NUMBER 28

PROTECTION DISTRICT UP FOR DISCUSSION

INTERESTING SESSION OF BOARD OF TRADE HELD MONDAY EVENING

GARDEN GROVE, WESTMINSTER, BUENA PARK AND FULLERTON LOWER THAN ANAHEIM

Showing that the outlying districts which have recently gotten up petitions against the formation of the Security Protection District, are lower in altitude and consequently more subject to overflow of the Santa Ana river than this city, members of the board of trade at Monday night's meeting dealt a death blow to the contention that these districts are in no danger from the flood waters of the river. The matter was brought up by Chairman Eggabroad, who asked V. U. Simpson, chairman of the committee which secured signatures to a petition for formation of the district, to state where the proposition stood at the time. Mr. Simpson said that as he had started the fight earlier in the campaign, he might just as well start it at the meeting.

"I was in Santa Ana and held conference with the old board of supervisors," he said, "and they told me positively that the Olive bridge, for construction of which \$35,000 was lying idle in the treasury, would not be built until a protection district should be formed and steps taken looking to the curbing of the river's water. Heretofore water of the stream in flood times, has meandered about this district, inundating land on both sides of this city, and on some occasions the main stream ran down the center of town. I notice the Fullerton people are circulating petitions protesting against formation of the district, saying property in that city is not subject to overflow. These people seem to have forgotten that 11 years ago men were engaged in shoveling mud from floors of business houses in Fullerton, and all houses were more or less damaged, and one man lost his life in aiding residents. And still the good people in that locality are objecting to formation of a protection district, saying they are immune from damage."

"Buena Park also, I understand, is objecting to formation of the district. As a matter of fact, Buena Park is the lowest place in the district, there being considerable fall from Anaheim to that city."

"I understand a man is circulating a report that if the district be formed, it will cost land-owners from \$10 to \$12 per acre. That is a great mistake, for the cost should not exceed \$1.00 per acre."

Secretary Ahlborn was asked to call the roll of chambers of commerce which had been invited to attend the meeting to find how many were present. Representatives were present from West Orange, Garden Grove, Stanton, Buena Park and Santa Ana.

City Engineer Steward, who with A. Mills, went over the boundary of the proposed district before the boundary was defined, was asked to talk on the matter. "I have lived in this city for 25 years," he said, "and know something about the actions of the river in question. For four weeks, in 1889, it was impossible for anyone to get from Santa Ana to Los Angeles except by wagon road, and part of the time, that was impossible. The whole country was inundated and railroad trains were a scarce article in these parts. At other times in the county's history, similar, but perhaps not such disastrous floods have occurred, and I am sure there is no one here who does not recognize the need of river protection. The question that naturally arises is, Who shall do it? and how is it to be done? We are all liable to it, and no man in the proposed district can say he is not in danger, for one can never tell where the river is going until it is gone. We are all liable to flood. If we do not take measures toward abating the danger from overflow, it seems to me we are inviting whatever danger may overtake us. I am not prepared to state what the cost of protecting the river will be for that is not in my line, and it would take expert engineers who have made a specialty of this work to estimate the cost, but as only \$5,000 has been spent on the river in the past 20 years, it ought not to cost so very much to fix it up right at this time. I am in

favor of starting the work, and completing it at the earliest possible moment."

John Swartzbaugh, of Garden Grove, said a few words, expressing it as his opinion that very much money ought not to be used for protecting the river to secure the bridge, for the Southern Pacific bridge between this city and Orange has stood for over 20 years without being washed away.

A. A. Mills brought a map of the geological survey for this district before the meeting and showed the altitudes of the various portions of the proposed district. "The danger point is at the Yorba bridge," he said, "and from there the flood waters are liable to break away and flood any part of the northern part of the proposed district. As to the altitudes of the various portions of the district, the Santa Fe depot at Fullerton is four feet lower than the Santa Fe depot at Anaheim, and yet the Fullerton people think Anaheim is trying to get them into something they do not need. The same contour line which passes through the river bed near the Chinese gardens east of Anaheim, also goes through the new residence of W. L. Hale a mile and a half east of Fullerton. The altitude of Buena Park is 73 feet, which is 20 feet lower than Garden Grove, and gives a fall of 19 feet to the mile from the danger point at Yorba to Buena Park. The fall from Anaheim to Garden Grove is 17 feet per mile, while the fall down the river bed is only 13 feet. If the water breaks over, there's no telling where it is going to land, for all this country to the west is lower than the river bed. Talbert has been flooded several times by the water from the river, and the people of Westminster make fun of the web-footed people of Talbert, but their own town is 25 feet lower than the former."

George L. Dietrich said that the district ought not to be divided on the question, for it was universally recognized that the protection was needed. All hands should get in and boost, and make the proposition a success, he said.

H. H. Cole, of Buena Park, asked why the gun clubs near the coast had not been included in the district, and Mills answered that most of the clubs had been so included, and those that were not, were right in the bay, and so could not be made to stay in the district.

Mr. Cole then asked information as to what right the ranchers of the Newbert Protection District or the property owners just west of the river would have to damages from water overflow if the district were formed. He understood that money could be collected from the district for damage done by the river water, if it should break over the bank and do damage to orchards and crops. He also wanted to know what sort of river protection was to be done. This was answered by Mr. Dietrich, who said that in some places piling would be necessary, and in others growing plants would probably be cheaper and better, so until an engineer is secured to take up the work, nothing definite could be said about the style of protection to be afforded.

Mr. Cole stated further that he and his associates were not at the meeting to fight the proposition, but were there for information. It seemed to him, he said, that all were in the dark, and did not know exactly what they were getting into. He would like to know something about what was proposed to be done, before going into something that might saddle a lot of expense upon himself and his children.

Mr. Dietrich said that he trusted the supervisors to do what was right in the matter and according to law, the committee in charge had taken the most feasible and easy way to get the plans for the work made. Engineers must be paid for doing the work, and as the county could not be asked to present to undertake the expense of the work, the district must be formed before funds for the work will be available. After the plans made and the cost of the work estimated, if the district does not wish to undertake the work, no action need be taken, and the proposition goes back to where it started.

Simpson said the river bed becomes higher year by year, and as the county has no right to cut the brush which makes the filling of the bed easy, the river has been left to go its own sweet way for many years, and hence the need of a protection district.

As great fear is expressed that the cost will mount up into enormous figures, Steward suggested that a limit for assessment be set by the board of supervisors if such a course might be pursued, and this would insure a moderate cost to the assessed property.

FOURTH OF JULY CELEBRATION PLANNED

UNIFORM RANK KNIGHTS OF PYTHIAS TO HOLD BIG TIME ON NATION'S BIRTHDAY

COMPETITIVE DRILLS, PARADES, MUSIC, FIREWORKS AND OTHER ATTRACTIONS COMING

What promises to be the best Fourth of July celebration in the history of the city is the big time planned for Independence day by members of the local Uniform Rank, Knights of Pythias. The celebration was definitely planned at a meeting of the organization held last week, and the proposition was further discussed at the meeting last night. One of the main features of the day is to be a competitive drill between companies of the Third Regiment, Uniform Rank, Knights of Pythias, 3,500 members of which will probably be in attendance. Members of the Knights of Pythias from all over Southern California will be asked to participate in the celebration and it is likely several thousand members will be in the city on that day.

A committee composed of Geo. W. Hamler, chairman, V. U. Simpson, H. M. Adams, H. A. Dickel and Herman Stern was appointed to have charge of the big time. Although definite plans have not as yet been made, it is announced that a big barbecue has been decided on. Fireworks, athletic sports, and all kinds of amusement attractions will be booked for the day, and one of the biggest times in the history of the city may be looked forward to.

It is planned to raise \$2,000 or \$2,500 by popular subscription among local business men for the celebration, and with this amount, one of the best and grandest times in the history of the city may be expected. Everybody will be in their "glad rags," everybody that is anybody will be here, and the town will be among the high-flyers on Friday, the Fourth of July.

ODD FELLOWS OF COUNTY AT PICNIC

Santiago Canyon Scene of One of Most Notable Gatherings of Order

Upwards of 100 members of the Odd Fellow and Rebekah lodges from this city attended the annual picnic of the Orange county I. O. O. F. and Rebekah orders held at the County Park in Santiago Canyon Friday. The crowd began to gather at 10 o'clock, and when all were present the assemblage was estimated to contain 600 people. Before lunch, a program was rendered, each lodge furnishing a number. Miss Louise Paschall represented the local lodge of Rebekahs with a fine vocal selection and H. A. Dickel sang for the Anaheim Odd Fellow lodge. Other numbers were given as follows: Address, Dr. D. F. Royer, Orange I. O. O. F.; address, Mr. Phelifer, Orange Rebekah; original reading, Mrs. F. M. Lacy, Santa Ana Rebekah; address, A. E. Koepsel, Santa Ana I. O. O. F.; recitation, Miss Melser, Fullerton Rebekah. Two numbers were also given by the Veterans' I. O. O. F. association, and the program concluded with a drill by the Cantons of Santa Ana. Upon conclusion of the program a panoramic picture of the assemblage was taken and the entire number sat down to a sumptuous basket dinner. Coffee, sugar, cream, oranges and lemons were served free. The afternoon was devoted to dancing, climbing hills, shooting the toboggan slide, and other amusements appropriate to the occasion. The picnic was held in honor of the 94th anniversary of Odd Fellowship, and was participated in by members all over the county. Over 100 autos and three large auto trucks were used in carrying the happy picnicers to the park. A most enjoyable day was spent by all who were in attendance, and they will look forward with pleasure to the picnic next year.

The Ladies' Aid Society of the First Presbyterian church, held its regular monthly meeting in the church Thursday afternoon. An interesting program was rendered, followed by a social hour and refreshments.

DELIGHTFUL CLASS PARTY

High School Seniors Enjoy Evening at Home of Miss Kathryn Hand

Miss Veda Walker, class teacher for the seniors of the high school, entertained members of the class Saturday evening at the home of Miss Kathryn Hand on the east side. At 8 o'clock the guests assembled, and for the first part of the entertainment, enjoyed a farce comedy act, the "Kleptomaniac," given by six members of the junior class, Misses Gladys Gervais, Louise Dahn, Fern Corcoran, Violet Gervais, Goldie Matthews and Alice Goetz. A small stage was simulated on one side of the room, tiny footlights being provided and the scenery being made up of a solid bank of roses against the wall. Games were then played, consisting of geographical contests, (not dry and schoolified, but real enjoyable), indoor ball games, blackbird pie, etc. All games were original, and none of them had ever been played before at class parties. Upon conclusion of the games, delicious refreshments of orange ice, cake and chocolate were daintily served, after which a flash-light picture of the assemblage was taken. The entire evening was perhaps the most delightful ever spent by members of the class, and all present expressed themselves as having enjoyed the occasion immensely.

BUENA PARK LADIES AID HOLDS MEETING

Dance Given by Misses Simpson and Wilson a Delightful Success

(By the Gazette Correspondent.)

The Ladies' Mutual Aid met with Mrs. H. H. Haggarty on Thursday at 2 P. M., it being her 30th wedding anniversary. The house was beautifully decorated with roses. Forty ladies of the society were present. The Aid presented Mrs. Haggarty with a beautiful cut glass fern dish and Mrs. Geo. Warren gave her an elegantly decorated china cake plate. After the routine business of the society was transacted, refreshments were served, after which Rev. Bruce Brown, of Fullerton, who is conducting a series of meetings in the Congregational church, gave an interesting and amusing talk to the ladies. Mrs. John Perry sang a beautiful song, Mrs. Nettie Robeson recited, Mrs. Wilson played two delightful numbers on the piano and the society adjourned to meet again May 8th at the home of Mrs. J. F. Simpson to be entertained by Mrs. Simpson and Mrs. Mann.

The dancing party given by the Misses Juanita Simpson and Madie Wilson at the home of J. F. Simpson on Saturday evening was a pronounced success. The house was beautifully decorated with roses; some 40 young people were in attendance, elegant refreshments were served cafeteria style and Gipsy fortune telling and some pleasing games were some of the features on the lawn. A house party will be given by Miss Simpson in the near future.

The regular monthly meeting of the Chamber of Commerce will occur on Friday evening, May 9th, in Masonic hall. These meetings are very well attended, especially since the wives of members are admitted to membership. At each meeting the ladies introduce some special feature, either a dainty little luncheon or a literary and musical program.

The Parent Teachers' Association will present Bible pictures in the moving picture show next Saturday night. Rev. Bruce Brown, of Fullerton, will lecture on the pictures, and a very interesting entertainment is looked forward to. Everybody is invited to attend the show, which will be held in Masonic hall, in the school building.

Mrs. Frank Baum entertained the Thursday Afternoon Whist Club, April 24, at her beautiful home on North Los Angeles street. Progressive whist was played at four tables, and a most enjoyable afternoon was spent. Three prizes were awarded—the first a silver meat fork to Mrs. Turk, the second, a hand painted plate, to Mrs. Quanton, and Mrs. Stock received a souvenir spoon as consolation prize. At 5 o'clock a delicious lunch was served.

Oscar Mills of Washington, a brother of Mrs. Robert McKee, is visiting here, and finds this section so inviting that he determined to remain permanently. Mr. Mills says this valley is the loveliest spot he has seen in all of his travels, and he is content to cast his lot here until further orders.

LOCAL RUNNERS MAKE RECORD TIME

CARRY MESSAGE THROUGH COUNTRY IN ANNUAL Y. M. C. A. RELAY RACE

20 ANAHEIM SPRINTERS SPEED WITH SILVER TUBE FROM REDLANDS TO LOS ANGELES

Bearing a silver tube with a message from Mayor Williams of Redlands to Mayor Alexander of Los Angeles, Morris Martenet sped through this city Saturday afternoon at 4:30 in the annual Southern California Y. M. C. A. relay race. Martenet took the tube at Alberta street at the intersection of North Los Angeles street, and carried it through on Los Angeles street to Broadway, where it was taken by another runner. The entire distance from Redlands to Los Angeles through this county, over the course which the run was to follow, is 183 miles, and almost 400 lads of the Y. M. C. A. took part in the race, each runner making a half mile. The silver tube containing the message from Mayor Williams of Redlands left that city at 4:30 Saturday morning, going by way of Rialto, Claremont, Ontario, Fullerton, and arriving in this city at 4:30 Saturday afternoon. From Santa Ana, where the tube was taken from here, it was carried by the youths of that city to Garden Grove, thence to Long Beach, and on to Los Angeles, arriving in that city at 8 o'clock in the evening. Those taking part in the race from this city were Beebe, Douglass, Kemp, Elliott, Ashley and Clark Chamberlain, Webb, Chambers, Petermann, Martenet, Owens, Joe Elliott, Clabaugh, Cavanaugh, Megede, Tedrick, King, Garner and Quanton. Four Anaheim boys drove to the junction of the Fullerton road with the Whittier boulevard, took the tube there, and carried it two miles in this direction, where Fullerton boys took it, delivering it again to Anaheim runners at Orangehorpe avenue between this city and Fullerton. From that point the local boys took it to the junction of the Santa Ana road with the road to Orange, where it was taken by boys from the county seat.

