committee; labor on same	22 50
Labor to repair ditch west of Mrs. Strain's orchard	4 87
One sack Colton cement at $2 85 a barrel	71
Fill balance Anderson and Tuffree ditches; labor and teams	169 85
Level Tuffree hills east and west of reservoir	35 85

CONSTRUCTION.

Teaming 944 yards gravel to the Paschall and East at ditches, Anaheim, at cost of 75c yard	70 85
Moving tools	3 50
Cost of raising East street bridge from North street to Santa Ana street, to height of seven inches above original height: Hauling water and cement, $38; labor, cementing same, $112 25	150 25
4 bbls. Gillingham cement at $3 35, $13 45; 43 bbls. Condor at $3, $129; 1½ bbls. Colton at $2 85, $4 27	186 62
Backfilling on East street ditch	25 35
Raising Paschall ditch, labor and team work on same	11 82
4 bbls. Gillingham cement at $3.35, $13.45; 1½ Colton at $2.85, $4.27	17 72
Labor and team work on the Almes-Johnston ditch	92 65
Uncovering gravel at Kraemer pit	49 00
Gentlemen: The old ditch through Tuffree and Anderson's places has been filled and leveled in good shape. I have also completed the raising of East street ditch as ordered by the board.	
The Almes-Ipsen ditch is about completed. Amount of water in Anaheim canal at Anaheim, 250 inches. Amount of water in Cajon canal at reservoir, 500 inches. Yours respectfully,	
A. L. PORTER, Superintendent.

About the Fight

Orange News

The Corbett-Fitzsimmons fight at San Francisco on Friday night resulted in a victory for Corbett, Fitzsimmons being knocked out in the eighth round. Fitzsimmons, although seventeen years older and 62 pounds lighter than the champion, had decidedly the best of the battle until the last round.

To Save Her Child

From frightful disfigurement Mrs. Nannie Galleger of La Grange, Ga., applied Bucklen's Arnica Salve to great sores on her head and face, and writes its quick cure exceeded all her hopes. It works wonders in sores, bruises, skin eruptions, cuts, burns, scalds and piles. 25c. Cure guaranteed by J. P. Hatzfeld, druggist.

Go to E. W. McCollum for bicycles, bicycle supplies and bicycle repairing. Our repair shop is in charge of one of the best bicycle men on the coast. Try us on repairs. Sporting goods of all kinds, baseball goods, lawn tennis goods, footballs, boxing-gloves and ping-pong, the latest fad.

Santa Ana Steam Laundry Agency

I run a laundry wagon that will call for and deliver your laundry twice a week. Laundry coming in as late as 9 o'clock Thursday morning will be delivered to you Saturday at 5 o'clock.

E. W. McCOLLUM.

For Sale.

Seventy-five cords of stovewood, one surrey, one phaeton, one buggy, one three-gang plow. JOHN HANNA, f20-tf Miraflores.

LAST OF EARTH OF THE LITTLE MOTHER

Laid Away Tenderly In the Silent Tomb, the Casket Garlanded With Flowers

The little mother lay in her coffin fast asleep. In her shriveled hands, crossed in her lap, she held a rose that had bloomed on her favorite bush that morning. This was the little mother's funeral day. She looked so peacefully at rest, so sweet, so content, one might have imagined her dreams were of that far-away time when, with her children gathered about her, she went, that happy day, amaying.

The little mother had planted the rosebush years agone, and had cared for it tenderly. Since she had been ill and unable to care for it, it had not bloomed, but this morning a rich rose, clad in its garb of pale purple and crystal, unfolded its petals, bursting forth in all its splendor, seeming to say, Good morrow, little mother, wherefore art thou?

The household prayed for the coming of the first blush of dawn to steal in and look upon that precious face. How long it seemed since she went away. How changed she was. But how content, how peaceful.

We see her again lying there in the shackles of death. The breath comes quicker and faster. She calls to her children for help, oh so piteously. A convulsive shudder, and the end claims all.

We see the little mother descending the declivity, down to the pebbly beach at the water's side. She seems to hear voices of loved ones on the other shore. Death has no terrors for her. She seems to wave a fond adieu to the dear ones left behind. And then the undiscovered country, from whose bourne no traveler returns.

The clock in the hallway tolled out the hour of ten—oh, how mournfully. The household remembered the time when the little mother first beheld it. It was her Christmas present, and replaced the old clock which had done service since the earliest of pioneer days, yet which, indeed, ticked off the hours beside her bed. The time had come when the household must bid goodbye to the loved one.

The house is filled with friends from near and far. The air is heavy with the perfume of flowers. There is sobbing and tears.

The choir of the Presbyterian church sing appropriate hymns. Rev. Snyder of the same church offers prayer and speaks of comfort in memory of the dead.

The pallbearers are old-time friends of the deceased and her family, namely, Judge Frank Shanley, Wm. Konig, H. A. Dickel, Charles Otto Rust, Julius J. Schneider, H. Cahen.

The casket was at last covered and the face of the little mother forever shut out from view. She slept peacefully, contentedly, in her hands the rose.

Then the body was borne by tender hands from the stricken household. The casket covered with a pall of flowers. Then the solemn slow-moving cortege. Then the grave. It seems an eternity since she went away. But somewhere in this vast domain of worlds we shall meet her, sometime. Surely it was not to be that we should be with her as but a fleeting moment, and then to suffer this pall of anguish indescribable, this sensation of loneliness and sorrow, forever and forever. That we shall again meet her we feel to be as true as that the rising sun lights up her flower-covered grave this morning.

Mrs. Samantha Kuchel, to whose memory these lines are a tribute, was a native of Bedford, Indiana. Her parents came from Virginia. She was born December 25, 1837. Died in this city July 29, 1902. She was one of the earliest pioneers of this city, coming in 1862. Here she had ever since resided. Her husband died in October, 1870. She thus survived him nearly 32 years, giving her entire time to the rearing of her family, and to their care and protection, with that fond love which only a stout-hearted mother knows.

Of her sickness and death our readers have already been told the sad story. When, many weeks ago, it seemed she was upon the point of winging her angel flight, she rallied and recovered sufficiently to be able to leave her bed and walk among the flowers. When the household looked joyfully forward to a reunion at table of the little mother and her children and grandchildren, she faltered, like a tired child at play, and sank to her eternal rest. During the many weeks of her illness her mental faculties were at times clouded, which was due to the action of narcotics upon her enfeebled system. But before the final summons, her mind was clear as the rainbow in the heavens. To those beside her she spoke, offering words of consolation and farewell. Then came the descent into the shadow of the silent valley. Step by step, loved ones beckoning her on, loved ones grieving at her going. Surely the little mother must have been sorely perplexed which way to turn. But somewhere in this vast expanse of stars and worlds illimitable we shall meet her, and there shall be no parting, and hand in hand with her loved ones, the little mother will romp with them again as of yore, in the asphodel-starred slopes of elysium.

ISSUED EVERY THURSDAY.

HENRY KUCHEL, Editor and Proprietor

THURSDAY..... AUGUST 7, 1902

So senseless and so venomous has the absurd Gen. Otis of the Los Angeles Times become in his impotent striving to prevent the triumphant renomination and re-election of Gov. Gage that he descends to the folly of printing the malicious statement that the two Anaheim papers, the GAZETTE and Plain Dealer, have "entered into a conspiracy" to "milk the city" in contracts for printing; therefore (continues this fellow Otis) as these two papers support Gage, he should be defeated! Such reasoning is characteristic of Otis and his "Anaheim correspondent," who resides at Fullerton, not here; votes the Democratic ticket, and is a fit associate for Otis and his troop of scalawags in their puerile wrath at the chief executive of the state.

Just what the price of city printing in Anaheim has to do with the nomination and election of a Governor of the State of California, may be apparent to Otis and his band of satellites; but we confess our inability to see it. Certainly the ammunition of this wretched old man must be scant indeed to permit the trotting out of this weighty bit of evidence, (?) disturbing as it does the equilibrium of the campaign!

But the Times' solicitude for the welfare of this city, even if it have a grudge against the Governor, whom every man in Anaheim esteems highly—this solicitude may be in itself commendable, but we fancy it is, when the true facts of the case are known, a bit grotesque, if not uncalled for.

Turning to our books, we find we have had, so far as jobwork is concerned, just two orders from the city of Anaheim, since we entered into contract with it, in May last, to do the city printing and advertising for it for a year. Both orders were booked June 5th. One was for 1000 letter heads, for which was charged $3 50; the other was for 1000 envelopes, for which $2 75 was charged. A week before we printed for the city 100 copies of an ordinance, for which we charged the city $1. Here is a total aggregate of $7 25 for job work from the city of Anaheim for the months of May, June and July.

With the exception of the small advertisement calling for bids for the city printing, published in the Plain Dealer in April, there had been no printing done by the city since March 20, nor any jobwork since the first of March. So that our bill of $7 25 covered all the job printing done by the city during the months of March, April, May, June and July.

Seven dollars and a quarter for five months' job work. You feel small, Otis, don't you, for coupling the name of the Governor with this attempt on our part to do, as you untruthfully allege, what you have been often charged with doing?

When it comes to city printing as such—the publication of ordinances, resolutions and such like work, we find our bills against the municipality have amounted to $30 90 for the four months of April, May, June and July, with no work of the kind done in March, and nothing in prospect for August. To this amount paid by the city for advertising in the past six months ($30 90) should be added the city election supplies, which were furnished by outside houses.

Here we have a total expenditure for all printing and advertising done by the city during the past five months, with nothing offering during the present month, amounting to $47 15. We assure Otis there is no combination between the "two Gage papers" to "put up jobs" against the city, with a view to "milking" the taxpayers, as charged by his high-minded correspondent; and even if there were, we doubt if the Governor would have anything to do with it. Otis might; he has been implicated in such theft before. But Gage, never!

The fact of the whole matter is that Otis, in his wretched fury—striking himself like an infuriated snake and hissing at the heels of the Governor—has been for some weeks past assailing the country press, which is a unit in its support of the Governor. In nothing has Otis recently shown his extreme littleness, his petulant perversity, his ingrained, malicious meanness.

And by such a course he hopes to dictate to the people of the state who shall and who shall not be governor!

MR. SHERWOOD tries very hard to explain that he is doing the "small amount of engineering necessary" at a nominal expense to the company, when as a matter of fact the by-laws should be so drawn that he, as a director and president of the board, should be debarred from doing any such work at all. It is not the "small amount" of work he is doing at the present time which so much affects the status of affairs, as that which he has in contemplation; for instance, the preparation of the company's right-of-way books and the prospective work on the reservoir—now temporarily under a cloud by the report of Mr. Eaton.

But beat about the bush as this artful dodger may, the fact remains, and is perfectly well known of all men, that so long as Kellogg was in control of engineering affairs, Sherwood persistently opposed the reservoir; but when Kellogg was displaced by Sherwood the latter immediately faced about and became a warm partisan of its construction. Sherwood put in two years bucking the enterprise, but after he had placed himself in control, set about with a will to prove the site was all that he had hitherto denied of it. He says:

> The facts are that less than a month, and less than $200 was spent in the investigation; and we are a long distance from where we started. Many deep holes have been bored defining the bed of clay which must be the foundation of the dam; and also the structure of the hills on each side, and where the materials for building the dam must come. Surveys have been made for a working contour map; the cross sections on the dam line have been plotted; the fact ascertained that the height of the dam can probably be raised, a resurvey of the outlet ditch made.
>
> The committee [Sherwood's committee] reported that there seems to be no reason why a safe dam cannot be constructed. We might perhaps have added without exceeding our authority, if money enough is spent on it. When we have employed a competent engineer to provide plans and specifications for the dam, and make a careful estimate of the cost, we will know whether it is a commercial proposition or not.

