

The valuation of the farm product of the United States, as estimated
(Continued on Page 8.)

IN THE DAYS OF LONG AGO

Items of Local Interest Culled from the Files of Former Issues of This Paper

50 YEARS AGO THIS WEEK

Adv.—For lightning, Jersey-blue 40-ro whiskey, 20 to Miller's.

Mr. J. A. F. Heyerman has sold to Joseph Backe 10 acres of land in Anaheim for \$250.

Adv.—Morca cueros, lana, grano, sebo, mantaquilla, huevos, semilla de mastazo, frijol de yerilla, y todas otras productos del sampa, pagando por lo mismo el precio mas alto, y puro dinero.—B. G. Perkins.

Mr. Henry Kroeger is about to construct a genteel cottage residence on his vineyard, and has let the contract for its construction to D. W. C. Dimmock. The lumber has been ordered, and the work of building will be commenced in about two weeks.

Mr. Alonzo Coons, the obliging and gentlemanly telegraph operator, has been ordered to take charge of the repeating office at Petrolpolis, above Los Angeles, and left for that point on Tuesday last. The Anaheim office is turned over to Mr. H. D. Polhemus, who will hereafter have charge of the telegraphing business at this point.

60 YEARS AGO

A Mr. Lynch, agent of the Land company, has posted a small printed slip on the Pioneer Inn stable in Anaheim, stating that the editor of this paper has attempted to blackmail him and his company. He also attempts to ridicule us as a lawyer and an editor. Our reply is, that this Lynch is a liar, a coward and a dirty dog.

Notice is hereby given that at a meeting of the trustees of the Anaheim Water Co., held on Saturday, April 15, 1871, an assessment of ten dollars per share was levied upon the capital stock of said company, and was immediately in U. S. gold coin to F. Schneider, treasurer, at his residence, corner Palm and North streets.

Messrs. Porter and McFadden at their place two miles south of Santa Ana, succeeded in getting a good quality of artesian water by boring only forty feet deep, the water rising to the height of eleven feet above the earth's surface. This is the first effort to obtain artesian water south of Santa Ana river, and its success has encouraged a number of others to try the experiment of boring artesian wells, the success of which will be fully reported.

On Sunday morning Justice Davis was informed that a man had died in a hay yard in the rear of the French restaurant. He went at once to ascertain who it was, and the cause of his death. It proved to be an old Mexican called Francisco, who had for some time divided his time between drinking and sheep herding, and it was evident that death resulted from an overdose of "forty-yard" whiskey. There were no marks of violence and nothing to indicate foul play. It was asserted by some that two twenty dollar pieces had been seen in his possession the day before, but the strictest search failed to reveal a trace of any worldly effects whatever. As the deceased had no friends, the body was taken charge of and buried by Justice Davis at the county's expense.

The date of the city election is approaching, and considerable interest is being taken, there being three tickets in the field. A caucus was held Saturday which was attended by forty-five citizens, but some of those present appeared to be over-enthusiastic, as sixty ballots were deposited in the hat. The following ticket was nominated: For mayor, Henry Kroeger; for councilmen, F. Davis, A. Bittner, Tim Boege, J. P. Zeyn, E. W. Champlin; for assessor, Richard Melrose; for city attorney, Dr. J. E. A. Heyerman; for marshal, T. H. Hill; for treasurer, R. Hulman. Wednesday another caucus was held and a second ticket put in the field, as follows: For mayor, S. J. Davis; for councilmen, John Fischer, E. W. Champlin, Obed Macy, J. P. Zeyn, and A. Bittner; for assessor, R. Melrose; for marshal, Mr. Byrd; for treasurer, Theodore Rimpau; for city attorney, Dr. D'Assonville. Furthermore, a ticket was nominated by petition, signed by twenty-two citizens, as follows: For mayor, S. J. Davis; for councilmen, Theodore Rimpau, Phil Davis, Tim Boege, J. P. Zeyn, A. Bittner; for treasurer, Theodore Rimpau; for marshal, George H. Horn; for assessor, Richard Melrose; for city attorney, F. W. Knopf. Of the three candidates for city attorney two are physicians and the other is a clerk.

25 YEARS AGO THIS WEEK

Baron Von Steinmetz and his fiancée, Miss Blanche Mitchell, after spending some days together in this city as the guests of Mrs. Archie Cadman, left for Pasadena on Monday. The Baron is said to have sent home for the family diamonds, and the bride's trousseau will be made, as we hear, in Berlin. The wedding is scheduled to occur early in the summer, and the honeymoon will be spent in the Baron's five castles on the Rhine.

The Placentia literary society is fast becoming renowned as one of the most cultured, entertaining and instructive societies of the entire county. Two weeks ago, in a debate that brought out the powerful intellects of that society, the society decided that the sword is mightier than the pen—and rightly so—and on last Friday evening the debate, "Resolved, that a good education is preferable to great riches," was settled—in the affirmative. Wm. Cowher and Arthur Strickland took the affirmative, while Wm. Thompson and Clarence McFadden argued from the negative point of view, and the best they could do was to get a two to one verdict from the ladies against them. The Placentia folks have made so much money out of oranges this year they despise any thing short of extreme riches, and the society's eloquence is such that to place him upon one side of a question is tantamount to having that side win. The next meeting the debate will be "Resolved, that ambition is a vice," and that's what it is.

The hearing of the petition for the opening of the county road at Polhemusville came up for hearing before the supervisors on Tuesday, and J. W. Hart and Joseph Fiscus appeared and protested against the opening, representing that the road as contemplated would cut off a small corner of their land. The report of the viewers was after discussion modified so as to leave the road on Mr. Fiscus' land at the northeast corner, and then to run on the proposed route to intersect the county road running by Polhemusville. The viewers' report was awarded, and the road of the Sheffield estate, and all amounts awarded as damages by viewers was denied.

Herman Dickel received an order yesterday for 10,000 rose buds and 30,000 murguettes for the decoration of a carriage in the Fiesta floral parade in Los Angeles on Saturday. It was impossible to fill it.

Mrs. L. F. Lewis entertained the ladies at progressive euchre at her residence on Friday afternoon. Mrs. Rust won the first prize, a beautiful table cloth; Mrs. Landell, the second, a gold souvenir spoon, and Mrs. Adolph Rimpau, the booby prize, a travelers soap-box. The next meeting of the club will be at the home of Mrs. Rogers.

The Populists have called their county convention to meet at G. A. R. hall at Santa Ana, Saturday, May 2, to elect delegates to their state convention at Sacramento on May 12.

The Rahmann building is being painted and made ready for occupancy. It presents a fine appearance, and is one of the handsomest buildings in town. It will shortly be occupied by Schumann's implement house and Seda's grocery in the north and south storey, the center room not having been rented as yet.

Seventy-five votes were polled at the Republican primary election on Saturday—more probably than ever cast at a primary in Anaheim. No special interest centered in the result, although seven candidates contested for the five delegates' places. The result shows more the growth of the Republican vote than attributed to any exertion on the part of the candidates to elect themselves, although all were anxious to get about town, with the exception of Williams, who was plastering out of town. The result was as follows: Geo. Boyd, 49; C. E. Grant, 63; E. B. Merritt, 58; Fred Seyn, 54; Frank Shanley, 58; W. A. White, 39; A. M. Williams, 23.

Arthur Lewis has put in a new front door at his lively establishment, to admit of street entrance into his bicycle emporium, and will go in for renting wheels in connection with his lively.

Mr. Weisel and family returned on Tuesday from their trip to Germany, after an absence of a year. Mr. Weisel is glad to get back to California and will make Anaheim his home.

STRANGE DOCUMENT

AGAIN GIVEN PUBLICITY

Letter Purporting to Have Been Written by Christ Bore Up.

The following letter, has appeared in many country newspapers throughout America the last few years. In the letter is an intimation that it should be published to the world by whoever found it, together with the statement that misfortune would follow the person having possession of it in the event that it was not given publicity. There is likewise a promise, that anyone having a copy of the letter in his or her possession will prosper and be followed by good luck.

The alleged history of the document is that it was written by Christ just after His crucifixion, signed by the Angel Gabriel ninety-nine years after the birth of the Savior, and presumably deposited by him under a stone at the foot of the cross.

On this stone appeared the legend, "Blessed is he who shall turn me over." No one, it is said, seemed to have sufficient curiosity to investigate until the stone was turned over by a little child and the letter found.

Teh story goes that the child gave it to one who became a convert to the Christian faith. He failed to have it as a sacred memento, and it passed down to different generations of his family for over one thousand years.

During this period the family suffered repeated misfortunes, migrating to different countries until some of them came to America, bringing the letter. They settled in Virginia, then moved farther south, always followed by misfortune.

Finally the last member of the family, a daughter, was on her deathbed, and she called a neighbor, Mrs. Thompson, giving her the letter and narrating its history. Mrs. Thompson seems to have been the first person to attempt to have the letter published, and it appeared in the Rome (Ga.) Tribune, October 31, 1891.