In the evening the boys gathered at the Garden Grove Y. M. C. A. and enjoyed a banquet, and listened to inspiring talks by men prominent in boys' work. Each runner participating was given a medal in remembrance of the occasion. Those furnishing automobiles and lending their aid toward the success of the race were L. O. Culp, L. A. Evans, George M. Ross, B. V. Beebe and A. Z. Megede.

The runners reached the Orange county line on the Whittier road at 3 P. M., just one hour ahead of the time expected. Seventy-nine boys of Orange county carried it through the county delivering it to the Long Beach boys, nine miles west of Garden Grove at 5:25, just an hour and a half ahead of the time expected. This remarkable gain of 30 minutes in 34 miles was made possible by the splendid spirit of co-operation among the runners, each one carrying it until tired out, when he was relieved by another runner. The run was through Fullerton, Anaheim, Santa Ana and Garden Grove. The Orange boys expected to carry it through their town, but the early arrival of the message interfered with this.

SEVENTH GRADE WINS

Exciting Athletic Contest Held on Local Grounds Recently.

The boy athletes of the seventh grade of the Fremont school were victorious over their eighth grade opponents in an interclass track meet held on the school grounds recently. The final score was Seventh grade 69, Eighth grade 62. The final score 69, Eighth grade 62. Those taking part in the meet and winning points for their respective classes were Webb, Schneider, Clabaugh, Elliott, Mondetti, Graxiola, Mickle, Smith, Muckenthaler, Yoern, Swaneers, Cavanaugh, Johnson, Davidson and Simpson. The boys all did well, and we expect them to put up a stiff fight for the county Triangle championship at the annual trackmeet to be held in Santa Ana next week.

Charley Newcombe was in town Sunday from Los Angeles, where he has a position as chief mechanic for a large packing company.

ANAHEIM B.B. FANS WITNESS A VICTORY

The Sterlings of Los Angeles Prove Easy Victims Sunday

Stump Huntington, who used to pitch good ball at a time, only two or three years since, when the Anaheim team was the swiftest bunch of amateurs in Southern California, occupied the mound on the local diamond Sunday and demonstrated that he is getting back into his old-time class. Eleven hits were made off his delivery but four or them were not hits, being chargeable to fielders' errors, and eight batters were retired by the strike-out route.

The visitors answered to the name of the Los Angeles Sterlings, but judging from the vari-colored uniforms and the multiplicity of names imprinted on the breasts and backs of the players, the nine was composed of the pick of four separate teams. It was a pretty fair bunch of youngsters and they put up a good game, but were defeated by a score of 5 to 3.

There is, usually, in the games on the local diamond this season, at least one exciting incident in which the players all quit, cluster about the umpire and upbraid him for a half hour or so. This time it occurred in the fifth chapter. The score stood 2 to 1 in favor of the locals and it was evident the game was cinched as they were out-playing the visitors. After two men were out Schultz hit for first base and, taking a desperate chance, stole second. Ortega followed and lifted the ball into the right field where it fell several feet short of the fielder. Instead of throwing it in, the guardian of the garden picked it up and sauntered toward the diamond while Schultz and Ortega sprinted around the bags and crossed the plate. When the noise subsided it developed that the right fielder claimed a foul, and although Umpire Hamer had already settled its status he finally reversed his decision out of consideration for the underdog and sent Johnny to the bat again and Schultz back to second. Ortega reached first on a passed third strike and Schultz was advanced a station, but Pyne's fly into left was gobbled in, retiring the side.

The eventful seventh was more fruitful in results. Armour reached first on four balls and was advanced to second by Lewis. Pyne's two-bagger scored the first man ahead of him and left the other on third. Then Meats followed with another second-base hit, driving in the other two scores. Guy stole third and was caught at the plate by a scratch while trying to score on a passed ball. The visitors made their three runs in the third, seventh and eighth by clean hits and without the assistance of errors. Leahy, the visitors' pitcher, was effective during most of the game, but weakened occasionally and was hit hard, especially in the seventh. Ten hits, four of them two-base hits, were made off him, and five strike-outs were recorded to his credit.

Local fans will, no doubt, remember Dwight Stone, the tall, lean, hungry-looking twirler who pitched for the Anaheim team while it was winning the championship of the Interurban League two years ago. Like Easterly, Walter Johnson, Cravath, and one or two others of local fame, he has broken into big league company and is pitching for the St. Louis Browns this season. Elmer Stone, who played in the field at the same time, is now with one of the Northwestern League teams.

The fourth county extemporaneous league debate this season for the Anaheim high school will be held in the local high school auditorium on the evening of May 21, upon the question, Resolved that the United States should grant Independence to the people of the Philippine Islands. The winner of this contest will hold possession of the Davis silver cup, now in possession of the local school, until it is won by some other school next year. Anaheim took the cup from Santa Ana in the first debate this year, and has since held it when Fullerton and Huntington Beach attempted its annexation. Orange has not put very strong debating teams to the fore previously, and if indications amount to anything, Anaheim will again be victorious. The local school will be represented by George Hedstrom and Lawrence Waller.

Richard Melrose and family last week moved into their palatial new residence on North Philadelphia street. The edifice is one of the most commodious in the city, costing upward of \$8000.

FLORAL NURSERY ONE OF SHOW PLACES

LOCAL ESTABLISHMENT COMES UP TO THE BEST TO BE FOUND IN SOUTHERN CALIFORNIA

OVER 200 VARIETIES OF ROSES OF ALL SHADES TO BE FOUND ON PREMISES

What is now considered by all to be one of the show places of the city, and county as well, is Ye Floral Nursery, owned by Mrs. C. R. Gates, and located on West Center street west of the high school. Here may be found all varieties of flowers, in colors of all shades of the rainbow. On the several lots on which the nursery is located, it has been estimated there are two hundred varieties of roses in bloom, making the premises a veritable rose garden. Here may be found pink roses, red roses, white roses, yellow roses, golden roses and roses of all shades of color between these. A fine trade in roses has been built up by Mrs. Gates, and it is her proud statement that every variety of rose plant she has for sale may be seen growing on the place so that customers may see how the bush blooms. Several varieties of roses, as well as many other kinds of flowers, have been tried out in the nursery, and when found to be of inferior grade, have been discarded and are not now offered for sale. A large beautiful bush of pink roses has been so tried out, and although the flowers were found to be very beautiful, they wither quickly in the warm sun, and Mrs. Gates has now taken the plant off the market, and will not sell it, for she knows it will not give satisfaction. A blue rose bush has been planted and tried out, but it has been found to be a "fake," as the roses are not blue, as they are supposed to be.

Two large beds of white and red carnations adorn the place, and from these large beautiful bouquets are picked weekly. A basket of upwards of 500 carnations was picked Saturday and on Sunday were used in decorating the Presbyterian church for the day's services.

One section of the place is devoted to bulbs and here are found all kinds of lilies, as well as many other kinds of bulb plants.

On one plot of ground is being tried out a quantity of Columbine plants, recently imported here from Hemet. There are 20 kinds of Columbines in the lot, and they are being tried out here to see how they will grow in this soil. To date they have showed up well and in all probability will later be put in as regular stock for sale by the nursery. The plants were formerly imported from France, Germany and England.

A large variety of potted plants is on exhibition at the nursery and includes camellias, heuchera, all kinds of ferns, hydrangeas, columbines, and many others. Several fine pansy beds are now in blossom, and Shasta daisies spread their white flowers to the heavens.

Two large cloth houses are found on the place, which are used for propagating of plants, and for tender young seedlings.

All manner of funeral pieces are made in the workshop adjoining the Gates' residence, and here are kept frames for turning out pieces from those of a moderate price up to the most expensive. The nursery and entire establishment is admitted to be one of the best in the state, and local people should appreciate more fully the expert floral work to which they have access. This is the season in which Ye Floral Nursery, in common with other places of its kind in this section, looks the most beautiful. The place is open for inspection at all times and an invitation is extended to all to pay the nursery a visit. Those who accept the invitation will be assured of seeing probably the largest variety of beautiful flowers to be found in this vicinity, as well as probably in the entire state.

The nursery is a home institution, and such deserves the support of Anaheim people, together with other home industries which have been and are now being established.

It is announced that Dr. Wishard will deliver a lecture at the Methodist church Thursday evening, May 8, upon the subject "The Mormon Menace." The public is invited to attend.

CITY TRUSTEES IN REGULAR SESSION

CONTRACT AWARDED FOR FURNISHING THE CITY WITH CAST IRON WATER PIPE.

A. A. MILLS RAISES OBJECTION TO PAVING NORTH STREET INTERSECTION.

The attention of the city trustees at Thursday night's meeting was largely taken up with receiving bids and awarding contracts for supplying the city with water pipe. Five bids were received. H. R. Boynton Co. and R. E. Allen submitted bids so much higher than the others that they were put out of the running. The total of the other three bidders were American Cast Iron Company, \$3781; Lynchburg Foundry Company, \$3779.46; U. S. Cast Iron Pipe and Foundry Company, \$3734. Each of the bids was accompanied by a certified check for \$200 as required by the call for bids. After comparisons and discussions, the contract was ordered awarded to the U. S. Cast Iron Pipe and Foundry Company. The pipe is to be used in laying water mains on Lemon street, which will extend from the northern to the southern city limits.

H. G. Ames, city attorney, who has been investigating the case recently brought up by Fritz Ruhman, in which the latter said that his brick building on an alley between Los Angeles and Lemon street, had been injured beyond repair by the laying of a sewer pipe line too near the foundation of the building, reported that in his opinion the city had not assumed any liability for what damage had been done, and advised that the matter be dropped. This report was accepted and the matter allowed to drop.

The bond of Wm. A. Wallace of \$5000 as collector of the city of Anaheim was presented and ordered accepted.

The contract between the city and M. C. Chase for the drilling of a well on the city's property on South Los Angeles street, was presented and ordered accepted. The contract provides that the well shall be completed within fifteen days after the signing of the contract.

A. A. Mills appeared before the board and protested against the paving of the intersection of North and Los Angeles streets as at present planned. The property line on Los Angeles street outside the city limits is 14 1/2 feet nearer to the center of the street than inside the city, and it no change be made in this property line, the pavement to be put in by the city at the intersection will continue the regular width inside the city to the center of North street, then jog in 6 1/4 feet, and continue to the north line of North street. Mr. Mills said he did not like the idea of this jog, and would like to have the pavement extend straight north. City Engineer Steward informed him that unless he should deed a 10 1/2 foot strip along the street to the county for the road, and thus place the property line to correspond with that inside the city no action could be taken in the matter by the city council. Property owners on the west side of the street are opposed to the deeding of a strip of 10 feet for street and unless this be done, the paving will be carried out as at present contemplated.

Chas. Doussout stated to the board that no call had been sent out for bids for sprinkling the streets since the running out of last year's contract, and suggested that bids be asked for the work. As the former contract with the present incumbent of the office, R. A. Fosseck, has run out three months ago, bids were accordingly ordered asked for sprinkling the streets for the ensuing year, bids to be opened the latter part of May. Plans and profiles for gutters on the proposed paving to be done in the city shortly, were read and accepted.

Building permits were granted as follows: H. G. Melcher, contractor, for Miss A. F. Gates, to construct a residence on Illinois street; cost, \$2700. L. Goble, to construct a frame building on rear of East Broadway lot; cost \$200.

At a special meeting held the previous week, the bid of M. C. Chase for sinking the well at the power house was accepted. The well is to be 16 inches in diameter, and will be sunk to a depth of from 100 to 500 feet, at a cost of \$3.70 per foot.

Several bids for furnishing a pump for the well were put in, and the bid of the Krogh Manufacturing company of \$1957 f. o. b. Anaheim, was accepted.

Gazette—Recognized want-ad. medium.

SEARCHING RECORDS FOR STATE ROAD TITLES

Work Preliminary to Beginning of Highway Construction Through Orange County.

Spencer V. Cortelyou, chief assistant engineer of division 7, California Highway Commission, and Mr. Godfrey, also of the engineering department of the state commission, are at Santa Ana searching the county's titles to roads proposed to be improved by the state.

The State Highway Commission does not do any paving on roads to which the county's title is not clear. It is thought that there will be little trouble over titles to the roads to be paved by the state in this county. The route follows the main traveled road from La Habra through this city to the San Diego line. The stakes that have been set in some places in the south do not conform to the road traveled, and new deeds may be required.

The state commission will have its work. Mr. Cortelyou is of the opinion that it will not be long before the actual construction of a state road through this county would be commenced.

WE EXPORT LESS BEEF THAN SIX YEARS AGO

Decrease in Herds in County One Cause for High Price of Meat.

The United States was exporting more than thirty-six times as much fresh beef and cattle six years ago as it sends abroad today, as shown by statistics made public by the department of commerce. In the first nine months of the present fiscal year, ending March 31, there was exported only 5,479,439 pounds of fresh beef and 13,598 pounds of cattle as compared with 200,069,729 pounds of fresh beef and 307,726 pounds of cattle in the same months of 1907. The intervening years reveal uninterrupted decrease.

Another feature of the report is the statement that while the population of the country has increased 11 per cent since 1907, the number of beef cattle has decreased 20 per cent. Furthermore, 220,000 head of cattle came into the country in the first eight months this year, against only 12,500 in 1907.

In the calendar year past the United States exported 900,000 pounds of fresh beef while Argentina sent 756,000,000 pounds, Australia 109,000,000, New Zealand 27,250,000 pounds, and Uruguay 21,000,000. To the United Kingdom Argentina sent 739,000,000 pounds, against 684,000 pounds from this country. The number of beef cattle in the United States in 1907 was 51,500,000; today it is 36,000,000.

The United States surpassed its rivals, however, in prices obtained, having received last year for beef exported an average of 11.67 cents a pound, compared with 4.38 for Argentina, 4.98 for Australia and 5 for New Zealand beef.

Without alleging that the Anaheim Union Water company has no right to enter into any other business than that of distributing water, Carolina B. Pittman and Matt Pittman have filed an answer to the complaint in the action brought by the Anaheim Union Water company and E. V. Benjamin against the Pittmans and the Boraby Oil company. The oil company's answer was filed several days ago. It declared that under the articles of incorporation of the water company it could not enter enterprises not to do with the development and distribution of water. The answer also alleges that the water company's rights in the 7.70 acres are in easement for water purposes only and not complete title as asserted by the water company. The latter maintains that it has title to this property which it has owned and controlled for about twenty years.

County Auditor Lester was in town one day last week driving over from Santa Ana in his touring car.

Misses Maude and Jean Livingston left last week for their home in Toronto, Canada, after two weeks' visit with Mr. and Mrs. Geo. M. Ross on Claudina street. Before leaving the Misses Livingston and Mr. and Mrs. Ross made an auto trip to the Madame Modjeska ranch in Santiago canyon, and report an enjoyable trip.

