NUMBER 35

WILL STAND BY PLEDGES

J. W. Morrison Declares He Knows No One in the Delegation Who Does Not Stand Squarely on Instructions of the Convention Against Don Miguel

J. W. Morrison of Orange, deputy fish and game commissioner, was in town on Saturday and made a pleasant call at this office. Mr. Morrison is chairman of the republican county central committee, and is also a delegate to the Thirty-ninth district senatorial convention, which meets at Riverside July 11th. He stands squarely upon the instructions of the convention not to support Estudillo for the senatorship, and says the Orange county delegation will probably caucus before going to Riverside, and formulate some plan of action.

"The situation politically in the district is one exceedingly rare in the history of the state," he said in discussing the senatorship. "Riverside has instructed her delegates to vote for Estudillo first, last and all the time, and Orange county's delegates are instructed not to support him at all. We are going to Riverside instructed not to support the candidate who will be presented to the convention as the choice of that county. Personally I do not favor the nomination of an Orange county man, and the only way I see out of it is for Riverside to turn Estudillo down and put up a good clean man."

Mr. Morrison declared there was not a member of the delegation who would not stand squarely upon the resolutions adopted by the county convention against supporting Estudillo.

"They had my name associated with the report that two of our delegates were going to support Estudillo, but I do not know upon whose authority the statement was made. Certainly there is not a word of truth in it."

"Keller Watson of Orange will also stand by the resolutions of instructions, and Jack Landell told me some time ago he would abide by them through thick and thin. I know Harry Whitaker too well to think for a moment that he would countenance anything wrong, and I am satisfied the rest of the delegates will be found true to their pledges."

Morrison said all talk about the nomination of S. O. Walker was too funny to be considered at all. "He's a dead one," said Morrison.

Delegates Hale, Walton, Blodgett, Stuteman, Wright and Lutz are anti-Estudillo from away back. The delegation will be a unit against him.

Young People Wedded

Thursday evening at the residence of the bride's parents, Mr. and Mrs. W. M. Criss, their daughter, Miss Ella, was married to James A. Correll of Austin, Texas, a professor in the State University. Rev. J. L. Moore, pastor of the Methodist Episcopal church, officiated. Mrs. Eugene Adams played the wedding march, and Little Marie Brandt of Los Angeles was ring bearer. The bride's Sunday School class, consisting of twelve little girls, were attendants.

The home was beautifully decorated and the bridal party stood beneath a cluster of "Lovers Knots."

The bride wore a pretty creation of Princess Louise lace and a bridal veil which is a family heirloom and carried a shower bouquet of Brides Roses.

About fifty guests witnessed the happy affair, and while busily engaged in conversation, Mrs. Moore slipped the bridal party away in an automobile, which conveyed the happy couple to a nearby station, where they took a trolley car to Los Angeles—thus escaping the old shoes, rice, etc.

The out-of-town guests were Mr. and Mrs. H. C. Brandt, Master Charles Brandt, Miss Hall and the Misses Collier of Los Angeles and Mrs. Frank Buser of San Diego.

Many useful and handsome tokens of love were presented, among others being a handsome pin of Pond Lillies, a present from the groom.

E. M. Neally, of Tustin and A. W. Everett, of Huntington Beach, have been appointed by the supervisors as members of the county board of education. Their appointments are for two years.

Library Plans Rejected

The library board on Thursday evening opened five bids for erecting the \$10,000 Carnegie library building. Bert Newbauer was the only bidder from this city. One bid came from Orange and the others from Los Angeles. All were rejected, as being too high. The bids ran from \$10,500 to \$14,000.

The board decided to cut out a number of interior adornments to the edifice, and to defer construction of the elevator.

The three lowest bidders were on Monday in consultation with Architect Austin in Los Angeles, and it is believed amended bids to be submitted in a few days will bring the price within the figures available for the building.

It is proposed to begin work upon the building within thirty days.

La Habra to Riverside

H. E. Huntington and W. E. Dunn, his attorney, were in Riverside the past week and in an interview, speaking for Mr. Huntington, Dunn said:

"There are a half dozen ways that we could build an electric line from Los Angeles to Riverside. The day of opposition to trolley extension has happily passed. It would seem at first blush that there would be a more direct line than that which would come into the city from Crestmore. Mr. Huntington is building through La Habra valley, and it would give, I think, a rather shorter line to Los Angeles to run this line up through the canyon to Corona and thence to Riverside, connecting at Arlington with the present line. Then, too, we are building to Glendora and have three miles of track laid from Pomona toward Covina."

"Mr. Huntington's confidence in this country, taking in all the regions from the ocean to Riverside and Redlands, is simply beyond understanding. He believes this great valley the most beautiful spot on earth. It is his theory that this strip of country is so small, that its climate is so unique, its soil so fertile and its charms so unique and distinctive that it is all bound to be settled by a class of people who will appreciate these things and who will in a few short years double and treble the population of this favored region."

Boys' Summer Camp

The Orange county Y. M. C. A. will hold their second annual camp at White's Landing, Catalina, July 27 to August 8.

A pamphlet giving the details of the trip is being prepared and will be ready for distribution about July 1.

The county committee have decided to take boys from 12 to 18 years of age, who are members of the Association, the number being limited to 60.

Boys desiring to go from points where we have not organized can secure a membership ticket for \$1.00 from the county Secretary.

Each boy will be charged \$9.00 for the trip; this includes transportation from Santa Ana or Garden Grove and a ride in the glass bottom boats from Avalon to camp.

Buena Park

The closing exercises of our school Tuesday evening drew out quite a crowd. The program was excellent, some of the pupils proving a surprise to the audience in the selections given. Certainly Buena Park school had never looked so lovely as on this occasion. The class colors were pink and green, and this color scheme was carried out beautifully in all the decorations. This feature was under the supervision of Miss Wilcox, ably assisted by Mrs. Whitaker, wife of our pioneer merchant. Miss Hill, the principal, was the recipient of a handsome vase, a gift from the English grade. Several short addresses were given, Mr. Jaynes being one of the speakers, after which delicious refreshments were served, among them being a perfect wonder of class cake presented by Mrs. Bixby.

James T. Coleman and family left in their touring car for their new home at Santa Monica.

The residence of E. H. Wright caught fire from a coal oil stove and burned to the ground. Everything in the house was lost. It was insured for only \$500.

C. A. Kidder negotiated the sale this week of a 10-acre tract for J. T. Coleman. S. E. Snow of Santa Monica was the purchaser.

Miss Ethel Crosby, the efficient primary teacher, left this week for her home in San Diego.

Pruning Walnut Trees

Judge Shanley has been engaged for several weeks past in pruning his walnut orchard on Lemon street, his purpose being to impart a greater degree of vitality to his trees. Instead of cutting back the trees and grafting to eliminate blight, he thins out the foliage, believing thereby to save his trees from the shock of the cutting-back operation. Finding his trees too abundantly foliaged, he has taken out much of the inner growth, and hopes next year to witness the beneficial results of the process. He cuts out limbs irrespective of the nuts upon them, one limb taken out containing upward of fifty fine nuts. The idea is original with the Judge, and he is of opinion he is ahead of the cutting back and grafting method adopted by other growers. He has found little blight on his orchard this season, and thinks that if the disease fails to make an appearance soon, the hulls will be so thick the blight will not be able to penetrate to the nut. This new method of combatting blight will be watched with interest by walnut growers throughout the valley.

The National Game

OLINDA, June 15.

The Olinda oil wells team and Garden Grove played an exciting ten inning game here Sunday, Olinda winning by a score of 3 to 2. Olinda got one in the second and another in the third. Garden Grove tied the score in the fifth. In the tenth Garden Grove got two on bases, but the next man was an easy out. For Olinda with two down, Brown singled, stole second and came home on C. Harris' error of Carpenter's grounder. The score:

OLINDA	AB	R	H	SB	A	PO	E
McLean, c.....	4	0	1	0	2	10	1
Brown, p and 3b.....	5	1	2	1	3	0	0

Two-base hits, Perry 2, Isbell, Andrade and Casey; sacrifice hits, C. Harris, Casey; double play, Carpenter to Isbell; base on balls off Brown 2, Elliot 2, Buzard 1; struck out by Elliot 3, Brown 4, Buzard 5; hit by pitcher, Perry and West; innings pitched by Brown 5, Buzard 5; hits off Brown 4, Buzard 1; time of game 2 hours; umpire Roy Perry.

Olinda will play Fullerton next Sunday at this place.

In the County Jail

George Schneider, a Fullerton printer who disappeared two weeks ago, leaving his accounts with the Foresters' treasury \$300 short, was arrested in Los Angeles by Marshal Ruddock, assisted by Los Angeles detectives, on Sunday, as Schneider was on his way to the Salt Lake depot, presumably to take a train out of the state. He was brought to Fullerton and released on \$2000 bail, which was furnished by two well known residents of that place. Subsequently the district attorney de-murred to his release upon this amount of bail, and Schneider was again taken into custody and bail raised to \$3000. This he was unable to procure, and he was taken to the county jail to await his preliminary examination at Fullerton this morning.

Schneider bore a good reputation until his financial wires became crossed. Beside his indebtedness to the Foresters' lodge he is said to owe a large grocery bill and to have overdrawn his amount at the bank. His wife and young child are penniless.

Schneider hopes to have the Foresters withdraw their charge of felony embezzlement against him, and promises to assign his wages in payment of all sums owing by him. He has hitherto borne an excellent reputation.

Walter Johnson's second introduction to the American league resulted in his being taken out of the box after the fourth inning, while pitching against St. Louis some days ago. It was his first appearance since his arrival east, and the kid suffered with nervousness. Johnson's friends hereabout have no doubt he will repeat his last season's performances this year.