Mr. Eaton seems to have done the rest. Mr. Sherwood says he sees no reason why a safe dam cannot be constructed. Mr. Eaton, whose report will be found in another column, says to him it looks unfavorable. When engineers fall out, perhaps honest men (as is the case of thieves falling out) may come by their dues.

But the fact remains, stockholders in this section will object to Sherwood's being in control of operations, be the reservoir at Yorbs or La Habra. He has forfeited their confidence, and they will refuse to carry on either enterprise so long as he remains in control.

GAGE has swept Orange county. He is the choice of the Republicans of this county. He is our neighbor, and our people have known him, many of them, a quarter of a century. They know him to be a true-hearted, honest and honorable gentleman, against whom the silly charges of his newspaper enemies are volatile as the wind that blows. They know these rumors to be false, and knowing them to be so have rallied to his support as one man.

Let it be recorded that Jim McFadden's one-man political power is forever at an end in this county. He has fought the Governor persistently, in season and out, for four years. In his own town he is beaten four to one.

Let us have a harmonious convention. Let us endorse the President and the Governor of the state. And then let us instruct our delegates for Henry Gage.

One word more: If Jim McFadden and the Flint push had carried the primaries and controlled the convention, have no doubt, gentle reader, that high-sounding resolutions would be adopted for the man of San Benito. But such is not the case. The county is for Gage and its delegates should be so instructed.

WE hope those gentlemen who fastened the Crawford system of primaries upon the party in Orange county are satisfied. As we pointed out three months ago would be the result of it, every Santa Ana aspirant for office has defeated his competitor—every outside candidate has been defeated. Mr. McKinley of this city is defeated by Smith for coroner and public administrator. Mr. Hardy of Orange is defeated by Wright of Santa Ana for tax collector. Snover of Newport is defeated by Nichols of Santa Ana for sheriff. Carpenter of Fullerton is defeated by Nichols of Santa Ana for superintendent of schools. Newberry of Garden Grove for clerk is defeated by Beckett of Santa Ana.

That is the distressing political story the Crawford system tells this morning.

The only two candidates receiving the nomination resident outside the county seat are W. G. Potter for treasurer and G. W. Sherwood for surveyor.

Perhaps this is the way to nominate a winning ticket. Perhaps not.

A LADY in TEXAS writes us that she has a pair of mocking birds, three months old, which she will dispose of to the highest bidder. She does not know the price, for, as she says, in her state the birds are common—as they are here also. Perhaps she did not know that, but if any of our readers desire to make an offer for them they may send it in just the same. Who bids? Going at how much?

Has the Best of It

Los Angeles Capital.

Henry T. Gage and the organization at his back continue to have much the better of the existing argument. The incumbent is reasonably certain of being selected his own successor when the state convention of his party meets in Sacramento August 25th. This declaration is based on the patent fact that the Governor and his friends continue in supreme control of the working element in the Republican party.

Should Henry T. Gage be renominated, most of us who are not blinded by prejudice must concede the incumbent will be elected to succeed himself. The state is Republican by from twenty to forty thousand plurality, and the Democratic program in the recent Congress has solidified if anything partisan feeling in California. There is not a congressman from this state who will not be returned in November, and the prediction applies to the Republican state ticket as a whole.

Romantic Story

A romantic story comes from the Soldiers' Home at Santa Monica, to which was admitted four months ago Harry Dockstader, an aged veteran of the Civil war, formerly a resident of Fresno. More than a decade ago his daughter Annie married against his will. He became angered, disowned her, sold out his belongings and came west. For years she has sought for him in vain, but about three months ago she communicated with the war department and learned that a man named Dockstader had recently entered the home at Santa Monica. The daughter has been widowed since, but has married again, and this time a well-to-do stove-maker in Los Angeles.

The daughter visited the home. The old veteran did not recognize his only child. There was an affecting scene. She uttered the one word, "Father!" A flood of memories burst upon him. They fell in each other's arms and there was a reconciliation. The daughter took the old man to her home to end his declining years in peace and content. Dockstader was a well-known character and lived on his pension. Declining health prompted him to enter the Soldiers' Home.

WEATHER CONDITIONS NORMAL

Crop of Sugar Beets Around Anaheim is Turning Out Well—Conditions Favorable Elsewhere.

Nearly normal weather conditions have prevailed during the week, with temperature considerably lower than during the preceding week, and fog along the coast. Some damage has been done by field and forest fires.

Grain harvest is nearly completed in some sections and progressing rapidly in others. Reports from the southern coast counties are generally to the effect that the yield of wheat and barley is considerably better than expected. In the northern part of the San Joaquin, the Sacramento valley and the central and northern coast districts, the yield of grain is heavy and the quality excellent. Hay baling is progressing rapidly, and a heavy crop is being stored or shipped. Sugar beets are yielding good crops except in portions of Southern California, and the factories are in full operation. Hops, beans and corn are making good growth. There will be a heavy crop of sweet potatoes in the San Joaquin valley.

Prunes and early table grapes were slightly damaged by heat during the preceding week in portions of the Sacramento valley. Vineyards are in excellent condition in all sections and prospects continue good for an unusually heavy crop of raisin, table and wine grapes. The apricot crop in the Santa Clara valley is reported very heavy. Prunes, peaches, pears and plums are yielding good crops in nearly all places. Walnuts, olives and citrus fruits are doing well.

The weather in the Sacramento valley has been considerably cooler than during the preceding week. Grain harvesting and threshing are progressing rapidly. Wheat, barley and oats are yielding good crops in all sections.

Cooler weather in the coast and bay sections during the week, with fogs along the coast, has been favorable for all crops. Grain harvest is progressing, and in many places the yield is better than expected. Beans are doing well, and an average crop is probable. Hops are making rapid growth and give indications of a heavy yield. Sugar beet factories are in operation, and it is reported the crop is unusually heavy in some sections. Grapes continue in excellent condition, and were not seriously damaged by heat during the preceding week. Fruit drying and canning are progressing. There is a scarcity of labor in orchards.

Warm weather has continued in Southern California during the week, but with cool nights and fog along the coast. The heavy rainfall of last week in the vicinity of San Diego was beneficial to corn and vineyards, and it is predicted the grape crop will be one-third heavier as a result. The deciduous fruit crop is insufficient to supply the local markets. Peaches and nectarines are ripening rapidly. Grapes are in excellent condition in all sections and will probably yield heavily. Walnuts are thrifty, and give promise of an average crop. Oranges and lemons are in good condition. The sugar beet crop about Anaheim is heavy. Corn and beans are doing well.

The Same Man

Orange Post.

Perhaps it might not be unkind to the stockholders of the two water companies and the rest of the voters of the county to call attention to the fact that the G. W. Sherwood seeking the Republican nomination for county surveyor is the same man who has figured so conspicuously in the newspapers of the northern part of the county during the last year and a half in water company affairs. If the voters want that kind of a surveyor they surely know how to get him without any instructions from the Post.

E A Curtis and Clara S Curtis to the Golden West Celery and Produce Co—Undivided ¼ interest in about 360 acres in the peatlands; $10.

D M Baker and Annie M Baker to Nellie R Schmidt—Lot 2, block 3, Fruit add to Santa Ana; $500.

Romance of a Diamond.

At the beginning of the eighteenth century a soldier belonging to one of the French garrisons in India became enamored of the eyes of Brahma in the temple of Serringham. These eyes were diamonds, more brilliant than ever shone under the eyebrows of Crapaud's European divinities. Their lusser captivated his soul. He haunted the temple and, yielding to the might of the god, became a convert to his worship. At least so he persuaded the priests, who went so far as to admit him to some care of the temple, doubtless trusting Brahma to protect his own. But on a stormy night the convert disappeared, and with him one of the idol's eyes, the other having resisted all his efforts to dislodge it. So Brahma was left squinting, and the perfidious Frenchman sold his prize to a captain in the English navy for about $10,000. Later it was bought by the Armenian merchant Schaffras for more than five times this sum and shown by him to Catherine of Russia, who offered for it about $400,000, a life pension of $18,000 and a patent of nobility. Schaffras refused this offer and subsequently sold the diamond to Gregory Orloff for the same sum without the patent of nobility. Orloff, part author of Catherine's greatness and raised by her to the steps of the throne, for whom she struck medals, raised triumphal arches and dedicated palaces "par l'amitie reconnaissante," to whom she offered secret marriage and whom in another caprice she banished—Count Gregory, being reinstated in favor, offered his imperial mistress two tokens of reconciliation, the St. Petersburg arsenal and the Orloff diamond.—Neith Boyce in Lippincott.

All In Being Used to It.

Little Chicago Girl—See how you like our water. Here's a drink.

Little St. Louis Cousin (tasting it)—It's pretty good, but it hasn't quite as much body as ours. I like ours best.—Cleveland Leader.

The Lytton Motto.

The family motto of the Bulwer Lytton house is singularly inappropriate for people whose fame has been won with pen instead of with sword. It is "This is the work of valor."

REINHAUS BROS., SANTA ANA

Life In Mars.

Megamicrus, as we shall call our man of the earth transported in his sleep to the now Mars, wakes up, opens his eyes and finds himself in bed in his room. All the things in it are familiar to him—the furniture, clothes, books and wares are just where he had left them overnight. He does not suspect the trick that has been played on him. He stretches himself, throws up his arms, leaps from his bed, goes to the washstand, lifts the pitcher, puts on his clothes—and is greatly surprised.

All these actions are of a common character and consist in raising masses to a certain height. His water pitcher, for instance, holds two liters, new measure. On the earth these two liters, representing two kilograms, require a certain effort to be raised, say, to the height of 20 centimeters. But on Mars these two liters weigh only two Martian kilograms, or 16 times less in earthly weight. Further, he does not have to lift them to a height of 20 centimeters, but of only 15 centimeters, his size being diminished one-half, so that the work to be performed is reduced to one-thirty-second. On the other hand, his strength, which is proportioned to the volume or the mass of his muscles, is only reduced to one-eighth. Consequently the effort he is required to make is four times less. His water pitcher seems extremely light, so do his clothes. He probably remarked the same thing when he threw up his arms and jumped from his bed, but simply thought he was in unusually good spirits.—M. J. Dubout in Popular Science Monthly.

Her Impressions of Angels.

The wife of a well known senator took her little daughter, a 4-year-old damsel, to a matinee once to see "Jack and the Beanstalk." A week or so afterward she was discovered pirouetting and lifting her petticoats before a cheval glass. Her father reproved her and told her it wasn't a pretty way to do.

"Why," said the child, "I saw the angels do it."

"The angels!" exclaimed her father, "Why, where?"

"When mamma and I went to heaven that day," said the child.

The father explained that the fancied heaven was only the theater. The little girl's face fell.

"And wasn't they angels?" she asked.

"No," said the father; "they were just girls."

The child put on an air of intense disgust.

"Well," she said, "I fink they ought to be taked home and spanked, 'cause they wasn't dressed any more than angels."—Lewiston Journal.

What are Humors?