Helter-Holmes gets a gigantic salary from that mining corporation. Skelter—Able to locate gold mines, is he?

Helter—Not much. Able to locate stock purchasers.

"That man who just registered says he is a light sleeper," remarked the hotel clerk. "Good," exclaimed the manager. "Charge him extra for light."

QUICKSILVER IN CALIFORNIA SHOWS GAIN

OUTPUT OF \$866,024 IN 1912 EXCEEDS THAT OF PRECEDING TWELVE MONTHS

80 PER CENT OF TOTAL PRODUCT OF UNITED STATES COMES FROM CALIFORNIA

Quicksilver production in California during 1912 amounted to 20,000 flasks having a total value of \$866,024, as compared with the 1911 output of 19,109 flasks valued at \$879,205. The average price per flask, of 75 pounds, suffered a decrease of \$3.97 in 1912, as compared with the previous year, thus causing a decrease of 1.5 per cent in the total produced while the amount increased 7.9 per cent.

Eight counties reported a production of quicksilver during 1912, against nine for 1911. Colusa and Santa Barbara counties had a small output in 1911, which was not duplicated last year, and during 1912 Fresno county operators shipped a quantity of the metal for the first time. The eight producing counties, in the order of their importance in this branch of the mineral industry, are as follows: San Benito, Santa Clara, San Luis Obispo, Sonoma, Fresno, Lake and Trinity. In addition to the above, owners of quicksilver properties from the following twelve counties answered inquiries sent out by the State Mining Bureau: Colusa, El Dorado, Kings, Monterey, Modoc, Santa Barbara, Shasta, Siskiyou, Solano, Stanislaus and Yolo. In round numbers 80 per cent of the quicksilver production of the United States comes from California.

The following table shows the California production by counties:

County	Flasks	Value (\$)
Fresno	336	14,125
Lake	209	8,786
Napa	287	12,065
San Benito	9,743	409,596
San Luis Obispo	666	27,998
Santa Clara	8,695	365,538
Sonoma	646	27,158
Trinity	18	758
Total	20,000	866,024

OTHER MARYS.

A teacher in one of the primary grades of the public school had noticed a striking platonic friendship that existed between Tommy and little Mary, two of her pupils.

Tommy was a bright enough youngster, but he wasn't disposed to prosecute his studies with much energy, and his teacher said that unless he stirred himself before the end of the year he wouldn't be promoted.

"You must study harder," she told him, "or you won't pass. How would you like to stay back in this class another year and have little Mary go ahead of you?"

"Ah," said Tommy, "I guess there'll be other little Marys."

Wm. Schumacher and family of this city spent Sunday under the great oaks of Santiago Canyon.

Own a Farm in Tulare County

Pay one-fourth cash (\$700 to \$1,000 on 20 acres), balance in 1919. Diversified crops are the farmer's safeguard. Yields of \$100 to \$200 an acre are realized from oranges, olives, peaches, figs, seedless grapes, melons, berries, Turkish tobacco, alfalfa, etc., etc.

The Orosi District is safe for oranges. The novel crop is shipped by December 15th.

Our illustrated folder with map may mean much to you. Send for it.

UNIVERSITY DAIRY DEMONSTRATION TRAIN

Three Weeks' Tour Creates Much Interest Among Schools of State.

The College of Agriculture of the University of California has just completed three weeks' tour of a demonstration train, over the lines of the Santa Fe and the Northwestern Pacific railroads. This year efforts were concentrated on the dairy industry. From the flat car were made demonstrations in the judging of dairy animals and upon the profitable use of grain on the growth of pigs. The subjects of contagious abortion and tuberculosis were also treated. The most striking feature of the campaign was the large number of high schools which were dismissed in order that the students might visit the train. Special lectures were given to these young people. Of them, thirty to fifty per cent, or more were from farms and ranches. It is estimated that of the 14,725 people who visited the train, fully 5800 were school children. The general interest shown by these young people in the lectures was very gratifying to those interested in the development of agricultural education. The insufficient supply of good cows was evident in every county visited. Increased production of dairy products is not keeping up with the growth of population and increased demand.

Assistant District Attorney Clark was conducting a case in the criminal court. A large, rough-shouldered negro was in the witness chair. "An' then," said the witness, "we all went down the alley, an' shot a few craps." "Ah," said Mr. Clark, sinking his eye-glass impressively. "Now, sir, I want you to address the jury and tell them just how you deal craps." "Wass that?" asked the witness, rolling his eyes. "Address the jury, sir," thundered Mr. Clark, "and tell them just how you deal craps." "Lemme outen head," said the witness, uneasily, "Firs' thing I know this gemman gwine ask me how to drink a sandwich."

BASKET WILLOW GROWS IN CALIFORNIA

Many Lands in Riverside Bottoms to Be Utilized for New Industry.

The office of the U. S. Forestry Service at San Francisco has been notified that the Department of Agriculture is getting ready to fill requests for basket willow cuttings grown last year on one of the government experiment stations. Distributions of these cuttings take place each spring, to farmers and others who wish to make trials of basket willow on lands too wet for other crops.

From 50 to 100 cuttings are given to each person. Marshy lands in river bottoms might be profitably utilized for the production of basket willow. Experiments would probably reveal several varieties adapted to climatic and soil conditions in different sections of the state, and demonstrate that the manufacture of willow baskets is an industrial possibility.

The trees have been propagated on the government experiment farm at Arlington, Va., and inquiries addressed to the Department of Agriculture, Washington, D. C., for attention Arlington Experiment Farm, will be referred to the proper officials.

According to the appraisement made by J. N. Anderson, John Hartung and C. D. Brown, the estate of Gus Hansen, who died on his ranch west of town, is valued at \$87,240.

Papers in an appeal from the court of Justice Howard were filed in the superior court on Thursday. The action is one in which judgment for \$82 was given in favor of M. W. Martenet, hardware dealer, against Lee C. Demming for goods sold the latter. The defendant appeals. Weisel & Dutton represent the plaintiff.

SPENCER VS. SCHULTZ

Suit is brought to Recover Gas Engine or its Value in Cash.

An amended complaint in the case of F. C. Spencer vs. J. A. Schulte was filed in the Superior Court this week. The suit is one in which the plaintiff seeks the recovery of one gas engine or its value, \$1000, in cash.

According to the complaint the engine belonged to W. K. Fogg, of Buena Park, but in some manner passed to the possession of Schulte. Spencer purchased the engine from Fogg. Demand has been made on Schulte for surrender of the property and he has declined to relinquish it.

BOOZE-FEST LEADS TO DIVORCE

George Eells, of Garden Grove, has filed suit for divorce from Edna Eells his wife.

Defendant in the case is the same woman who figured in the township court at Santa Ana recently for disturbing the peace near Garden Grove during the booze-fest in which she and a woman from Los Angeles were the principals.

UNIVERSITY WILL RECORD FARM RESOURCES

SOIL SURVEY TO BE UNDERTAK-
EN BY STATE COLLEGE OF
AGRICULTURE.

GIVE HOMESEEKERS CHANCE TO
HAVE FAIR, HONEST AND
USEFUL INFORMATION

Plans for a soil survey of all the agricultural lands in California are announced by Professor Charles F. Shaw in the first number of the "University of California Journal of Agriculture," a new monthly just established by the students of the college of agriculture.

This summer the soils of the Sacramento valley will be surveyed, and next winter those of the San Joaquin valley. Before the Panama-Pacific Exposition opens, the university will publish soil maps and descriptions for practically the whole of the great interior valley. Within the next few years the university will publish detailed soil maps for every agricultural area in California. These "reconnaissance soil survey" maps will be on a scale of four miles to the inch. The soils series will be indicated, and accompanying reports will describe the soils, the natural conditions, the good and bad features, the crops grown and the results obtained by farmers, and the best treatment and use of the particular soil areas discussed.

This survey will give homeseekers a chance to have fair, honest, and useful information regarding every farming section in California. It will protect investors against misrepresentations. It will aid the farmer to plan wisely his planting, his crop rotations, and his treatment of the soil. Professor Shaw has recently completed after six years of work, just such a soil survey for the whole of Pennsylvania. His soil survey for California will carry on the great work in this field pursued for several decades past by Professor Eugene W. Hilgard, a pioneer among all soil investigators. Professor Shaw will have from three to six men continuously at work and the United States Bureau of Soils will have a like number at work in California. For each of the major soil groups, special studies must eventually be worked out to determine the crops most appropriate to each, and to decide for each the most appropriate ways of tillage, plant breeding and fertilization.

The promotion of successful family life in California is the underlying purpose of all the university's agricultural work. Dean Hunt of agriculture in the same initial number of the Journal of Agriculture urges promotion of "selective immigration" that the vast lands of California may come to be farmed by men and women who will "make good." The

problems involved are how to find and counsel wisely prospective settlers who are competent to succeed, and how to aid such newcomers to avoid the untrustworthy and to select lands suitable for making successful homes. Among the requisites are: an accurate inventory of the resources of California, to protect homeseekers from settling on lands where it is not worth while trying to make a living; knowledge as to the type of people best suited to the development of California, as farmers and, thirdly, investigations as to new agricultural industries which ought to be established in California, and as to the people who can best develop such new industry. Director Hunt suggests, therefore, thorough investigation of agricultural and human conditions in regions similar to California, including, for example, Australia, Uruguay and the Mediterranean countries, and the "supplementing of restrictive immigration by selective immigration."

Typical of the possibilities in new industries is cotton. Cotton has been grown commercially in California only five years yet this year's cotton crop will be worth \$1,125,000, or five times last year's. The story of this important new agricultural industry is told in this May Journal of Agriculture by Walter E. Packard, in charge of the university's experiment station in the Imperial valley. In the reclaimed desert, below the level of the sea, was grown last year cotton which took the first prize over all short staple cotton grown in 1912 in the whole United States.

The great problem facing the California cotton raiser, says Mr. Packard, is to select and establish the variety that will bring the greatest net returns. Other varieties should then be excluded from a particular locality, to protect against hybridization. Durango, a long staple upland cotton is said to be the favorite with inch and a quarter staple, and commands a premium of from 3 to 5 cents over the short-staple cotton on the market. The Cotton Growers Exchange is offering large cash prizes to the growing of clean fields of this one type. While the Egyptian cotton is by far the finest, it yields less well than Durango and is more expensive to pick. Experiments are, however, being made in the hope of getting a new variety or strain better than anything yet grown in the Imperial valley.

That a normal crop of oranges is expected in Southern California for next year, despite this winter's frost, and that after fifteen to eighteen months the lemon trees will be bearing as well as ever, is stated in the Journal by A. R. Taylor, assistant Plant Pathologist at the university's Southern California laboratory and citrus experiment station. Carl Nichols gives a detailed account of the frost fighting on the Limonieria ranch, in Ventura county, where fires were kept up in the lemon orchard for twenty-seven nights, at an expense of between \$90 and \$100 an acre. However, the average loss of lemons was in consequence reduced to 15 per cent, as compared with five times that loss elsewhere, so the premium on lemons will amply compensate for the expenditure. A third paper on citrus matters is by A. V. Amet, who discusses lessons from the freeze, such as pruning methods, proof that sour stock was more resistant than sweet, development of by-products, the improved methods for testing for frozen fruit. An account is given also of the "summer traveling practice course" in citriculture, given this year for the first time. The students who take it will spend six weeks together, visiting all the chief citrus regions in central and southern California, for observation and for training in actual work in orange and lemon orchards. A picture and account of Herbert E. Van Norman, the great authority in dairy husbandry and animal industry, who has recently been called as dean to the university farm school at Davis, is another feature.

This Journal of Agriculture is to be issued by the students of the University of California monthly throughout the university year. It seeks to bring to the knowledge of the community the work that is being done by the agricultural investigators of the university, and to aid in every way the development of agricultural education in common schools, high schools, and the university itself. As part of its aid to the rapidly developing movement for teaching agriculture in all the schools, the University of California is to have a number of courses in the next Summer Session, from June 23 to August 2 for the special training of high school and grammar school teachers of agriculture. Included will be courses on the elements of agriculture (for elementary school teachers), on plant propagation, and on home and school ground gardening, and courses for training teachers to give high school courses in school-farm work, dairying, animal industry and horticulture. Thus the university is advancing the good cause of developing direct practical training in all the schools.

IN AND ABOUT COUNTY

6,615,805 Orange Trees in State

California has more orange and lemon trees of bearing age than all other states of the Union put together. The 1910 federal report for citrus fruit says that California had 6,615,805 orange trees of bearing age out of 9,737,927 in the country, and 941,293 lemon trees of bearing age out of the nation's 956,920.

Arrested at Capistrano.

Maximiliano de Alve, wanted in Riverside on a felony charge, was arrested last week at Capistrano by Under Sheriff Law and Constable Frank Heard and lodged in the county jail.

The man is charged with having had improper relations with his stepdaughter, a young girl, and when arrested the girl was found at his home in Capistrano, where she has been living with Alve's wife and family.

Shot Himself in the Foot.

While in the Santa Ana bottoms one day last week on a marksmanship jaunt, Mrs. Sara James was accidentally shot in the left foot, the injury necessitating the amputation of the middle toe of that foot. Mrs. James is a good shot and is used to firearms. Her injury was due to the accidental discharge of the weapon while she was preparing to take a shot at a bird. Mrs. James was taken to the Santa Ana hospital, where the toe was amputated.

Kitty Meason Files Petition.

A petition was filed in the Los Angeles supreme court last week in behalf of Kate Lieritz, formerly Kate Meason of Delhi, convicted in Orange county of a violation of the liquor laws. She is said to have sold liquor in Santa Ana and was sentenced to six months in the county jail. Irregularities in the formation of the "No License" Fifth supervisorial district where the violation is alleged to have taken place, is the ground upon which the petition for the release of the woman is based.

Asks For Return of Deed

Asserting that she gave a deed to lot 28, Anaheim Home tract, on misrepresentation, Clara M. Swan has brought suit against Frank Hart, asking the court to cancel the deed and declare the title to the property vested in the plaintiff. The complaint states that on April 8 Hart secured the deed, representing that \$50 would be paid on a mortgage for \$300. The plaintiff asserts that the representations were not true and that she got no compensation for the deed.

May Be a Blind Pigger

Under Sheriff Law, Deputy Dean and Constable Heard are satisfied that A. Battestea has been selling liquor at Delhi. Battestea has been using a good deal of it himself. Friday night Law and Dean went to the store on a report of a disturbance. They had no warrant. Battestea came out on the porch and drew a revolver. The officers refrained from attempting to take the man as a fight might result in the death of the man, which might put the officers in bad since they had no warrant. Battestea was noisy again Saturday and the officers took him in. He tried to destroy bills for brandy and wine in 10-gallon quantities, but the officers took the bills from him.

Catterlin Case Continued.

The trial of F. J. Catterlin accused of obtaining money under false pretenses which was to have begun in the superior court on Monday, has been postponed by consent of counsel until August. Catterlin is accused of having sold bonds to C. H. Newcombe of Buena Park, representing them to be worth par value when as a matter of fact they were worth next to nothing at all.