WHAT'S DOING IN POLITICS

Short Shift: the Usual Portion of Contesting Delegations—Absurdity of Big Southern Vote in National Republican Conventions—Bits of State Politics—Knight Out For Perkins

The colored brother fared illy with the steam roller at Chicago, but probably it is no more than he deserved. In a word, the usual convention is too much taken up with other and more important business than to devote much time to unraveling these southern political scraps, which should be fought out at home. Moreover, while the contests this year were doubtless looked into and the evidence weighed as impartially as time and the multiplicity of other work permitted, it is nevertheless true that these quadrennially recurring colored fights are becoming a wearisome thing to national committees. They have short shrift given them usually, the standing admonition to them being to settle their quarrels at home. We do not recall a national convention that was wholly free from these negro contests. Usually the dominant factor in the national committee captures them, as so much wreckage afloat upon the political sea, and if the Hitchcock roller flattened them out this time, probably it would have been the allies who had done the job were they in control of the committee. These contested southern seats are a game of grab; the first one to grab them has them. That has been their history. As a matter of fact, these delegates are not essential to Taft's nomination, for he probably would have had a sufficient number without them, but it would have been violating precedent to let the other fellows have them—only that and nothing more. Precedent is a great thing in politics.

What a farce all this contested-delegation business is, to be sure. Of the 224 contested seats from the south, and the contestants are all of them negroes, probably not 100, and possibly not 50, are entitled to seats in a national convention upon any basis of fair representation. For instance Alabama, which gave Roosevelt 22,472 votes, is credited with 22 delegates, while California, which gave him 205,226, has only 20 delegates. Texas, which polled 51,242 votes for Roosevelt, has 36 delegates, 4 more than Massachusetts, which polled 257,822 votes for Roosevelt. Mississippi cast 3187 votes for Roosevelt, and is given as many delegates as California. Florida polled 8314 votes for Roosevelt, and has 8 delegates. Here we have four southern states, casting 10,000 votes less than half the vote of California, casting more than four times the vote of this state in the national convention. If the same ratio of representation prevailed in California, the state would be entitled to 160 delegates, or about the same number allotted to New York, Pennsylvania and Ohio combined. Ridiculous, isn't it? The reason for this disparity between northern and southern states is this: The representation of delegates to national conventions is made upon the number of congressmen in each state; two for each congressman, and two at large from each state. So far so good. However, in the north, congressmen are elected upon a basis of votes actually cast, while in the south it is difficult. In the Eighth California district, for instance, we are required to poll 40,000 votes in order to secure a congressman; while John Sharp Williams, former leader of the democratic minority in the house, was four years ago elected on a total poll in his Mississippi district of 1400 votes. Senator Quay long ago protested against this unfair basis, and this week's convention will delegate to the national committee authority to report upon a new and more equitable plan of selecting delegates.

George Stone is off for the east in

company of W. F. Herrin, traveling in the latter's private car. Stone was appointed by Knight a member of the executive committee of the state central committee, which appellation is nothing but a misnomer. The membership of the executive committee was not selected from the state central committee, and Stone was one of the appointed members who could not have been elected to a place on the state central committee. Clean republicans had a notion that they had seen the last of Stone in political authority, but not so. He was picked up by Knight, and is mentioned as chairman of the executive committee, which, as everybody knows, is the real governing body of the party in the state. Now he's taking a post graduate course with the big railroad boss, and the statement is given out that while east he will call upon the national leaders and get next to what's doing in national politics. Stone declares he will decline the chairmanship of the executive committee, but we miss a guess if he doesn't accept it the first thing after his return from the east. We must have Stone; the children cry for him.

George A. Knight has come out in open declaration that he is for Perkins for United States senator. He gives as his reason that it was the senator who first introduced him into politics in California and that an old-time sentiment holds him in a bond no influence can break.

It is assumed that Knight is also grateful because Perkins some months ago helped to obtain the post of shipping commissioner for one of Knight's sons, one of the most desirable places in the federal service because of the good pay and its permanency of tenure.

"I saw to it that every man I appointed on the state executive committee was a friend of Perkins," said Knight in an interview. "I concede that Perkins may be slippery and all that, but he's my friend and I am for him for United States senator."

Knight tries hard to justify his being a machine man and insists that his only reason is his loyalty to Perkins.

Asked why he appointed Walter Parker of Los Angeles on the executive committee if he was not taking orders from Herrin, Knight's excuse was that Parker had a fight on in the south and that "those fighting him were no better than he was."

Knight has no use for George F. Hatton and thinks Perkins would be better off without him as campaign manager. Because of this lack of esteem Hatton was not placed on the executive committee again.

The Call prints the following account of a street colloquy between Knight and a Lincoln-Roosevelt leaguer:

"The favorite machine assertion that the Lincoln-Roosevelt league movement was started by political soreheads was punctured by a leaguer in the course of an argument with George A. Knight. Knight sought to vindicate his alliance with the Herrin men in the recent convention and wound up with this sweeping declaration:

"Why, there isn't a leader in the Lincoln-Roosevelt who hasn't a sore toe."

"Asked to name some of the leaders thus afflicted, Knight immediately instanced ex-Governor Pardee. It was granted for the sake of argument that a defeated candidate might be classed as a sorehead, and Knight was asked to name others he had in mind.

"Oh, there are any number of them," he countered vaguely.

"Is Frank Devlin, state president of the league, a political sorehead?" was asked.

"No; I admit Frank isn't in that class. Frank is a fine fellow."

"Is W. R. Davis of Oakland a sorehead?" the leaguer continued.

"Why, Davis is a friend of mine," Knight laughed. "Of course, he's no sorehead."

"Is Chester H. Rowell a sorehead?" Knight admitted he was not. And Knight was glad to talk about something else."

Governor Gillett and his administration have set things whirling politically by their invasion of the state's university to do some stunts in the way of revenge on those who oppose them.

Charles E. Snook has lost his \$2,400 a year job as attorney for the board of regents, for reasons that the governor says were "personal and political," and which undoubtedly arose from the lawyer's active participation in the campaign of the Lincoln-Roosevelt league in Alameda county.

Again, in the assignment of the new committee, Regent Chester Rowell of Fresno, uncle of the state organizer of the league, was given an inconspicuous place, with evident intention of relegating him.

There is much speculation as to how far the war of retaliation is to be carried. Snook had thought his position secure, that there would be no carrying of the game of politics into the affairs of the university, and his dismissal the other day at an executive session of the board of regents came as a great surprise.

President Benjamin Ide Wheeler of the university has been outspoken and active in hostility to the railroad machine of the state, and as it has a majority on the board of regents apparently, it is contended that he must follow the way of Snook. Several of the professors in the university have openly advocated the Lincoln-Roosevelt league, and according to the laws of the game, if politics is to be introduced into the university they must go upon the block.

In an address before the native sons of Yosemite valley recently President Wheeler spoke of the university as the one place where men would speak their minds fearlessly. It remains to be seen if he will be permitted to make good.

The prediction that there will be a general cleaning out of all men connected with the university who have opposed the powers that be in the state is based on pure speculation, however. So far as can be learned there has been no intimation of such intention.

Fletcher Cutler, former law partner of Gillett in Eureka but now of San Francisco, was given Snook's post.

The regents who voted to oust Snook were the following: Governor Gillett, Lieutenant-Governor Warren R. Porter, Speaker of the Assembly Beardslee, State School Superintendent Hyatt, State President Ben Rush of the agricultural society, P. C. Yorke, J. W. McKinley, William H. Crocker and F. S. Johnson. Those opposing: President Wheeler, Mrs. Hearst, A. W. Foster, F. W. Dohrmann, R. J. Tausig, Guy C. Earle and John A. Britton.

Water Power Bills

Attention was called several weeks ago to a number of bills pending in Congress which were designated as vicious legislation. These bills were for the granting of valuable water powers and water rights to private individuals and to corporations, with practically no consideration to the government. In many instances these bills provided for the damming of navigable rivers and were otherwise of such objectionable character as to fall legitimately within the classification of "vicious."

Of these water bills perhaps H. R. 7618 has attracted the most general attention. This is a bill granting to the Benton Water company the right to build a dam across Snake river, in the state of Washington. A large portion of the course of Snake river lies in the state of Idaho, and the river's principal water sheds are in that state. This bill was passed by unanimous consent in the House, in the face of an urgent petition from citizens of Idaho, setting forth the fact that the building of this dam would cut off their way to the sea. The bill was then passed by the Senate over the vigorous opposition of Senator Heyburn. On April 6, conferees were appointed to handle the bill, but up to the present time these conferees have made no report.

On April 13, in transmitting his veto message on H. R. 15444, President Roosevelt said that he would veto all similar bills coming to him. Apparently this closes the door to all such water power legislation; but opponents of such measures must be continually on the lookout to prevent the insertion of these bills as riders to appropriation bills of one sort or another. The only possible way in which legislation of this kind can be enacted at the present session is by making the bills riders to appropriation bills, and as the end of the session is approaching, at which time the appropriation bills are usually rushed through, it is urgently necessary that those who are opposed to barefaced robbery of the nation, such as is proposed in practically all of these water power bills, must be on their guard.

Tighten Your Grasp On Independence

Become a Land Owner and Stop Worrying About the Future

Buy a Ranch in Our Cherry Valley Tract where 5 Acres and Independence costs less than the Price of a City Lot

Don't you want to plant a few dollars for the future in Beaumont lands, so that you are protected by a deed to productive property against ill health, financial disaster or the need of a self-owned home in later life?

Don't stand back and hesitate, but go to Beaumont and see for yourself. Examine the Cherry Valley lands, investigate the water, soil, crops and climate, and be convinced that Beaumont is the promised land.

Stop and think how Beaumont, now in its swaddling clothes, is passing through the same wonderful changes that characterized the early growth of Los Angeles, Redlands and Riverside, and then you will realize how significant to you this opportunity is, for it offers you the chance of getting rich on the rising tide of realty values and business expansion.

And it is an opportunity replete with convincing merit, for right now you can find your independence either by acquiring 5 acres of Beaumont's fertile soil or some of the city lots; while they are down at bed-rock price levels.