They are vitiated or morbid fluids coursing the veins and affecting the tissues. They are commonly due to defective digestion but are sometimes inherited.

How do they manifest themselves?

In many forms of cutaneous eruption, salt rheum or eczema, pimples and boils, and in weakness, languor, general debility.

How are they expelled? By

Hood's Sarsaparilla

which also builds up the system that has suffered from them.

It is the best medicine for all humors.

Drying preparations simply devel-op dry catarrh; they dry up the secretions, which adhere to the membrane and decompose, causing a far more serious trouble than the ordinary form of catarrh. Avoid all drying inhalants, fumes, smokes and snuffs and use that which cleanses, soothes and heals. Ely's Cream Balm is such a remedy and will cure catarrh or cold in the head easily and pleasantly. A trial size will be mailed for 10 cents. All druggists sell the 50c. size. Ely Brothers, 56 Warren St., N.Y.

The Balm cures without pain, does not irritate or cause sneezing. It spreads itself over an irritated and angry surface, relieving immediately the painful inflammation.

With Ely's Cream Balm you are armed against Nasal Catarrh and Hay Fever.

Ladies can Wear Shoes

One size smaller after using Allen's Foot-Ease, a powder to be shaken into the shoes. It makes tight or new shoes feel easy; gives instant relief to corns and bunions. It's the greatest comfort discovery of the age. Cures and prevents swollen feet, blisters, callous and sore spots. Allen's Foot-Ease is a certain cure for sweating, hot, aching feet. At all druggists and shoe stores, 25c. Trial package free by mail. Address, Allen S. Olmsted, Le Roy, N. Y. 4t

Notice of Sale of Real Estate at Private Sale.

NOTICE IS HEREBY GIVEN THAT IN pursuance of an order of the Superior Court of the county of Orange, state of California, made on the 26th day of July, 1902, in the matter of the estate of William J. Smith, deceased, the undersigned, executor of the last will and testament of said deceased, will sell at private sale, to the highest bidder, for cash, gold coin of the United States, and subject to confirmation by said Superior Court, on or after the 16th day of August, 1902, all the right, title, interest and estate of the said William J. Smith at the time of his death, and all the right, title and interest that the said estate has, by operation of law or otherwise, acquired other than or in addition to that of the said William J. Smith at the time of his death, in and to those certain lots, pieces or parcels of land described as follows, to-wit:

PARCEL I

The north twenty acres of the south fifty acres of the east eighty acres of the southeast quarter, and the north fifty-five acres of the west eighty acres of the southeast quarter, all in section 31, township 3 south, range 10 west, San Bernardino base and meridian, Orange county, California.

PARCEL II.

The south thirty acres of the east eighty acres of the southeast quarter of section 31, township 3 south, range 10 west, San Bernardino base and meridian, Orange county, California, excepting one acre in the southeast corner thereof, described as follows: Commencing at the southeast corner of said section 31, and running thence north 12 rods; thence west 13½ rods; thence south 12 rods and thence east 13½ rods to the place of beginning.

Together with 7½ shares of the capital stock of the Anaheim Union Water Company, located upon said described land.

PARCEL III.

Beginning at the northwest corner of the east half of block 1 in the town of Buena Park, Orange county, California, as per map of said town recorded in book 18, page 20, of Miscellaneous Records of Los Angeles county, California, running thence east 628 7-100 feet; thence south 1078 7-100 feet; thence west 628 7-100 feet; thence north 1078 7-100 feet to the place of beginning (reserving a small piece in the northeast corner owned and occupied by the California Central Railroad company), containing fifteen acres more or less, less 30 feet reserved on the east side for street purposes.

PARCEL IV.

Beginning at a point 25 feet south of the northeast corner of block 86 in the town of Buena Park, Orange county, California, as per map of said town recorded in book 18, page 20, of Miscellaneous Records of Los Angeles county, California, running thence west 150 feet; thence south 25 feet; thence east 150 feet; thence north 25 feet to the place of beginning.

Terms and conditions of sale: Cash, gold coin of the United States. Deeds at expense of purchaser.

Bids or offers must be in writing and may be made at any time after the first publication of this notice and before the making of the sale, and must be left at the office of Richard Melrose, Anaheim, California, or delivered to the undersigned personally at his residence near Fullerton in said Orange county, or may be filed in the office of the clerk of the Superior Court of said county of Orange.

Dated July 26, 1902.

A. V. SMITH,
Executor of the last will and testament of William J. Smith, deceased.
RICHARD MELROSE, attorney for executor. jy31-3t

AN UNFAVORABLE REPORT ON YORBA RESERVOIR

Fred Eaton of Los Angeles Takes a Look at the Site and Tells Us What He Thinks of It.

On Tuesday morning Mr. Sherwood came into the water office and handed out the following copy for publication:

"President Sherwood, of the water board, gives out the following statement with regard to the examination of the Yorba reservoir site made by Mr. Eaton, the consulting engineer, on Saturday last. Mr. Eaton stated to the board, when asked for his opinion, that after a personal examination of the site and the borings made by the committee he would be compelled to decline to act in accordance with the resolution of the board directing that a consulting engineer be employed to make plans and specifications for a dam, as the impressions he had formed in the short time he had been able to give the matter were unfavorable to the project, principally owing to the difficulty in making a safe connection with the gravel hills on each side.

"He also stated, however, that by a further study of the subject a way might be devised to safely build a dam, and that if the board wished him to take up the matter on that basis he would do so. In any case there would be no difficulty in building a dam of sufficient height to retain the Anaheim night water.

"The board directed that the committee make further investigations under the direction of Mr. Eaton, and also that, coincidently, an examination of La Habra site be made and put in shape for Mr. Eaton to take up the matter again at a later date. He also gave the board an interesting explanation of the method of draining the underflow of the Los Angeles river, now being put in operation by that city under his direction as consulting engineer, and stated that, in his opinion, a large quantity of water could be developed from the underflow of the Santa Ana river in a similar manner. The board will accept his invitation to inspect this work at an early date."

Fred Eaton met with the water board on Saturday afternoon, the meeting being an executive session. After the meeting Eaton drove with Sherwood to the latter's residence, where he remained until the following morning.

There was little doing at the meeting in open session.

The ditch committee submitted the following report:

ANAHEIM, Aug. 2, 1902.

Report of Ditch Committee—To the honorable board of directors of the Anaheim Union Water Company:

1. On the recommendation of the superintendent as regards the overshoots on ditch at Olinda and Horseshoe Bend, we ask for further time.

2. We ask for more time on the Kroeger block ditch.

3. On the crossing at West street we ask for survey of same by engineer in order to get right location for said crossing before we make recommendations on same.

H. L. SMITH,
H. H. HALE.

The report was filed and committee granted further time on subjects before them.

The reports of the finance committee and the superintendent were submitted and filed. They will be found printed upon the first page.

The board discussed the contemplated placing of a pipe through the Placentia school grounds, the school trustees to pay $100 toward the expense thereof and to maintain the same.

Attorney Melrose directed the board's attention to the fact that the school trustees could make an agreement binding only during their term; that the succeeding board of trustees could not be bound by the action of the present board.

The matter was, after discussion, left to the ditch committee with power to act.

Mr. Zoyn reported that 250 measuring gates were being installed in the ditches throughout the distributing system.

Sherwood asked if the committee on right-of-way for the outlet ditch from Yorba reservoir was ready to report.

Secretary Krick reported that he had written Mr. Yorba relative thereto, but had received no answer. Further time was granted the committee.

Mr. Bradford called attention to the fact that tules were again making their appearance in the Yorba reservoir and suggested that they be cut down to the water's level, so that when the water rises they may be submerged and killed.

Superintendent Porter was instructed to proceed against the tules and exterminate them.

Porter reported he had collected $16 from small stockholders for use of water.

Sherwood—Collected anything from Tuffree?

Porter—I thought I'd let Krick do that.

Sherwood—Well, you can collect 25 cents from me. I took water from the ditch to irrigate my trees. At the rate of 10 cents per 1000 gallons the price will amount to 25 cents.

T. A. Darling wrote saying he had been the possessor of three shares of stock, the certificates of which had been destroyed in 1894. He averred he had not sold, transferred, hypothecated nor endorsed it, and asked that a new certificate be issued to Charles Lange. An indemnity bond in amount of $100 was furnished with Napoleon Hart and Frank Nevada Steadman as sureties, holding the company harmless, according to rule governing issue of new certificates. A new certificate was accordingly issued.

Superintendent Porter reported he had repaired the Christian ditch on south Los Angeles street. Some lady neighbors of Mr. Christian had refused him permission to enter upon their premises and repair it, claiming their flower gardens would be damaged thereby. Porter cleaned the ditch and never harmed a flower, and now Mr. Christian gets his water and the goose hangs high.

If you are tired of paying rent and interest, and have a desire to own a city home or acreage property, and pay for it at $8 per month, without interest, read the ad. of Home Builders' Association in another column. Arthur M. Bushnell is the local agent.

On account of the vast increase in their business and to make room for their new Fall stock of Gent's Furnishing goods, Youngbluth & Kroeger will enlarge their store to twice its present size. aug7

ALEXANDER CRAW IN TOWN

Looking After the Lady Birds Liberated Here for Destruction of Red Scale.

Alexander Craw arrived in town from San Francisco yesterday on a tour of inspection of scale and scale destroyers in the counties of Southern California.

Mr. Craw is state quarantine officer, and a year ago, it will be remembered, liberated a number of lady birds for the destruction of red scale in orange trees in an orchard on Lemon street. These lady birds had been sent to California by Mr. Compere, who discovered them in China.

Mr. Craw looked forward with great interest to examining the trees to ascertain what progress had been made by the parasites, but his disappointment may be imagined when, on going to the place, he found the trees had all been grubbed up and along with the parasites had long since disappeared.

He then went to Judge Shanley's orchard, where a colony of the parasites had also been liberated. Here he found several red scale which seemed to have been parasitized by the lady birds. These he took with him to San Francisco, where they will be subjected to microscopical examination.

Mr. Craw advises that horticulturists who are about to fumigate for black scale defer the work until September, for the reason that many young are unhatched at the present and fumigation would not interfere with them. They will be hatched by next month, when fumigation will effectually destroy them.

Mr. Craw departed on the 3 o'clock train for San Diego, where he goes to look into the scale question.

SUIT AFFECTING SANTA ANA TITLES

Heirs Under Spanish Grant Bring Suit to Recover Land in Heart of Town.

Suit involving 80,000 acres of land and the site upon which the town of Santa Ana is located is soon to be filed in the United States court in Los Angeles by Don Gallardo, an attorney of Santa Barbara, who is known all over Southern California as one of the few remaining Spaniards of the old school.

Gallardo is in San Bernardino searching old records for data to assist him in his suit, although he asserts that he is in possession of sufficient evidence to establish his case, which is based upon a land grant made by Spain in 1810 to two brothers. This grant consisted of 80,000 acres, the very center of which is now the county seat of Orange county. The grant was recognized by Mexico when that country came into control of California, but during the regime of Pico the first he ignored the Spanish grant and divided the land between several other persons.

They assumed possession, but the original owners clung to their rights, and now their heirs have come forward with documentary evidence of the Spanish grant. A daughter of one of the Spaniards, a resident of Santa Barbara, has made Gallardo her attorney in fact and signed over to him one-fourth interest in the 80,000 acres, and he has undertaken the fight for the land. It is rumored that a wealthy syndicate is interested with him in the suit.