Catterlin was placed under arrest last year, and at his preliminary examination made vigorous objection to being held under bonds for trial in the upper court. He was held to so appear under heavy bonds, which he succeeded after the lapse of some time in furnishing, and has since been at liberty.

Sues Estate For Large Amount

Dr. D. F. Royer, of Orange, on Saturday, brought suit against the estate of Mrs. Caroline M. Conn, of which Deputy County Assessor D. N. Kelly is executor, for \$22,400. According to the complaint filed Mrs. Conn signed a contract with Dr. Royer for the establishment and promotion of a manufacturing plant to cost \$25,000, with the proviso that he should have the plant or \$25,000. This contract was signed on September 10, 1907. On October 6, 1911, another contract was signed in which Mrs. Conn admitted the indebtedness of \$25,000, with the statement that in case of her death it should be paid Dr. Royer, minus whatever notes there might be from Royer to Mrs. Conn. A note for \$2,500 was found by the executor and listed among the assets of the estate. When collection was sought, Dr. Royer replied with the suit. From the \$25,000 is deducted \$2,500 for the note and \$100 interest, and judgment for the remainder is asked.

Goes Back to Washington.

Sheriff Harry E. Stark of Washington started for that state on Thursday with Bert H. Marsh, who escaped from jail there after he had been sentenced to from two to five years in the penitentiary for bigamy. Marsh had a wife and three children at Garden Grove. He was arrested by Deputy Sheriff Turner of that town. Grove.

Freight Loss and Damage.

The movement started by the Santa Fe railway to reduce to the minimum the item of freight loss and damage is winning the earnest approval of shippers all over the system. Officials of the company here and elsewhere along the line have received hundreds of letters in the last few days commending the road for the campaign it has inaugurated and pledging their co-operation in the work.

The Santa Fe also will have the hearty assistance of manufacturing concerns which make containers for eggs, butter, fruit, vegetables and products of that character, the damage in transit to which has been considerable. These concerns have expressed a desire to co-operate in planning for the construction of containers that will best meet the needs of the shipper and the railroad.

A great deal of the work of bringing about the desired results will be done by the station agents and transportation inspectors, whose duty it is to watch the handling of freight in warehouses, on transfer wagons, in depots and on trains. The inspectors, especially, are trained in modern methods of preparing freight for shipment, and in handling it after the railroad takes charge of it.

At the semi-annual meeting of the Santa Fe's system loss and damage committee in Albuquerque last week an invitation was extended to other railroads and to steamship lines to join the movement for a safer and more expeditious handling of freight shipments. A number of favorable responses already have been made, leading the railroad officials to believe that the movement will be national in its scope.

Held on Felony Charge.

W. E. Polson of Garden Grove was last week held to answer in the superior court on a felony charge, operating an automobile while he was intoxicated. His bail, \$1500, remains the same, with the same bondsmen who went his bond on April 7, the day after Polson's automobile collided with a buggy on North Main street at West Orange. Witnesses examined by District Attorney West were Howard Timmons, Mrs. Ruth Harper, whose buggy was struck, S. Collins and Officers Boynton, Law and Combs. Mrs. Harper stated that she had asked the officers to withdraw the felony charge against Polson. The testimony of the officers was to the effect that Polson was still intoxicated after he was arrested after the collision. A number of Garden Grove residents have interested themselves in the case. They want the felony charge dropped and a misdemeanor charge brought on the theory that Polson has already had a lesson that he will not forget.

ANNUAL TRIANGLE LEAGUE TRACKMEET

Contest Will Be Held in Santa Ana
Next Week—Anaheim Well
Represented.

The annual county Triangle League track meet will be held on Lincoln athletic field at Santa Ana, Saturday, May 10, beginning at 1 o'clock, p. m. It is expected that there will be three hundred contestants, and these will be divided into five groups, according to weight. Forty grammar schools of the county are eligible to compete and some good records will probably be made by the star athletes of the county. Bronze merit badges are to be awarded the winners of the various events.

An exhibition of girls' school yard games will also be held at the same time, the group doing the best work to be awarded a banner. These games and athletics will begin at 1:30. In the morning of the same day at

10 o'clock, the county spelling contest of the eight grades of the Triangle League will be held in the Santa Ana high school building, a silver cup offered by the Santa Ana chamber of commerce to be presented the winner. The spelling contest of the seventh grades will be held in the Commercial school, and a silver cup, offered by the W. C. T. U. of this city will be presented the winner. Admission to these events free. Tickets for the track meet will be 25 cents; children 15c.

At last year's contest, the Anaheim schools won everything, bringing home the silver cup for winning the spelling match, and both school banners for athletics and spelling. A good representation will be sent over this year, and with the talent manifested by the pupils of the local school, ought to bring back a share of the honors from this contest.

A. Fiedler, formerly proprietor of Fairland theater, now of El Segundo, was in town on Monday, settling up business affairs. Mr. Fiedler has sold Fairland to H. C. Bilger, who is now conducting that popular moving picture theater. Mr. Fiedler has been in enfeebled health for some time past, and will devote some time to rest and recuperation before going into business again.

WHERE BIG RED APPLES GROW Yucaipa Valley

Big returns are being made from Yucaipa Apple Lands. 3,000 acres of young trees are now flourishing here and hundreds of acres more will be planted at once. One of the largest consignments of nursery stock ever shipped (60,000 trees) was delivered in the Yucaipa Valley for this season's planting. No heavy winds, sufficient frost, ideal climatic conditions. AMPLE water at low rates, rich, deep soil, soft and easily worked, and the same for twenty feet down, are only a few of the many features which make Yucaipa Valley Apple Lands the best from all standpoints of any in California.

\$285 AN ACRE

Apples pay bigger returns than any other crops—water, soil, and climate in a combination hard to find in California, are essential and we have them all.

AN UNLIMITED MARKET

Los Angeles alone consumes seven times the apples raised in all California and pays highest prices. The Salt Lake Railroad alone shipped 300 cars into Los Angeles in one month. You can make big money at Yucaipa—investigate today.

FALKENSTEIN'S ANNUAL SPRING CLEARANCE SALE

Sale starts Saturday, May 3rd, and closes on Wednesday, May 14th

Look for the Green Tickets, you'll find them in every department in the store. They point the way to Economy.

For Saturday, May 3d, we announce our Annual Spring Clearance Sale—planned this year on a broader, bigger, and more comprehensive scale than ever. It will undoubtedly be the greatest sale in our history. Year after year this sale has become an event of still greater importance, of wider influence and prestige, until now it is the most Commanding Sale of all the year—and justly so, for no sale affords such notable values, such large stocks, and such varieties. The hundreds of customers, who yearly look for this sale as a signal to begin their Summer Buying, will find it this year of surpassing importance. In every department the savings are phenomenal. Plan now to attend this sale and be here when the doors open.

THE INCIDENT AT CHEMULPO

Before a declaration of war between Russia and Japan, a squadron of cruisers flying the Mikado's flag, entered a friendly port and without warrant of legalized warfare, sank the two Russian cruisers, Korietz and Varlag. The incident occurred in the bay of Chemulpo, where the two Russian vessels had been stationed as part of the fleet at Port Arthur. The former were altogether unprepared for such an attack, and although they resisted valorously, were sent to the bottom of the waters. These two ships were after the close of the war raised by the Japanese government, and were the two vessels touching at San Pedro some years ago, under the names of Asoe and Soya. The battle marked the beginning of hostilities between Russia and Japan, and is referred to in contemporary literature as the Chemulpo incident. It is this act of treachery which must now bring forcibly to the American mind that in a war with Japan this nation would be embroiled in hostilities with a nation of uncivilized savages. The United States maintains a powerful fleet on the Asiatic station, and in event of war, which we do not for the present at least expect to see, it would be entirely able to give a good account of itself in a battle with ships of the Mikado's empire. It will hardly be the purpose of Japan to meet these American vessels in open combat, even though the Japanese navy may be of superior strength. It will rather be its purpose to seek out individual ships detached from the fleet, and by overpowering numbers attempt its destruction. Of course we should very greatly regret to see such a thing brought about, and while the Japanese would pay for such treacherous act dearly, we are loath to contemplate the possibility of such a disaster to our men and ships abroad. We look for no war with Japan, but we believe it is the duty of the American nation to be represented by a stronger fleet, not only in Oriental waters, but upon the Pa-

cific coast as well. To be sure, we have already on this coast a considerable fleet of war craft, but when it is compared with the gigantic navy maintained in the Atlantic waters, it seems to be altogether insignificant and incapable of meeting eventualities which might of a sudden precipitate themselves. One reason for the lack of naval strength on this coast is a disinclination on the part of the navy department to send vessels hitherward around the Horn. The Panama canal is, of course, the solution of the entire matter. When the Atlantic fleet can come through the ditch to this side in two or three weeks' time, we lean to the opinion that the cocky little Japanese will not have quite so much to say about the purpose of Californians to govern their commonwealth as best suits their purpose. The Japanese race is unassimilable with the Caucasian, we do not desire their presence here, and we are ready to deny them the privilege of land tenure. Six years ago, when this Oriental nation threatened the United States with war because of anti-Japanese legislation proposed at Sacramento, the nation humbled its pride by yielding to protestations of timid citizens that the United States was unprepared for war, and the proposed alien land law went by the board. Today we have the selfsame incident with us again. Sooner or later, it must be settled, and settled right, and it might just as well be settled now as at any other time. We court no trouble with any foreign power.

We want no war with Japan, but it seems to us the time will shortly arrive for the United States to whip that nation and whip it severely. It will take us just about as long to do this as it took us to whip the Spaniards—just long enough to give us a chance to get at them, that is all. We do not desire the Japs here. We do not want them. They will have to get out.

In this connection, what shall we say of the action of a party of intelligent American gentlemen, who were guests at Tokio the other day, as we read in the dispatches, of Count Shigenobu Okuma, who informed them in so many words, that "Christianity was the only force that remained to prevent war." Diplomacy, the courts, and commercial men are helpless, he said, to stay an inevitable conflict.

These good American citizens, O shame be it said, uttered no word of protest to this insolent fulmination of this fiery little Jap, but rushed off

to the cable office to forward dispatches beseeching the president to interfere in matters engaging the attention of the California people, to the end that impending war might be averted. In a word, Count Okuma said to these Americans that unless the California legislature desisted from its purpose to enact an anti-alien law, they might as well begin prayers to the Almighty to save them from the horrors of war. It seems to us they gave tacit acquiescence to this covert threat that, unless California receded from its position, which it does not intend to do, war with Japan would immediately follow. We think it is high time for these good Americans to sail for home. What the devil are they doing in Japan, anyhow?

Whether another Chemulpo incident shall be the lot of the United States in the present lowering clouds in the Oriental horizon, it is out of our power to say. Certain it is our Yankee sailors will give an excellent account of themselves and we have no fear that the disaster visited upon the defenseless Russian cruisers will be repeated upon the gallant Jack-Tars of the United States navy. If war should come, and we hope it will not, there can be no doubt as to the ultimate outcome of the struggle.

Mr. Secretary Bryan having pursued this statement of affairs now confronting Californians, he may return to Washington to assist in the passage of a tariff bill which is aimed at destruction of our citrus fruits, and annihilation of our beet sugar industry. Mr. Bryan is for peace at any price. Californians insist that the Japs get out, even though it lead to immediate war.

NOTICE

The Knights of Pythias building committee invites bids on a hall to be erected on North Los Angeles street in the City of Anaheim, Cal. Plans and specifications can be seen at the office of Simpson & Hamler, Anaheim, Cal. The successful bidder will be required to give bonds for the faithful performance of the work according to the plans and specifications. All bids must be sealed and presented to the secretary of the committee not later than May 14th, 1913. The committee reserves the right to reject any or all bids.
CLINTON IDLOR, Sec.

BIG TOWEL SPECIAL

For Saturday at 2 P. M., 200 towels in huck and Turkish, bleached and unbleached, made of heavy absorbent cotton, hemmed edge, size 18x36, excellent value, Saturday at 2 P. M., 10 cents each. Not more than three pairs to a customer. On display in the show-window at the 5, 10 to 35 Cent Store.

The May festival of the city grade schools will open this (Thursday) evening, May 1, with floral cantata, "The Brownies' Whispers," to be given at the Fremont school auditorium at 8 o'clock. The opera will be given by children of the fifth and sixth grades under the direction of Miss Edith Luckenbach and Miss Elva Seldeman with Miss Lillie Zeus as accompanist.

Joseph Helmsen was at his store on Saturday afternoon, coming over from his residence to see how things were getting along, after an absence of three weeks. Joe is convalescing from his illness, and he will in the near future throw away his crutches, and get into the swim with the best of them.

Ed. Launder, of Offinda, riding a powerful motorcycle, ran into a buggy in which Mrs. Winters was riding on North Los Angeles street one evening the latter part of the week. Mrs. Winters was slightly bruised, and the motorcycle was badly damaged. Mr. Launder escaped uninjured. The accident occurred due to a misunderstanding in regard to road rules.

Bob Mills and Dick Nemets are at Anaheim Landing, where they have joined forces with Capt. Jim Innarity in the fishing business. They catch large quantities of smelt, mullet, sandabs and other finny delicacies which are shipped here and are offered for sale by Ed Schleuter, the local fish baron. This fish is the finest offered for sale in this town and the boys are rapidly amassing a great fortune at the business.

"HOME-LIKE" CHURCH

Bible school meets at 9:45. Preaching and communion at 11. Subject: "Why Support Southern California Work?" Junior Endeavor at 3. Senior Endeavor from 6:30 to 7:30. Preaching at 7:30. Theme: "An Analysis of the Christian Endeavor Pledge." The young people who are interested in Christian Endeavor work are invited to attend this service. It is especially prepared for the Endeavorers, old and young. This address is given by request from the Endeavor society. All young people are invited. Do not neglect the mid-week prayer and praise service Wednesday 7:30 to 8:30 P. M.

EPISCOPAL CHURCH

Sunday, May 4th, the Sunday after Ascension day, St. Michael's Episcopal church, corner of Adele and Emily streets, extends to all a most cordial welcome to worship with them at the following services: 9:45, Bible school and adult Bible classes; 11, holy communion and sermon by the rector, the Rev. David Todd Gilmore, subject: "The Ascension." The Bible school is helpful and instructive for all ages. You are not too young or too old to learn more of God's truth. Come, study with us. The 11 o'clock service is one of order and deep reverence. Come worship your Heavenly Father with us.

A large audience attended the concert last Thursday evening given by representatives of the U. S. C. College of Music and Miss Veda Walker of the high school faculty, held in the Fremont school auditorium. Miss Trowbridge, at the piano, made a most favorable impression, giving several selections from the classics requiring skill and musical interpretation. By the enthusiasm with which Mr. Bright, cellist, was received, it is evident that the cello is a favorite instrument with concert-goers in Anaheim. His playing was both brilliant and full of feeling. Mr. Cogswell, baritone, rendered several songs of a high order of merit. As usual, Miss Walker proved a favorite, her impersonations are inimitable and she received enthusiastic recalls, to which she responded most graciously. The concert was given under the auspices of the choir of the M. E. church.