TO PROVE IT: Come in for our price list, examine it carefully and see if you ever heard of property offered so low, in a growing town like Beaumont is. These low prices will prove to you that boom methods are not part of our system, and will convince you that your dollars will go farther in Beaumont than elsewhere; that you get your money's worth and a chance to profit heavily.

We can sell 50 per cent cheaper than others, for we bought the property under a mortgage from a bank, and that's why "Well Bought is Half Sold" was never so true as in Beaumont; and that is the reason our sales have reached nearly \$240,000 in nine months, and why every buyer has made money from the start.

Special Excursions Thursdays and Sundays

So that every man can visit Beaumont and see this wonderful farming district face to face at very reasonable cost, this company makes special land seekers' rates from all points and relates to purchasers of \$100 worth of property or more the fare from Los Angeles and many nearby towns. These rates are made known on application and we invite the attention and correspondence of interested persons who are seeking a home, ranch, business opening or position. Next excursions go June 18, 21 and 25. Send in your name for a ticket.

Cut out and mail coupon below:

BEAUMONT LAND & WATER CO.
226 Mercantile Place

BEAUMONT LOTS RISE IN VALUE.

Augmented by a steady influx of homeseekers from eastern and southern states the sales of acreage in the Beaumont valley are reported to have reached \$4800 for the week. Business and residence property in the townsite is also active as evidenced by several recent resales at advances ranging from 100 per cent to 500 per cent, the latter figure having been recorded in the transfer to Mrs. C. Beese of three lots 50 x 140 feet, in Block 8, for \$1000, which cost the seller \$150 last October.

C. D. Kemper purchased Lot 2, Block 102 for \$150 less than sixty days ago and sold it last week to James H. Denham for \$300.

The Republican voters of California are, as a rule, men of intelligence and patriotism. Men of that character cannot be relied on indefinitely to submit to being deprived of the privileges of free and honest state government.

HOW TOWNS ARE GROWING

Compilation of Official Reports giving Population of Southern California Cities — Anaheim Shows Notable Increase.

A compilation of school census figures for the leading cities in Southern California affords a number of interesting comparisons. This city shows up well with the others of its class, when it is remembered that it is probably the smallest in territorial area in Southern California. Its limits are 14 miles square, and surrounding it on all sides is intensely cultivated sections, with probably not less than 1000 population. The figures follow, being the official report of the children between 5 and 17. A comparison with 1907 is also given:

	1908	1907
Los Angeles.....	50,615	48,782
San Diego.....	5,622	5,351
Pasadena.....	5,262	5,492
Long Beach.....	3,841	4,603
Riverside.....	2,881	2,806
San Bernardino.....	2,562	2,642
Santa Barbara.....	2,447	2,430
Redlands.....	2,262	2,058
Santa Monica.....	1,813	2,410
Pomona.....	1,876	1,734
Santa Ana.....	1,652	1,760
San Pedro.....	977	944
Whittier.....	841	819
Colton.....	708	755
Ontario.....	788	672
Orange.....	730	727
Ventura.....	710	690
Alhambra.....	730	680
Hollywood.....	748	511
Anaheim.....	739	667
South Pasadena.....	678	588
Monrovia.....	652	643
Corona.....	610	601
Oxnard.....	591	601
Needles.....	598	583
Redondo.....	530	444
Chino.....	513	421
Cahuenga.....	506	435
Santa Paula.....	482	
Escondido.....	460	
Ocean Park.....	440	
Glendale.....	446	
San Gabriel.....	412	419

In most of the towns a good gain is made; where a loss is shown it may be due to a lack of thoroughness of enumeration except at Long Beach and Santa Monica where, according to the statement of the Riverside Press, the loss is too large to be accounted for in that way.

The ratio between the number of school children and the total population varies from four to five according to different conditions that prevail in different localities. In most cases four is a conservative basis, but in other cases five is none too high. We give the following population estimates figured according to both plans. Even the basis of five will not satisfy Los Angeles and San Diego, but we believe it is plenty high enough unless some abnormal conditions exist:

	On Ratio	Ratio of 4	Ratio of 5
Los Angeles.....	202,460	253,075	253,075
San Diego.....	22,450	28,110	28,110
Pasadena.....	21,050	26,310	26,310

President Roosevelt paid his tribute to the memory of the country's dead heroes on Memorial day. Accompanied only by his doorkeeper he left at 10 o'clock in the morning for Arlington in an open surrey nearly filled with three large floral emblems. The monument to General Sheridan, the monument to the Spanish war veterans, and the monument to the unknown dead were decorated with the beautiful wreaths and designs.

A New Orleans woman was thin. Because she did not extract sufficient nourishment from her food. She took *Scott's Emulsion*. Result: She gained a pound a day in weight.

REVISION OF THE TARIFF

Producers Invited to Attend Meeting to Formulate Measures for Informing Ways and Means Committee of California's Interest in the Subject.

The following letter received by The Gazette will appeal with especial interest to fruit and walnut growers, as well as all other producers affected by the Tariff, with coming revision by the Ways and Means Committee of Congress of that instrument. The republican party in its platform has declared for revision, and the Tariff will undoubtedly be revised by the coming Congress. No state in the union possesses a wider range of products under tariff protection, and a change will affect many of these industries disadvantageously. The subject herein contained is worthy of careful perusal by our readers.

The following note gives information regarding time and place of meeting. Many of California's industries are affected by the tariff, consequently the coming tariff revision of the Congress is of special interest to the producers of the State. Congressman James C. Needham has written to the California Promotion Committee calling attention to the advisability of the producers of California taking some action to protect their interests at the coming meetings of the Ways and Means Committee of Congress, and in pursuance of this suggestion the committee has sent out an invitation to all commercial organizations and individual producers to meet in conference at the headquarters of the committee, California Building, Union Square, San Francisco, July 16. It is of vital importance that all of the industries of the State which are affected by the tariff or which may be affected by it, be represented at this meeting. Every one who is interested will be welcome to the gathering, and it is hoped that every one who may be affected by a tariff change will be present. The letter to the commercial organizations is as follows and explains itself:

EDITOR GAZETTE:—

The California Promotion Committee is advised by Congressman J. C. Needham that it is deemed advisable to have representatives of all California industries affected by the tariff or likely to be affected by a new tariff, prepared to present the claims of the various California Industries before the Committee on Ways and Means of the Congress during the coming session, beginning next December.

The California Promotion Committee desires to co-operate in all ways possible with the Congressional Delegation of the State and in furtherance of the suggestion of Congressman Needham it desires to have a conference of all who are interested in industries of the State, in order that a concerted plan of action may be formulated for the proper and adequate presentation of California's claims at the proper time. To this end the Committee calls a meeting of representatives of such interests, to be held at California Building, Union Square, San Francisco, beginning at 10 o'clock Thursday morning, July 16, and continuing two days.

The Committee requests all organizations throughout the State to notify all people in their vicinities who may be interested in this question, in order that they may attend meeting, and also invites the organizations to have representatives present in order that a full understanding of the requirements of California may be arrived at, and a representative committee or committees appointed to take the matter up and carry it to a successful conclusion.

Will you kindly take immediate action in relation to this, informing me what you have done and also informing me regarding the representatives that will be sent from your part of the State and what industries they represent?

This is a most important matter for California and I am sure The Committee can count upon your hearty co-operation. Cordially yours,

RUFUS P. JENNINGS, Chairman.

Funds for the purchase of supplies for the army during the current fiscal year are so depleted that no further purchases will be made for miscellaneous supplies for the Philippines until after July 1st, the beginning of the next fiscal year. For this reason no contracts will be made under bids opened at San Francisco on April 11th.

This Bill Has Bugs In It

The separation of state and local taxation would benefit the railroads at the expense of communities.

It would permit the railroads, by a simple artifice, to escape taxation and thereby mulct the people out of thousands of dollars.

It would relieve the large corporations from paying any share of the Owens River aqueduct expenses.

There are "bugs" in the bill.

These were points made in denunciation of the proposed constitutional amendment providing for distinct taxing functions in an address delivered some days ago at the annual meeting of the Los Angeles realty board by G. M. Giffen, a capitalist, and treasurer of the organization.

"Should the measure pass as proposed," said Mr. Giffen, "it would deprive Los Angeles city and county of a great deal of revenue."

"There are bugs in the bill. Should the railroads with harbor and other tidewater holdings put in fake spur tracks they could exempt from county taxation hundreds of thousands of dollars of dollars. This would be possible because 'operative' railroad property is under the free list in this state."

"Special taxation in time of menace or other unusual occurrence could not be imposed upon the many heavy corporations here, as the State only could command this form of revenue."

"The separation of State and local taxation would relieve the corporations from paying any share of the Owens river expenditures."

Mr. Giffen declared himself as unalterably opposed to the proposed amendment.

It is probable that the Los Angeles Realty Board will take up the amendment officially later and pass upon it. It is believed that the final action will be adverse to the measure. In that case it will be in line with the protest of several organized business bodies throughout the State.

In this connection it might be asked what becomes of Gov. Gillett's scheme to issue \$18,000,000 of bonds by the state for good roads? Under this iniquitous proposed amendment, railroads, street railroads, electric lines, telegraph and telephone companies and all other corporations would escape taxation for these bonds, as well as for all other bonds issued in the state for civic improvements of all kinds.

What has this man Gillett to say of his advocacy of this iniquitous measure? Speak up, Gillett; what do you mean?

Feed Will Be High

"If every rancher realized that feed will be high this year," said a farmer recently, "every one would plant what available space he has to some kind of crop suitable for feed. Take the farmers who are taking out their potatoes now, and those who are cutting hay. If they clear their land, and have irrigation water they ought by all means to put that land into some kind of forage crop, pumpkins, citrons, stock beets—something or other that stock will eat. There is no question but what every bit of it will help the farmer out."

"Nearly every rancher has some stray corners on his place that he might just as well put to some such use as not, and this is the time to get busy with those corners. If a man has a small piece of land on his place that is idle just now and does not know what to do with it, it is my advice that he plant some kind of forage crop."