Dinner Set Drawing.

A crowd of about 300 people witnessed last Saturday night the drawing of the 60-piece dinner set in front of Harris & Falkenstein's department store. The big window had been cleared for the purpose and at the time set for the drawing John Hartung, of the Citizens' bank, armed with a hatchet, entered the window. The boxes containing the coupons were handed to him and in view of all he emptied the contents in a basket, which had been covered with a tablecloth. This done, Miss Edith Wallop was led blindfolded to the basket and took from it one number, which she handed to Mr. Hartung, who read it aloud to the people. The number drawn was 6937 and Fred Dettmer, who recently bought Mrs. Standolph's place, west of town, was the lucky winner, and he carried off the pretty set, envied by many a good housekeeper, who had hoped to be the proud possessor of such a valuable addition to her household.

Moving Pictures.

A decided novelty in the amusement line has arrived in Anaheim and will open for a four nights' engagement on Center street, opposite the city hall. Prices of admission are cheap and the show is said to be good. It was located at Riverside and San Bernardino for several nights and the Sun thus compliments the performance:

"The shows at the big tent on the corner of Third and E streets are causing a great deal of comment, and each evening large audiences assemble to view the marvelous moving pictures and hear the timely illustrated stereopticon lectures.

"Last evening the program consisted of displaying the wonders of America in the twentieth century. The pictures reproduced upon the curtain were illustrative of the mighty strides which this nation has taken in the last hundred years, and the lecture explaining them added much to the entertainment.

"Tonight the famous eruption of Mont Pelee will be reproduced in 100 graphic pictures. These pictures were official photographs made at the introduction of the play in the Bavarian Alps two years ago, and they are said to be fine. There will also be an entire new line of moving pictures, displaying many instructive and amusing subjects, and the program will be concluded by amusingly illustrated songs."

Looking for Oil

J. A. Jones and Fritz Ruhmann of this city one day last week, in company with the oil wizard, "Lady" Duggan, went to San Juan by the Sea where they made an attempt to locate oil on the abandoned property of the Mueller Oil company.

The company in charge of developing oil at the San Juan fields made an unsuccessful attempt last year to strike paying oil sand, and after difficulties with well-borers and crooked pipe finally gave up the job. The directors of the company have always been confident that there is oil in paying quantities in the field, and the present trip is made as a last effort to locate it.

"Lady" Duggan is reputed to be an oil wizard who possesses the power of locating oil. She claims to have made several good strikes.

SCHOOL BEGINS

Trustee Lewis informs us the high school will reopen for the fall term on Sept. 1st. The grammar school opens Sept. 15th.

THE GRAND OLD GOVERNOR SWEEPS ORANGE COUNTY

Jim McFadden Carries a Sofitary Precinct Against Him at Santa Ana--County Overwhelmingly For Him--A Victory Hands Down

The Ticket

Superior Judge—Z. B. West of Santa Ana.
Treasurer—W. G. Potter of Buena Park.
Clerk—W. A. Beckett of Santa Ana.
Auditor—J. H. Hall of Santa Ana.
Sheriff—J. C. Nichols of Santa Ana.
Tax Collector—A. Y. Wright of Santa Ana.
District Attorney—E. T. Langley of Santa Ana.
Recorder—George Peters of Santa Ana.
Assessor—Frank Vegely of Santa Ana.
Surveyor—G. W. Sherwood of Fullerton.
Superintendent of Schools—J. B. Nichols of Orange.
Coroner—G. S. Smith of Santa Ana.
Assembly—E. R. Amerige of Fullerton.

Out of twelve county offices Santa Ana appropriates nine. W. G. Potter of Buena Park, having no opposition, is nominated, as is also G. W. Sherwood of Fullerton for surveyor, who had no opponent.

All the other candidates are Santa Ana men, with the exception of Nichols for school superintendent.

Every aspirant to office from an outside precinct was defeated for nomination—Hardy of Orange for tax collector, Lewis of Tustin for recorder, Snover of Newport for sheriff, McKinley of this city for coroner, Carpenter of Fullerton for school superintendent, and Newberry of Garden Grove for clerk.

It seems to have been a clean Santa Ana sweep, such as we predicted it would be at the outset of the Crawford primaries.

Republicans in this section of the county are asking themselves the question: Gentlemen, have you nominated a winning ticket?

The Primaries

The result of Tuesday's primaries leaves little doubt about the complexion of the delegation from Orange county to the state convention.

That the eleven delegates will go pledged for Henry T. Gage admits of no doubt.

In this (the Third) supervisor district the result shows 26 Gage delegates elected to the county convention, to 6 anti-Gage.

Santa Ana went overwhelmingly for Gage. In Jim McFadden's precinct an anti-Gage delegation was elected, but in the other four precincts Gage delegates were elected.

In the Orange supervisor district Gage sweeps the boards.

The same news comes from San Juan and Westminster.

Anaheim elected seven pledged delegates, Olinda 2 and La Habra 2.

At West Anaheim 5 Gage delegates were elected. Postmaster Duckworth and C. W. Marden were defeated in this precinct after a hot fight.

At Olive Postmaster Upham was defeated in caucus, he being an anti-Gage shouter.

At Santa Ana yesterday the sentiment of the anti-Gage push was that a delegation should be selected for the state convention pledged to Greeley, but saying nothing about the governor. The fight against the governor, which has been waged quietly for a year, seems to have collapsed. Jim McFadden is beaten 4 to 1 in his own town.

That the Gage men will organize the convention admits of no doubt this (Wednesday) afternoon. Caucuses are being called for in the various supervisor districts and preliminary work mapped out.

The victory for the governor is conspicuous in the fact that it was won by the Republican party as a whole. There was a minimum of what is known as "organization," but a maximum of enthusiasm.

A persistent attempt has been made in one or two precincts in the county for a year past to throw the county to Flint. Principal movers in the scheme were Jim McFadden of Santa Ana and G. W. Sherwood of Fullerton, candidate for county surveyor.

While Fullerton chose 6 anti-Gage delegates, prominent Republicans of that precinct aver the sentiment in the precinct is favorable to Gage.

Vote by Precincts.

ANAHEIM NO. 1.

Total vote 74. Ballard 26, West 43, Potter 62, Beckett 26, Newberry 43, Hall 52, Smart 2, Munger 17, Nichols 47, Snover 14, Meacham 11, Hardy 36, Wright 22, Williams 17, Langley 52, Peters 45, Lewis 27, Vegely 51, Yount 5, Flook 9, Sherwood 46, Nichols 13, Carpenter 43, Davis 14, McKinley 55, Smith 10, Hasson 32, Amerige 29, Hale 45, Bradford 25, Shanley 53, Llewellyn 53.

Delegates—Shanley 50, Stern 50, Hunter 48, Rea 48.

ANAHEIM NO. 2.

Total vote 39. Ballard 14, West 25, Potter 34, Beckett 14, Newberry 22, Hall 22, Smart 3, Munger 8, Nichols 24, Snover 9, Meacham 4, Hardy 17, Wright 17, Williams 21, Langley 16, Peters 25, Lewis 8, Vegely 26, Yount 4, Flook 4, Sherwood 28, Nichols 6, Carpenter 19, Davis 11, McKinley 32, Smith 5, Hasson 14, Amerige 20, Hale 15, Bradford 20, Shanley 32, Llewellyn 27.

Delegates—Swain 33, Melrose 32, Dickel 32.

WEST ANAHEIM.

Total vote, 99. Ballard 17, West 77, Potter 99, Beckett 40, Newberry 53, Hall 46, Smart 15, Munger 25, Nichols 31, Snover 47, Meacham 13, Hardy 57, Wright 30, Williams 36, Langley 59, Peters 56, Lewis 32, Vegely 45, Yount 17, Sherwood 65, Nichols 10, Carpenter 59, Davis 22, McKinley 65, Smith 25, Hasson 40, Amerige 48, Hale 64, Bradford 25.

Delegates—Tipton, Norman, Spilman, Powers, Litton.

PLACENTIA.

Total vote, 56. Ballard 21, West 29, Potter 30, Beckett 24, Newberry 22, Hall 40, Smart 3, Munger 4, Nichols 30, Snover 7, Meacham 11, Hardy 22, Wright 19, Williams 22, Langley 25, Peters 39, Lewis 7, Vegely 25, Yount 4, Flook 6, Sherwood 21, Nichols 9, Carpenter 33, Davis 8, McKinley 35, Smith 12, Hasson 23, Amerige 27, Hale 27, Bradford 20, Ford 44.

Bulletins

The GAZETTE posted the first bulletin of the primary at 6 o'clock on Tuesday evening, it being that of precinct 2 of this city, in which a light vote was polled.

The result in precinct 1 was bulletined at 7.

The Fullerton election board declared a recess of three-quarters of an hour for supper, and it was after 9 o'clock when the report came in.

Placentia reported at half-past 8.

A large crowd gathered in front of the office all day yesterday and on Tuesday evening awaiting the returns, which were posted up as fast as received.

The Result.

Superior Judge—West 1391, Ballard 816.
Treasurer—Potter 1720.
County Clerk—Beckett 1500, Newberry 674.
Auditor—Hall 1104, Smart 773, Munger 292.
Sheriff—Nichols 1120, Snover 584, Meacham 461.
Tax Collector—Wright 1068, Hardy 970.
District Attorney — Langley 1094, Williams 1072.
Recorder—Peters 1348, Lewis 776.
Assessor—Vegely 1277, Yount 361, Flook 467.
Surveyor—Sherwood 1598.
Superintendent of Schools—Nichols 822, Carpenter 802, Davis 529.
Coroner and Public Administrator—Smith 1139, McKinley 935.
Assembly — Amerige 1068, Hasson 970.

The Supervisor

The contest for supervisor developed the running powers of Billy Hale, who defeats Bradford decisively. The vote of the district is as follows:

	Hale.	Bradford.
Anaheim No. 1.	45	25
Anaheim No. 2.	15	20
West Anaheim	64	25
Fullerton	108	32
Placentia	27	30
Buena Park	72	25
Olinda	55	22
La Habra	10	1
Total	396	170

In the first district H. E. Smith of Santa Ana was nominated; in the second, J. Fulsom of Garden Grove; in the third, Billy Hale; in the fourth, D. S. McMullan; fifth, G. C Holderman.

Judge Shanley was unanimously renominated for justice of the peace of Anaheim township, and S. O. Llewelyn constable.

Late this (Wednesday) afternoon news comes from all points in Orange county that Gage has swept the county.

Off for Berkeley.

Welborn Wallopp and Bowman Merritt left on Tuesday for Berkeley to enter the university. Steve Himpan and John Dauser go north on Sunday and Carl Zeus Wednesday.

A. G. Baker is already there, as is also Snyder of West Anaheim.

C. C. Miller was a business visitor in town on Tuesday and made us a pleasant call.

Mrs. Groat of Los Angeles was the guest during the week of the families of Mr. Rea and Mr. Rogers.

Prof. Mills, the Fullerton nurseryman, was in town on Tuesday getting a line on how the primary election was going.

Bob Graham came over from Santa Ana yesterday to look over the political situation after the republican primaries.

Mrs. Spoerl sustained a surgical operation some days ago for cancer of the breast. Her condition is critical, but hopes are entertained for a more favorable turn.