FREE VICTROLA CONCERT
Knights of Columbus hall, 3 o'clock Friday afternoon, May 2nd. An opportunity to hear Caruso, McCormack, Gogorza, Alma Gluck, Mary Garden and other famous artists. Free tickets may be secured at Weber's Book & Music Store.

HENRY M. ADAMS, Manager

Manager Sandilands of the local fruit association is in receipt of advices from New York to the effect that a carload of Mother Colony St. Michael oranges shipped from this city topped the market in the Eastern metropolis on Tuesday, bringing \$4.15 per box. A carload of Old Mission oranges from C. C. Chapman's ranch brought \$3.90 a box. This speaks well for the character of the fruit shipped by the local fruit association. Mr. Sandilands is preparing to ship out the season's Valencia, and looks for top-notch prices all along the line.

Spring is here, the days are clear. The best of the year for a view of "Home Sweet Home," so dear. And there's a photographer in your town. J. S. Howard, 130 So. Los Angeles street, Anaheim.

In and About the City

L. B. Weber was a visitor in Los Angeles Sunday and Monday.

Bert Simpson was the observed of all observers at Balboa on Sunday.

Sperry's Best Family Flour will give more loaves and better bread. Try a sack.

Kurt Epstein and Miss Blanche Mickle enjoyed the theater in Los Angeles Sunday.

Charley Brandenburg was at Venice on Sunday watching Pug Dundee do his training stunts.

Mrs. A. Konig has purchased several houses at Venice, and will spend the summer with friends at that resort.

Summer weather is here, and mail carriers have blossomed out in their summer hats, believing it better to be comfortable than handsome.

R. Rees, of Minneapolis, Kansas, is here with his family for the summer. Mr. Rees owns a ranch in the west country, and will probably locate here permanently.

W. J. Elliott spent Sunday at San Pedro, and other coast points. At the first named place he saw a number of torpedo boats and submarines attached to Uncle Sam's navy.

Mrs. Mary Basten, aged 54, a native of Liverpool, England, on Saturday, took out her first naturalization papers. She came to this country in 1881. She is an orchardist at Placentia.

That rose bush over the front porch with its profusion of roses we must have it photographed. Let's see—who does the best view work? Why the Howard studio, at the most reasonable prices. 130 So. Los Angeles street, Anaheim.

Emil Dreyfus has returned to San Francisco from a brief business visit here. He will in the near future begin erection of a two-story brick block at the southwest corner of Center and Los Angeles streets.

Attorney Ames was in Los Angeles on Saturday filing a brief with the Supreme Court in the case of W. J. Cole against the City of Stanton, on appeal from Judge West's decision in favor of the latter in the Superior Court.

Congressman Kettner has our thanks for public documents from Washington.

County Auditor Lester was in town one evening last week, driving in his touring car.

Councilman Tom Hill of Stanton was in town on Tuesday morning, shaking hands with his many friends hereaway.

W. S. B. Lawrie was in town several days the first of the week from San Diego attending to property interests here.

Mr. and Mrs. Charley Johnson and Mr. and Mrs. Seth Piper motored to Long Beach on Sunday and spent the day with friends.

Mr. and Mrs. F. A. Yungbluth and family, Mrs. Strodhoff and Hugo Strodhoff, motored to Huntington Beach on Sunday and spent the day at the seaside.

The regular meeting of the Anaheim Parent Teachers' Association will be held at the Fremont school on Tuesday afternoon, May 6th, at 3:30. The annual election of officers will be held and a full attendance is desired.

Mr. and Mrs. Vic Lamont and son, Mr. and Mrs. Fred Mauer and Mr. and Mrs. Billy Lake returned Sunday evening from a week's sojourn at the beach where they spent an enjoyable time basking on the sands, gambling in the surf and catching fish.

A delegation of Knights Templar consisting of Henry Braden, H. M. Adams, S. C. Hartratt and Wm. McLaughlin, went to Santa Ana on Saturday afternoon to attend the funeral of Hugh McDonald, a well known Knight Templar, who died at his home near that city on Thursday.

W. P. Robinson, of Riverside, was in town several days last week, a guest of Robert McKee. Mr. Robinson is a patriotic Riversider, and said that citrus trees in that locality show very little effects of the January cold weather. The trees are coming out well and give every indication of producing a fine crop next year.

Capt. E. Barr came in from Elsinore on Tuesday afternoon for a brief visit with friends.

Attilio Pierotti was a visitor the latter part of the week from his ranch at Placentia.

Mr. and Mrs. H. M. Adams and family motored to Newport Beach on Sunday and spent the day with friends.

Postmaster Duckworth and wife, Mrs. Sibley and W. E. Duckworth and family enjoyed an outing at the County Park on Sunday.

Mr. and Mrs. Henry Adams were in Los Angeles on Tuesday evening, witnessing a performance by Maude Adams at the Mason.

Mr. and Mrs. A. L. Lewis and Mr. and Mrs. H. A. Dickel drove to Cucamonga on Sunday and were guests of Mr. and Mrs. L. F. Lewis.

A "Silver Tea" and garden party will be given by the ladies of St. Michael's Helpers' Guild at the home of Mrs. Gilmor, 208 South Los Angeles street Tuesday evening, May 6th, the proceeds in aid of the altar fund. A cordial invitation extended and a pleasant time assured.

J. B. Collins has arrived from San Diego and taken a position as agent for Wells Fargo Express Company here. With Richard Dugdale and Joe Blair as his assistants, the interests of the company will be looked after with careful attention. Mr. Collins has been in the service of the express company for a number of years, and is in every way a competent and experienced man.

Napoleon Hart spent several days the first of the week at San Diego and La Jolla, where he owns extensive property interests. He contemplates leaving shortly for an automobile tour of mining points in Nevada where he will prospect for mining locations. Mr. Hart is an old-time mining expert, and will devote two months or more in prospecting through mining sections of our neighboring state.

Henry Hetebrink was in town the first of the week from his ranch at Placentia. Mr. Hetebrink notes increasing activity in oil development in his section, but has so far declined offers of oil companies to drill upon his land. His ranch is one of the richest in the Placentia neighborhood, and the idea prevails that it has underlying it an arm of the oil lake which has made that section famous.

The Entre Nous Dancing Club gave another of its delightful dances in Eagles' hall Wednesday evening of last week. Fifteen couples, constituting the entire membership, were present and all enjoyed a pleasant evening. Music was furnished by Adams' orchestra. The club has just held its mid-year election and the officers for the ensuing term are as follows: President, Alvin Nowotny; treasurer, Herman Schindler; secretary, Al Erickson. The next dance will be on Wednesday evening, May 7.

The Cherry Blossom Confectionery was opened for business Saturday and the opening crowds gave indication of the popularity which the place will no doubt attain. W. H. Titchenal, the proprietor, has moved the entire establishment from his former location in Santa Ana, where he has made it a success for the past several years, and seeking a new location hit upon this city as offering him the best opportunities. His establishment is probably the best in the county and one of the best in the state, being equipped in a thoroughly modern way throughout, and everything being neat and orderly.

Mr. Titchenal has associated with him an expert candy and ice cream maker, and all creams and confections sold are made in the shop. The place is a beauty, and Anaheim is to be congratulated upon securing such a modern and up-to-date confectionery establishment.

A party of prominent Masons composed of William Falkenstein, M. W. Marten, B. V. Beebe, H. M. Adams, Robt. McKee and Henry Hansen attended a banquet at Fullerton Saturday night in honor of the grand master of the state, William Fillmer. Covers were laid for 150 and Masons were present from all parts of the county. Addresses were given by several prominent speakers, and a most enjoyable evening was spent by all.

Oliver Hill has sold the City Livery Stables, which he has conducted for some years past, to W. S. McFarlane, who will hereafter be in charge of the business. Mr. Hill will enjoy a vacation for some weeks, and plans later in the summer to visit his old home in Ireland. Mr. McFarlane is well known about the town and county and in his new location will doubtless make a success of the business. The new owner will improve the service, and make additions to the equipment of the stable, and will endeavor to keep it up as one of the best livery in the county.

CARD OF THANKS

Rev. and Mrs. F. W. Mitchell, Mrs. Swerfeger and Miss Nettie Swerfeger wish to hereby express their deep gratitude to their many friends who by their words of sympathy and acts of kindness so truly helped them in their hour of sorrow and bereavement.

Top notch prices paid for walnut meats and cracked walnuts at Jensen's.

Rose Plants

We would be pleased to show you our stock of rose plants. These are strong, healthy plants, in many varieties. Many of them are in bud and will blossom soon. While these plants may be planted at any time now is an excellent time to make your selection as we have blossoms of every variety to show you.

Leave orders at 120 East Center street or call Pacific 251J; Home 2461. Auto Transfer Company.

RAG CARPET AND RUG WEAVING—Done by Mrs. E. Sheldon, 123 Topoka street, corner Chartres. Call and investigate work and prices.

ATTENTION! For the best cement pipe manufactured see Ed. Kelly & Co., 1/4 mile south of Brookhurst. We buy our material in carload lots and as a consequence are in a position to supply your wants at the very lowest prices, taking the quality of our goods into consideration. We guarantee prompt and reliable service. Ed. Kelly & Co.

Don't forget that for quick deliveries and best service the Auto Transfer Company is the best.

"Lawrie's Lots" on Los Angeles St., half way to Fullerton. Best of water on the tract; also 3 or 4 houses with lots. See Carl Forster at the lots or Elliott & Bushard.

When seeking the best table wines, sweet wines, and champagne, seek no further than the Anaheim Winery, opposite West Anaheim Southern Pacific depot.

There will be no frost or failure for the housewife if you use Sperry's Best Family Flour. Include in your next order on your grocer a sack of Sperry Flour.

The monthly entertainment and dance of the Anaheim Concordia will be given at the society's club rooms tonight. A dance will be the main feature of the occasion, and musical numbers will be rendered during the intermissions. The affairs of the Concordia society are always well attended and enjoyable, and good attendance is assured when it is announced the society is backing an entertainment or a dance. An invitation is extended to all.

Harry Hanna arrived this week from San Marcos, San Diego county, and will devote several weeks to superintending plowing operations upon his father's walnut ranch at Miraflores. Mr. Hanna has 120 acres in oats at his ranch near San Marcos and 20 acres in corn and beans, from all of which he expects to harvest bumper crops. He is as yet unmarried, and is probably the most available young bachelor in San Diego county.

Sheriff Charley Ruddock was over from Santa Ana in his automobile on Tuesday morning. Mr. Ruddock is the best sheriff Orange county ever had in its employ, and his many friends throughout the county are going to support him for re-election next year, and they are going to elect him by a great majority.

An automobile party consisting of Mr. and Mrs. C. O. Rust, Percy Rust, Mr. and Mrs. W. T. Moore, Mrs. Grace Hasty, Mrs. C. G. McKinley, Misses Alexandra and Theresa Fay, Miss Melania Cahen and Archer Fay returned on Sunday evening from a three-days' automobile tour of San Diego, Coronado, Point Loma, and other points of interest in the southern county. They visited the fair grounds, Mission valley and other localities, and report a highly enjoyable outing.

Stephen Kistler has sold the Boston Bakery which he has conducted here for 23 years past, to Albert Mucken-thaler, who assumes control of the business today. The establishment will be in personal charge of George Bishop, an experienced baker who has resided here for some time past. Mr. and Mrs. Kistler leave in July for a tour of Europe, where they will spend the winter. They will visit Mr. Kistler's old home in Alsace and Mrs. Kistler's home in Switzerland. Twenty-five years have passed since the worthy couple have seen their old home, and they look forward with particular pleasure to the coming visit among relatives and old-time friends.

AHOY!

On the "lookout" for a Straw?

This is the Sailors Port this Summer.

The Jolly Tars are here in all the latest shapes.

From at home and across the pond!

Splits — sennets — Milans — in the crown and brim most becoming to you. \$2 to \$3.50.

From the Isthmus comes the "COLON" — the new Panama.

Truly a block out-of-the-usual, designed by renowned hat engineers and moulded into a style of its own—getting away from that slouchy appearance of the ordinary Panama. \$5 and \$6.

MUNICIPAL AUDITORIUM FOR SAN FRANCISCO

MAGNIFICENT STRUCTURE TO BE BUILT IN CIVIC CENTER OF GOLDEN GATE CITY

\$1,000,000 TO BE USED IN ITS ERECTION—BIDS HAVE BEEN CALLED FOR

Bids for the construction of the Municipal Auditorium which is to be built in the civic center of San Francisco have been called for by the Panama-Pacific International exposition. One million dollars was set aside by the exposition directors for this immense structure, and the city and county paid \$701,437.80 for the site which was formerly occupied by the old Mechanics' Pavilion. The plans for the steel work have been completed by the consulting architects, John Galen Howard, Fred Meyers and John Reid Jr. Work on the building will be rushed as more than one hundred congresses and conventions have been secured for the exposition year.

Contracts for the construction of the Machinery Palace, Food Products, Agricultural and Educational Palaces have been let by the exposition and within another thirty days contractors will be at work on these exhibit buildings. This means the employment of three to five thousand men by the contractors. By August next it is expected that at least 7000 men will be at work on the grounds. At present 2000 head of stock are busily engaged in the pre-exposition work.

Residents of this city and vicinity are earnestly requested when purchasing postage stamps to ask the clerk for the exposition stamps. This request is made by the division of exploitation of the exposition in order that the 1915 world's fair may be exploited throughout the world. The government is still printing the old style stamp and these are offered to the buyer because they are easier to count and handle. Postmaster Fisk, of San Francisco, a few days ago ordered ten million two-cent stamps of the Panama issue. These stamps are in commemoration of the Panama canal and the celebration which is to be held here in 1915.

Electricians are now planning for the construction of the largest searchlight in the world which the Mount Tamapals railroad intends to install on top of Mount Tamapals as an added exposition feature. It is hoped that the rays of the powerful light will reach across the Golden Gate and tip the mountain tops for miles around and that they will also illuminate the 1915 exposition grounds. There is a doubt among experts as to whether rays of light can be made to illuminate the exposition site. Some claim that on clear nights this can be done but a test will have to be made before the question is settled. A firm of electrical engineers is at present making a searchlight fitted with a parabolic Bausch and Lomb mirror lens and an arc lamp capable of one hundred and twenty amperes of current capacity, to be increased as desired. The lens is so constructed as to concentrate the intense light on a 100 foot square spot at a distance of nine miles from the lens. Thrown into the sky a beam from this lamp will be seen at 100 miles distance, and objects will be illuminated at a distance of ten to twenty miles. The searchlight will have a range of at least twelve miles and will be sufficient to blind a man at this distance.