It next appeared in the Dalton (Ga.) Citizen, and Mrs. Wortman, now living in Marion, Ind., clipped it and kept it in her possession until an effort to have it published. She was followed by misfortune, which she attributed to her neglect in the matter.

Mrs. Ruby Crutchfield, of Trexavon, Tenn., is also said to have had a copy of the letter and to have failed to make an effort to have it published for three years, during which period she, too, suffered misfortune.

Following is the letter alleged to have been written by Christ. Read it and draw your own conclusions as to its authenticity:

"Whoever works on the Sabbath day shall be cursed. I command you to go to church and keep holy the Lord's day, without any manner of work. You shall not idle or mispend your time in bedecking yourself in superfluities of costly apparel and vain dressing, for I have ordered it a day of rest. I will have that day kept holy that your sins may be forgiven."

"You will not break my commandments, but observe and keep them, being written by my own hand and spoken from my mouth. You shall not go to church yourselves, but also your man servant and maid servant. Observe my words and keep my commandments."

"You shall finish your work every Saturday at 6 o'clock in the afternoon, at which hour the preparation for the Sabbath begins."

"I advise you to fast five days in the year, beginning Good Friday and continuing the five days following in remembrance of the five blood wounds I received for you and for mankind."

"You shall love one another and cause them that are not baptized to come to church and receive the Holy Sacrament, that is to say baptism, and then the supper of the Lord, and be made a member thereof and in so doing I will give you long life and many blessings."

"Your land shall be replenished and bring forth abundance and I will comfort you in the greatest temptation and surely he that doeth to the contrary shall be cursed."

"I will also send hardness of the heart on them and especially on hardened and unpenitent unbelievers. He that hath given to the poor shall find it profitable. Remember to keep the Sabbath day for the seventh day I have taken as a day of rest to myself. And he that hath a copy of this letter written by my own hand and spoken by my own mouth keepeth it without publishing it to others shall not prosper, but he that publisheth it to others shall be blessed by me and if they sing be as many as the stars in the firmament of heaven. He that shall be pardoned, and they that believe not this writing and my commandments will have my plagues upon you and you will be consumed with your children, goods and cattle and all other worldly enjoyments that I have given you. Do but truly think of what I have said for you, if you do, it will be well for you in this world and in the world which is to come."

"Whoever shall have a copy of this letter and keep it in their house,

nothing shall hurt them, neither pestilence, thunder nor lightning, and if any man be a child birth and put his trust in me he shall be delivered of her child. You shall hear no more news of me except through the Holy Scriptures, until the day of judgment. All goodness and prosperity shall be in the house where a copy of this letter shall be found. Finished."

TO PAY NATIONAL DEBT

THROUGH SINKING FUND

Republican Leaders Intend to Use Billions Paid by Houston to Lessening Taxes.

Prevention of a financial deficit which might be brought about by a continuance of the policy of the Wilson administration of paying off a billion dollars during the last year on the national debt will be one of the moves of the new administration.

That this is a move for the benefit of the taxpayers may be gathered from the fact that without this huge payment on the national debt, taxes may be perceptibly diminished. Thus the excess profits taxes and the surtaxes which have been passed on to the consumer until prices have been kited out of sight, will be removed or greatly reduced.

It was provided by the last congress that the national debt shall be paid at the rate of 2 1/2 per cent of the aggregate amount of victory and liberty bonds outstanding on July 1, 1920, less an amount equal to the par amount of any obligations of foreign governments held by the United States on that date. This percentage amounts to \$253,000,000 and the debt will by this means be paid in twenty-five years without great burden to the country.

Secretary of the Treasury Houston, however, just before he went out of office, said that "the war debt should be paid, not perpetuated, and the time to pay it is as soon as possible after the end of the war." In other words in spite of the fact that the business depression which naturally follows heavy importations of foreign goods without any protective tariff to safeguard American producers, and in spite of the reasoning that it is better to let the entire next generation pay the war from which it will benefit, the head of the treasury in the Wilson administration is of the opinion that the debt should be paid off immediately and at enormous sacrifices. And yet it was this same secretary of the treasury, backed up by his chief assistant, Mr. Williams, who permitted the nations of Europe which had borrowed from us to forego their interest.

TAX ON ALIEN CARGOES

TO PROTECT SHIPPING

10 Per Cent and Tonnage Dues Expected to Assure Return of Supremacy of Our Early History

Discriminating duties of 10 per cent on all cargoes imported into the United States in foreign ships and tonnage dues of 50 cents per ton on all such cargoes are contemplated by Republican leaders of the house as a means of rehabilitating the country's merchant marine.

Such discriminating duties were proposed in 1896 by the Republican convention which nominated McKinley. It declared that "we favor restoring the early American policy of discriminating duties for the rebuilding of our merchant marine and the protection of our shipping in foreign trade, so that American ships—the product of American labor employed in American shipyards, sailing under the Stars and Stripes, and manned, officered and owned by Americans—may remain the carrying of our foreign commerce."

More recently McKinley stated that "we should no longer contribute directly or indirectly to the maintenance of the colossal marine of foreign countries, but provide an efficient and complete marine of our own." Provision was made for this duty in a bill which passed the house, but failed in the senate because, slated to death by a Democrat, Senator Carmack, of Tennessee. In 1904, however, the entire Democratic membership of the house committee on merchant marine and fisheries accepted the Republican position in a report in which they said that "the measure may be placed on theory but the simple fact is, experience proves that a moderate discriminating duty will accomplish what we all want—and no nation can justly take offense." However, because of general Democratic opposition the measure was not put through. But in 1913 a provision was inserted in the Simons-Underwood tariff law, with a proviso that it was not to become effective if in conflict with commercial treaties with other nations. Then it was found that there were such treaties with twenty-seven nations. The supreme court held that the duty had been nullified.

Anaheim Gazette, fifty-two weeks for \$1.50.

THREE PRESIDENTS

ASK AID FOR CHINA

Harding, Wilson and Taft Appeal to Americans to Help Stricken Millions of Sister Republic.

The President and two ex-presidents of the United States have joined, for the first time in the history of the country, in an appeal for a philanthropic enterprise. President Harding, ex-President Wilson and ex-President Taft are all in the forefront of the movement to send aid from America to the famine victims of China.

One of President Harding's first official acts after his inauguration, taken when he had been in the White House less than two weeks, was to renew the appeal made by his predecessor in the half of America's sister republic in the East. President Harding said in part: "At this, the earliest practicable moment in my administration, I desire to add my own to the many appeals which have been issued heretofore in behalf of the starving people of a large section of China."

"The picture of China's distress is so real that I am moved, therefore, to renew the appeal heretofore made and to express the hope that the American people will continue to contribute to this humanitarian cause as generously as they possibly can."

In appointing the American committee for China famine fund, with its headquarters at the American Legation in White House, ex-President Taft, as one of the members, and Thomas W. Lamont of New York, as chairman, President Wilson said in his proclamation:

"Not only in the name of humanity, but in that of the friendliness which we feel for a great people in distress, I venture to ask that our citizens shall, even though the task of giving is not today a light one, respond as they can to this distant but appealing cry for help."

LIFE SAVING STAMPS

HELP FAMINE VICTIMS

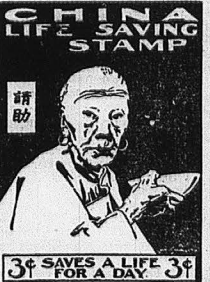

Each "Mercy" Sticker Purchased for Three Cents Provides Food for One Day for a Chinese.

Sales of "Life Saving Stamps" by the American Committee for China famine fund for the benefit of China famine victims have reached a total of thousands of dollars at the end of the first month, and already the money is actually saving lives in China. Orders during the first month aggregated more than 100,000 stamps, which will mean at the rate of 3 cents for each stamp—\$300,000 for the Chinese when the complete returns have been made. The stamps are intended to secure a multitude of small contributions from persons who will not have an opportunity to contribute in other ways. The campaign for China is the greatest single philanthropic effort now before the American people.

Every state in the Union is now co-operating in the life saving stamp sale, and special committees are at work in more than 2,000 cities throughout the country. The circulation of the stamps is being effected by sales organizations composed of officers of the Woman's Foreign Missionary Society, assisted by commercial organizations, schools, churches, Boy and Girl Scout Camps, Y. M. and Y. W. Christian Associations, fraternal lodges, hotel associations, boards of education and other volunteers interested in the movement to extend a helping hand to a sister republic in distress.

House to house canvassing for the sale of the stamps—which are intended to be placed on the backs of letters and packages—has proved the most effective method in the entire campaign. In the big cities the stamps have been sold to business houses, which are using them on their outgoing mail and packages. A nominal quote of ten cents for every adult has been set by the committee, but in many centers this already has been passed. If unable to obtain stamps through a local committee write China Famine Fund Committee, Bible House, New York.

BUY CHINA LIFE SAVING STAMPS

3¢ SAVES A LIFE FOR A DAY 3¢

If each person buys ten stamps at a cost of 30 cents, this community will go over its stamp quota.

Stamps can be sent to the local China Famine Fund Committee or directly from China Famine Fund, Bible House, New York City.