Don Henrico's Lost Note

A San Diego news item forwarded from that city some days ago reads as follows:

MYSTERIOUS FIND

Plumbers, while repairing a small building on Columbia and D streets, found a pocketbook in the flush tank of a closet, which evidently had been placed there since last March. Papers found include a receipt given by the Anaheim Lodge of Odd Fellows to Henry Oelkers, dated in March. Another paper is a note given to Oelkers by Peter Hermint.

First class land with probably the cheapest water supply in the state, on small payments.

John Schumacher, Jr., Anaheim, Cal.

THAT GOOD ROADS MEETING

The good roads meeting recently held at Santa Cruz, where Gov. Gillett made his high-wire spiel about an \$18,000,000 bond issue for good roads, adopted resolutions to be introduced at the next session of the legislature as a concurrent resolution providing for the appointment of a joint legislative committee to investigate conditions and outline a plan for a broad scheme of highway improvement, including the financing of the undertaking.

This action, so an inspired report of its deliberations informs us, was the culmination of a largely attended meeting of citizens. Delegates, two hundred strong, representing California's fifty-eight counties, gathered to hear papers read by experts in road building and by men of experience in various lines of activity from all parts of the state. The governor and lieutenant governor of California and the president of the University of California addressed the meeting and pledged active support of the movement by the state. A committee of five was appointed to carry out the provisions of the resolution and arrange for the introduction of the concurrent resolution in the legislature providing for the appointment of the joint committee. Similar action in regard to the harbors of the state, instituted at the San Diego meeting of the counties committee in December, 1906, resulted in the appointment of a committee that is now at work preparing a plan of harbor improvement which will be presented to the next session of the legislature. By thus securing state legislation for good roads the work of improvement will be carried on, with the co-operation of the counties, upon a broad and thorough basis. The meeting emphatically proved that the people of the state are a unit in recognizing the need for better roads, the problem resolving itself into an inquiry into the best means to attain the end in view. It was pointed out by several of the speakers that the amount of damage to food products and other perishable goods occasioned during the year by bad roads was enough to pay for building and maintaining good roads all over the state.

To all of which the taxpayers of the state will respond with cordial acquiescence. At the same time, they will reserve their opinion upon the governor's high-wire performances until such time as Senate Constitutional Amendment No. 1 is disposed of. This amendment, if adopted at the November election, will exempt all railroads, street-railway lines, telephone and telegraph companies and all other corporations from assessments for this bond issue. The poor farmers will however have no such exemption. They will foot the bills. Is the governor really so heartily in favor of good roads, or is he again hearkening to his master's voice?

The personal interest taken by President Roosevelt in the Japanese exposition was indicated in his message to Congress at the beginning of the last session, when he formally presented the matter to that body with a strong recommendation for such legislation "as will provide in generous fashion for the representation of this government and its people in the proposed exposition."

IRRIGATION EXPERTS IN PERU

This Government's active interest in reclaiming arid land in the West by irrigation is not a solitary or exceptional movement in the world of to-day. Similar work is going on in many countries. Irrigation is as old as civilization, but just now it is receiving more attention than ever before, and many gigantic problems are being worked out by the foremost engineers.

Peru is one of the latest to turn its attention to developing waste land by bringing water upon it from rivers which have always gone idly to the sea. It is true that irrigation in Peru has been carried on since before the days of Atahualpa, four hundred years ago, but not on a scale to be compared with what is now contemplated.

A report to this Government by Charles M. Pepper, special agent at Lima, says experts from the United States Geological Survey and from the Reclamation Service have been in Peru for some time, employed by that Government to investigate the possibilities of irrigation. The reclamation of 2,500,000 acres between the mountains and the sea has been pronounced feasible. The rivers are not large, and the projects in Peru would not compare for size with some of the great irrigation schemes in the United States. But the marvelous fertility of the land in the South American republic, and its fine climate, assure success in the highest grade.

The arid lands of the United States with five or six inches of rain a year might be considered well watered if compared with some of Peru's dry wastes which are to be reclaimed. The showers that visit them are few and far between—once in from ten to fourteen years. But when water is put on such land its fertility is phenomenal. The soil has lain inert for centuries without any run-off to leach out the fertility stored from time immemorial. This has been found true in our own West. The driest region often has the strongest soil, once it is brought under irrigation and its salt dissolved and made available for plants.

Peru's rivers which are to be utilized flow down from snowy mountains and cross the arid country just as many of the rivers of our own arid regions do. To that extent, the western part of the United States and the western portion of Peru have many features in common, and the engineering experts who have gone down there from this country can make good use of the experience and technical knowledge gained at home.

Fullerton trustees have entered into contract with the domestic water company operating there, obligating themselves to pay \$800 per annum for a period of seven years, in return for an expenditure of \$12,000 by the company to rehabilitate the system. Thus it appears the city will pay, what with interest and money annually disbursed, more than half the initial cost of the works. This is municipal ownership with a vengeance. If memory serves aright, we believe a recent meeting of citizens expressed with practical unanimity a desire for municipally owned water works. At the end of this period, if our neighboring town should desire to take on the benefits of such a system, it will have an opportunity of purchasing, at enhanced cost, the system which it now so liberally assists in paying for. A private snap is truly a wonderful thing.

It now seems probable that the action of the Republican National Committee in cutting down the representation of the territories and insular possessions from six to two delegates will be reversed and that all six will be seated. While the Republican call has always provided for only two delegates from the territories and insular possessions, the Convention, ever since 1892, has seated six from each.

CONDITIONS CREATED IT.

The organization in the Republican party of California has gotten out of the control of the voters who constitute its rank and file. Every honest man knows this and acknowledges it. If the Republican voters of the state recognize the duty of protecting the interests of the state, their own interests, and the good name of the party, it simply becomes a question whether any effort is to be made to improve conditions.

The Lincoln-Roosevelt Republican League movement is the result of conditions created at Santa Cruz and at Sacramento. It is the tide of public resentment resulting in a popular movement to repudiate and defeat what honest men within the Republican party feel that they cannot and ought not to tolerate.

Party organization is necessary. It goes without saying that party organization ought to be subject to the will of a vast majority of the men who compose it. In the nature of things there must be at least two contending political parties, and the best government will be secured when both parties, or all parties, seek to serve the public rather than private interests.

The average man believes in righting what is admitted to be wrong and unjust and therein lies the secret of the remarkable showing made at the May primaries by the Lincoln-Roosevelt Republican League.

The political optimist believes in righting what is wrong in the state by righting what is wrong in his own party, and then working for his party.

The task which will confront Judge Magoon, Provisional Governor of Cuba, when he undertakes to act as referee in the arbitration of claims in Panama against the United States, is by no means an easy one. The two American arbitrators—Representative Denby, of Michigan, and Judge Bumpus, of Boston—have sailed recently for Panama where they are to meet two Panamanians, and to these four, with Governor Magoon as referee, the settlement of the claims growing out of the flooding of land by the creation of the Gatun Lake will be confided. The sum at which the Canal Commission appraises this land is now something under \$300,000 and the owners ask something more than \$15,000,000—a wide discrepancy which the arbitrators must adjust.

A decision has been rendered by the War Department which will exclude militia commands from sharing in the profits accruing from the conduct of bakeries and other establishments at army posts or joint manoeuvre camps. When a regular troop or company is serving temporarily at a post it does not benefit by the profits of the bakery and other establishments at that station, the profits going to the troop regularly on duty there, and it is considered that no greater favor may be extended, with propriety, to the militia.

Republicans in California are not going to be satisfied with conditions within the party until a Republican can go to the polls and vote his party ticket without thereby aiding a conscienceless bunch of political schemers, bound together in an alliance of villainy and dishonesty.

Many voters lose interest in the machinery of representative government, refusing to submit at the ballot-box to vote a party ticket which does not represent free action by the rank and file of the party at party primaries.

Nothing is plainer than that if the Republican party in California is to hold the Republican vote of the state, it must be a party of the people, not a mere instrument for plundering the people of their political rights.

P. J. WEISEL

There has never been devised a political machine capable of resisting the power of the people when that power is thoroughly aroused. Party managers who plant the machinery of the party athwart the will of the people may expect it to be swept away whenever the people find a means of organized resentment.

There can be no peace on any other basis than a free expression of opinion within the party. Self-respecting men will not submit to government by proxy.

Gerald Sandilands will next week begin the shipping of fifteen carloads of Valencia oranges from the Independent packing house near the Santa Fe depot.

"What's the greatest duty devolving upon civic reformers?" asks one athirst for information. We should say the enactment of an ordinance prohibiting the sale of firecrackers until the day before the Fourth.

L. E. Miller and wife leave next week for Cleveland and other points east. This will be Mr. Miller's first visit home since coming to California 17 years ago. They will be away until September.

F. W. Wiedman, a retired Chicago capitalist, is here, accompanied by his wife, guest of Mr. and Mrs. Fulde and family. This is Mr. Wiedman's seventh trip to California, and on his return east will probably make up his mind to come out again and locate permanently. He has been spending several months at Long Beach, and is favorably impressed with Southern California. Welcome to our city, Mr. Wiedman.

G. L. Dietrich has added a number of new instruments to his eye-testing apparatus, and has introduced an all-day electric-light current, which renders his optical department one of the most perfect in the country. A novelty in mechanism is an acrobatic addition to a clock in the show window, showing an athlete doing wonderful stunts on a horizontal bar. Ask the kids, and they will tell you this is the most wonderful thing they ever saw, and they require no optical tests to be convinced of this idea.

William Eisenberg was brought into the superior court on Monday to appear for trial on a charge of forgery, he having been detained in jail under bonds for a fortnight past. Eisenberg is accused of forging the name of John C. Bentz to certificates of stock in a knitting factory in Los Angeles. Eisenberg was a year ago engaged as instructor of turning by the turnverein here, and left town owing numerous mourning creditors.