Frank Ey was defeated in his contest for nomination as supervisor in the Santa Ana district. H. E. Smith was the successful nominee, defeating Ey and Nickey.

Mr. Crowther stepped upon a rusty nail at his home some days ago, and has been getting about with a bad limp to starboard. One day last week he was kicked in the shoulder by a vicious horse and was laid up for several days. No permanent injury resulted.

L. Good, who for four years past has been principal of the Olive school, has resigned, after having been elected for the fifth year, and will go to Sonoma county, where he has been offered the principalship of a school at advanced salary. Their friends at Olive on Friday evening tendered Mr. Good and his family a very happy surprise party, during which regrets were expressed at their coming departure.

Samuel Shallenberger, aged 22 years, of Santa Ana, was shot in the arm some days ago by the accidental discharge of a shotgun while hunting rabbits in the Aliso hills. Shallenberger had three companions and was hunting somewhat apart from them. His gun was discharged while he was killing a wounded squirrel and beating it with the butt. The charge of shot passed through his arm just below the shoulder, shattering the bone, tearing the flesh loose and severing the arteries. He was brought to town and his arm amputated. He is in a fair way to recover.

Mr. Boswell and other Fullerton hunters were in the Brea canyon hills last week when they ran across a crazy Frenchman, who shot at Boswell with a long pistol, but missed. The man made all sorts of motions, one of which was to shake a red handkerchief on the top of a pole. The hunters think he escaped from an asylum. He has been in the canyon hills several days, and residents are afraid of him. Some days ago he fired one of his pistols—he carries one in each boot leg—into a tent, but no one was injured. As he started for the hills one of the men fired a load of birdshot at him, and it is believed it took effect. The matter was reported to the Fullerton officers, who will try to capture him.

Beware of Ointments for Catarrh That Contain Mercury

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. E. Cheney & Co., Toledo, Ohio, contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free

Sold by druggists, price 75c. per bottle.
Hall's Family Pills are the best.

Only a Mask

Many are not being benefited by the summer vacation as they should be. Now, notwithstanding much outdoor life, they are little if any stronger than they were. The tan on their faces is darker and makes them look healthier, but it is only a mask. They are still nervous, easily tired, upset by trifles, and they do not eat or sleep well. What they need is what tones the nerves, perfects digestion, creates appetite and makes sleep refreshing, and that is Hood's Sarsaparilla. Pupils and teachers generally will find the chief purpose of the vacation best subserved by this great medicine which, as we know, "builds up the whole system."

ROYAL BAKING POWDER CO., NEW YORK.

PERSONAL MENTION

Bob Dunn came over from Redlands on Monday on a short visit.

Henry Strodthoff and wife are spending a few weeks at Long Beach.

Mrs. Cahen and family leave on Saturday for an outing at Laguna beach.

Judge Shanley formed one of a party visiting Hermosa beach over Sunday.

Miss Elizabeth Kuchel is the guest of relatives and friends in San Diego.

Mrs. Koenig spent several days last week visiting with friends in Los Angeles.

Marion Aubrey of San Francisco visited with friends in town a few days ago.

Mr. Bruce boarded an early train for Newport beach on Friday to try his hand at fishing.

A. T. Pendleton and family, of Placentia, are spending several weeks at Newport beach.

A. C. Jennings is home from Sonoma county for a week's visit with friends and relatives.

Miss Kate Rea is suffering from a badly sprained ankle, sustained at her home several days ago.

Mr. Spooner came down from Los Angeles a day or two ago to cast an eagle eye over his fine orchard tract west of town.

Misses May and Irene Cargill depart on Saturday for Yuma to join relatives. Little Miss Lydia Harrison accompanies them.

Henry Husman went to Los Angeles on Tuesday and shook hands with the governor. Now all the boys look at Henry as he passes by.

Madame Modjeska departs on Saturday from Santiago for her old home in Poland. She will be accompanied by her husband, Count Bozenta.

Arthur Lewis has returned from a fortnight's outing at San Juan springs, and has resumed his position as electrical engineer at the power-house.

Herb Morton writes his parents from Japan that he will be home in October. Herb has been gone four years. He has been to the Klondike and the South seas.

Frank Buther has sold his ranch at Yorba and has moved with his family to this city to reside. He has rented the Stechert cottage near the school house.

Frank Nemetz and Miss Etta McClellan, two popular young people of this city, were married on Wednesday and will make Anaheim their permanent home.

Mr. Goodale is up and about again after an illness of several days, during which appendicitis threatened. No operation was necessary, and Mr. Goodale is well along on the road toward recovery.

Stuart Cargill leaves shortly for Terra Haute, Ind., to enter the college of electricity in which Fred Lewis has been a student. Paul Turk and Hans Weisel also contemplate attending the same school.

Mrs. Gene Owen of Chicago was the guest of Mr. and Mrs. Rogers during the week. She recently returned from Honolulu, where she has a son employed as electrical engineer. She departs by way of San Francisco on her return to her home in the east.

Otto Strodthoff has returned to Jerome, A. T., where he is confidential clerk and adviser to Senator Clark in his extensive copper mining properties. "Ot" spent a week fishing at Avalon, and tells us he caught the biggest fish ever landed at that point.

Frank Schwentker is home from Fresno for a few weeks for an outing at the coast, having been driven south by the excessively warm weather. He will spend a few days at the beach, and will then go with his family on a camping tour up the Santa Ana canyon.

C. H. Nickey has opened a plumbing and tinning establishment in the Schauman block on Los Angeles street, and will do a general jobbing business. He will make a specialty of the latest devices in plumbing, and being a first-class mechanic guarantees satisfaction in all lines.

Mr. Blennerhassett came down from Los Angeles on Tuesday to vote at the primaries. He also paid a visit to the San Joaquin ranch, where he is interested in the building of a dam across a channel in the bay. A new gun club will form a game preserve here, and Mr. Blennerhassett will be one of its leading lights.

Mrs. Helmsen, mother of our fellow-townsman, Joseph Helmsen, has been ill for some days past with a complication of disorders superinduced by old age. She is aged 77 years, and for some time past has suffered from failing sight. She suffers no pain, but is in a weakened condition. Her friends hope for a more favorable turn.

THE MAN AND GOVERNOR

There are a few people—those who do not follow closely the trend of political events, and who have not the full information necessary to correct analysis of political conditions—there are a few such people who are honestly and sincerely opposed to the renomination of Governor Gage. They have been misled and misinformed by the claptrap and mendacity of the Governor's political enemies. They do not bear or heed, politically speaking, until some great hue and cry is raised. Then they begin to ask why this, why that, and why the other. They are childlike and bland. They still believe in old adages—that, for instance, which declares that "where there is so much smoke there must be some fire." They do not seem to realize that, just as the science of chemistry can produce a great deal of smoke without any fire whatever, so the black art of political chicanery can sometimes make an honest and able man appear the veriest incompetent and the greatest rascal.

One of these credulous indviduals asked, the other day, "Is it true that no governor of this state has ever been given a second term?" He was told that that was true. "Why, then," he asked, "should Governor Gage ask for a second term?" Why shouldn't he? Well, the credulous individual didn't know why he shouldn't. One reason is, probably, that he desires to vindicate his character and administration, which have been foully attacked by those who have futilely sought to control his official acts in the interest of personal ambitions and selfish aims and ends. Another reason may be that he desires opportunity to round out and complete, in the light of experience, an executive policy impossible fully to develop during a single term. And, moreover, the very fact that no other governor has ever been given a second term is sufficient to fire any virile man with the laudable ambition to break the record and secure for himself a recognition in keeping with his ability and integrity and his devotion to his official duties and responsibilities.

Another political innocent asks if it isn't undignified for the governor of a great state to leave his office to personally manage his campaign for re-election. Dear heart! What man with marrow in his bones will stand on his dignity when his honor and his family's good name are assailed by political iconoclasts! Governor Gage would be less than a man if he did not fight with all the fury of an outraged soul against the malignant mendacity of the pot house politicians who are hell-hounding him in this campaign.

And still another political purist wants to know if it isn't a fact that Governor Gage tried to force the election of Dan Burns to the United States senate. No, it is not a fact. Long before he was thought of as a candidate for governor, Henry T. Gage went on record as favoring the election of both governor and senator from the south. He strenuously insisted that it could be done. And so far as can be ascertained neither Gage the man nor Gage the governor ever did or said anything in the least inconsistent with the position he had taken in this matter. Col. Burns is on record as having stated that he asked Gage not to use his influence in any way in his (Burn's) behalf. And in all the controversy, discussion and agitation of this question never a senator or assemblyman has been found who would say that Governor Gage ever tried in any way to influence his vote for senator.

The entire course of Henry T. Gage, both as governor and in this campaign, is the florescence of a noble, a loyal and a courageous soul, qualities which have caught the man to the hearts of his friends with hooks of steel and made him a terror to his enemies.—Pasadena Star.

Mike De Young Insane?

SAN FRANCISCO, Aug 2nd.—Upon the most reliable authority it is reported that M. H. DeYoung, proprietor of the San Francisco Chronicle, who is now in Paris, is the victim of a mental malady which threatens to lead to his utter incapacity. He is said to be undergoing treatment from the most celebrated mental specialists in Europe and is under the care of two nurses. These reports, as might be expected, meet with denials, but the truth of the story was admitted by one of Mr. De Young's most intimate friends. It is doubtful whether he will ever again be able to attend actively to business.

Mr. DeYoung has led a strenuous life. He devoted himself for years to making money, and finally became ambitious for political distinction. There is no doubt that his unsuccessful attempt to become United States senator greatly embittered him and affected his health. It was a severe blow to his vanity, and his paper has been used ever since as a bludgeon with which to revenge himself upon those whom he regarded as instrumental in causing his defeat. DeYoung went abroad a few months ago with his wife and daughter to attend King Edward's coronation. Before his departure his changed demeanor excited comment, and the story now current of his mental decay finds wide credence.—L. A. Herald.

Chamberlain's Colic, Cholera and Diarrhoea Remedy has a wide reputation for its cures. It never fails and is pleasant and safe to take. For sale by all druggists.

GAVE HIS CONSENT

"I want your daughter," said the young man, aggressively.

The old man was shrewd.

"Have you got her?" he asked.

"I have."

"Then take her."

A Young Lady's Life Saved

At Panama, Colombia, by Chamberlain's Colic, Cholera and Diarrhoea Remedy.

Dr. Chas. H. Utter, a prominent physician of Panama, Colombia, in a recent letter states: "Last March I had as a patient a young lady of sixteen years of age who had a very bad attack of dysentery. Everything I prescribed for her proved ineffectual and she was growing worse every hour. Her parents were sure she would die. She had become so weak that she could not turn over in bed. What to do at this critical moment was a study for me, but I thought of Chamberlain's Colic, Cholera and Diarrhoea Remedy and as a last resort prescribed it. The most wonderful result was effected. Within eight hours she was feeling much better; inside of three days she was upon her feet, and at the end of one week was entirely well." For sale by all druggists.

FRITZ GETS ANOTHER STOPPER

Superior Judge Cook Issues a Restraining Order Against His Proceeding With the Dummy Case.

Governor Gage's libel suit instituted against John D. Spreckels and W. S. Leake, proprietor and manager of the San Francisco Call, was before two judges in that city on Saturday.