A SUGGESTION FOR FARM HANDS

Inspired by the wonderful success of railroad workers in promoting their interests through organization, farm hands might form a union. Among other principles which might be adopted by the A. A. A.—Amalgamated Association of Agricultural Assistants—are the following:

1. A basis eight hour day.
2. Time and a half for overtime.
3. Double pay for Sunday work or work on holidays.
4. Only members of the A. A. A. in good standing shall be employed.
5. Employers shall deduct dues from wages and pay the same to the local branch of the A. A. A.
6. The work of an agricultural assistant shall be limited strictly to ordinary care of crops livestock, etc.
7. For any work other than that of ordinary care to crops and livestock, an agricultural assistant shall be paid the compensation that would be due a specialist. For instance, for repairing a pump, an A. A. shall be paid the wages of a plumber; for giving medicine to an animal, he shall be paid the compensation of a veterinarian; for mending machinery, he shall be paid the compensation of a blacksmith.
8. In no case shall an agricultural assistant be permitted to perform work other than ordinary care of crops and livestock if a specialist can be secured, and if work be so performed, the A. A. shall be entitled to receive not only the compensation of a specialist, but also the cost the farm owner would be required to bear in securing the aid of a specialist if one were available.
9. Breakfast shall not be served more than 30 minutes before the beginning of the eight-hour work day, and the agricultural assistant shall not be called earlier than 15 minutes before time for breakfast. Violation of this rule shall entitle the A. A. to double pay for the period of time he shall have been constructively on duty.
10. Each agricultural assistant shall be attended by a helper whose duties shall be subject exclusively to the determination of the A. A.
11. Controversies over the manner in which work shall be performed or involving interpretation of the rules, shall be referred to the walking delegate of the A. A. A. whose decision shall be final, pending which decision, the farm owner shall recognize the contention of the agricultural assistant.

FULLERTON'S NEW SCHOOL

With the board of trustees of the Fullerton district grammar schools, life is just one school house after another.

While the finishing touches are being put on the handsome new building on the west side plans are being prepared for another equally handsome on the east side grounds, along side of the present modern structure erected a few years since.

Already preliminary work on the grounds is under way, the ornamental trees and plants being sacked with earth and removed until such time as they shall be needed again. To further clear the ground the old brick building now occupying a portion of the campus, the original grammar school of early Fullerton, is to be torn down at the end of the present school year. The new building is to be erected at the corner. It will extend 198 feet on Harvard, with the main entrance at the corner. It will extend 198 feet on Chapman and 203 feet on Harvard, with a 12 foot corridor running all the way through it. The general width of both wings will be 63 feet.

The general style of architecture will correspond to that of the west side building, the plan calling for a one-floor structure of hollow tile construction, with a small basement and tile roof.

There are to be eleven class rooms, each 24x30, and a big kindergarten room 34x51. In addition there will be a business office, principal's room, teachers' room, work rooms, library, coat rooms, story room, janitor's room, toilet rooms, etc.

They hope to have the plans and specifications ready by the first of May and to be able to let the contract soon thereafter, to the end that the new building may be ready for use at the start of the next school year.

Norman Marsh, of Los Angeles, who designed both the other grammar school buildings there, is preparing the plans and his estimate of the cost is around \$100,000.

NO REDUCTION IN HEATING CAPACITY

New Ruling Doesn't Effect Southern Counties Company

The recent ruling of the state railroad commission rescinding the permit granted by that body to two southern California gas companies to reduce the heating value of the gas from 815 to 760 British Thermal units does not affect the heating value of the local gas. This statement was made public today by J. C. Hayden, district superintendent of the Southern Counties Gas company in this district.

Last January when the demand for gas in southern California was far greater than the available supply, the commission, in order to meet this emergency, ruled that the Los Angeles Gas & Electric Corp. and the Southern California Gas company, distributors of mixed gas, artificial and natural combined, could reduce the heat units in their gas from 815 to 760 B. T. U.'s. This order, according to District Superintendent Hayden, of the local gas office, affected only these two companies and not in any way reduced the heating value of the gas distributed locally by the Southern Counties Gas company.

The gas distributed in this city and district is a straight natural product, being transmitted by the Southern Counties Gas company to this district through its own transmission lines. The heating value of Southern Counties gas served in this district averages 1050 B. T. U.'s.

The heating value of this gas indicates that the local consumers of the Southern Counties gas company, together with the consumers on the Ventura county system of the Southern Counties Gas company, receive a gas which has no superior in the state. The consumers of the Southern Calif. Gas Co. in San Bernardino and Riverside are served with the same gas as the Pomona consumers, the reason for this being that the Southern Counties wholesales natural gas to the Southern California Gas company east of Ontario in San Bernardino county.

The sources of supply for the consumers of Southern Counties natural gas are the Montebello, Coyote Hills, Brea Canyon and Placentia oil fields.

MAKING AND SPENDING

By Meredith Nicholson.

To spend all we earn is to prove imprudent; to spend more than we earn is to invite disaster. The only sound rule is to preserve a safe margin between a prosperous today and an uncertain tomorrow.

There is constant and widespread complaint of the extravagance of the American people. Far too many of us think it a shameful thing to be thought economical and thrifty. The keeping-up of appearances is a practice of direct folly. Better to be thought "close" and have a savings account than to be identified with the free spenders who are blind to the needs of tomorrow.

Much has been said and written about the conservation of the national wealth, but it is incumbent upon all of us to stop waste in our personal affairs. We must free ourselves of the fallacy that economy is a synonym for stinginess.

It is true but right that a dollar saved is a dollar earned.

I have watched with interest the long lines of depositors pressing toward the receiving window of a trust company on a Saturday night. These men, women and children are establishing for themselves a shelter against the coming of the inevitable rainy day. We may fairly gauge the rood Americanism of a town from the total of its savings accounts, the number of its life insurance policy-holders, and the percentage of homes owned by its citizens.

Getting and spending, we lay waste our powers; Little we see in nature that is ours;

Such was the plaint of Wordsworth a hundred years ago, and it is frequently reiterated by critics of American life. The fine old simplicity of our fathers are in danger in these times of high pressure and high prices.

Get the saving habit! Scan your dollar carefully before you spend it. Every penny saved adds to your ease of mind and self-respect and contributes to the strength and security of America.

Anahelm is a city of savers. There is a savings account for every two people in Anahelm. Over two thousand and bank at the Anahelm National bank, one of the largest reservoirs of capital in Orange county.

EVAPORATOR DEMONSTRATION

The Farm Bureau in its effort to serve all members of the farm, has scheduled three meetings of special interest to the housewife, not only of the farm, but also the city. The demonstration concerns the preparation of fruits and vegetables in the home for home evaporation. A very simple method will be shown by Miss Lillian Clark, specialist from the

college of agriculture. Her work has been in great demand in every Farm Bureau county of the state. It will prove of great value to the ladies of Orange county.

She is bringing an evaporator to demonstrate with, one that can be made at very low cost on the farm. Fruits, vegetables and meats will be prepared and dried at the demonstrations.

The first demonstration will be at the Garden Grove theatre on Tuesday, April 26th, 10 a. m. to 4 p. m.

An evening lecture will be given at the West Orange Farm Center, at Jas. Smiley's home on North Flower street, near West Orange depot.

The second demonstration, at Dr. J. R. Schofield's ranch, 1-2 mile south of Buena Park on the boulevard, Wednesday, April 27th, 10 a. m. to 4 p. m.

These meetings will be open all day in order that the finished product may be seen after evaporating.

A NERVOUS YOUTH

Orville H. Clyde, 19-year-old work or residing at 1109 Orange avenue, Huntington Beach, is being lionized by his friends following an exhibition of heroism Sunday night that resulted probably in the saving of the lives of five persons.

He jeopardized his own life to save those of others. His heroism came in a remarkable display of nerve and presence of mind when he stopped his automobile on the tracks of the Newport Beach Pacific Electric line and permitted an electric car to hit it, rather than pull a car he was towing, and in which there were five persons into the path of the speeding car.

In the car being towed were Mr. and Mrs. Lee Judson and little daughter and Mr. and Mrs. M. E. Crowder.

The accident occurred at the Colorado street crossing, Long Beach, of the Newport-Huntington Beach line. Clyde, slowed up before starting across the tracks and not seeing any cars in sight pulled upon the track, only to see that limited car bearing down on him. The car was in charge of Motor-man R. Helander and Conductor L. E. Goodman.

Realizing that he could not get the towed car clear of the track, he shifted into low gear, pulled ahead just far enough to leave the car in the clear and with the intention of jumping from it was owa machine. He was too late. The electric car hit his auto before he could jump. The impact hurled his machine completely around, bursting the gasoline tank. The fuel was ignited and the automobile was soon a mass of flames.

Clyde suffered second degree burns on his hands, face, neck and scalp. He attributes the fact that he was not more seriously burned to a big mole skin overcoat which he was wearing at the time.