The pumping pit being dug for the Anaheim Union Water company at Wm. Crowther's southeast corner has reached a depth of 60 feet and reached water. Ben Cook is in charge of operations, and will endeavor to sink the pit forty feet below the water level. When completed the pit is expected to yield the largest flow of water in the county.

Mr. Roy, living on South street, this week sold 500 laying hens to Wallop Bros., who shipped them to Los Angeles wholesalers.

Judge Howard was appealed to the other day by an irate citizen who had a bill against a certain peanut corporation formerly doing business here, but which seems to have gone by the boards. The citizen told the judge he could secure no answer to letters addressed to the company, and desired his honor to advise him relative to the propriety of bringing an action in the justice's court to recover. The judge informed the citizen the company could be forced to pay, and that the bill could be collected. On the evening train came a check from the peanut outfit, in part payment of the bill. The judge has the goods when it comes to dealing with evil-doers of high and low degree.

The Santa Fe overland limited passes through Anaheim, service beginning on Sunday, instead of going by way of Pasadena. The train for the east passes through at 8.18 am. It does not stop at Orange. Tickets are sold from this point to Corona, the first stopping place, Riverside and points east. The run to Riverside is made in little over an hour. The train from the east arrives at 6.18 am, and may be flagged. The local accommodation trains arriving here at 4.14 pm southbound and 5.24 pm northbound are discontinued. The Santa Fe runs 14 trains per day through this city.

Examinations are in progress at the boys' school conducted by Dominican Sisters on Palm street, and the usual summer vacation will occur in a few days. There are more than 200 boys in the school, and 21 Sisters devote their time to them. A number of additions have been recently made to the buildings, yet the institution is not large enough to accommodate the increasing attendance.

Nick Hugo's horse while hitched in front of Mrs. Schumann's residence on Claudine street on Saturday afternoon took fright at a passing auto and bolted down the road. The buggy collided with two young camphor trees in the parking, breaking them down and removing two handsome trees from the sidewalk. The horse was captured without further mishap.

W. M. Kincaid, recently arrived from Colorado, has purchased residence property on East Charles street, and will make his home here. Mr. Kincaid will open a grocery store in the new Strothoff building on Center street, now in course of erection.

Mrs. W. M. Rose and two little daughters departed on Friday for Michigan on a visit to relatives and friends. They will be absent two or three months.

F. W. Barron, a well known resident of the West End, contemplates a visit in the near future to Iowa and other points east. He will be absent several months.

Fred Vossbeck left this week for Colorado to resume his studies in the Trinidad business college.

Mrs. Brandenburg this week sold her residence property on Bush street to Edgar Culver. Hans Vossbeck negotiated the sale.

Mr. Fulde has purchased two lots on Adele street near Emily, and will shortly begin the erection of a palatial residence.

J. O. Schwentker is home from Missouri, after an absence of several years, and will probably make his permanent home here.

C. L. Green was called to Pomona on Monday to attend the funeral of an aunt who died on Sunday.

Mrs. W. H. Spake and daughter leave shortly for a visit with friends in Texas. They will be absent two months.

Postmaster Duckworth spent Tuesday at Los Angeles and Santa Monica on business.

The Song of the Hair

There are four verses. Verse 1. Ayer's Hair Vigor stops falling hair. Verse 2. Ayer's Hair Vigor makes the hair grow. Verse 3. Ayer's Hair Vigor cures dandruff. Verse 4. Ayer's Hair Vigor makes the scalp healthy, and keeps it so. It is a regular hair-food; this is the real secret of its wonderful success.

WHERE QUALITY COUNTS

Mrs. Richard Burmeister and young son of Los Angeles were guests of Mrs. Melrose on Tuesday.

Joseph Helmsen's graph has a new one, "Who threw the overalls?" Ask him to play it for you.

Mrs. Pendleton of Norwalk and Mr. and Mrs. Charles Pendleton of Buena Park visited with Mr. and Mrs. J. W. Duckworth on Sunday.

The young ladies of the Sunset Telephone Co. have donated the Los Angeles Herald to the Public Library.

Miss Jean Adams will attend the meeting of the Sixth District California Library Association at the Santa Monica Public Library on Friday, June 19.

Mrs. Josephine Weisel and two daughters, Misses Hettie and Gretchen, departed on Monday for Milwaukee. They will be absent several months.

Milbried Wray, one of this year's high school graduates, left Tuesday for Oregon to join relatives. He will enter the university at Berkeley next year.

Roy Donaldson came in from San Bernardino on Sunday to visit with relatives. Mr. Donaldson is employed by the Santa Fe as conductor, and was some weeks ago severely injured in a train wreck. His foot was caught between cars and he had to undergo the amputation of a toe as a result of the accident. He has recovered and is again on his train.

Announcement has been received of the marriage of James R. Dunseath, the well known Tucson attorney, to Miss Irene Perpetua Hanahan, daughter of Mr. and Mrs. Matthew Joseph Hanahan of Chicago. Mr. Dunseath and bride are touring the east on their honeymoon and will late in the fall take up their residence in Tucson.

E. J. Byrne contemplates leaving soon for a three-months' tour of the east. He will visit Chicago, New York and other eastern cities, and will return by way of Seattle.

Miss Mills of Riverside is visiting in town, the guest of Mrs. H.A. Johnston.

Mr. and Mrs. Konig entertained at dinner on Sunday Miss Pfeiffer, of Ocean Park and Dr. Lucius, who is temporarily sojourning in this city.

Ed. Marion is going in for tomatoes, and will not stay out of a corner on the market.

Bobby Mills was an early morning visitor in Los Angeles yesterday. He flagged the limited and rode in on the New Chicago train.

Misses Ruth Dutton, Edith Wallop and Alice Grimshaw go to Los Angeles today to attend the commencement exercises of the University of Southern California.

E. Barr and H. F. Kealther are at Murietta Springs for an outing.

W. A. Wallace and A. T. Webb are at the Elsinore Springs recuperating their health. They are improving and will probably soon be home again.

It is proposed to have an excursion of Herald readers to Los Angeles to attend the housewarming, when the house and lot is won by one of the Anaheim young lady contestants for the Los Angeles Herald's first prize offered in this contest. Will you favor our own girls with your Herald subscription and votes? Do you want us to get the prize? Are you with us to win? Do it now, the contest closes Saturday. Ask John for particulars. Its up to you!

Charles Lange, the West Anaheim grocer, was fined \$5 by Recorder Howard on Saturday for selling his wares in town despite the city ordinance imposing a license of \$10 per month upon non-residents for so doing. Lange refused to possess himself of such license, and complaint having been made by merchants in town who regularly pay their license, Marshal Steadman placed him under arrest. Recorder Howard, on hearing the evidence, imposed the minimum fine of five circulating placers of the realm, and defendant was counseled to go and sin no more. Lange denounced his arrest as an outrage and declared his contempt in emphatic language for the municipal ordinance.

W. F. Laird left on Tuesday with his family and a carload of household goods for his new home in Kern county. Good luck attend him.

Mr. Hanna reports the Miraflores walnut crop as being the best in years.

Mrs. William Potter died at her home in this city on Sunday after a long illness. Interment was made yesterday morning at 10 o'clock.

H. A. Dickel was in Los Angeles on Monday hob-nobbing with wholesalers.

Miss Ruth Enearl, teacher of the San Juan school, is spending vacation with her parents, Mr. and Mrs. Jas. Enearl, of this city.

Miss Rose Michod of Los Angeles attended the commencement exercises of the high school on Friday evening. She was the guest of Miss Alice Grimshaw.

FOR RENT—Brown Potato Diggers. Address or call upon H. Wagner, east Anaheim.

Peter Webber is erecting a \$2000 residence at the corner of North and West Street.

G. Meyer has sold a twenty acre tract east of town to Henry Baert, recently arrived from Oxnard; consideration, \$5200. L. A. Evans made the sale.

V. Simpson and family leave today for San Juan Hot Springs. Mr. Simpson has been indisposed for a month with inflammatory rheumatism. He will take the baths with a view to throwing off the ailment.

Mrs. George L. Dietrich has been seriously ill at her home on Philadelphia street, but was yesterday improved.

Church Notes

Rev. George Merrill of Pasadena will occupy the pulpit at the Presbyterian church on Sunday morning. In the evening children's day exercises.

City Trustees

The city council met in regular session on Thursday evening. Present, Trustees Rust, Gates, Kroeger, Stock and Fiscus.

The Marshal reported the following collections: For water \$573.91, license \$489.50, light \$604.55, total \$1667.96. Delinquents collected: Water \$68.65, license \$6.50, light \$53.90; total \$129.05. Delinquents reported: Water \$100.25, license \$9.50; light \$105.65; total \$215.40.

The Recorder reported six cases in court during the month and fines collected amounting to \$20, two dollars in excess of fees.

The Treasurer reported a balance in the treasury on June 10 of \$10,893.86.

Superintendent of streets reported that Palm street had been oiled, water connections made, city stables moved to new home, and that all-day service at power-house started June first.

Finance committee reported auditing bills to the amount of \$2005.03 and warrants were ordered drawn in payment of same.

Ordinance committee presented Resolution of Intention No. 74, relating to the widening of West Broadway. Notice of the public work will be found in another column of this issue.

City Attorney Melrose reported having received favorable reply from Southern Pacific officials in regard to the sidewalk of South Los Angeles street. Work upon same will probably be commenced in the near future.

Applications for a retail liquor dealer's license were received from the following: Gustav Martins, S. W. Cottle and Max Bayha. The applications were laid over for future consideration. It is said the "spare" license will be held in reserve for an up to date hostelry, should one be launched here in the near future, as it is confidently expected such will be the case.

The street are asked for on East Broadway will be installed as soon as practicable.

Communication from R. C. Spoerl in regard to extension of Oak street was referred to the city attorney.

City Attorney Melrose reported that all property owners on the line of the projected extension of Oak street, from Lemon to Los Angeles streets, have signified their willingness to give deeds for same. He was instructed to accept same in behalf of the city, and to proceed with the proposed extension.