Hundreds of visitors journey to the exposition site daily to watch the progress on the Palace of Machinery and other activities. The construction of the immense exhibit palace is not only remarkable but unique. From points of eminence for miles around the great brown framework, surrounded by millions of feet of lumber awaiting its placement may be seen. At closer view, the gigantic structure looks alive. On workdays it is dotted with tiny forms of men. Three hundred and seventy men are at work on the building which is being constructed with surprising rapidity. In the center of the columns are chords for single beams of great thickness. The chords are one hundred and ten feet high. To the summit of them are attached the arches, also fitted together on the ground and hoisted in structural completeness to their lofty eminence. They are received at the top by scores of men who immediately rivet them to the chords and then connect the whole to the next column by stanchions 25 feet in length. Machinery Hall is being built in three naves. This means four lines of columns running the length of the building.

Horace E. Hand was in town Monday morning from his orange plantation on the east side.

FORESTRY PRINCIPLES TAUGHT IN SCHOOLS

Subject One of Far Reaching Importance to People of Country.

In addition to the educational work carried on by the U. S. Forestry Service—which work covers every phase of forestry practice, protection, production, preservation and proper utilization—the principles of forestry are being taught in many of our leading institutions of higher education. In twenty-three of the greater colleges and universities in the United States are courses leading to a degree of bachelor of arts in forestry or master of forestry, ten schools have courses covering one or more years in forestry; and thirty-four schools have short courses in forestry—which gives excellent provision for the professional training of foresters and rangers in our country.

And among the many local organizations which have been formed in the interest of forestry throughout the United States there are twenty-seven national, state and local forestry conservation, timber protective and allied associations; seven mountain climbing clubs and eight geographical societies which take active interest in this work; while twenty-nine states make annual appropriations ranging from \$500, in Alabama (for publication only), to \$321,750 in Pennsylvania for such items as fire protection, purchase of lands, and administration and protection of state forest reserves and forest academy.

EVEN IN DEATH

Sam Bernard was talking at the Lambs in New York about the recent arrest of some foreign dancers on the score of immorality.

"Of course these dancers were all right," he said, "and they got off. Their arrest was dictated by prudery. Such prudery reminds me of a hospital I know."

"In the building of this hospital a cold-storage chamber for the accommodation of dead bodies was included. One of the hospital doctors, in going through this cold-storage chamber, found that a partition divided it in two."

"What's this partition for?" he asked.

"Oh, sir," said the foreman primly, "that's to keep the sexes apart."

CUT COST OF LIVING.

Experiment of Opening Three Street Markets to Be Tried by the Angel City.

This office is in receipt of the following letter from the chairman of the Los Angeles city council:

On May 3d, Los Angeles will open three street markets where ranchers and producers of food products may come and market their goods to the people of this city directly without paying any license to the city for such privilege. The purpose of these markets is to reduce the cost of living and benefit the producer and ultimate consumer by eliminating middle men as far as possible. The three markets to be opened May 3d are located at:

1—Hollywood, corner Calhoun avenue, Selma avenue and Cosmo street.

2—Corner Manitou avenue and Daly street.

3—Boyle Heights, Corner Fourth and Breed streets.

These markets will be open Mondays and Wednesdays, from 6 a. m. to 2 p. m., and on Saturdays from 6 a. m. to 6 p. m. In case these markets prove a success, others will be opened and the city will buy or lease property and erect several market buildings.

There will be considerable opposition to these markets from commission men and jobbers. We hope that producers will aid the city in making this experiment a success by bringing their vegetables, fruits, dairy products and poultry to the above markets. To this end we trust that you will give this matter publicity among the producers and ranchers of your section. We are particularly anxious to have the markets well attended on the opening day, May 3d. For further information on this subject, please address the Municipal Market Committee, City Hall, Los Angeles.

Thanking you in advance for your co-operation in this matter, we are, Yours truly,

MUNICIPAL MARKET COM.
By Hamilton Reed, Chairman.

SURE ENOUGH

An Irishman entered a ticket-office one day and inquired the fare to Chicago.

"Ten dollars," said the clerk. "But," he added, "we are making a special rate. By buying a round trip ticket you can get it for \$15."

The Irishman looked puzzled. "A round-trip?"

"Yes," said the clerk, "a round-trip to Chicago and back."

"Well," said Pat, "what do I want to come back for, when I am here already?"

U. S. LEADS IN THE CONSUMPTION OF SUGAR

ANNUAL CONSUMPTION MORE THAN ONE FIFTH TOTAL PRODUCT OF WORLD.

COUNTRY PRODUCES ONLY 10 PER CENT OF TOTAL BEET SUGAR CROP.

The United States is the largest sugar consuming country in the world. It consumes annually almost one-fifth of the entire amount of sugar produced in the world. In 1909-10 it consumed 3,285,771 long tons, as compared with 1,707,956 tons by the United Kingdom, 1,199,389 tons by Russia, and 1,116,315 tons by Germany, all other countries consuming less than one million tons each. The per capita consumption of the United States in the same period was 79.9 pounds which was the highest except that of the United Kingdom, which had an apparent per capita consumption of 86.49 pounds, due to the large amount of fruit canning and preserving for export.

In 1910-11 the world's production was 8,457,178 long tons of cane sugar and 8,982,220 tons of beet sugar. Of a total world's production of 8,294,324 long tons of cane sugar in 1909-10, the United States and its possessions produced 1,232,015 tons, and of these 335,000 tons were produced in Louisiana and Texas, 461,688 tons in Hawaii, 309,629 tons in Porto Rico and 125,698 tons in the Philippines.

In 1910 over one-half of the world's sugar production came from the beet. Europe produced 90 per cent, and the United States 9 per cent of the world's beet sugar crop. Europe produced 5,399,548 long tons of beet sugar and the United States 214,825 tons in 1903-4, and six years later, in 1909-10, Europe produced 5,864,047 and the United States 457,562 long tons, an increase in the period of 8.6 per cent for Europe and 113 per cent for the United States.

In 1903-4 there were 4,272,675 acres under cultivation in sugar beets in all of the countries of Europe and 370,984 acres in the United States. In 1910-11 the European acreage was 4,749,435 acres and that of the United States 420,262 acres, being an increase in the six years of 11.2 per cent for Europe and 13.3 per cent for the United States.

In Europe, in 1909-10, the highest production was in Denmark with 12.9 short tons of beets per acre. The lowest production was in Russia with 5.5 tone per acre.

In the United States in 1909-10, the highest production was in Utah, with 14.54 tons of beets per acre, and the lowest in Michigan, with 3.1 tons per acre. Notwithstanding its low production per acre, Russia was first in number of acres in beets, with 1,374,269, and third in production of beet sugar, having 1,126,905 long tons in the same period. In 1910, Russia took second rank in sugar production.

California ranked first in the United States in 1909-10 in the average percentage of sugar extraction from the beet, based on weight, with 14.43 per cent, while Utah was lowest with 10.74 per cent.

In Europe, Russia ranked first in the same period, with 16.61 per cent, and France lowest with 12.70 per cent.

In pounds of sugar, per acre of beets, Utah ranked first in the United States in 1909-10, with 3,124 pounds per acre, and Michigan lowest, with 1890 pounds. In Europe, Germany ranked first with 3812 pounds of sugar per acre in the same period and Russia lowest, with 1836 pounds per acre.

The total imports of raw sugar into the United States in 1910 from foreign countries and from our insular possessions was 5,714,010,074 pounds, and of this 3,896,071,029 pounds, or 68.2 per cent, was dutiable 1,817,939,045 pounds, or 31.8 per cent, came in free of duty. The value of the dutiable sugar was \$99,839,264.98 and the revenue derived from it was \$52,677,757.28. The average value of the dutiable sugar was 2.6 per pound.

Of imported refined sugar only 3,149,338 pounds were dutiable in 1910. Its average value per pound was 3.1 cents and the duty derived from it was \$60,044.68. 37,242,300 pounds of refined sugar came in free in 1910.

Richard Egan was in town on Thursday from San Juan, a guest of friends. Judge Egan is a member of the Orange county highway commission and stated that work upon the county road will begin at the Los Angeles county line June 1. The road will pass through Fullerton, this city, Santa Ana and San Juan, and will continue to the San Diego line. Bids for constructing the road will be opened by the highway commission within a few days.

SAND FOR GLASS MAKING.

Industry Highly Specialized—Silica, Clay and Other Impurities Must Be Removed.

The preparation of glass sand has become a highly specialized business, and in the middle Mississippi valley 15 or more thoroughly equipped plants are at present employed. The materials used for glass sand in the central United States according to the United States Geological Survey, are mainly bedded sandstones, and a complete process of preparation includes quarrying, breaking, crushing and grinding into component grains, screening, washing, draining, drying and finally screening to various sizes. Some beds of sandstone are so friable and pure that only blasting down and slight crushing are necessary before the sand is dried and screened. Many plants, however, wash their sand in the course of preparation, particularly those in Illinois, where hydraulic mining is employed to obtain sand from the quarries. Washing doubtless removes, even from high-grade sand, considerable silica in such fine state as to be detrimental, as well as an appreciable quantity of clay and other undesirable impurities.

It is mistaken economy to neglect this important phase of treatment on account of the expense of installing washers, for the price of sand, and often its use or rejection, is affected by the small percentage of impurities that may be washed away.

NEW YORK'S CANAL.

Comparatively few persons have given serious attention to the fact that a great large canal at an estimated total cost of \$101,000,000 is being constructed across central and western New York state. This great wall of water with its locks, water gates, spillways and highway bridges winds across the state from the Hudson to Tonawanda, giving access to the old Erie canal, Oswego canal, Lake Champlain, St. Lawrence and great lakes, opening a grand highway from the seaboard and the first city of the Union. When one considers that the canal extends, as the crow flies, 353.5 miles across the state, and with the branches to Lake Champlain and Lake Ontario, has a length of 463.5 miles, it will be recognized as one of the largest engineering feats in canal construction, ranking second only to the Panama Canal. There has been no end of difficulties met with, such as quicksand and floods, and frequently bridges had to be built to make the work possible.

PLACENTIA OIL NOTES.

The interest of oil operators of the state seems now to be centered on the Placentia field. Here is where new leases are being made and more new wells are being started than perhaps in any other field.

Many think that this whole district practically is underlaid with oil and expert oil men and geologists seem to be of the same opinion as evidenced by the extent of leases made or options asked for.

The outlook for even greater activity in the Placentia oil fields looks very bright. A number of new companies from the northern fields are sending representatives to investigate the field and much competition for new leases is expected. This will also undoubtedly mean the starting of wells in territory still further outside the field of operations hitherto.

Placentia is no longer called a "wild cat" field. There are too many producing wells now in operation and good indications in others now drilling to make this any but a proven oil field of great producing capacity and producing oil of a high gravity.

The Ortoque well in which interest has centered especially of late, was reported down to oil bearing sand two weeks ago, and the Brand & Stevens Oil Co. drilling same have been busy the past week putting in a casing and cementing off the water, an assurance that the indications of a producing well was indeed very good. The well is down some 2000 feet. The rotary drill will be continued for a time yet.

OIL FIGURES FOR MARCH

Orange County's Daily Production Totaled 22,625 Barrels.

Figures that have just become available in Los Angeles show that the production of oil in the Fullerton-Brea field for the month of March was 701,377 barrels; for the state, 8,184,809 barrels. That put the average production per day for the Orange county field at 22,625 barrels.

The figures show that there are 291 producing wells in the Fullerton-Brea field, and that at the present time there are 55 wells being drilled. In March five new wells were brought in. Of the eighteen fields in the state, the Orange county field is third in point of number of wells now being drilled. Midway with 722 producing wells, has 108 being drilled, and Colinga with 914 producing has 61 drilling. In proportion to the producing wells, there is no field that has as many wells under drill as the Orange county field.

See the preparations that are being made by city and government to take care of the traffic which is soon to come by way of the Panama Canal. Business men and foreign steamship officials who have been studying the situation for a year or more predict that the business of the port of Los Angeles will jump to \$100,000,000 annually—following the opening of the great ditch.

Arrangements have already been made for practically a thousand great ocean liners to call at this port upon the completion of the canal. Is it any wonder that hundreds of people are buying harbor property to the very limit of their means. The real center of activity in harbor real estate is DOMINGUEZ HARBOR TRACT. This property is RIGHT AT THE HARBOR. It is crossed by steam and electric roads. It is just a few feet from deep water—where the big liners will dock. Actual sales since opening day aggregate over \$350,000.

Notice of Assessment No. 2

American Orr Concrete Pole Company, a corporation, with its principal place of business located in the City of Anaheim, County of Orange, State of California. Notice is hereby given that at a meeting of the directors, held on the 15th day of April, 1913, an assessment of twenty cents (20c) per share was levied upon the capital stock of the corporation, payable immediately, in gold coin of the United States, to the secretary, at the office of the company, No. 229 North Lemon street, City of Anaheim, California. Any stock upon which this assessment shall remain unpaid on the 17th day of May, 1913, will be delinquent, and advertised for sale at public auction, and, unless payment is made before, will be sold on the 6th day of June, 1913, to pay the delinquent assessment, together with costs of advertising and expenses of sale. GEO. W. TERRY, Secretary, 229 North Lemon street, City of Anaheim, California.

Notice to Creditors

Estate of Blanche L. Hill, Deceased. Notice is hereby given by the undersigned administrator of the estate of Blanche L. Hill, deceased, to the creditors of, and all persons having claims against the said deceased, to exhibit the same with the necessary vouchers, within ten months after the first publication of this notice (which publication was first made on the 1st day of May, 1913), to the said administrator of the said estate, at the office of F. C. Spencer, room 4, Odd Fellows' building, Anaheim, Cal., the place for the transaction of the business of said estate in the County of Orange. Dated this 28th day of April, A. D. 1913. JAMES R. SHEARER, Administrator of Estate of Blanche L. Hill, Deceased. F. C. SPENCER and CLYDE BISHOP, Attorneys for Administrator. (5-1-15)

Notice to Creditors

Estate of Martin Huarte, Deceased. Notice is hereby given by the undersigned administratrix of the estate of Martin Huarte, deceased, to the creditors of, and all persons having claims against the said deceased, to exhibit the same with the necessary vouchers, within four months after the first publication of this notice (which publication was first made on the 1st day of May, 1913), to the said administratrix of the estate of said deceased, at the office of F. C. Spencer, attorney for said estate, room 4, Odd Fellows' building, Anaheim, Cal., the place for the transaction of the business of said estate in the County of Orange. Dated this 23rd day of April, A. D. 1913. PILAR HUARTE, Administratrix of Estate of Martin Huarte, Deceased. F. C. SPENCER, Attorney for Administratrix. (5-1-15)

Notice of Dissolution of Partnership

The firm heretofore existing under the name and style of Anaheim Auto Transfer Company, doing business in the City of Anaheim, is this day dissolved by mutual consent, J. C. Mauerhan having purchased the interests of Perli R. Carpenter and B. T. Beale in the concern together with the debts due the firm. He has assumed the obligations of the firm and will hereafter conduct and carry on said business.

PERLI R. CARPENTER,
B. T. BEALE,
J. C. MAUERHAN.