J. H. Clyde, father of the young hero, is manager of the Peerless Oil company, Huntington Beach.

GRAIN GROWERS' EXCURSION

El Toro, Irvine and Capistrano Fields to Be Observed on May 4th.

Grain men of Orange county are looking forward to the all-day excursion arranged by Farm Advisor Wahlberg to visit a number of grain ranches where demonstration plots have been seeded to Marquis barley, Tennessee winter barley, Bunyip wheat and other varieties new and uncommon to Orange county.

A grain specialist from the College of Agriculture will accompany the growers on this trip, Wednesday, May 4, to assist in describing the different varieties and explain their adaptation to our conditions. The university has made an exhaustive study of a large number of grain varieties among which are the Marquis barley and Bunyip wheat.

A few will start from the Farm Bureau office at 8 a. m., on May 4th. The main portion of those attending, however, will meet at the El Toro store at 9 a. m. The trip will take in several fields at El Toro and Irvine and end up at Capistrano at 4 p. m.

Lunch will be provided for by the El Toro ladies at noon at the El Toro hall. Every grain grower is urged to come out and take advantage of this treat.

The board of trustees definitely construction of the new ornamental lighting system Tuesday night when, in the bust of legislative speed, they successively adopted a resolution accepting the plans and specifications for the improvement as prepared by City Engineer Dupuy; and a resolution of intention, declaring that the work shall be done, describing the zone to be so improved, fixing the limits of the assessment area for bonding purposes and providing for the various other details connected with the deal. The marquette standards are specified, bearing a double lantern, the power being designated as 400-candle for the Spadra lights and 250-candle for the others. The standards are to be eleven and one-half feet high and are to be spaced 150 feet apart in the street. The estimated cost is \$230 per foot of frontage on the streets traversed, it being specified that the city would pay twenty per cent of the total, to take care of the street intersections.

Mrs. Antoinette Earl, of Costa Mesa, was probably fatally injured and her husband, R. J. Earl, proprietor of the Earl Hotel, at 309 E. East Fourth street, Santa Ana, was badly shaken up and bruised when the automobile in which they were riding collided with a Pacific Electric car on South Main street about 6:30 Tuesday morning. The injured woman was taken to the community hospital, where it was reported that she had sustained a fractured skull, a broken right leg and fractured right hand. She was unconscious and little hope is held out for her recovery. Earl is suffering from the shock. Mr. and Mrs. Earl were making their usual morning trip into the city from their home at Costa Mesa when they met with the accident. According to Earl, who was driving, he did not see nor hear the electric car until it was upon him. He then had no chance to avoid hitting it, he says. The machine, an Overland touring car, was dragged about thirty feet by the car and thrown into the ditch, almost a complete wreck. Both Mr. and Mrs. Earl were thrown out to be impact. It is believed that her head struck the pavement.

PICNICS AT THE PARK

There will be "big doings" at Orange county park Saturday, April 30, judging from the fact that it was announced Tuesday that a big Odd Fellows' picnic is to be held there on that day. Announcement of this I. O. O. F. picnic follows that made recently that the Orange county Y. M. C. A. outing would be held on the same day. Odd Fellows and their friends from

WAR SUBSTITUTE

A Chinese merchant in Chicago sold some Japanese goods last week—and a secret society ordered him to pay the customary \$2,000 fine or get measured for a wooden kimono. He paid the fine.

This Chinese boycott against Japanese goods, with severe penalties, is going on in every Chinatown all over the world, and all through China. A few months back, San Francisco Chinese held a public bonfire of all silks and other Japanese wares in their possession.

The idea is to cripple Japan's foreign trade until she gets out of Chinese territory. There never has been a peaceful war as powerful and extensive as this boycott. There never has been, in the world's history, a punitive secret society as strongly organized as the one enforcing the boycott, with the possible exception of the Ku Klux Klan.

Te Chinese say that their peaceful war against Japan is getting the desired results, that it is only a question of time until Japan will have to pull out of Chinese territory.

Electrified Dollars

Yield Good Dividends

The Future Growth and Prosperity of Southern and Central California depend on an unlimited supply of electric power.

Southern California Edison Company has 1,000,000

Horsepower of Undeveloped Waterpower in the Sierras which will be brought in as needed.

This vast electrical system comprises at the present time \$110,000,000 of Electrical Properties operated by over 5000 Specially Trained Employees.

Why Not Invest Your Savings in This Great Organization and Share in Its Present and Future Prosperity, as Thousands of Other Investors Are Doing by Purchasing "Edison Common"?

J. R. Gallimore, of the News, is a candidate for the postmastership at Fullerton.

Dr. and Mrs. Leander Stark, of San Pedro, were visiting Mayor Stark and family last week.

Mrs. Lucy Smith, grandmother of Dr. G. W. Closson, died at Long Beach, Sunday night, at the age of 85 years.

Mrs. J. E. Stroup attended the state convocation of the Yeomen at Sacramento, as representative of the Anaheim lodge.

Mrs. Ryan and daughter, Miss Clara Ryan, came in last week from Pennsylvania and will spend some months with friends here.

The fire department answered a call Friday and found a small blaze in the vicinity of the Ruhman home on North Los Angeles street. No damage.

The Kiwanis club committeemen held a meeting at the high school on Monday evening for the purpose of discussing matters pertaining to the work.

At a party given by Miss Frances Schumacher Wednesday night, announcement was made of her engagement to Fred Scott. The wedding will take place in June.

Earl Nott, organizer for the Ellison-White Chautauqua company, was in the city Friday conferring with the committee in charge of the entertainment which opens here on May 7.

Mrs. Louise Walto died at her home in Santa Ana Saturday at the age of 78. Mrs. Walto has been a resident of California 70 years. Her father came around the Horn in 49, and the family followed shortly after.

Mr. and Mrs. John Hartung, who are spending the summer at Venice, drove up and spent a day this week with their son Edgar, and family. Mr. and Mrs. Hartung expect to build a two residence in Anaheim some time in the future, and again make this city their home.

The proposal to disincorporate the city of Stanton was defeated by a large majority at the polls Tuesday. The vote for disincorporation was 83, and against, 125. On May 20 a recall election will be held, in which an effort will be made to oust three trustees and the city clerk.

Mrs. Edgar Hartung entertained the Ladies' Euchre club at her home on Sunkist avenue Wednesday afternoon. Miss Anna Ryan proved to be the champion euchre player while Mrs. F. A. Backs, Jr., was second best. The consolation prize was given to Miss Doris Zeyn. The hostess served a delicious luncheon after the games.

Jerome Greenberg, manager of the Cut Rate store in the Kistler building, was married Sunday to Miss Mary Friedman, of Los Angeles. The wedding was solemnized in the synagogue at Temple and Olive streets, Rabbi Levi officiating. Two hundred friends of the parties witnessed the ceremony. The young couple are enjoying a honeymoon in the Yosemite before beginning house keeping in this city.

Frank Davis, C. C. Davis and family and Nathan Davis and family have been enjoying a visit from friends from the east and north. They are Mrs. Cora Davis, her son, Arthur Davis, and family, and Mrs. Leonard, of Cleveland, Ohio, and Mr. and Mrs. E. B. Batchelor, of Seattle. Sunday the three Davis families and their visitors with Mr. and Mrs. F. H. Leonard and Mrs. Leonard's mother, went down to the ocean and spent the day on the sands.

Office rooms to rent in this city appear to be as scarce as vacant houses and residences. Undeterred by his failure to find a room an enterprising gentleman has opened a real estate office in a Ford sedan on East Center street. He is rather cramped for quarters, but he has one advantage over all other office renters—if he doesn't like his neighbors he can pull the throttle, step on the accelerator, vanish from where he is and appear in some other locality without disturbing his office fixtures.

Test plots to determine the value of the use of sulphur and gypsum as fertilizers for alfalfa were established Thursday by County Farm Advisor H. A. Wallberg on the W. L. Wakeland ranch, Greenville. Alfalfa growers throughout the county will be greatly interested in the outcome of the tests. Sulphur will be used on one acre, and gypsum on another. A gypsum demonstration plot was also established in the citrus grove of B. L. Chandler at the corner of Ball and Garden Grove roads, near Anaheim, to determine the fertilizer value of this material on citrus fruits.

J. W. Duckworth has sold his residence on North Los Angeles street to Nick Hugo.

Billy Knott, of the Stroup meat market, has been off duty for several days past on account of illness.

Wayne Amack will shortly begin the erection of a bungalow court on North Olive street, which will contain fourteen apartments.

Santa Ana capitalists are preparing to build a theatre at a cost of \$150,000. The county seat is making heroic efforts to keep pace with Anaheim.

Emil Tittman is preparing to open a shoe hospital in the Bushard building on East Center street. Mr. Tittman arrived here ten months ago from Switzerland.

A wrestling match is staged for Pressell's hall tonight. Strangler Nelson, the pride of Anaheim, will perform on the mat with Chief Orango of Ventura. There will be some preliminary bouts but this will be the main event.

Twenty-five handsome shorthorn Durham bulls have been turned loose on Jerome O'Neill's cattle ranges in the southern part of the county. The animals were bought last week on the Dibble ranch Santa Barbara. The bulls were brought from Santa Barbara by William Magee, of San Juan Capistrano. The animals are 16 months old.