Samuel Kraemer was granted permission to cut back the sidewalk for a driveway in front of his new building on Center street for a distance of two feet.

A numerous signed petition asking for the use of the bandstand for public speaking was received and the same was denied.

A delegation of citizens from the merchants' association appeared before the council asking for an extension of the street sprinkling area. After a lengthy discussion the matter was tabled for the present.

Attorney Spencer, in behalf of the retail merchants' association, asked the board to pass an ordinance affecting outside merchants invading the town with advertising literature and such like. To the ordinance committee.

Building permits were granted as follows: Godfrey Betts, residence on South Lemon street; \$2500.

H. E. Strodthoff, brick building on Center street; \$2000.

G. B. Schlusser, corrugated plumbing shop on South Los Angeles St.; \$200.

\$100 REWARD. The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Republicans Will Ratify

The executive committee of the republican county central committee on Friday morning named committees to act during the coming campaign. The executive committee decided to hold a ratification meeting in Santa Ana on the night of June 20. This meeting will be for the purpose of ratifying the actions of the national convention. It will be in the Grand opera-house, and an able speaker will be there from some other county.

The executive committee of the republican county central committee is composed of Chairman Morrison, Secretary N. A. Ulm and five men appointed by Chairman Morrison. Those appointed are T. B. Talbert of Huntington Beach, F. C. Spencer of Anaheim, D. A. MacMullan of Olive, R. T. Davis of Fullerton and Sid Smithwick of Santa Ana.

The committees chosen for the campaign are as follows:

Finance—G. W. Angle, H. J. Forgy, N. A. Ulm, A. W. Rutan and H. D. Connell of Santa Ana, W. S. Gregg of Orange.

Advertising—L. L. Shaw, George E. Robinson, R. T. Harris and George L. Wright of Santa Ana, K. E. Watson of Orange, J. W. Duckworth of Anaheim and R. T. Davis of Fullerton.

Entertainment—W. B. Williams, N. T. Edwards, A. H. Stutsman, S. O. Walker, F. C. Spencer, T. B. Talbert and D. A. MacMullan.

Auditing committee for central committee—J. W. Morrison, Sid Smithwick and D. A. MacMullan.

Summer Service

Between Santa Ana and Newport Beach. Beginning Saturday, June 13, and until further notice trains will run between Santa Ana and Newport Beach as follows:

Leave Santa Ana—8 am, 8:30 am, 10:10 am, 2:40 pm, 4 pm, 6:20 pm.

Returning, leave Newport Beach 6:50 am, 10:45 am, 3:15 pm, 5 pm.

8 am and 4 pm are daily except Sunday.

L. P. VALLA.

If there were any lingering doubts as to the interest and friendship of the United States government for its Japanese neighbor in the orient, they have been most effectually dissipated by the action of Congress in making liberal provision for representation by the United States at the great national exposition to be held at Tokio from April 1, to October 31, in the year 1912. All departments of the government will co-operate in meeting the desires of the President, the Secretary of State and the Congress, for a complete and successful exhibit of the artistic, industrial and material resources of the United States.

PATENTS

PROCESSED AND DEFENDED. Send model, drawing or photo for expert search and free report. Free advice how to obtain patent, trade marks, copyrights, etc., in ALL COUNTRIES. Business direct with Washington saves time, money and often the patent. Patent and Infringement Practice Exclusively. Write or come to us at 823 Ninth Street, opp. United States Patent Office, WASHINGTON, D. C.

GASNOW & CO.

Walk on Easy Street

Get rid of that painful corn or bunion.

When relief and cure are to be obtained

Indian Corn Leaf

will do the work quickly and without causing a particle of pain. It is the new way of treating corns, bunions or calluses. Cut off a piece of the leaf, apply it to the corn, relief comes instantly after which the corn is removed entirely. It is harmless and totally unlike any other remedy. We have testimonials from all over the U. S., of its wonderful cures, and the cost is only 20 cents, sent by mail for ten cent stamps and our booklet how to treat the feet. "Indian Corn Leaf" cures Piles, price 20 cents. Agents make money selling these wonderful remedies. Write for terms. Address, BOND SUPPLY CO., BOND BUILDING, WASHINGTON, D. C.

When you have that blue and disagreeable feeling drink a glass of the famous Anaheim beer, and smoke a North Light cigar. That will fix you up. Both are union made.

Notice of Public Work

Notice of the passage of a resolution by the Board of Trustees of the City of Anaheim declaring its intention to order the widening of Broadway Street in said City.

Notice is hereby given that on Thursday, June 14th, 1906, the Board of Trustees of the City of Anaheim, State of California, did at its meeting on said day, pass a resolution, No. 74, declaring its intention to order the following street work to be done, to-wit: To widen Broadway Street in said City of Anaheim. That the land which was by said Board of Trustees deemed to be, and by its said resolution was declared to be necessary to be taken for said work or improvement, is described as follows, to-wit:

All that certain land situated, lying and being in said City of Anaheim, and particularly described as follows: First: Beginning at the Southwesterly corner of Lot 13 in Block 2 of the Enterprise Tract, a map of said tract recorded in Book 4 page 88 of Miscellaneous Maps, Records of Orange County, California, and running thence South 74 1/2 deg. West parallel with the South line of Vineyard Lot 2, as shown on a map recorded in Book 4 of Deeds, pages 629 and 630, Records of Los Angeles County, California, 320.32 feet to a point on the East line of Citron street; thence South 15 1/2 deg. East 20 feet; thence North 74 1/2 deg. East parallel with the "South" line of said Vineyard Lot, E. 620.57 feet; thence North 15 1/2 deg. West 20 feet to the point of beginning.

2d. Beginning at the Southeastery corner of Lot 6, West Broadway Tract, as shown on a map recorded in Book 4 page 88 of Miscellaneous Maps, Records of Orange County, California, and running thence North 74 1/2 deg. East parallel with the South line of Vineyard Lot 2, as shown on a map recorded in Book 4 of Deeds, pages 629 and 630, Records of Los Angeles County, California, 297 feet to a point on the West line of Citron street; thence South 15 1/2 deg. East 20 feet; thence North 74 1/2 deg. West parallel with the South line of said Vineyard Lot, E. 620.57 feet; thence North 15 1/2 deg. West 20 feet to the point of beginning.

That the exterior boundaries of the district of lands established, and declared by said resolution to be affected and benefited by said work or improvement, and to be assessed to pay the damages, cost and expenses thereof, are described as follows:

Beginning at the Northeastery corner of Lot 6 of the West Broadway Tract, as shown on a map of said tract recorded in Book 4 page 88 of Miscellaneous Maps, Records of Orange County, California, and running thence North 74 1/2 deg. East along a line parallel to the Southerly line of Center Street 297 feet to a point on the West line of Citron street 405 feet South 15 1/2 deg. East from the Northeastery corner of Vineyard Lot E. 7, as shown on a map recorded in Book 4 of Deeds, pages 629 and 630, Records of Los Angeles County, California, 112.45 feet to a point on the North line of Citron street; thence North 15 1/2 deg. East 20 feet; thence North 74 1/2 deg. East 208.4 feet; thence South 15 1/2 deg. East 240 feet to a point 20 feet South 15 1/2 deg. East of the Southwestery corner of Lot 13 in Block 7 of the Enterprise Tract, as shown on a map of said tract recorded in Book 4 page 88 of Miscellaneous Maps, Records of Orange County, California, and running thence North 15 1/2 deg. West 86.07 feet to a point 20 feet South 15 1/2 deg. East from the Northeastery corner of Vineyard Lot E. 7, as shown on a map recorded in Book 4 of Deeds, pages 629 and 630, Records of Los Angeles County, California, 112.45 feet to a point on the North line of Citron street; thence North 15 1/2 deg. East 20 feet; thence North 74 1/2 deg. East 208.4 feet; thence South 15 1/2 deg. East 240 feet to a point 20 feet South 15 1/2 deg. East of the Southwestery corner of Lot 13 in Block 7 of the Enterprise Tract, as shown on a map of said tract recorded in Book 4 page 88 of Miscellaneous Maps, Records of Orange County, California, and running thence North 15 1/2 deg. West 86.07 feet to a point 20 feet South 15 1/2 deg. East from the Northeastery corner of Vineyard Lot E. 7, as shown on a map recorded in Book 4 of Deeds, pages 629 and 630, Records of Los Angeles County, California, 112.45 feet to a point on the North line of Citron street; thence North 15 1/2 deg. East 20 feet; thence North 74 1/2 deg. East 208.4 feet; thence South 15 1/2 deg. East 240 feet to a point 20 feet South 15 1/2 deg. East of the Southwestery corner of Lot 13 in Block 7 of the Enterprise Tract, as shown on a map of said tract recorded in Book 4 page 88 of Miscellaneous Maps, Records of Orange County, California, and running thence North 15 1/2 deg. West 86.07 feet to a point 20 feet South 15 1/2 deg. East from the Northeastery corner of Vineyard Lot E. 7, as shown on a map recorded in Book 4 of Deeds, pages 629 and 630, Records of Los Angeles County, California, 112.45 feet to a point on the North line of Citron street; thence North 15 1/2 deg. East 20 feet; thence North 74 1/2 deg. East 208.4 feet; thence South 15 1/2 deg. East 240 feet to a point 20 feet South 15 1/2 deg. East of the Southwestery corner of Lot 13 in Block 7 of the Enterprise Tract, as shown on a map of said tract recorded in Book 4 page 88 of Miscellaneous Maps, Records of Orange County, California, and running thence North 15 1/2 deg. West 86.07 feet to a point 20 feet South 15 1/2 deg. East from the Northeastery corner of Vineyard Lot E. 7, as shown on a map recorded in Book 4 of Deeds, pages 629 and 630, Records of Los Angeles County, California, 112.45 feet to a point on the North line of Citron street; thence North 15 1/2 deg. East 20 feet; thence North 74 1/2 deg. East 208.4 feet; thence South 15 1/2 deg. East 240 feet to a point 20 feet South 15 1/2 deg. East of the Southwestery corner of Lot 13 in Block 7 of the Enterprise Tract, as shown on a map of said tract recorded in Book 4 page 88 of Miscellaneous Maps, Records of Orange County, California, and running thence North 15 1/2 deg. West 86.07 feet to a point 20 feet South 15 1/2 deg. East from the Northeastery corner of Vineyard Lot E. 7, as shown on a map recorded in Book 4 of Deeds, pages 629 and 630, Records of Los Angeles County, California, 112.45 feet to a point on the North line of Citron street; thence North 15 1/2 deg. East 20 feet; thence North 74 1/2 deg. East 208.4 feet; thence South 15 1/2 deg. East 240 feet to a point 20 feet South 15 1/2 deg. East of the Southwestery corner of Lot 13 in Block 7 of the Enterprise Tract, as shown on a map of said tract recorded in Book 4 page 88 of Miscellaneous Maps, Records of Orange County, California, and running thence North 15 1/2 deg. West 86.07 feet to a point 20 feet South 15 1/2 deg. East from the Northeastery corner of Vineyard Lot E. 7, as shown on a map recorded in Book 4 of Deeds, pages 629 and 630, Records of Los Angeles County, California, 112.45 feet to a point on the North line of Citron street; thence North 15 1/2 deg. East 20 feet; thence North 74 1/2 deg. East 208.4 feet; thence South 15 1/2 deg. East 240 feet to a point 20 feet South 15 1/2 deg. East of the Southwestery corner of Lot 13 in Block 7 of the Enterprise Tract, as shown on a map of said tract recorded in Book 4 page 88 of Miscellaneous Maps, Records of Orange County, California, and running thence North 15 1/2 deg. A COMING ROAD CONGRESS