CONSERVATION AS PRACTICED IS INJURIOUS

THREATENS TO DESTROY RE-
SOURCES WE ARE TRYING
TO SAVE, AIDS MONOPOLY

GIFFORD PINCHOT HAS SOME-
THING TO SAY ABOUT NA-
TION'S PRESENT METHOD

Conservation has been defined by its chief exponent as the "use without waste for the benefit of all the people."

When the conservation movement started seriously, little more than a decade ago, it was welcomed by all classes except the professional land, timber and coal grabbers, and by all sections of the country. The west had learned the lesson of the east by observation and example, and did not want to see its great forests destroyed as the walnut and oak groves of Ohio and Indiana were annihilated.

The national parks have met popular approval, says Gifford Pinchot in a recently issued pamphlet. They have been perpetuated for a worthy purpose, and actually serve that purpose, which is to save and hold for all alike for all time wonderful and inspiring objects of nature.

Our national forests would meet with the same approval if they served the purposes which they purport to serve.

The popular conception of conservation is that it permits the wise use and prevents the wilful waste of the natural resources still to be found within and upon the public domain.

Conservation has been entrusted to a bureau which has been permitted to grow arrogant and wasteful without reproof. This has gone on until conservation now actually threatens with destruction the very resources we are trying to hold for wise use and against profligacy.

The West sees this. The East does not. The East however, is acquainted with the theoretical conservation only. The West is acquainted with conservation as it is practiced. The radical conservationist affects to believe that Western opposition is due to the alleged fact that every Westerner is an active or a passive land thief.

As a matter of fact the average Western man is as honest as the average Eastern man and the public conscience is as active an entity West as East, therefore there must be another reason.

In the first place it is the West and not the East, North or South which has been conserved. The West is carrying the burden for the whole nation for, with the exception of 161,171 acres in Michigan, 674,970 acres in Florida and 65,950 acres in Porto Rico, our National forest reserves, 190,328,733 acres in all, lie in the states west of the Mississippi and within the territory of Alaska.

The man who has read only the Forestry Bureau's circulars and press matter knows only one side, the side of the theorist and the radical; what the publicist with a college knowledge of forestry has to say of the purpose and work of the forest service. Out in the states where conservation is going on and where men can see for themselves, results are apparent.

Conservation has piled up a continuous deficit, and at the same time has permitted an appalling waste of the very resources it purports to save.

A bulletin issued by the Forest Service under date of October 30, 1911, gives the total area of all the national forests as 190,328,733 acres. Only two states of the Eastern half of the country, Michigan and Florida, have national forests within their borders. With Porto Rico the total area of forest reserves east of the Mississippi is 904,640 acres. Alaska and the West contain all the balance.

Right here is found an unequal distribution of a great national burden. The West practically carries all of it, but has no voice in administration, as the forestry bureau at Washington is made up of Eastern theorists.

A statement issued by Forester Graves under date of September 12, 1912, gives an estimated stumpage for all the forests under the service of 600,000,000 feet board measure. In his 1911 report Mr. Graves estimates new growth on the reserves at 3,273,690 feet. In other words that is the crop.

Total timber sales on the reserves for the 7 years, 1905 to 1911 inclusive, was 1,901,532,000 feet, or less than 60 percent of any single season's growth. The average annual cut for this 7-year period was only 271,647,000 board feet, or about eight and one half per cent of the annual crop.

Total cost of administration for the past five years is shown on pages 12 and 13 of the chief forester's report for 1911. It aggregates \$18,164,984.56.

The total revenue for the same period as shown in the same place in this report, were \$9,337,666.20, leaving a deficit for the five years of \$8,827,318.36. That deficit was only \$2,265,985.34 for the year 1908, but for the year 1911 it was \$3,582,615.19, an increase of nearly 200 per cent in four years.

What would be thought of a private business that would show such a balance sheet? The forest service markets but eight and one-half per cent of its annual crop, as shown in the sales of a seven years' period, while at the same time it saddles an enormous and rapidly growing annual deficit upon the nation.

Congress has provided plain procedure under which settlers may go upon the public domain and develop it. Congress has not found it necessary to change existing land laws, but a system has grown up under which a government bureau has become greater than congress, because it can nullify the acts of congress by rendering the public land laws of the United States inoperative.

The practices of which the West complains grew up under the two Roosevelt administrations. They were not checked by the Taft administration.

Western resources have been locked up by blanketing the public domain with reserves. Boundaries have been defined around great areas the areas withdrawn from all forms of entry and placed under the forestry bureau to be administered as national forests. Coal lands have been withdrawn, oil lands, too, and water power sites, until nothing remains of the public domain except waterless desert lands. The old land laws stand in full force and effect, but with no lands left except lands withdrawn by executive order and converted into monuments, parks and forest reserves, under the administration of bureaus; so far as the public domain is concerned, this is a bureaucratic government pure and simple.

There is a provision in the statutes under which natural objects can be preserved by the creation of a national monument, but the law restricts the withdrawal to the area on which the natural object is situated. The late Congressman Frank Cushman, a wag as well as a sportsman, named the Elk of the Olympic peninsula in Washington "Cervus Rooseveltus." The Mount Olympus National Monument was promptly created.

On this reserve no one can cut a stick of wood, prospect a ledge of mineral, catch a fish or shoot a bird. Instead of restricting its boundaries to the base of Mount Olympus, the monument covers 608,640 acres of the heart of a known mineral region. That was a stretch of executive authority without warrant of law or the justification of common morality. It was taking at least 600,000 acres from a sovereign state to perpetuate it as a profitless wilderness.

The Gila cliff dwellings are in a monument of 160 acres, and the famous Oregon caves in 480, while Lassen Peak in Colorado and Jewel cave in the Black Hills are in monuments of 1280 acres each.

In the two states of Oregon and Washington are 5,000,000 horsepower of idle energy. The total waterpower development in the two states is not in excess of 300,000 H. P. These developed water-powers are in the hands of five large companies and a number of small ones, none of which has any interests in common with any of the others. One of the larger stations is owned by the city of Seattle, which now has enough power, developed and undeveloped to make monopoly in the Puget Sound region impossible. Water-power sites on the public domain were withdrawn without provision for their future utilization. The city of Bellingham, in the state of Washington is served with power right now generated in British Columbia, because progress on water power development in the Mount Baker region has been halted by the government.

The pretext for these withdrawals is that they are intended to prevent monopoly, and this in a region where monopoly is impossible in the very nature of things.

Six cents per K. W. hour is the maximum light rate in Seattle, and power sells for as low as one-half cent per K. W. hour. Much more cheap power could be developed in this region for all domestic and industrial purposes, with every opportunity for keener competition than now exists, if there were some provision for the utilization of an idle resource. There is still a statutory way to secure power sites, but the sites are withheld from entry. The law is plain, but it is abrogated by department orders.

C. S. Crookshank and John Beatty were in town from Santa Ana on Monday morning delivering state road bonds to local bankers.

EARLY DAY ITEMS ABOUT THIS CITY

PEOPLE CLAMORING FOR DIVISION FROM LOS ANGELES COUNTY.

TELEGRAPH LINE FROM SAN BERNARDINO TO THIS CITY IN PROSPECT.

(From Gazette March 29, 1873.)

Who Are the Opponents of County Division?

An attempt has been made to create the impression that the desire to divide the county of Los Angeles exists only amongst a small portion of its citizens, that in that part of the county, which it is proposed to cut off, public opinion is divided upon the subject and that north of the San Gabriel river there is a unanimity of feeling against the creation of a new county. Outside of the city of Los Angeles, three-fourths of the voting population lie south of the San Gabriel river. Nine-tenths of this number or all, except a few citizens of Los Nietos precinct, warmly advocate county division, differing only with regard to the best method of accomplishing their object. Even those who do not experience the inconveniences resulting to citizens living in the more remote portions of the county, and who are in consequence content with the present location of the capital, are not opposed to the division, provided they are allowed to remain in the old county. Their opposition has heretofore been based upon the difference of opinion in regard to the proper boundary line to be established, and when we satisfy them upon this point, they will accord to us the right to form a separate government.

Who then are the real opponents of county division? In the first place the county officials. The offices are owned by a certain clique, and this proposition attacks directly their pockets. As soon as the bill creating two counties out of the present territory of Los Angeles is passed through the legislature, an effort will undoubtedly be made to reduce the fat salaries, which have heretofore enabled their recipients to prevent the accomplishment of the will of the people. With salaries cut down to reasonable figures, there will no longer exist a fund with which to fee the many hangers-on whose only business is to vote. In their endeavor to keep the county intact, the men are ably seconded by the citizens of Los Angeles. For so many years have the residents of the country precincts been compelled to visit Los Angeles, that many of the townspeople believe it to be actually a felonious act to attempt to change the existing state of affairs, and will do all in their power to aid the office holding ring to defeat the wishes of the country. In a word, it is town against country. Owing to personal dissensions in our midst the town has hitherto won the day. In the present campaign which is now commencing, we have, on account of the equality of two political parties, every prospect of success, provided always that we adopt a popular plan of action, and that we firmly unite to carry it forward to a successful completion.

Married—In San Francisco, March 27th, Benjamin Dreyfus, of this city, and Miss Lea Wiel of Baltimore, Maryland.

Born—On Saturday, March 22, to the wife of D. Strohoff, a son.

(From Gazette April 19, 1873.)

Telegraph Line Between Anaheim and San Bernardino.

About four months ago the project was agitated of San Bernardino connecting by wire with either Anaheim or Los Angeles. San Diego, hearing of the project, made a strong effort to have the connection made with it. Since that time the company has been quietly looking into the matter with the result that Anaheim has been selected as the proper point from which the branch line shall start. Mr. Gamble, the superintendent of the Pacific lines, passed through here on Tuesday en route for San Bernardino to make the final arrangements before commencing construction. Anaheim Landing will be materially benefited by the building of the line. The trade of San Bernardino and that portion of Arizona lying immediately east will naturally follow the telegraph. By diverting trade to this point, the revenue of the lighter company will be largely increased. Anaheim will also derive a benefit from the connection and should see to it that no outside influence is expected to change the

present intention of the telegraph company.

Married—In Anaheim, April 15, by the Rev. Philip Farley, Henry Knapke and Miss Annie Bach.

(From Gazette, May 10, 1873.)

Born—On Friday, to the wife of H. Kroeger, a son.

MOUNTAIN LION SLAIN BY RANCHER

Made Away With Hog on Modjeska Ranch, Caught in Two Traps Set For Him

A mountain lion was killed Thursday night at the Modjeska ranch in Santiago canyon by the keeper of the ranch, O. H. Smith. The animal was trapped in a pig pen.

Thursday morning Smith found that during the night previous some wild animal had visited the pig pen and had killed one of two hogs that were in it. The hog's head had been chewed up and the meat from one shoulder had been torn off and eaten. Smith concluded that the visit had been from a mountain lion. He took the live hog from the pen and left the carcass of the one that had been killed. He set several traps in the pen.

Thursday night Smith, who was on the watch at the house, heard a commotion at the pig pen. He ran out with his rifle and found that the big cat had jumped into the pen and had one trap on a fore foot and another on a hind foot. The lion had tried to jump out to flee. The weights on the traps kept them on the inside of the fence, and when Smith arrived the mountain lion was hanging feet up outside the pen. A shot from Smith's rifle quickly put an end to the animal.

While Smith was at work releasing the carcass he heard the cry of another lion not over 100 yards up the canyon. He is convinced that the cry came from the mate of the animal he had killed. Smith has traps set and hopes to be able to capture him.

The animal that was killed was an unusually fine specimen, a female, weighing 70 pounds and measuring five feet seven inches in length. The fur is excellent.

It is seldom that a mountain lion is killed in the Santa Ana mountains. In the last five or six years Andrew Joplin has trapped two. Hunters have seen an occasional lion, but the animals are wary and keep out of sight.

Owing to the fact that mountain lions are known to be very destructive of deer, the State Fish and Game Commission has a standing reward of \$25 for one's scalp.

In San Diego beer, we are producing a brand that is unexcelled, even by the most widely advertised brands manufactured in Europe or America. It is as near perfect as human agency can produce, and we believe justly popular. All Anaheim wholesale dealers sell it in bottles and Germania Hall saloon sells it from the wood.

MONEY FOR ROAD BONDS SUBSCRIBED BY BANKERS

\$200,000 Placed to Credit of State Highway Commission.

Sixteen banks of this county have forwarded to the state highway commission the sum of \$200,000 for purchase of state 4 per cent road bonds, the money to be used in defraying cost of constructing the state highway through this county. The highway will cost more than \$400,000, and of this amount the state commission some months ago indicated it desired local bankers to subscribe for one-half.

Work upon the road will be taken up in the immediate future and it is believed actual operations will be under way during the coming summer. Banks subscribing for these bonds are the following:

Anaheim Nat. Bank, Anaheim	\$ 5,000
First Nat. Bank, Anaheim	10,000
Southern County Bank, Anaheim	3,000
Farmers and Merchants' Nat. Bank, Fullerton	4,000
Bank of Garden Grove, Garden Grove	3,000
First Nat. Bank, Fullerton	9,000
First Nat. Bank, Huntington Beach	5,000
State Bank of Newport, Newport	2,000
First Nat. Bank, Orange	8,000
Nat. Bank of Orange, Orange	16,000
Placentia Nat. Bank, Placentia	3,000

First Nat. Bank, Santa Ana	55,000
Orange County Savings & Trust Co., Santa Ana	32,000
Total	\$200,000

UNIVERSITY DONOR PASSES TO BEYOND

Mme. Therese Colin of Wellesley College Dies, Fortune Goes to U. C.

News has just been received at the University of California at Berkeley of the death of one of its benefactors—Mme. Therese F. Colin, head of the Department of French of Wellesley College. Mme. Colin some years ago deeded to the University of California property in Oceanside, Redlands, and Escondido, valued at a total of approximately \$11,000. It was provided by the terms of her gift that the income should be paid to her throughout her lifetime, and that after her death the income should be applied to the support of the Therese F. Colin Traveling Fellowship. This fellowship is to be awarded annually to some graduate of the University of California for the purpose of studying in Europe, in the field of the Romanic languages.

Professor Colin had had a distinguished scholarly career. She studied at the University of Paris, at the Sorbonne, at the Ecole des Hautes Etudes, and at the Ecole des Chartes in Paris, and also in Florence and in Rome. She took a master's degree at Stanford, was Fellow in Romance Languages at Bryn Mawr, and took the degree of Ph. D. at the University of Pennsylvania. For the past eight years she was head of the Department of French at Wellesley. She held that literature must be studied in intimate relation to the art and the history of a country. Her aim was to interpret to her classes the civilization of France and its spirit and culture as expressed in architecture, art, and life, rather than merely to study texts. She used the cathedrals, the sculptures, and the paintings of France to give vivid background for each literary epoch.

The French government had paid to Mme. Colin the high honor of decorating her with the insignia of Officer d' l' Academie. Later she received the rare distinction of being decorated with the insignia of d' l' Instruction Publique, an honor seldom accorded to a woman. Mme. Colin had visited the University of California on several occasions.