A bicycle race in an ordinary store room is something new here, but Saturday there will be a race in Pete Wiser's sporting goods house, and every boy in town is invited to enter. Boys are invited to call at the store and register. Pete furnishes the bike, and allows each contestant ten minutes time. Some splendid prizes will be given.

Clyde Potter, advertising manager, and Mr. Lewis, traveling auditor of the Southern Counties Gas Co. were making a tour of the county Monday visiting the company's various offices, and Mr. Potter, naturally, drifted into the newspaper shops. He informed us that his company's business here has increased 45 per cent during the past year. This is a certain indication of the rapid growth of Anaheim.

The body of E. E. Denny was found late Saturday afternoon in Newport bay. Denny drowned Friday night when he fell into the channel while attempting to step from a dredger to a tug. He had taken a crew of men to the dredger for a shift. He lost his life after unloading the workmen. He was 28 years of age and had been married a year. He was a son-in-law of Joseph Provost, of Santa Ana. He was in overseas service and was engaged in his occupation at the suggestion of a physician.

In a terrific but bloodless battle on the Fullerton diamond Sunday afternoon, the Anaheim Elk team triumphed over the Santa Ana aggregation to the tune of 10 to 5. Both teams hit heavily and errors also figured in the final count. In the neighborhood of 350 viewing fans witnessed the game. Pitcher Logo went the full route for Santa Ana, but Anaheim used two pitchers, Hughes relieving Salverson. Logo held Anaheim to eleven hits and the Santa Ana team also annexed the same number of digits. Santa Ana was charged with four errors, while three mishaps were counted against Anaheim.

The trial of Gottlieb Meger, charged with criminal conduct toward his eighteen-year-old grand-daughter, Elsie Semrau, which has been occupying the time of Judge Williams' court for several days, was brought to a halt Tuesday by the serious illness of the aged man. The case is a sensational one and is being stubbornly fought on both sides. Rev. Max Luescher, of this city, testified that Meger had confessed to him that he had slain against his grand-daughter, but Earl Rogers, attorney for Meger, is endeavoring to prove that the charge was concocted by Miss Semrau's father in order to extort money from the old man.

The first poster for the California Valencia orange show was received here Saturday and placed on exhibition in Wm. Falkenstein's department store window, where it is attracting great deal of attention. The first distribution of these posters is being made through the Southern Pacific company, A. T. & S. F., and the Salt Lake route, and every one of their western ticket offices and stations will have one of these very attractive advertisements on display. Posters for local display may be had during the early part of this week, according to Tom Wilkinson, who is in charge of the publicity committee of the California Valencia orange show. Paul Hansen, who is in charge of the selling of industrial space, has disposed of fifteen space units in Los Angeles last week.

AT

FALKENSTEIN'S

Mrs. Frank Machlieb, Mrs. George Tedrick and Miss Ella Machlieb visited Los Angeles Monday.

L. B. Weber and his sister, Mrs. Costello, are at Lake Elsinore, where they will spend a couple of weeks.

W. E. Duckworth has sold his feed store to P. Pouplier, of Los Angeles, lately a resident of Canada. The new proprietor took charge Monday.

Mrs. P. Krause, of China, was in town Monday visiting friends. Mrs. Krause was a resident of Anaheim one time, but for more than a quarter of a century has lived at China.

N. F. Steadman, Dick Fischle, Fred Minyard and George Lazzaroni went over to Victor valley Saturday to visit the Steadman ranch and gather a few rabbits. They returned Tuesday.

In the southern California high school track meet held at Los Angeles Saturday, Harold Shoberg, won first in the pole vault, annexing five points for the Anaheim school. All the high schools in the southern end of the state participated.

Representatives of the Great Angus Oil company met with about twenty ranchers of the Anaheim district in this city Friday night. The oil men are seeking to lease 200 acres of land for drilling purposes. The 200 acres includes the well-known Johnson-House tract. It is situated on the Garden Grove road about one and a half miles out of Anaheim.

J. M. Alcorn, of the department of agriculture of the Fullerton high school is budding twenty different varieties of citrus trees this spring for experimental purposes. His success in the malaga and emperor grape vine culture is attracting much attention. He is also experimenting with a type of red apricots, but the most important feature of his work this year on his experimental farm, one mile out on East Commonwealth, is the grafting of Japanese persimmons on 7000 Manchurian stock of yearling trees.

Marking it was declared the first time that an entire carload of citrus fruits had been shipped from the Pacific coast to Halifax, Nova Scotia, L. M. Banks, of Santa Ana, has forwarded to that point a carload of Orange county Valencia, he announced Saturday. The fruit will be transferred at Halifax to a ship aboard which it will proceed to St. Johns, Newfoundland. Heretofore, it was stated, citrus fruits have arrived at Halifax only in less than carload lots. The fruit has been specially packed in order to stand the rough usage to which it is expected to be subjected on being transferred to the ship. The Valencias were packed at Orange.

NOTICE.

To the new comers in Anaheim or vicinity who are in need of lower set of teeth: I guarantee to fit any gum, upper or lower, at \$15.00 a set. If you are satisfied, if not I will keep them and they cost you nothing.

MAN CONFESSES TO NUMEROUS BURGLARIES

Professional Thief Was Extremely Active in This Region.

Grilled for more than two hours by Sheriff C. E. Jackson, and his deputies, Melville Bowles, arrested last Saturday night in Los Angeles on a charge of stealing an automobile belonging to State Senator Walter Eden, confessed, according to Sheriff Jackson, to numerous burglaries in this vicinity and points north.

Bowles also told, according to Jackson, of a flying trip made by himself and Clarence Noyes, his alleged co-partner in crime, from San Francisco to Olive, near Orange, for the sole purpose of stealing some cyanide and ammonia from a fumigator at Olive. They made the trip from the bay city to Olive in 10 hours, according to Bowles.

The pair desired the cyanide and ammonia, according to Bowles's alleged confession, for the purpose of subduing and robbing a "gambling joint" near Sacramento, where the stakes are said to be high. Bowles said that he and Noyes got "cold feet" and decided not to rob the gamblers after returning to Sacramento. Noyes is now under arrest in the capital city on a charge of robbing a tailor shop.

Bowles is said to have confessed to stealing two guns and a watch from William Rockefeller, a resident of East Seventeenth street, Santa Ana. He says he sold one of the guns in Pasadena and the other to a Santa Ana second hand dealer.

According to Jackson, Bowles also told of robbing a house on Tustin avenue of \$250 cash and of robbing another home on Seventeenth street of two gold watches. This house, according to Bowles, was occupied by a man named Noyes or Noyes. Bowles is said to have confessed to a burglary at Turlock the latter part of last February. From this place, he said, he secured a rifle, a revolver, an electric iron and a vacuum cleaner.

After the Turlock "job" Bowles and Noyes, according to the confession of the former, tried to rob a shoe store at Stockton. He said they drove an automobile into an alleyway back of the store and had brought 500 pairs of shoes when they were frightened off by officers. They left the shoes behind and succeeded in getting away.

Other "jobs" Bowles is said to have been "worked" at Placentia and Buena Park were related by Bowles in the alleged confession.

Valuable confidential information also was given to Sheriff Jackson by Bowles.

VALLEY CALMS THE CHAMPIONSHIP

Imperial Farm Production Is Largest, Say Papers

The United States Census Bureau's figures, which gave Los Angeles county the leadership of the entire country in the value of the crop yields in 1920, appear to have overlooked the Imperial valley, according to articles published in the Imperial Enterprise and the Brawley News.

"For some reason Imperial valley has been ignored entirely in the published statements. As a matter of fact, Imperial county is the greatest farm producing county in the United States, and the 1920 crop production exceeds by \$12,000,000 that of Los Angeles county, which the papers in that city claimed to be the largest," the valley papers declare.

The United States Census Bureau's estimate of the crop production in Los Angeles county was placed at \$62,212,000.

"Conservative estimates on the production of Imperial valley for 1920 place the figures at \$75,000,000," the articles say. "These figures are based on prices in effect then, just as the figures of the other counties were presumed to be." The articles continue to say that the claim of Los Angeles county cannot be entirely correct. If the Imperial county estimates are to be considered:

The census reports showed that six counties in California produced a volume of farm products last year that is greater than the combined production of any other six counties in the United States. These six counties, as enumerated in the report, are as follows:

Los Angeles, \$62,212,000; San Joaquin, \$39,748,000; Tulare, \$33,238,000; San Bernardino, \$26,681,000; Santa Clara, \$23,679,000; and Orange county, \$22,736,000.

COUNTY TAXES

Become delinquent on Monday, April 26. Remittances should be mailed in time to reach this office before that date. Those who pay at the office should do so, if possible, before the last day to avoid the discount of standing in line. All remittances whether checks or cash should be accompanied by tax bill or description of property.