President Appoints Delegates to Represent Government at International Road Congress at Paris In October

[CORRESPONDENCE OF THE GAZETTE]

Washington, D. C., June 11.—President Roosevelt has directed that this nation be strongly and officially represented at the good roads international congress to be held at Paris the week beginning October 11 and credentials have been issued naming Logan Waller Page, director of the office of public roads of the U. S. department of agriculture, chairman of the commission. The other members named are Colonel Charles S. Bromwell of the United States corps of engineers, now serving as superintendent of buildings and grounds of the District of Columbia, and Clifford Richardson of New York, an eminent chemist and one of the world's acknowledged authorities on bituminous road building materials.

This coming congress, which will be attended by distinguished delegates from every country in the world, is regarded by highway engineers and experts as probably the most important ever summoned for the discussion of an economic question. Its need is the direct outgrowth of the advent of the automobile, for while thousands are ignorant of the fact, the soft tires of the modern motor car are the greatest menace the hard surface thoroughfares of the world have ever been called upon to face. To understand how a pneumatic tire made of rubber could possibly injure a road surfaced with particles of crushed rock, one must have at least a faint understanding of the theories on which first Tresauget of Limoges and then MacAdam of Ayr built that class of highway. They figured that a road composed of crushed stone would not only endure the constant traffic of iron-tired vehicles, but would improve because the metal-bound wheels would be constantly crushing the stones and forming rock dust. That dust would, they argued, not merely sift itself into all cracks and interstices, but would fill all surface inequalities and when wet would be rolled into a smooth, impervious, water-shedding, shell like surface.

They reasoned well, built wisely, and for over a century and a quarter the so called macadam road did everything that the famous French and Scotch highway engineers claimed it capable of. It came to be the ideal road for suburban sections, and thousands of miles were built. France to date has spent \$660,000,000 on her incomparable system of rock surfaced national routes and the United States has followed to a degree, possessing at the present time approximately 32,000 miles of this class of highway.

Prior to the advent of the automobile the roads improved, but the modern speed vehicle had not been traversing the suburban highways long before a pronounced retrogression of the most generally traveled stretches was very noticeable. Complaints came from farmers and from dwellers along suburban roads that a great dust nuisance had also sprung up and that emerald lawns were taking on the hue of London fog, and that box hedge was dove grey rather than green. Fruit farmers noted their products becoming gritty and prices fell off.

Investigation proved at once that the new conditions had been created by the automobile and highway engineers in every civilized land began studying the new condition and seeking for a remedy. In this country, Director Page conducted a series of interesting experiments in which various classes of automobiles were sent at varying rates of speed over selected stretches of road, while expert photographers pictured their progress and produced proof that the tractive force of the rear tires did the damage. While he was watching that work and was experi-

menting with various dust laying liquids, France was doing the same on an even larger scale. That country, which expends vast sums annually on maintaining the well-nigh perfect system of highways it has been building since the days of the first Napoleon, made a most complete set of measurements and learned that the automobiles had caused the roads of the republic to retrograde fully forty per cent. It was decided to summon the thought, skill and intelligence of the world to combat a condition which means great financial losses and the official invitations to the congress were sent out, the French government formally requesting the U. S. government to participate in the congress.

That President Roosevelt is personally so deeply interested in the coming gathering as to send the director of roads and his distinguished associates to France may by some be regarded as evidence of a national awakening to the vast importance good roads are to the nation.

Invitations have been transmitted through the office of public roads to state highway commissioners, city engineers and park commissioners to attend the congress and already a number of delegates have been selected.

PRESERVE THE FORESTS

Future Welfare Dependent upon Conserving National Resources—Deforestation Causes Floods in Michigan

PESSIMISM VS. "OPTIMISM."

A correspondent writes: "I do not believe any association or individual can do anything toward the protection of the forests. They are bound to go, in this country, even down to the railroad ties and prop timbers. Assessments are so high that no one can afford to hold them to grow up into timber again. I have no sympathy with the movement at all."

Over against this should be put the speech made by Speaker Cannon before the National Wholesale Lumber Dealers' Association in Washington on the 12th.

Mr. Cannon declared himself to be "an optimist." He ridiculed the idea that our forests are facing destruction. He scorned the notion that special effort should be made to conserve our natural resources. He sneered at "men who make reputation in public life, in departmental life, in legislative life, by denouncing the criminal wastefulness touching the destruction of the forests," and added: "I sometimes hear them talk; I sometimes wonder how much they know."

He described his early pioneer life in Wabash County, Indiana, when it was necessary to clear the forests to provide land for farming; and then inquired: "Is there a man here *** who would put us back to fifty years ago, when there was nothing but the wild beasts and the adventurous pioneer to be found in that vast domain known as the Northwest Territory, that would turn the hands back upon the dial fifty or sixty years ago?"

He exclaimed sarcastically: "What is to become of posterity? Oh, the natural resources are being destroyed! In forty or fifty years we are to freeze to death because there is no more coal and there will be no more lumber, no more timber. Burning the candle at both ends! I suppose we ought to freeze now, that fifty years from now they may have something to warm

them." He expressed his faith that the Caucasian race would find some way to meet conditions which may arise, and declared that he was not "losing sleep."

In closing, he thought it "necessary" for lumbermen "to pursue a different policy toward the preservation of your holdings in the forest: that instead of cutting it clean, you should be more careful about the cutting." But added: "You will do it because it is to your interest to do it, and that is greater than anything else. It is greater than law."

Between the pessimism of our correspondent and the "optimism" of Speaker Cannon, the reader may take his choice. The chief difference between the two is that the latter is in the place of power. He sees no occasion for anxiety, and no ground for action by the community through its agency called government. For such slight corrections as may be necessary, he relies wholly upon cold-blooded self-interest and unregulated individual initiative. In so far as this speech is an index, his political economy is that of a hundred years ago, as voiced by David Ricardo: *Laissez faire*, each for himself, self-interest the grand automatic regulator of our whole industrial mechanism! Is it any wonder the Appalachian bill finds rocks in the channel through which it must travel?

"After us the deluge!" "I suppose we ought to freeze now, that fifty years from now they may have something to warm them."

The world has not yet forgotten the speech of Louis XV. to Pompadour. Perhaps this speech of Speaker Cannon's may also prove historic.

KANSAS FARMERS' INSTITUTE. The Kansas State Agricultural College, at Manhattan, has engaged C. A. Kupfer of the U. S. Forest Service, for several weeks, to talk to farmers' institutes in Western Kansas. This is in addition to the institute work done by the two professors of horticulture and forestry.

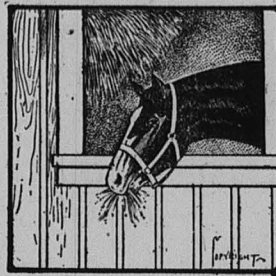

The college has recently issued a practical pamphlet on "Tree Culture," sending it to all the rural district teachers of the State and to all members of farmers' institutes. It will be sent free to anyone on application to the Superintendent of Farmers' Institutes, Kansas State Agricultural College, Manhattan, Kansas.

Another pamphlet of the same sort issued by the college, especially for teachers, is entitled "Bird Life."

RECLAIMED FROM LAND THIEF.

H. H. Yard, who has operated most extensively in Government lands in Butte and Plumas counties, California, seeking to obtain public domain in those sections, has lost his fight for the possession of about 265,000 acres along the Feather River. The land office at San Francisco has rendered a decision and report setting forth that in more than ninety claims there is no evidence of mineral. The lands taken by Yard revert to the Government as timber lands.

The decision is causing much excitement in Butte and Plumas counties.

KEEP A LOOK OUT

on your horse's feed. Be sure and give him the right kind. He will give you better service and you won't need to call a veterinary surgeon.

WE HAVE BALED HAY

in our store room that's as sweet as the day it was mown. There isn't a bit of danger when using our feed. It's good the year round.

Get our prices on Hay, Grain, Seeds and Poultry Supplies before buying. It will pay you.

where similar large tracts are endangered.