While Superior Judge Carroll Cook was issuing a restraining order upon the petition and affidavit of J. C. Rives, district attorney of Los Angeles county, halting the proceedings now pending on the calendar in Judge Fritz's department of the police court, the latter passed upon the motion made some days ago by Attorney A. A. Moore in behalf of Governor Gage demanding that the attitude in the case of Louis P. Boardman be investigated.

Judge Fritz held that if there was a collusion between Boardman, the nominal plaintiff, and J. D. Spreckels the fact would develop during the trial of the libel case. The court therefore overruled the motion made by Moore, but also removed Boardman from the prosecution, forbidding him to take an active part in it and instructing the district attorney to perform his duty in prosecuting the case.

Judge Fritz was then served with an injunction from the superior court forbidding his taking further action. The trial had been set for Monday next, but the police court is now estopped. The petition upon which the injunction is based is similar to that which was before Judge Sloss, with the exception that in the former proceeding Governor Gage was named as the beneficiary, and in this instance the commonwealth is substituted.

There was the usual array of legal talent in court, but no material arguments were made. Attorneys Peter F. Dunne and J. J. Lerman argued the matter before Judge Cook, whose injunction is made returnable next Friday morning at 10 o'clock.

A Cure for Cholera Infantum

"Last May," says Mrs. Curtis Baker of Bookwalter, Ohio, "an infant child of our neighbor's was suffering from cholera infantum. The doctor had given up all hopes of recovery. I took a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy to the house, telling them I felt sure it would do good if used according to directions. In two days' time the child had fully recovered, and is now (nearly a year since) a vigorous, healthy girl. I have recommended this remedy frequently, and have never known it to fail in any single instance." At all druggists.

PERSONAL

They haven't got Senator Spooner defeated yet.

Kaiser Wilhelm has not paid that long anticipated visit to Paris as yet. The dove of peace hasn't flown that far.

If Mr. Cleveland were not a power in politics would Mr. Bryan waste his valuable time throwing mud at the venerable sage of Princeton?

Secretary Hay's summer home can't be reached except by those who are taught the intricacies of the road leading thereto. Mr. Hay has a great head

Before committing suicide a Philadelphia man willed his $100,000 life insurance to his creditors. This way of paying debts will not become popular so long as there are courts of bankruptcy.

President Roosevelt has furnished the Democrats with another fine campaign argument. He has been diminishing the treasury surplus by buying an $18 pair of shoes, and he paid for them out of his salary.

The newspapers are marrying off prominent people at a great rate now. They have arranged a match between Miss Alice Roosevelt and Lieut. Robert Clark, son of Bishop Potter's fiancee, and the richest young man in the army.

Cured Paralysis

W. S Baily, P. O. True, Texas, writes: "My wife had been suffering five years with paralysis in her arm, when I was pursuaded to use Ballard's Snow Liniment, which cured her all right. I have also used it for old sores, frost bites and skin eruptions. It does the work." 25c, 50c and $1 bottles at J. P. Hatzfeld's.

COHERENT ANSWER

Helen—I have just refused to marry Mr. Gingerley.

Edith—O! Did he propose?

Helen—Well, I can't say, positively, but that is how I construed his incoherent remarks.

Their Secret Is Out

All Sadieville, Ky., was curious to learn the cause of the vast improvement in the health of Mrs. S. P. Whittaker, who had for a long time endured untold suffering from a chronic bronchial trouble. "It's all due to Dr. King's New Discovery," writes her husband. "It completely cured her and also cured our little grand-daughter of a severe attack of whooping cough." It positively cures coughs, colds, la grippe, bronchitis and all throat and lung troubles. Guaranteed bottles 50c and $1 Trial bottles free at Hatzfeld's drugstore.

SUMMER SCHOOL

"I hear that Claribel has given up her music lesson," remarked Mabel.

"Yes," responded Genevieve, "but she has taken up another study."

"What is it?"

"Why, haven't you heard? George is trying to teach her to love him."

Astonished the Editor

Editor S. A. Brown of Bennettsville, S. C., was once immensely surprised. "Through long suffering from dyspepsia," he writes, "my wife was greatly run down. She had no strength or vigor and suffered great distress from her stomach, but she tried Electric Bitters which helped her at once, and after using four bottles she is entirely well and can eat anything. It's a grand tonic, and its gentle laxative qualities are splendid for torpid liver." For indigestion, loss of appetite, stomach and liver troubles it's a positive, guaranteed cure. Only 50c at J. P. Hatzfeld's.

TOO OLD A STORY

He—Are you fond of fiction, darling?

"Yes, darling, but don't tell me I am the only girl you have ever loved."

A Worm Killer

J. A. J. Montgomery, Puxico, Wayne Co., Mo., writes: "I have little twin girls who have been bothered with worms all their lives. I tried everything to relieve them, but failed until I used White's Cream Vermifuge. The first two doses brought four worms from one of them; the next two doses twelve, one of them measuring twelve inches. The other child was only relieved of four worms. It is a most excellent medicine." White's Cream Vermifuge is good for children. It not only destroys worms, it helps the child to perfect growth and wards off sickness. 25c at J. P. Hatzfeld's.

THE CAMPANILE

The famous bell tower of St. Mark's in Venice, the Campanile, fell over the other day, and is now a mass of ruins. It was one of the most remarkable and lofty structures, and stood among such constructions as one of the finest examples known to architecture. But it stood upon a foundation of piling. As long as properly prepared piling is covered by water it will last practically forever. But if the piling is at times exposed to air it decays. The weight in that case presses most upon the weakened part, pushing out the piling on that side and throwing the structure out of plumb.

That is what probably happened to the Campanile. At any rate, twelve years ago a Venetian architect, Signor Vendrasco, warned the government that the great and beautiful tower would fall over. Thereupon a commission was appointed to examine, and it reported the tower safe, and Vendrasco was officially reproved. In 1892 Vendrasco again wired the government that the tower was in danger. A second commission was appointed, examined the building and pronounced it safe, and Vendrasco was again rebuked officially, removed from the office he held and cashiered as an architect.

Lately workmen cut a hole in one of the walls to put in a fireplace for the use of the custodian. Vendrasco protested, but in vain.

At 5 o'clock on the morning of the disaster the old architect announced: "The Campanile will fall in a few hours," and in a few hours down came one of the most famous piles in Europe. But Vendrasco, heart-broken, had left the city. None knew whither he had gone, but the government has sent for him to return, and proposes to acknowledge that he was right and to remove the disbarment fulminated against him. He knew that the piling foundation was pushing out, and foresaw what must happen when it gave way on one side.

The walls were structurally sound. There was no defect in the masonry, and the great tower would have stood for ages more had its foundation been perfect. The question now is, will it be rebuilt? Italian architects say the cost will be too great—$1,200,000 is a low estimate. Some say it cannot be reconstructed under existing environment, but famous French architects say it can be rebuilt, and the Italian government is about resolved to undertake it.

The Russian Czar has sent an offer of subscription to a rebuilding fund; Emperor William of Germany has tendered offers of aid; King Victor Emanuel has subscribed $200,000, and offers of contributions have come from English and American people. But the Italians are disposed to reject all foreign aid and make reconstruction a purely national affair.

Among architects there is wide division of sentiment about rebuilding, a large body of them advising against it, on the ground that a reconstructed tower will never be recognized as a work of classic times. It will be at best an imitation. They think the ruins more impressive than any reconstruction possible. But the burden of sentiment just now is in favor of rebuilding the tower and making it just what it was in the first place, using, just as far as practicable, the old material, and that can be done to a considerable extent.

It was from the Campanile, erected in 888, that Galileo made many of his observations. It was a quadrangular structure of brick, and stood 323 feet in height, on a base at the street surface of 42 feet square. Its destruction removes the most striking architectural sight of Venice and the loftiest example of architectural art in that famous city.—Record-Union.

Watch for a Chill

However slight at this time of year and in this climate, it is the forerunner of malaria. A disposition to yawn and an all tired out feeling even comes before the chill. Herbine, by its prompt stimulative action on the liver, drives the malarial germs out of the system, purifies the blood, tones up the system and restores health. 50c at Hatzfeld's.

Beet Harvest

Beet harvest has been in progress a week. Carloads of beets are arriving at the factory at Chino from Fulton Wells, Cudahy, Compton, Norwalk, Benedict and Buena Park. The harvest on the Chino ranch will not commence for a week, as most of the beets there have been maintaining a vigorous growth and have not commenced to ripen. The yield promises to be the heaviest per acre ever harvested on the Chino ranch. Mr. Hache is looking over the fields and will decide when to commence the harvest.

Inside the factory all is activity. A big lime kiln was fired some days ago and a supply of lime burned ready for use. All the lime supply for the factory comes from Oro Grande.

Six carloads of molasses have been received from the Los Alamitos factory, and this enabled the company to start the Steffens plant together with the rest of the factory. Without this molasses the Steffens house could not be operated until molasses could be accumulated in the main factory. The Los Alamitos factory has no Steffens plant in which to work up molasses.

Manager Schroeder has visited all of the outside shipping points, instructing the men in charge in their duties.

K. Rudorf went over the outside fields with L. Hache in order to familiarize himself with the crop conditions at the different points.

Santa Fe Beach Rates

The Santa Fe is now selling round trip tickets every Saturday and Sunday at greatly reduced rates to the following beaches: Redondo, Long Beach, East San Pedro, Terminal Island, Catalina Island. The Santa Fe is the best line to all these points. Most frequent trains and best service. Inquire for full information at Santa Fe depot at Anaheim. jun26-sep30

Coronado Excursions

Every day the Santa Fe sells tickets to Coronado and return for $3.50. Special $3.00 excursions to San Diego. Inquire of agent at Santa Fe depot for full information giving dates, also for Coronado booklet. jun26-sep25

For Sale Cheap.

FACTS ABOUT ANAHEIM

Sketch of the Industries and Resources of this Most Beautiful Part of California.

The City of Anaheim, with a population of 2500, is situated in the northern part of Orange county, in Southern California, 12 miles from the ocean, 4½ miles from the foothills, and 148½ feet above sea level. It is 27 miles from Los Angeles, the second largest city in the State of California.

The climatic conditions are the most favorable for out-door life to be found in Southern California. The temperature is extremely uniform, seldom rising above 90 degrees in summer, or falling below 32 degrees in winter. The abundance of sunlight and the absence of sharp frosts and cold winds make it a place especially acceptable to those desiring to escape the severe climate of the east.

The country is very attractive. It is practically level, with just sufficient slope from the hills to afford adequate drainage. The roads are level, well graded, and well kept, affording excellent opportunities for cycling and driving. The soil is a rich sandy loam which never bakes, making it a very easy ground to work; thus lending itself readily to the cultivation of berries, nuts, oranges, etc.

The variety of products, and the possibility of procuring small tracts of land at low figures, and on easy terms make our section of the county very attractive and advantageous for diversified farming on a small scale. The following are a few of the products: oranges, lemons, walnuts, grapes, peaches, apricots, sugar beets, berries and vegetables of all kinds.

Anaheim is the possessor of a Building and Loan Association, Water company, two railroads, fruit cannery and drier, large oil industry, ostrich farm, bank, several adequate commercial houses, two hotels and two newspapers. The city also owns its water and lighting plant.

FACTS ABOUT ORANGE CO.