J. C. LAMB,
Tax Collector.

MERRY WAR RAGING IN CIRCUS CIRCLES

Barnes' Animals and Howes' Girls are Fighting to Control Territory

Howe's Great London circus and Van Amburg's trained wild animals played in Anaheim and Santa Ana, and Al G. Barnes' wild animal show, a week or so earlier, also played at Anaheim because—

The elephants, the trained seals and the Nubian lions have gone to war with the bareback riders, the beauties of the flying trapeze and the girls of the tinselled ballet.

The whole Pacific coast is the battleground and the prize. Not that the lions are planning to dine upon any of their adversaries or anything like that—but there is war in progress between the wild animal show and the real, old time circus, according to the stories told among the show people and those who follow the big tops and the saw-dust rings.

Victory, it is generally agreed, depends on two elements—whether the public prefers a well trained lion to a sick encephalitis and whether the press agent and the advance man can move faster ahead of a Bengal tiger or a girl who can hang by her toes.

If the press agent and the advance man of the animal show can grab the space and the choice bookings and leave the circus to starve, the lion to a competitor, half the battle will be won and vice versa. The remainder will rest with the public, "It is said.

The generals directing the struggle are Al G. Barnes of the wild animal show fame on one side and Jerry McGovern, who bought the Sells-Floto, the Howes-London, the "Yankee" Robinson and the Hagenback-Wallace shows, according to the stories which are going the rounds. Barnes for years has been king of the territory west of the Rockies.

When the spring season arrived this year, Barnes is said to have found his "leadership" challenged. The Howes-London show, appeared on the scene and from the start began dogging the path of the Barnes show.

The first move was made when Barnes changed his schedule and jumped back from Southern California to Arizona to head off the invasion of that state by his competitor. Howes-London moved next and dashed into the San Joaquin valley, with Barnes jumping, too. Now they are both moving into northern California.

With the first show of battle the press agents and advance men rushed forward and they are now said to be fighting a quiet but determined battle through the northwest, the Dakotas, Montana, Wyoming—offering big prices for choice of circus lots, securing licenses and trying to outguess each other.

It has resolved into the biggest circus war show people say, since the days when P. T. Barnum and the Ringling Brothers first locked horns.

BEAN RATE CLASH INTERESTS GROWERS

Orange county bean growers are deeply interested in the announcement that the Lima Bean Growers' association had been successful in its efforts to secure a lower freight rate on beans shipped by water. Steamer shipments from Pacific coast terminals to Gulf and Atlantic coast ports have been reduced from 70 cents to 55 cents a hundred pounds, according to announcement direct from the association to The Gazette.

The rate concession was made at a conference of steamship agents held in San Francisco, with R. L. Churchill, manager for the Lima Bean Growers' association, presenting detailed facts as to why the rate should be a reduction. The rate is effective at once and while made operative only until August 1, 1921, it is believed the rate, before that date will be made permanent.

It is believed the new schedule will be of considerable assistance in helping to create a free movement of beans from California, benefitting the growers of all kinds of beans, produced in this state.

The rail rate on beans from coast to coast is \$1.25-1-2. It is pointed out that adding 20 cents from coast to inland points, the water rate will still be 40 cents above the rail rate.

Churchill is quoted as follows as to the water rate reduction: "We believe that this reduction in shipping rates will stimulate increased sale and movement of beans of all kinds from California. This is a time when concessions must be made by everybody, and we feel that the action of the steamship companies in reducing the rate will be a very helpful factor in bringing living conditions back to normal. Both distributors and consumers will benefit by it, and it is to be expected that a lower price on beans will result."

Churchill is quoted as saying there are now approximately 1,250,000 bags of beans in southern California ready to be shipped immediately, this figure representing half of the 1920 crop which has not yet been moved.

THE MAN OF MYSTERY

Orange county's hermit and mystery man of the hills imbued with the strength of a giant, who refused to talk or give intelligible answers to questions addressed to him when he appeared before Justice of the Peace Cox April 1 for preliminary examination on a charge of vagrancy, was given another chance to reveal his history to Orange county authorities.

For sixteen days the hermit, known only as Mike Jackson, which he denies is his name, has been held within the close confines of the Orange county jail.

Will this close confinement break the silence of the man who is supposed to have lived most of his life in the hills and mountains? Orange county authorities are doubtful. Since Jackson was sent to the county jail his actions have been closely watched with a view of determining whether or not he is sane.

It is possible that a lunacy complaint may be filed against him and a closer examination made as to his sanity. When Jackson first appeared before Cox he refused to answer questions or furnish any information about himself. He gave his name as "Devil," denying that Jackson was his name.

The mystery man was arrested early in March after a hand-to-hand struggle with Sheriff C. E. Jackson and a posse of city police officers near El Modena. It was only after a mass attack on the man that he was overcome and that the handcuffs were placed on his wrists.

The hermit fought with the strength of a giant and by swinging a pronged compass about him as though it were a light stick he endangered the lives of those who sought to overpower him.

The alleged theft of a coat from a rancher at Orange led to the hermit's arrest. He was seen to leave a barn with the coat on his arm, it is said.

He fought off those who followed him by hurling stones at them. A mob formed but Jackson held the crowd at bay until Sheriff Jackson and Under Sheriff E. E. French arrived on the scene. Mass tactics were then used to capture the hermit.

Jackman made his home for several years on the Iron Horse. The source of his livelihood was a mystery, as he had only a small garden near his hut. He was scantily clad when arrested.

During his confinement at the county jail he has maintained the silent demeanor which he followed while he was at large for examination. He shuns the other inmates of the county jail and his history is as much a secret today as it was the day he was arrested.

Judge Cox and other authorities believe that confinement is the only cure for the man's strange and evil mind.

It is asserted, if the hermit is sane and has a story to tell they believe that sixteen days in the county jail will serve to unseal his lips.

THE PROPER CURE

Information of Priceless Value to Every Anaheim Citizen.

How to act in an emergency is knowledge of inestimable worth, and this is particularly true of the diseases and ill of the human body. If you suffer with kidney backache, urinary disorders, or any form of kidney trouble, the advice contained in the following statement should add a valuable asset to your store of knowledge. What could be more convincing proof of the efficiency of Doan's Kidney Pills than the statement of an Anaheim citizen who used them, and who publicly tells of the benefit derived?

"Mrs. H. L. Burns, 610 S. Helena St. says: 'I suffered long with kidney and bladder trouble. I became run down and had a lump and aching back that kept me miserable. Inflammation of my kidneys acted irregularly. I read of Doan's Kidney Pills and used them as directed. Doan's helped me wonderfully, removing the backache and relieving all signs of kidney trouble.'"

Price 60c at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Burns had. Foster-Milburn Co., Mrs. Buffalo, N. Y.

CALIFORNIA HIGHWAY COMMISSION

Experiments of interest and importance to road builders in every state of the union are to be conducted in California under an arrangement which has just been entered into between the California highway commission and the United States bureau of public roads.

The details of the arrangement was announced by B. P. Fletcher, chief engineer of the California highway commission, following his return from a conference in Washington with Thos. H. MacDonald, chief of the bureau of

public roads.

Following an intensive investigation by the United States bureau of public roads of soils which have given particular difficulty to road builders, it has been discovered that the difficulty with these soils, such as adobes and clays, generally lay in the presence in these soils of colloidal matter, a glue like substance capable of extraordinary absorption and retention of water. Colloids have been extracted from these soils, and the result has been that the soil has been left inert and deprived of its quality of absorption.

Experiments show that the colloids found in these soils are capable of absorbing and retaining water up to several hundred times the volume of the colloids.

The result of the discovery of colloids in these soils has been to change the trend of thought in highway construction.

In view of the difficulty that highway engineers have found in building roads over these soils has been due to the large contraction of the sub-grade, resulting in longitudinal and other cracks in the surface slab. The attempt heretofore has been to overcome this by increasing the thickness of the surface slab.

The effort now is to be made to overcome this tendency to large expansion and contraction by neutralizing the colloidal properties of the soil and rendering the subgrade a suitable base upon which to build the concrete slab. Discussing this phase of the matter, Mr. MacDonald in a letter to the California highway commission, has outlined the policy of the United States bureau of good roads relative to approval for federal aid allotments as follows:

"The report of the California study made by this bureau is in your hands and you will note that the accent is all placed upon the kind of subgrade under the roads and this we hold to be the most important consideration in the building of future highways in your state. It is the hope of the bureau in co-operation with the state highway department to carry on certain experimental and research studies over those soils which have proven to be poor foundations. We believe that such studies will point the way to the construction which will prove adequate. There should be no contention as to minor differences in the details of design for surface construction. Minor changes in the specifications for road surfacing will not insure their future integrity. We feel that the big problem is to stabilize conditions under the surface and this is the line of research that we feel can be most profitably carried out between your department and the bureau and that these studies and experimental construction should proceed at once."

In connection with the statement of

IN THE SUPERIOR COURT OF THE STATE OF CALIFORNIA, IN AND FOR THE COUNTY OF ORANGE.

ORDER TO SHOW CAUSE.

In the Matter of the Estate and Guardianship of JOSEPHINE ROMERO, Insane.