The outcome of the controversy is a great victory for State Mineralogist L. E. Aubrey, who has for years waged a bitter fight against individuals and corporations who took up timber lands under the Mineral and Placer Land Act. Aubrey began this contest in 1901 and took the case directly to the President of the United States.

Mr. Aubrey says his action is in the interests of the miners of California, who are shut out by these land grabbers.

DEFORESTATION AND FLOODS IN MICHIGAN.

Replying to an inquiry, Mr. C. F. Schneider, section director of the Climatological Service of the Weather Bureau, at Grand Rapids, Michigan, writing February 24, says:

"Regarding the connection between deforestation and floods in Grand River, my experience along this line confirms

the oft repeated claims of the friends of reforestation—that the cutting down of trees destroys one of Nature's savings banks. Not only do the deforested slopes of the Grand River shed the heavy rains of the summer very quickly, but they yield up all the water content of the winter's snow in a remarkably short time when the warm sun and warm rains of spring come on. The rapid congestion of the water into creeks and rivers is also forwarded by the extensive network of county drains, farm drains and tilled land."

Speaking of rivers in the same section, the Huron and Raisin, the U. S. Geological Survey bulletin says: "The location of the cities and nearly all of the villages on the banks of streams was determined by the water power they afforded for grist mills and sawmills." This suggests a similarity of conditions in Michigan and New England, and a corresponding interest in forest conservation

USE TIMBER WINDBREAKS

California Included in a Study by the Forest Service to Prevent Crop Ruination by Hot Winds in Arid Regions

[CORRESPONDENCE OF THE GAZETTE.]

Washington, June 11.—Uncle Sam's tree planting and farm experts have just undertaken a practical and scientific study of the use and effect of timber windbreaks and shelterbelts in the agricultural regions of fourteen western states. This is the first time in this country that a study of this much discussed question has been undertaken over a wide region under one plan, for the purpose of collecting data for the benefit of the agriculturists who are developing the western plains. At present windbreaks are planted haphazard, one kind here, another there. If one kind is better than another, the government experts think that fact ought to be known, and it is believed that the study about to be undertaken will settle the question once for all. It will at least collect such facts never before brought together.

The work will be done by the United States Forest Service. In some states the agricultural experiment stations will co-operate in the studies, and in these cases the Forest Service will provide the necessary apparatus, and the other expenses will be shared half and half by the government and experiment stations. The investigations will be taken up in five states this year and extended to the other nine as rapidly as the investigations are completed. Four of the states in which the study will be made this year are Nebraska, Colorado, Oklahoma and Kansas. The fifth will be either Minnesota, North Dakota or Iowa. Ultimately the investigations will cover Minnesota, North Dakota, South Dakota, Nebraska, Iowa, Kansas, Oklahoma, Colorado, Texas, New Mexico, Utah, California, Washington and Idaho.

The sudden ruin that hot winds sometimes bring to growing crops in parts

of the West are well known. Blowing strongly across the unobstructed plains, these winds may in a few days blast all hope of even a partial harvest. This is particularly in the lower portion of the central plains region, and in years of unusually low rainfall. Here the winds most to be feared blow from the southwest or south. In the northern prairie region the farmer is exposed to the hot "Chinook" wind, which sweeps down from the Canadian mountains. This either dries out growing crops or, if it prevails before the danger of killing frosts is past, causes loss through urging vegetation forward prematurely. Cold winter winds also do great injury to crops, make the climate more severe for stock and men, and interfere with an even covering of snow upon the ground. This is true from Canada almost to the Gulf.

In Southern California, dry winds from the north and northeast sweep down from the Mohave Desert with destructive results. Coming in June, these winds may reduce the wheat yield of unprotected fields to almost nothing. Windbreaks of eucalyptus and Monterey cypress, now in such common use to protect orange groves and orchards, long ago convinced possessors of highly valuable irrigated land of the value of tree planting for protection purposes.

But there are two sides to the wind-break question. Some prairie farmers declare positively that belts of osage orange, for instance, are a "nuisance." Others cite figures to show positive benefit. Mr. Morris Thompson, who lives near Downs, Kansas, gives his yield of corn from a field protected on the south by a row of tall cottonwoods as six bushels per acre more than in places where there is no protection. About fifteen acres are benefitted in this way. It is highly improbable that the wind-break occupies sufficient land to offset this benefit.

An Illinois farmer sums up his observations upon this matter thus: "My experience is that now, in cold and stormy winters, wheat protected by timber belts yield full crops, while fields not protected yield only one-third of a crop. Twenty-five or thirty years ago we never had any wheat killed by winter frosts, and every year a full crop

of peaches, which is now rare. At that time we had plenty of timber around our fields and orchards, now cleared away."

The Forest Service proposes to find out just when and how much windbreaks increase the yield of crops. To carry out the plans, much technical work will be necessary. Instruments will be used to measure heat and cold, moisture and dryness, both above and below ground; to register the force of the wind near the wind-breaks and some distance away; to measure light intensity, and take note of the effects of shade; to register frost at different distances from the trees; and to keep account of the effect of the wind-breaks on the snow which covers the ground to leeward in winter. Many other measurements and tests will be made, and elaborate data will be collected by experts who will have charge of the study.

Many disputed questions will thus be settled and the data gathered will be placed at the disposal of the farmers who desire it. Doubtless rows of trees between fields sometimes do more harm than good, by casting shade and abstracting water from the soil. Trees may also increase the danger from frost, since the movement of the air lessens that danger. The Forest Service will study all sorts of conditions, including the relative value of windbreaks, consisting of a single row of trees, and shelterbelts, made up of a number of such rows. A wind-break is usually planted for protection alone, a shelterbelt for both protection and the growing of timber.

Corn will be the crop studied behind the wind-break this year. Trustworthy conclusions can not be obtained by comparing results from different crops. Each crop makes its own demand upon the soil, so that what would destroy one might do little harm to another. Corn is a particularly good crop to experiment with because it is easily injured by hot dry winds, will not stand shading, and is very sensitive to frost.

The instruments and apparatus for each State will be read weekly by persons assigned to that duty by the Agricultural Experiment Stations in the respective States. The whole work will be in charge of an expert for the Forest Service at Washington, who

OPENING GUN!

GRAND

Republican Ratification

Grand Opera House, Santa Ana

Saturday Evening, June 20, '08

Hon. Clyde Bishop

and other prominent speakers will pay tribute to the principles of the Republican party and its nominees. Music will be furnished by the Santa Ana band. All believers in Republican principles and Roosevelt policies should turn out and make this opening meeting of the campaign an enthusiastic success.

will be assisted this summer by three or four persons, also from the Forest Service, who will study general conditions in the States under investigation, in regard to the effects of wind-breaks on crops. The work will continue until crops are gathered next fall, when the actual yield of sheltered fields will be measured, and results compared with nearby unsheltered fields. Some of the observations will continue through the winter.

It is expected that the results will be published both by the Forest Service and by the Experiment Stations which cooperate in carrying out the work.

Company E, N.G.C., will hold an election June 25. The three commissioned officers here will have completed their terms by that date. The officers are Captain Herman Stern, Anaheim; First Lieutenant Kellenberger of Buena Park, and Second Lieutenant Selinger of Placentia. Major Vestal of Santa Ana will have charge of the election. The local company has one of the highest records in the state for attendance, equipment, etc. Col. Shriver has issued an order that all companies of the Seventh regiment in whose home towns no Fourth of July celebration will be held, be at San Pedro on the Fourth of July.

Rev. Mitchell, who has been on a visit to his home in Erie, Pa., for six weeks past is expected back the latter part of the week.

Beginning with Sunday June 21 and continuing indefinitely the Los Angeles Herald will print a four page green section entirely devoted to sports of every description. It will be edited by Jay Davidson, who will be assisted by a staff of recognized authorities on sporting subjects. Leave orders with Wirechasing.

Articles of incorporation have been filed by the Beebe-Weisel Co., a vehicle and implement firm. The company has been capitalized at \$20,000 and \$8000 has been subscribed by the three directors as follows: P. J. Weisel, \$3900; B. V. Beebe, \$4000; Louis Weisel, \$100.

Placentia

Mr. and Mrs. James Schumacher and Prof. Walter Crowther got up a pleasant surprise party Sunday in honor of O. H. Schumacher, it being his 37th birthday. The visitors went to the Schumacher home loaded down with many good things to eat and spent a pleasant day. The Crowther orchestra furnished good music for the happy occasion.

Mr. and Mrs. Joe Wagner celebrated their fourth wedding anniversary recently by giving a big dinner at their home in Placentia, and having as guests a number of relatives and friends. The affair was a very happy one for all present.

Most of the Placentia people attended the class play given by the senior class of the high school Friday evening.

Mrs. R. H. Gilman and daughter Helen were Los Angeles visitors Saturday.

Mr. and Mrs. O. P. Jones were Santa Ana visitors Saturday.

Louis and Hannah Edwardson left Wednesday for Boston to visit their sister, Mrs. Frost.

Miss Christine Hansen spent Thursday and Friday in Los Angeles.

Mrs. Messler has as her guests her mother and sister of Los Angeles.

R. H. Gilman and son started for Bear Valley Saturday for a two weeks' outing.

N. P. Robertson entertained about forty guests at dinner Sunday.

Mrs. Conliff and son Bert will leave this week for the hot springs. They will be joined by Mr. Conliff and Ed about the first of July.

J. Hahn was in Los Angeles the first of the week on a business mission.

Mr. Gunderson reports his walnut trees more heavily laden than ever before. The nuts are larger than in any former season, and show little blight.

J. Hahn yesterday appealed to the Supreme Court his case contesting the seat of Frank Gates, recently declared by the Superior court to be elected city trustee of Anaheim.

... Our ...

Alteration Sale

proved a perfect success. Why? Because we are selling everything exactly as advertised. All goods are marked in plain figures and we are selling all goods with the guarantee, "Satisfaction or Money Back." We shall continue our sale every day this week, the same prices as quoted below will rule as long as the goods will hold out.

Very respectfully,

Ahlborn & Raymond