THE census bureau has issued a bulletin on agriculture in California which we quote from extensively in another part of this issue. One of the interesting features of the report is the paragraph giving the number of farms and acres of farming lands in the five Southern California counties. The pre-eminence of Orange county is apparent:

Counties.	No. farms.	Acres.
Los Angeles	6577	895,063
Orange	2388	506,436
Riverside	2340	427,097
San Bernardino	2350	219,132
San Diego	2698	809,419

But it is in the acreage of irrigated lands that Orange county takes easy precedence over the other counties of Southern California:

Counties.	Acres.
Los Angeles	85,644
Orange	41,549
Riverside	32,947
San Bernardino	37,877
San Diego	16,022

The area of Orange county is 780 square miles; that of Los Angeles, 3880; that of Riverside, 7008; that of San Bernardino, 20,055, and that of San Diego, 8400 square smiles.

Orange county thus contains one-fifth the area of Los Angeles; yet its irrigated lands approach in area to one-half those of its neighbor to the north.

Riverside embraces nine times its area, yet it irrigates 9000 more acres, or a fourth more than the belauded county on the east.

San Bernardino is 25 times its size, yet its irrigated acres exceed those of this jumbo county by nearly 4000, approximately ten per cent.

San Diego is eleven times its size, yet it irrigates 25,000 acres more than the county on the south—300 per cent is the former's irrigated area as compared with that of the latter—almost the irrigated area of San Diego and Riverside combined.

Orange county possesses the finest system of irrigation, the most secure water rights, that exist in Southern California. That is what we have said many a time and oft. These figures prove it. It is the handsomest and most productive county that lies outdoors and is settling up faster than any other in the State.

The Triumph of Danny.

Several years before the discovery of oil at Pithole an Irishman named McCarthy and his son Dan came to this country from the Emerald Isle. Dan was a young man of 20, but his father looked upon him as a mere boy and seemed to take delight in ridiculing him before people.

"Yis, Dan is a good b'y," he would say sarcastically, "but, Danny, me b'y, yez'll niver set the river on fire."

This was his stock witticism, and it annoyed Dan very much, but he did his best and soon surprised the old gentleman by securing a lucrative job.

"Yis, Danny has a job all right," he said. "It's $1.50 a day, but the b'y'll niver set the river on fire. Not he."

When oil was found at Pithole, Dan hurried to the scene and was soon earning unusually large wages as a teamster. All the petroleum was drawn in barrels, and teams were in great demand. He saved his money, bought an acre of land and soon had a well drilled that was producing 100 barrels of oil per day at $10 per barrel. The elder McCarthy joined him, saw the well, received a liberal gift of money, and then shook his head ominously.

"'Tis a good thing, Danny," he croaked; "ye're doin well, but mark me worruds, yez'll niver set the river on fire, me b'y."

A few days later a flood wrecked one of Dan's small wooden tanks, the oil ran down the river, and there was great excitement. As Dan and his father stood on the bank watching the oil float away Dan drew a match and lighted it.

"Father," he said coolly, "the next toime yez say Oi'll niver set the river on fire plaze rimimber that Oi had a chance wanst, and—and didn't do ut, bedad!"

Then he blew out the match.—Harper's Bazar.

"I caught myself just in time this morning," exclaimed Mr. Meekton. "I came very near annoying Henrietta quite severely."

"By some remark?"

"No, I started to whistle 'The Girl I Left Behind Me,' but stopped before she could recognize it."

"She dislikes the tune, then?"

"I don't know that she dislikes the tune. But I am sure Henrietta would resent any insinuation that the girl was not away in the lead, no matter what the occasion might be."—Washington Star.

Production of Minerals

Continued from First page.

($15,750); Madera in granite ($294,799); Nevada in gold ($2,121,054) and Napa in quicksilver ($388,176). Riverside leads in asbestos ($4,400), clays for pottery, etc., ($16,624) and quartz sand ($500). San Bernardino leads in borax ($898,130), cement ($159,842), limestone ($76,710), rubble ($151,447) and torquoise ($20,000). San Diego leads in lithia mica ($27,500) and tourmaline ($20,000). San Francisco quarried the most macadam ($142,500). San Luis Obispo produced most values in bituminous rock ($33,070). The most asphalt came from Santa Barbara ($55,800). The most lime was burned at Santa Cruz ($161,500). Shasta county made the largest product of copper ($4,481,048), silver ($891,994) and chrome ($1,950). The largest values in mineral waters was from Siskiyou ($175,000). Sonoma produced the most graphite ($4,480) and paving blocks ($32,675). The most mineral paint was from Stanislaus ($375), and largest quantity of magnesite from Tulare county ($28,210).

It will be noted that only one county leads in five substances—San Bernardino. Two counties lead in four articles—Alameda and Los Angeles. Those which lead in three are Kern, Riverside and Shasta. The counties of Inyo, San Diego and Sonoma lead in two products. The other counties named in the "banner" counties only have the lead in one substance each.

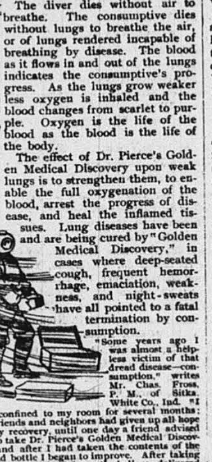

Physician and Druggists

Ford & Simpson, a prominent drug firm at Rocky Hill Station, Ky., write: "We were requested by Dr. G. B Snigley to send for Herbine for the benefit of our customers. We ordered three dozen in December, and we are glad to say Herbine has given such great satisfaction that we have duplicated this order three times, and today we gave your salesman another order. We beg to say Dr. G. B. Snigley takes pleasure in recommending Herbine." 50c bottle at J. P. Hatzfeld's

HEROIC MEASURES

Dr. Pills—How did you manage to collect the bill that Closefist owed you?

Dr. Squills—I told him that if he didn't pay I would advise his wife to go to Europe for her health.

The diver dies without air to breathe. The consumptive dies without lungs to breathe the air, or of lungs rendered incapable of breathing by disease. The blood as it flows in and out of the lungs indicates the consumptive's progress. As the lungs grow weaker less oxygen is inhaled and the blood changes from scarlet to purple. Oxygen is the life of the blood as the blood is the life of the body.

The effect of Dr. Pierce's Golden Medical Discovery upon weak lungs is to strengthen them, to enable the full oxygenation of the blood, arrest the progress of disease, and heal the inflamed tissues. Lung diseases have been and are being cured by "Golden Medical Discovery," in cases where deep-seated cough, frequent hemorrhage, emaciation, weakness, and night-sweats have all pointed to a fatal termination by consumption.

"Some years ago I was almost a helpless victim of that dread disease—consumption," writes Mr. Chas. Fross, P. M., of Sitka, White Co., Ind. "I was confined to my room for several months; my friends and neighbors had given up all hope of my recovery, until one day a friend advised me to take Dr. Pierce's Golden Medical Discovery, and after I had taken the contents of the second bottle I began to improve. After taking six bottles I was, I honestly believe, delivered from the grave and entirely cured. I am now a strong and hearty man."

Dr. Pierce's Pleasant Pellets cleanse the clogged system from accumulated impurities.

Everybody Knows About

Pain-Killer

A Household Medicine

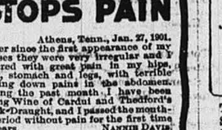

A Safe and Sure Cure for

Cramps Coughs Bruises
Diarrhœa Colds Burns
Sprains and Strains.

Gives instant relief.

Two sizes, 25c. and 50c.

Only one Pain Killer, Perry Davis'.

STOPS PAIN

Athens, Tenn., Jan. 27, 1901.
Ever since the first appearance of my menses they were very irregular and I suffered with great pain in my hips, back, stomach and legs, with terrible bearing down pains in the abdomen. During the past month I have been taking Wine of Cardui and Thedford's Black-Draught, and I passed the monthly period without pain for the first time in years. NANNIE DAVIS.

What is life worth to a woman suffering like Nannie Davis suffered? Yet there are women in thousands of homes to-day who are bearing those terrible menstrual pains in silence. If you are one of these we want to say that this same

WINE OF CARDUI

will bring you permanent relief. Console yourself with the knowledge that 1,000,000 women have been completely cured by Wine of Cardui. These women suffered from leucorrhoea, irregular menses, headache, backache, and bearing down pains. Wine of Cardui will stop all these aches and pains for you. Purchase a $1.00 bottle of Wine of Cardui to-day and take it in the privacy of your home.

For advice and literature, address, giving symptoms, "The Ladies' Advisory Department," The Chattanooga Medicine Co., Chattanooga, Tenn.

HUMOR

ANXIOUS TO TRADE.

A "Woman's Exchange" Was What Hiram Was Looking For.

Mr. Hiram Henpekt of Frog Hollow had finished his business in the city and was slowly drifting along with the tide of humanity toward the Pennsylvania railroad ferry when his attention was suddenly attracted by a sign on a building he was passing.

This is what he read: "Woman's Exchange."

A smile of anticipation lighted up his countenance as he turned aside and entered the building.

A middle aged, sharp featured lady in eyeglasses came forward and bowed to him as he stepped up to the counter, and after slowly looking her over he said:

"Excuse me, madam, but air you the only one they've got on hand at present?"

"The only one on hand? What do you mean?" was the puzzled reply.

"The only woman, of course. I hain't got Hanner along with me today, but I noticed that this was a woman's exchange, an I thought I'd drop in an look over what you had on hand an if I liked the looks of any of 'em I'd bring the old woman in the next time I come to the city an make a trade."

Gently but firmly the lady in charge explained his mistake to him, and Mr. Hiram Henpekt of Frog Hollow resumed his homeward journey, a crestfallen and bitterly disappointed man.—Will S. Gidley in New York World.

No Wonder He's Successful.

One of the most successful colored politicians in North Carolina is Cicero Urkart, according to the testimony of his home paper, which says of him:

"Cicero was elected constable of Woodville township at the last election. In the interval between election and bonding time Cicero put in his nights, it is alleged, stealing cotton from William Hardy, colored. Cicero was indicted for larceny, and while the jury was out Cicero ran away. The jury failed to agree—standing 11 white men for conviction and a negro preacher for acquittal. Cicero went down to Norfolk, where he lived happily ever afterward."

Ready For Emergencies.

"Look here, conductor," said the nervous passenger, "I notice the trestles are rotten and the track out of line and cannot help thinking this road is very dangerous."

"No need to worry a moment," answered the conductor. "The company has taken proper precautions. Every train carries a life insurance agent, who can write you a policy in five minutes. You'll find him in the next car."—Atlanta Journal.

The Policeman's Dilemma.

The policeman looked after the man on the bicycle and shook his head doubtfully. He watched him wabble up the street and then wabble back again, and he was sore troubled.

"Hi, there!" he yelled at last. "Git off that wheel wanst till I see whether you're drunk."

Well he knew that on a bicycle the signs of inebriety are sometimes misleading.—Chicago Post.

Vocal Shakes.

"Why does Miss Howler let her voice shake so when she is singing 'On the Banks of the Wabash?'"

"That's her idea of realism. She knows there ain't a river in the world that can hold a candle to the Wabash for fever'n ague."—Cleveland Plain Dealer.

More Accurately Expressed.

"May I ask which of the city's political faction you belong to?" said the stranger.

The boss looked at him sternly and then responded, "What you doubtless mean to ask, sir, is which political faction belongs to me."—Washington Star.

A Man's Diagnosis.

"George, did you notice Mrs. Highroller's new bonnet?"