Upon reading and filing the Petition of Marie A. Hurtado, the guardian of the person and estate of Josephine Romero, Insane, praying for an order authorizing and permitting said petitioner as such guardian to lease certain real property belonging to said estate and which is hereinafter more particularly described, and good cause appearing therefor it is ordered that said Petition be and the same is hereby set for hearing in Department One of said Superior Court, in the courtroom at said Department One, in the Courtroom in the City of Santa Ana, County of Orange, State of California, on Friday, the 22nd day of April, 1921, at the hour of 10 o'clock in the forenoon of said day.

And it is further ordered that all persons interested in the said estate be and they are hereby required to appear before said court in Department One thereof at the time aforesaid then and there to show cause if any they have why the real property belonging to said estate and which is hereinafter described should not be leased for the period of three years beginning on the 1st day of May, 1921, and ending on the 1st day of May, 1924, at a rental of Five (\$5.00) Dollars per month as set forth in said petition. Reference being hereby made to said Petition for further particulars.

Said real property herein referred to is situated, lying and being in the City of Anaheim, County of Orange, State of California, and is described as follows, to wit:—Lot Thirty-two (32) in the Langerberger Trust, as per map of said Tract recorded in Book 1, at page 551, Miscellaneous Records of Los Angeles County, California.

Dated this 1st day of April, 1921.

Z. B. WEST
Judge of the Superior Court.

the experiments to be conducted in treating adverse subgrade soils, announcement has also been made by the United States bureau of public roads that a regional office is to be established in San Francisco, having jurisdiction over eleven states and which will exercise a large degree of authority. This office will probably be in charge of Dr. Howes, who conducted the study of California highways for the United States bureau of public roads.

VINE NEARS CENTURY AND A HALF MARK

The touch of spring has once more stirred the sap in the old grapevine of San Gabriel. The mammoth stem and giant twisting branches have stretched yet a little farther out into the sunshine, and tiny leaves like emeralds, and soft curling tendrils have appeared again along the rough surface of this veteran vine, whose history ranks with the oldest pioneer tales of California.

For, be it known, this is the one hundred and forty-sixth time that the grapevine of San Gabriel has put out leaves under the gentle touch of the California sun. It is the mother of all the vineyards in the state, and was brought from Spain along with other treasures when the padres came to the new land. It was planted in 1775 within the walls of the mission at San Gabriel, which in time came to be known the whole length of El Camino Real as the queen of the missions. San Gabriel it was planted the first vineyard and the first orange trees, and owned the richest ecclesiastical silver in the province.

And the old mother vine multiplied and replenished the earth, and the fruit of her vines flowed to the far corners of the world and brought fame and fortune to the land of her adoption, and now again she is putting forth new leaves, as tender and fresh and beautiful as those the padres watched nearly a century and a half ago.

In the beginning it stood in the garden of the mission, and stretched its protecting branches over a quaint little adobe house. It is one of the few original oodles still in existence, and stands today very much as it did in those far-away days when it was the center of stirring romance. The property has recently been acquired by the "Mission Play" and the little adobe and the giant grapevine will be near the entrance of the new mission playhouse at San Gabriel, and under its gnarled and picturesque branches, the famous South American bands will play during the open-air concerts, which will be a feature of the summer program at the new house.

E. K. Hoak, manager of the "Mission Play," has conferred with the state agriculturist, and the vine is regularly inspected. As far as is known, it is the oldest grapevine in existence, certainly the oldest grapevine in California, and the state has recognized its value, as a relic of great historical interest and is treating it with expert scientific skill in the expectation of having it reach its two hundredth

Fordson TRADE MARK TRACTOR

The Fordson way of farming is easier, quicker, better. It will help you to do more work per day. It will help the farmer to do all his work more quickly—not only in the field, but any and all power work on the farm. And because it will do more and better work for you, it is a money-maker.

The Fordson tractor is a product of the mechanical genius of Henry Ford; it is his idea of the universal power plant for all kinds of farms. It is a light tractor; it is easy to handle; and it gives you a steady, reliable power. It endures. Fordson service—Fordson repair parts and expert repairmen—are always handy.

We carry a stock of parts and employ mechanics who understand just how to get the best results from the Fordson.

Let us tell you about the Fordson. Made by Henry Ford & Son and sold by

NOTES ABOUT THE OIL FIELDS

Items of Interest Gleaned From Southern California's Producing Fields and Progress Made.

The National Exploration seems to have gotten away from all the earlier difficulties and is now making splendid progress on the Olinde and Chino wells. Olinde No. 1 shows 1560 feet of hole and Chino No. 1 is 1300 feet.

For the past ten days the Harrington-Dumas No. 1 has been flowing by heads. The well is to be packed off and tubed in the hope of making it flow more uniformly. It is expected to settle down to a steady production of 400 barrels.

On account of what appears to be a small leak the Ridge Oil company took no chances and has recomenced its No. 1 well at 2899 feet. Oil sands of a most encouraging kind were drilled into before the well was originally cemented.

The Placencia Oil company is playing in hard luck again. On getting out of a very difficult situation that held the well back for four months a second test left a lot of drill pipe in the hole. The pipe was shot off and an effort will be made to side-track it.

Kraemer 2-3 added to Standard Oil's success by coming in a 1500-barrel well at 4208 feet. This new big well started off easily and quietly and is not expected to give any further trouble. Kraemer 2-9 will probably be the next producer, as it is showing considerable gas and oil at 4125 feet.

Vejar No. 1 is the Andersons' deep well. Now drilling at 4700 feet. Vejar No. 1 is in sandy brown shale with little hope of being a commercial producer. L. and O. No. 1 is also deep, drilling at 4600 feet in hard sandy shale. Kraemer 2-16 is a new well just started to drill.

While the Union Oil company is starting a new well in almost every section of the Richfield district the big showing for new work is being made on the Chapman property. Grades for the following new wells have been started and constructed. Nos. 14, 15, 16, 17, 18 and 19.

The Thompson No. 1 well in No. 2 is now in the oil sand at 3130 feet and is looking very encouraging. The Union's last completion, McFadden No. 2, is making a great deal of water and may have to be recomenced.

Both Coyte No. 2 and Stern No. 1 are held up by fishing jobs. Morse No. 5 will be the next producer on the Morse property and is in hard sand at 3145 feet.

Steady and consistent drilling is being done by the Gold Seal Petroleum company on the well out well in the Little Bear canyon district. The last bore from the well gives the depth as 3625 feet. A few showings were noted.

T. B. Crumpton is making a great producing property out of the Petroleum-Midway's Yarnall property. His latest success, Yarnall No. 12, brought in a few days ago, started off with an initial production of 800 barrels. Yarnall No. 4-A is still a "big well," doing better than 1200 barrels.

Yarnall No. 9 shows 1900 feet in the hard sand. No. 14 is standing recomended at 2837.

On the Krug property development is going ahead rapidly. No. 1 is to set pipe in a few days at 2800 feet; No. 2 is at 1300 feet drilling; No. 3 is up and is about to start drilling; No. 4 is building rig, and the lumber is on the ground for No. 5.

Richfield-Yorba is standing cemented at 3040 feet. An attempt is being made to put Steiner No. 1 on the pump, the water has been shut off but sand seems to be a good deal.

With 74 rigs, 40 of which are drilling and fully dozen completed wells, Huntington Beach has in prospect numerous interesting events for the oil investor. During the week several new rigs were completed, among them being the new rig for Standard A-10, Standard B-4, Peerless Petroleum, Paramount and the Eden. The two latter named companies have their labor on the ground and have their ladders at work erecting the rigs.

Drillers and operators are at present interested in watching the Hurst well, which is doing considerably better than when it was brought in several days ago. It is now flowing between 1000 and 1200 barrels, 50 per cent oil and 50 per cent water. One of the remarkable features in connection with it is the 300 to 400 pounds of gas pressure at the casing head. There is every indication that this

will eventually clear up and become a normal producer of 1000 or more barrels a day. The well is well cemented, at first there was some disappointment over the results, but present evidence is that there is a real oil well here.

The Huntington Central is waiting for findings and reports that it has perforated casing set for 7 feet in the sand. An attempt to permit the well to drill itself in has so far met with little encouragement, but operators are distinctly optimistic.

When the Amalgamated's Huntington No. 2 came in it flowed about 600 barrels. The well has not held up to anything like this and now preparations are being made to swab the hole. In order to do this properly the rig is being closed in, boarded up solid.

Huntington No. 1-A is at 1300 feet. Fowler No. 1 is drilling at 3050 and lumber is on the ground for No. 3 Huntington.

The Beach Oil company is the new concern of the week to make its appearance at Huntington Beach. The company has acquired property north of the Vista Del Mar No. 2 and has the lumber on the ground.

The Moser Special, now drilling at 2895 feet, is jockeying along a bit and is waiting on the findings of the Petroleum-Midway on the Columbia property just across the road.

The Milroy-Kock Oil company is balling out mud and water at No. 2 and will know in a few days the water condition. Work on No. 1 is to be resumed soon.