In thus entrusting the care of her property to the Regents of the University of California, reserving the right to the use of the income during her old age, and yet making certain during her own lifetime that with her death the principal should become permanent endowment for the good of humanity, Mme. Colin followed the example of several other donors who have created University of California endowments. For all time to come this European fellowship will be an enduring monument to Mme. Colin's desire to help ambitious young men and women to a scholarly career.

Doctor—You mustn't give up hope. Some years ago I had exactly the same illness.

Patient (gloomily)—Ah, but not the same doctor.

Harold—You don't believe I love you?

Susie—No, you don't leave your chest like the lovers do in the moving pictures.

WATER COMMISSION BILL MEETS OPPOSITION

TRI-COUNTIES COMMITTEE ADOPT RESOLUTION PROTESTING AGAINST MEASURE

HELD TO BE INIMICAL TO INTERESTS OF IRRIGATORS IN THIS VALLEY

By a vote of 13 to 10, the Tri-Counties Reformation Committee on Monday morning at a meeting held at Santa Ana, went on record against the Water Commission bill now before the State Legislature. Out of 37 members of the committee, 23 were present.

It was a special meeting called for the purpose of considering the measure. The resolution as passed follows: "The Tri-Counties Reformation Committee in special session at Santa Ana, Cal., on this 28th day of April, 1913, do resolve and declare that we are bitterly opposed to the passage of Assembly Bill 642, including any amendments (water commission bill so-called), and request all members of the legislature from the counties of Orange, Riverside and San Bernardino, to use every honorable means to defeat the same; and be it further resolved that a copy of this resolution be wired at once to the representatives of the above counties in the legislature."

The meeting was called to order by the chairman, Francis Cuttle, of Riverside. He and J. P. Baumgartner, of Santa Ana, members of the State Conservation Commission, where the bill had its inception, were present.

E. E. Keech, of Santa Ana, stated that he had been in Sacramento and that certain amendments had been made so that the bill so far as it touches irrigation deals only with surface water, and that therefore the interests of underground waters would not be affected. He said the bill had been carefully considered, and he favors it as it now stands.

A. G. Kendall, a San Bernardino county representative, introduced the resolution opposing the bill. Then came a discussion in which Keech and H. Clay Kellogg, of Santa Ana, E. P. Clarke, George Frost and Francis Cuttle, of Riverside, spoke against Kendall's resolution, and Kendall, G. A. Atwood, Kenneth McRae and Seth Marshall, of San Bernardino county, Robert Irving, of Riverside, Samuel Armor, of Orange, G. W. Sherwood, of Fullerton, and J. W. Newell, of Placentia, spoke for the resolution.

The opponents of the bill declared that while Northern California needed the regulation provided in it, Southern California did not. Those favoring the bill declared it was the result of a long study of conditions and is needed to protect the people's water power rights.

Chairman Cuttle stated that he thought the time to have made a fight against the measure as a principle was at some time in the last year and a half. The committee had suggested various amendments, which have been made to the original bill, and now it was proposed to strike at the bill as a whole. He thought the time to have given an expression on the principle of the bill was before the present critical time when there is a climax in the fight at the legislature.

Roll call showed 13 votes in favor of the resolution and 10 against. The resignation of W. G. Fraser of Riverside, as a member of the committee, was accepted, and Robert Irving was elected in his place.

Chairman Cuttle stated that if the committee thought that his position in favor of the water commission bill, being opposed by the committee, was such that the committee thought better harmony could be kept by his resignation, he would offer it. Immediately there was half a dozen opponents of the bill on their feet protesting that Cuttle should not be allowed to resign.

The president and secretary were instructed to draw up resolutions of regret over the death of E. W. Holmes of Riverside, a member of the committee.

Adjournment was taken to next October, when the meeting will be held at the Arrowhead hotel.

A party of local Woodmen of the World, members of the team, and officers and members of Anaheim lodge, to the number of 30, went to Whittier Friday night, and exemplified lodge work at that point, initiating a large class of candidates. The team was in command of Captain Alvin Nowotny, and did the work required of it with credit. After the initiatory work was completed, a banquet was discussed, to which local members of the order did ample justice. The party arrived home in the early hours of the morning, making the trip in automobiles in record time.

Hand power or electric washing machines at Dickel's.

PROTECTION DISTRICT UNDER DISCUSSION

(Continued from page 1.)

Secretary Ahlborn, of the board of trade, said that the assessed valuation of all property in the proposed protection district is \$15,000,000, he thought that a tax of 20 cents on the \$100 for the first five years, making a total of \$30,000 yearly for the work, would be sufficient to carry on necessary improvements. After the five years, he said, probably the river would be in such good condition that an assessment of 10 cents would probably be sufficient to keep up the protection and that probably later the rate could be further decreased. As only \$5,000 has been spent upon river protection in this section in the last 20 years, he said, he thought \$30,000 a year ought to be sufficient to afford adequate protection, without loading a tax upon the people that some of them would find it difficult to pay.

J. W. Duckworth said that the report that the forming of the district would cost \$10 to \$12 per acre was absurd, and that 50 cents per acre ought to cover the cost.

To this Mr. Cole stated that in the Artesia district, he understood that the cost had been \$5 per acre, and that \$150,000 has been spent in river protection in that district.

C. E. Chamberlain said that while he had not given the matter very much thought, it seemed to him the river would have to be curbed some time, and why not now. If the work be done immediately, all danger for the next 100,000 years is lessened and generation after generation will reap the benefit of the work. When the river goes on a rampage, he said, somebody gets the damage, and something ought to be done to prevent this.

Supervisor Schumacher, when asked to state if the limit of taxes could be fixed by voters in the district, said that the district attorney had been asked to render a decision on the protection district matter, and would report later. To date he could not give an answer to the question.

Daniel Crossmann, engineer of the Southern Pacific, and Engineer West of the Santa Fe, were in attendance at the meeting, but they said they had not gone over the ground and could therefore not give any idea of the cost. They would prefer to listen and see what it was planned to do before making a statement.

The matter was disposed of by Secretary Ahlborn, who made a motion that it be recommended to the board of supervisors that the rate for assessments in the new district be 20 cents for the first five years and whatever decrease is possible after that should be made, finally bringing the rate to 5 cents per \$100 yearly. The motion was carried unanimously.

Another matter which occupied some time, was the matter of citrus tariff rates. Mills introduced a resolution fixing what growers in this section consider a fair minimum rate for citrus fruits, and after adoption it was moved and carried that a copy of the resolution be forwarded to the president, vice-president, speaker of the house and all the members of congress from California.

Kitty Measor Out Pending Hearing

Kitty Measor was released Monday on bail, pending the review of her case by the State Superior court, a hearing before which has been set for May 5. Mrs. Measor was sentenced to 13 months on two counts, charging violation of the Wylie local option bill by selling liquor at Delhi. The case was appealed on the ground that where a county prohibition ordinance is in force in the county, the Wylie law is inoperative.

W. G. Mason and Miss Rebecca Rayburn were married at the home of the bride's parents in Riverside Sunday afternoon. The wedding was kept a secret when the couple came to this city Sunday evening, and it was not until they were leaving for their honeymoon Thursday that their marriage was discovered. Friends gathered at the depot in time to shower them with rice, and give them a happy send-off for their trip. The happy couple will tour the Middle and Eastern States, visiting New Orleans, Niagara Falls, and other points in the East, and will return probably in six weeks. Mr. Mason is the popular agent of the Southern Pacific at West Anaheim, and is well known and liked by many in the community. Miss Rayburn is a favorite among all who know her, and has a host of friends here who extend well wishes for a long-continued and happy married life.

H. W. Wekeman has accepted a position in the Griggs & Hammarth grocery, and is on the job early and late. Among his first successes is the raisin window, decorated for Raising day, which was celebrated yesterday. The window has been attracting much attention, and demonstrates the fact that the originator of the idea is "there with the goods."

IN AND ABOUT THE CITY

Henry Hetebrink was in town the latter part of the week from his ranch near Fullerton.

Mr. and Mrs. G. M. Theodore, George and Nick Theodore, and Miss Mary Hund visited friends in Los Angeles Sunday.

Mr. and Mrs. John Hartung and Mr. and Mrs. E. J. Hartung went to Ocean Park and Santa Monica on Sunday in their motor car.

Arthur L. Ruiz, a Mexican disturber of the peace, drew a sentence of 30 days in the county jail in the justice's court on Tuesday morning, for creating a rumpus and fighting the previous night.

H. M. Adams, E. L. Goodrich, M. W. Martenot and J. H. Enearl formed a party which went to Santa Ana on Monday on business connected with the local Masonic building which will be erected shortly.

Manager Theodore of the Anaheim Laundry Company contemplates installation in the near future of a new mangle, costing \$2,200, for use in the laundry, taking the place of the present machine, which is outgrown by the trade of the company. Other improvements are also in contemplation and the proprietors intend to keep up their reputation as owning one of the best equipped laundries in the county.

J. L. Cadman, sales agent for the Oakland cars, reports the sale of a 1913 Oakland 35 to Councilman Tom Hill of Stanton. Due to a rush of orders at the Los Angeles agency of the company a scarcity of cars was reported, over 50 orders being received for which no cars were available, and delivery will be made next week, when a large shipment of cars will be received. "Jack" is a hustler from away back, and is going in to clean things up in the automobile line.

J. B. Reeve was in town the latter part of the week demonstrating the Mitchell automobile he having taken the Orange county agency north of the Santa Ana river for that car. He makes his headquarters at the Orange county garage and machine shop, Fullerton, and covers his territory from that point. Mr. Reeve has one of the classiest cars on the market, and many are the admiring glances cast at his machine as it goes about the county. Note his adv. in another column.

The first of a series of fashionable 9-course luncheons given by the domestic science classes of the high school to members of the senior class and faculty members will be held today noon, Prof. Prince, Miss Veda Walker, Miss Gladys Gunnitt, Miss Winifred Iman, Miss Kathryn Hand, Walter Spaeth, Lawrence Waller, Will Webb and Ralph Maas being the guests. The entire class, numbering 29, will be entertained in groups of seven, with two members of the faculty until the entire class has been so entertained. Everything about the affairs will be carried out in the highest style of the art, and will furnish valuable training for all who take part. The serving of the luncheons comes as part of the regular course for members of the domestic science classes.

Ruth, the 4-months-old daughter of Rev. and Mrs. F. W. Mitchell, died at her parent's home in this city Saturday evening of acute cerebral meningitis. The funeral was held Monday afternoon from the undertaking parlors of Backs & Terry, interment being made in Santa Ana cemetery. Rev. Henderson officiated at the funeral and Miss Juanita Powers furnished the music. Rev. Mitchell is pastor of the Presbyterian church here, and he and Mrs. Mitchell are well known and liked by all who know them. They have the sympathy of the entire city in their bereavement consequent upon the loss of their daughter. Floral offerings for the funeral were profuse and elaborate, and betoken the respect in which the parents of the little child are held.

ANAHEIM PROOF

Should Convince Every Anaheim Reader

The frank statement of a neighbor, telling the merits of a remedy. Bids you pause and believe. The same endorsement By some stranger far away Commands no belief at all. Here's an Anaheim case. An Anaheim citizen testifies. Read and be convinced.

Louis Danser, 425 W. Center street, Anaheim, Cal., says: "I was troubled by sharp stitches in my back. They came on suddenly and my back was so weak, lame and painful that I could hardly stand up. I thought this trouble was due to weak kidneys and I tried Doan's Kidney Pills. They took away the pain and I have had no special need for them since. I know that Doan's Kidney Pills can be depended upon to do good work."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.—Adv.

REMONSTRATE AGAINST PROTECTION DISTRICT

Fullerton Chamber of Commerce Asks Supervisors to Exclude Town

Opposition to the inclusion of that territory in the limits of the proposed river protection district has been presented to the Chamber of Commerce at Fullerton by property owners who think that city is in no danger from the river, and a resolution was adopted expressing the same sentiment by the chamber. A letter to this effect has been sent to the supervisors by the president and secretary, and a committee has circulated petitions of protest to be signed. These will be presented by E. K. Benchley at the meeting of the supervisors May 6, when action is to be taken by them in regard to forming the district.

Socialists of Orange county will hold a picnic at Garden Grove on Sunday, May 4. C. R. Allen, Hugh Badgley and Charles Hamer comprise a committee in charge of plans.

C. J. Chisam and wife have arrived from Omaha to spend a few weeks on their place on Nicolas avenue in Fullerton. Mr. Chisam is assistant general freight agent of the Chicago Great Western railway, but comes out to Fullerton two or three times a year to visit his place.

A contract for the construction of the reservoir for the city water system has been awarded by the city trustees to Frank Benchley for \$12,500. The only other bid was from Charles Stansbury of Los Angeles, whose figure for the work was \$14,945.

F. Wilson has severed connection with the Placentia Mutual Orange Association as manager of the packing house and leaves soon for Seattle, Wash., to engage in the lumber business. Charles E. Fuller, of Redlands, has accepted the position as manager. Mr. Fuller will bring his family to Placentia soon.

Fullerton has suffered but little from the effects of the cold weather, according to the statements of the banks. In the two national banks the deposits foot up over \$700,000, to say nothing of the deposits in the savings banks. This is a record-breaker for Fullerton.

Eugene Bercot was in town the latter part of the week from his ranch on the eastside. Mr. Bercot has ten acres of fine young orange trees adjoining the Bruns ranch, and considers he has one of the finest pieces of property in the county.

C. C. Ringer, representing the California Acreage Home Builders, was in town on Friday from Los Angeles on business connected with his company.

FOR THE BREAKFAST TABLE

We suggest a nice steak or a few chops will be found more sustaining than a dish of sawdust and milk. And if you buy your meats here there will be none of the don't-care-for-breakfast talk at your house. Hubby will eat a meal that will do him till lunch time. You will enjoy breakfast as heartily as you do any meal of the day.

ANAHEIM CASH MARKET 109 North Los Angeles Anaheim, Cal.

It Pays to Buy

A Reliable Car, made by a Reliable factory, and sold by a Reliable dealer. In other words, a

STUDEBAKER

The lowest priced automobile is not always the cheapest car to buy. Neither is the highest priced car necessarily the best. If a car is really built (not assembled) by an organization that has been established for years and that has a world-wide reputation for square dealing, you are sure that the car is built honestly and as well as modern mechanical skill knows how and that your guarantee is worth something.

If the dealer you buy from has been in the business long enough to have established himself and there is no danger of his going out of business, you are reasonably sure of good service after you have purchased your car and this, sometimes, is the means of saving many dollars in repairs as well as many hours of the use of the car.

There is no car that exemplifies these points as much as the STUDEBAKER. That name stands for fair dealing and honesty in business. We have sold over one hundred and fifty STUDEBAKER cars in northern Orange county so that it is an easy matter to ascertain the service they have given. We do not claim to have the lowest priced car but we do believe the STUDEBAKER is the most economical car in the long run. Why then invest hundreds of dollars and take a chance, when you can by a Studebaker