"Yes, of course. Wasn't it lovely? It looked like one of your lace tidies wopsed up with two feathers, a decanter stopper and a wad of red necktie sticking out of it."—New York Truth.

Why Fido Yelped.

Wife (suddenly awakening)—Hark! What's the matter? Fido is way down stairs, yelping as if he were hurt. What's happened to the little dear?

Husband—I threw him at a burglar. —New York Weekly.

A Long Farewell.

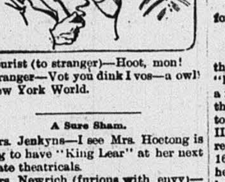

The Blond—Did he bid you a long farewell?

The Brunette—Yes, from 9 p. m. until 2 a. m.—New York Journal.

More Honor to Them.

Spain is laughing at us because we couldn't get the O'Higgins. But that's all right. The O'Flahertys are with us.—Atlanta Constitution.

International Misunderstanding.

Tourist (to stranger)—Hoot, mon!

Stranger—Vot you dink I vos—a owl? —New York World.

A Sure Sham.

Mrs. Jenkyns—I see Mrs. Hootong is going to have "King Lear" at her next private theatricals.

Mrs. Newrich (furious with envy)—Is she, the affected thing? Do you know, I don't believe he's a real king at all. —London Fun.

CATARRH

COLD IN HEAD

ELY BROTHERS, 56 Warren Street, New York.

Finding a Fortune and Founding a Fortune.

A TRAMP'S LUCK AND AN ENERGETIC MAN'S PURPOSE.

It is perhaps true as told that a tramp, searching a garbage barrel for scraps of refuse food, found a fortune in good United States currency. Such a thing may happen.

But the workman who gives up a steady occupation however unremunerative to hunt garbage barrels for a fortune will surely degenerate to a tramp. There is a difference between finding a

fortune and founding a fortune. Few men chance upon fortunes. The fortunes we know about are not found but founded on a certain substantial basis. The nature of that basis of fortune is well set forth in the advice given by a successful merchant to a young man who asked, "What is the first requisite to making a fortune?" "The first requisite to making a fortune" said the rich man, "is health." "The idea that fortunes are *made* suggests toil and industry and skill. Nothing can be made without these. But a weak man cannot toil, and industry is incompatible with ill-health. If you want to be strong remember that all physical strength comes from food and that the amount of strength extracted from food depends upon the ability of the stomach to digest food and assimilate its nutrition. The man who takes care of his digestion is, in general, taking care of every other organ of his body."

SUCCESS AND THE STOMACH.

The merchant who gave the above opinion may not have been much of a physician but he was a good deal of a philosopher. He had seen men with success almost within the grasp, break down because of "stomach trouble." He had theorized the saying that the "weakest must go to the wall" into the saying that "the man with the weakest stomach must go to the wall," because no man is stronger than his stomach. The man who will learn this lesson of success has taken a great stride to his goal. Health is the first prerequisite of success and health in general means a sound stomach and a good digestion.

Look at the logic of the matter. Food is a man's life, his strength. Physical life is sustained by food. But the fact that a thing can be eaten doesn't make it food. Many a physician practising in the tenements of a city says of failing men or women, "What they need is *nourishing food*." Shipwrecked men eat scraps of leather, the bark of trees, anything to satisfy hunger. But this is not food in any true sense because it contains no nutrition. All food must be considered in relation to its nutritive value. When the stomach and the allied organs of digestion and nutrition are diseased the nutrition contained in food is imperfectly extracted and the body fails of nutrition adequate to its needs. The shipwrecked sailor living upon scraps in which there is no nutrition is on a level with the man who eats abundant nutritious food but whose stomach with its allied organs is diseased and therefore fails to extract from the food eaten the nutrition which is the body's need.

SOUND STOMACH, SOUND MAN.

That is almost an axiom. The man with a sound stomach and good digestion will in ordinary be a sound man, because the nutriment of food is the life and strength of heart, lungs, liver, kidneys and every organ of the body.

The first need of a weak man is to look after his stomach and his digestion. There is the common seat of physical weakness. How weak men have been made strong; strong of heart, liver, lungs, kidneys, and other organs by being made strong of stomach and strong of digestion has been told thousands of times by those who have used Dr. Pierce's Golden Medical Discovery.

"I write to tell you of the great benefit I have received from the use of Dr. Pierce's Golden Medical Discovery," writes Mr. G. B. Bird, of Byrnside, Putnam Co., W. Va. "It cured me of a very bad case of indigestion associated with torpid liver. Before I began the use of 'Golden Medical Discovery' I had no appetite; could not sleep nor work but very little. The little that I ate did not agree with me, bowels constipated, and life was a misery to me. I wrote to Dr. Pierce giving the symptoms, and asked for advice. You advised me to try the 'Golden Medical Discovery' so I began the use of it and after taking four bottles I felt so well that I went to work, but soon got worse, so I again began the use of it and used it about eight weeks longer, when I was permanently cured. I took in all twelve bottles of the 'Discovery' and some of Dr. Pierce's Pleasant Pellets in connection with the 'Discovery.'"

Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutrition. It cures through the stomach diseases which seem remote from that organ but which have their origin in disease of the stomach and its allied organs.

There is no alcohol in "Golden Medical Discovery" and it is entirely free from opium, cocaine and other narcotics.

Persons suffering from disease in chronic form are invited to consult Dr. Pierce by letter, *free*. All letters held as strictly private and sacredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.

There is no similar offer of free consultation by letter or free medical advice which has behind it an institution such as the Invalids' Hotel and Surgical Institute, Buffalo, N. Y.

There is no similar offer of free medical advice which has behind it a physician of Dr. Pierce's skill and success. In a little more than thirty years Dr. Pierce, as chief consulting physician to the Invalids' Hotel and Surgical Institute, assisted by his staff of nearly a score of physicians, has treated and cured hundreds of thousands of men and women.

IS YOUR LIFE WORTH 21 CENTS?

It may often happen that the issue of life or death depends upon knowing what to do and how to do it in a crisis. Dr. Dierce's Common Sense Medical Adviser is full of helpful information which may at any time mean the saving of a life. This great work containing 1008 large pages is sent *free* on receipt of stamps to pay expense of mailing *only*. Send 31 one-cent stamps for the cloth-bound volume or only 21 stamps for the book in paper-covers. Address Dr. R. V. Pierce, Buffalo, N. Y.

The English Walnut.

Possibly few trees in the old world are more profitable than the English walnut, which thrives in England and all over the northern part of the continent of Europe. The wood is especially used for gun stocks and for many articles of furniture and is found profitable from trees of 10 years of age and upward. There is always a good demand for the nuts, so that there are two distinct lines of profit—by the timber and by the fruit. In our country they thrive in any portion of the eastern states, although as they progress northwardly the tips of the last year's shoots are destroyed by winter. The living portions push out again, however, and generally bear as abundantly as before.

In the vicinity of Philadelphia there are numerous trees, planted by the early German settlers, which bear every year. Single or isolated trees sometimes fail to bear fruit on account of the pollen bearing flower maturing and scattering pollen before the nut bearing flower is in condition to receive it, and for this reason crops are more assured when a number of trees are planted together. In this way some of the pollen bearing catkins are conditioned so as to be in bloom before the time that the nut bearing flowers make their appearance.—Meehan's Monthly.

The Bride's Perplexity.

May—What—frowning on your wedding day?

Fay—I'm in a quandary. If I go to the altar smiling people will say I'm simply crazy to get Charlie and if I look solemn they'll say I already regret the step. What shall I do?—Philadelphia Record.

Politically Hungary is divided into 63 counties, containing from 50,000 to 126,000 inhabitants. There are 26 cities endowed with self government. Budapest, the metropolis, contains about 600,000 inhabitants. The population of Hungary is about 15,000,000.

The French capital furnishes a market for 126,500 gallons of milk daily.

Chimney or Hearth Money.

What you call "chimney money" is the same as the house tax called "hearth money." It was established as a means of making up the deficiency in the revenue granted after the restoration to Charles II. It was repealed by I and II William and Mary, c. 10, but was reimposed in Scotland in September, 1690, at the rate of 1s. 2d. for every hearth. The repeal was one of the first boons conceded by William on his arrival.—"History of Taxation," by Dowell.

Navies of the World.

The Army and Navy Year Book rates the navies of the world as follows: 1, Great Britain; 2, France; 3, Russia; 4, Italy; 5, United States; 6, Germany; 7, Spain; 8, Japan; 9, Austria; 10, Netherlands. Under present naval contracts Japan in 1899 will go to the fifth place, crowding down the United States and Germany one point.

The oldest emblem of royalty in existence is the iron crown of the Lombards. The inner strip of iron, according to tradition, was beaten out of one of the nails used at the crucifixion. Its most distinguished wearers have been Charlemagne, Charles V and Napoleon.

Spanish Knights Looted by the Irish.

The Century has an article on "The Spanish Armada," written by William Frederic Tilton. An introduction is furnished by Captain Alfred T. Mahan. Mr. Tilton says:

The huge Venetian Trinidad Valencera, having sprung a desperate leak, ran for the Irish coast, and soon found herself off O'Dogherty's country, perhaps in Lough Swilly. Part of the crew swam ashore; others huddled into an old leaky ship's boat. A native rowed out toward them, and being promised a bagful of ducats and jewels helped land those in the leaky boat, while another Irishman, bent on richer spoil and heedless of the cries for help, rowed straight for the wreck, which went down while he was looting in the hold. No sooner had the Spaniards got ashore than "wild people," and even the queen's soldiers, fell upon them, robbing them of their "money, gold buttons, rapiers and apparel" and slaughtering numbers of them in cold blood. But one of the O'Donnells came to the rescue, had a great fire built for some of the officers and seemed to "pity their case, especially O'Donnell's wife."

One of these officers tells how he was lodged in the cabin of a fellow who sold ale and aqua vitæ and was ruffling it in a stolen "red cloak with buttons of gold." In the night he robbed his guest of 200 ducats, and the officer heard him "beat out barrels' heads and fill them with plate, money and jewels." The Spaniards, having saved no provisions, were forced to buy a few wretched horses, "which they killed and did eat, and some small quantity of butter that the common people brought also to sell."

Queerest Town In England.

The most curious town in England is Northwich. There is not a straight street nor, in fact, a straight house in the place. Every part of it has the appearance of having suffered from the visitation of an earthquake. Northwich is the center of the salt industry in Cheshire, England. On nearly all sides of the town are big salt works, with their engines pumping hundreds of thousands of gallons of brine every week. At a depth of some 200 or 300 feet are immense subterranean lakes of brine, and as the contents of these are pumped and pumped away the upper crust of earth is correspondingly weakened and the result is an occasional subsidence. These subsidences have a "pulling" effect on the nearest buildings, and they are drawn all ways, and give the town an extremely dissipated appearance.—New York Sun.

He Was Actually Clean!

Colonel Ibbetson, who died recently in England, was a capital whist player and an insatiable reader. In the interval between games he invariably plunged into a book, never indulging in futile discussions about the plays. He was the hero of the last sensational elopement to Gretna Green. Forty-four years ago he ran off with the Lady Adela Villiers, daughter of the Earl of Jersey. They were never fully pardoned, as it was thought that she had been guilty of a grave misalliance. Indeed the story is told that when they got back to town Lady Adela was reported to have exclaimed to her sister, "I had no idea till I married that the lower orders were so clean in their habits."