The State Consolidated's No. 1 came in Saturday and flowed nicely for a few hours and then quit. The rods and tubing are now being put in and the well will be put on the pump. Not over a couple hundred barrels can be expected from the showing the well has made.

In addition to the five wells the Petroleum-Midway has drilling this company has added another by locating and starting a well on the Bray property. The Petroleum-Midway's Columbia 1-1 is now at 3100 feet and is showing some oil. Columbia 2-1 has the lumber on the ground, and Columbia 3-1 is drilling by at 2875 feet.

Ray Walker No. 1 is being cemented for third time, at 2241 feet. Vollmer-Meyer No. 1 is standing cemented.

SUPREME COURT TAKES A HAND

A decision of the federal courts holding that the postmaster general has no authority to exclude a publication permanently from the mails, because one issue of it contained objectionable matter, together with a suit for damages that has now been brought against the former postmaster general by the injured publisher, serves to emphasize the effectiveness of the new provision of governing power by departments or bureaus.

Almost coincident with this decision and the filing of the damage suit, came the admission by attorneys of the Wilson administration that they collected under erroneous view of some taxes that aggregate about one million dollars, and possibly many times that amount. These taxes collected unlawfully by a Democratic administration must be repaid under a Republican administration. Taxpayers will receive some measure of recompense them for the injury they have suffered. The government will refund only the actual cash collected; the taxpayer is out the amount he could have earned if he had kept the money in his business. The supreme court recently upheld the internal revenue bureau in some of its rulings, but attorneys admitted they were not entitled to a decision in the matter to which reference has just been made.

The issue in the newspaper case is of far more importance than that of the income tax case, for the preservation of the right of free speech to the people takes the loss of a few millions to be no individuals. There seems to be no question that the offending newspaper had published material which was in violation of the postal laws. It may be assumed that there was violation of the postal laws. But the postmaster general took it upon himself to exclude the publication permanently from the mails, thus practically destroying the investment it represented. Such a power should

not be lodged in the hands of the postmaster general, or of any other official to impose a penalty so severe. It is a fundamental principle of American government that a man shall have a right to trial by a jury of his peers. Such a right was not observed in the proceedings conducted by the postmaster general.

There, of course, some minor instances where trial by jury may not be practicable or desirable, but in the main the only safe course for a free people to pursue is to guard zealously the right of trial by jury as one of the guarantees of freedom from oppression.

Principles set forth in the Republican platform and in the speeches of the Republican candidates indicate an intention to abandon the policy of usurpation of power by departments and bureaus.

ANTI-JAP MOVEMENT STARTED IN THE WEST

States Having Alien Land Laws to Form Co-operative Policy

Victor H. McClellan, of Tempe, Arizona, to take the California delegation to the inside of the California anti-Japanese land campaign, and, as a result, it is expected that a joint conference of senators and congressmen from the states which have passed, or now have anti-alien land laws, will be held within a few days to formulate a policy of co-operation and the placing of a memorial before the state department asking that no federal action be taken which will in any way diminish or neutralize the attitude of the various states as to alien land holdings.

ORANGE COUNTY BUSINESS COLLEGE

Santa Ana, California

Enrollments now active for our fall term. We can train you in a few months for our graduates in a month. The demand for our graduates was never so great. Salaries were never so high. We cannot fill half the positions placed at our disposal. We must have more students this year to fill the wheels of business movement. We have our 1921 catalogue. J. W. McCormack, President.

IN THE SUPERIOR COURT OF THE STATE OF CALIFORNIA, IN AND FOR THE COUNTY OF ORANGE.

No. 10014, Dept. No. 1. ORDER OF THE COURT ON GUARDIANSHIP OF THE ESTATE OF FRANK CHARLES F. MARTER, A Minor.

IT IS ORDERED BY THE COURT That all persons interested in the Estate and Guardianship of Frank Charles F. Marter, a Minor, do appear before the Superior Court of the County of Orange, State of California, in Department No. 1, on the 22nd day of April, 1921, at the hour of 10 o'clock a. m., to show cause, if any they have, why the real estate described below and in the Petition of Myrtle A. Holman, Guardian of said Estate, hereinafter referred to, should not be leased for the purpose of exploiting and extracting from said lands, oil, natural gas, asphaltum, or other hydro-carbon substances, for the term of twenty years, and for the rental or royalty of eleven-sixteenths (11-16) of the net amount of all such substances extracted and saved from said lands, and for the purpose of that used by the lessee in its operations, as prayed for in the Petition of Myrtle A. Holman, the Guardian of the estate of said minor this day filed; reference to which said Petition is hereby made.

For further particulars, and a copy of this order, see the published copy of the same, and that a second copy of the same be published in a newspaper of general circulation in said Orange County.

Said real estate is situated in the City of Huntington Beach, in the County of Orange, State of California, and is particularly described as follows: To-wit: An undivided one-half interest in Lot 29 and in the East one-fourth of Lot 28, and an undivided one-half interest in Lots 30 and 31, all in Block 62 of "Vista Del Mar Tract," Huntington Beach, Knoll Section, as per map as recorded in Book 4 of Miscellaneous Maps, Records of said Orange County.

Dated this 1st day of April, 1921. J. W. WEST, Judge of the Superior Court.

DELIQUENT NOTICE

Office of the Anaheim Union Water Company, Anaheim, Orange County, California.

There is delinquency on the following described stock, on account of assessments No. 87, levied on the 5th day of February, 1921, the names of the respective shareholders are as follows:

Cert. No.	Amt. Due	No. Shares	Due

And in accordance with law and order of the Board of Directors made on the 5th day of February, 1921, that so many shares of each parcel of said stock as may be necessary will be sold at the office said Union Water Co., Anaheim, Orange County, California, on the 8th day of April, 1921, at the hour of 1 o'clock p. m. of said day to pay the delinquent assessments, together with the costs of advertisement and expense of sale.

ANAHEIM UNION WATER CO. L. J. Sheridan, Secretary.

March 16, 1921

IN THE MATTER OF DRAINAGE DISTRICT IMPROVEMENT NO. 2, RESOLUTION OF INTENTION NO. 2.

RESOLVED: That it is the intention of the Board of Supervisors of the County of Orange, State of California, to proceed to improve said drainage district by the construction of a drainage ditch, to-wit:

Beginning at a point on the one-quarter section one, north of the center of said section 20; thence South along the one-quarter section line, a distance of 5740 feet to the center of said section 20; thence Southeast a distance of 2305 feet to a point 50 feet East of and 20 feet South of the center of said section 20.

The furnishing and laying of pipe line or drains in said drainage improvement District No. 2, situated in Sections 8, 9, 10, 11, 14, 15, 16, 17, 20, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

The furnishing and laying of pipe line or drains in said drainage improvement District No. 2, situated in Sections 8, 9, 10, 11, 14, 15, 16, 17, 20, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160

Lovelace Tells Farm Bureau's Ambitions

(Continued from Page 1.)

the national department of agriculture, for the year 1930, was approximately twenty-five billion of dollars, which was some seven hundred million greater than the next largest industry, yet it seems that many of the people do not recognize the magnitude or importance of this great industry.

The railroads, coal mines and various industries may go on a strike and the world moves on, but let the farmers go on a strike for a few weeks during the seeding or harvesting time and there would be no delusion on the part of the people as to what is the most important industry in the world.

Both the state and national federations have already accomplished much. President J. R. Howard, of the national federation has been working in behalf of speedy and definite relief for the agricultural credit situation. Mr. Howard and Gray Silver, the federation's Washington representative, have been before the joint committee of agriculture and banking and currency of the United States senate, and advocated measures, embodying five definite planks in the American Farm Bureau Federation's immediate relief program:

1. Regulatory power over farmers' co-operative marketing associations should be in the hands of the United States department of agriculture, rather than the federal trades commission.

2. The farmers' co-operative marketing movement must not be hindered by the provisions of the Sherman law enacted to control trusts and not with any intent to curb co-operation for the benefit of the public at large.

3. The federal reserve bank act should be amended so as to provide preferential rates for loans for production purposes, over loans for speculative purposes.

4. The warehousing act should be extended so as to serve the needs of both individual and co-operative associations, and there should be based upon it a rural credit plan which will enable the farmer individually or collectively to market his crops in an orderly fashion.

5. The federal hand bank system should be extended to provide farmers with personal credits for such purposes as buying improved seeds, livestock, machinery and equipment on the same general plan as real estate loans are now provided.

According to President Howard these planks form the basis of a platform which he hopes to see forthwith erected by congress for the benefit and encouragement of the farmers of America who are at present offered prices far below the actual cost of production. The farmers of America deem it morally wrong and very detrimental to the interests of agriculture and the consumers to permit the farmers to sell in vagrant and haphazard fashion, and the selling farm products not own at the time of sale. We need state and national laws against "short selling." We hope to soon have a complete and continuous report for the use of our members on the world-wide market conditions.

The greater part of the legislative program of the California Farm Bureau Federation has been presented to the legislature co-operatively with the agricultural legislative committee. One of the most important bills presented refers to the California warehouse act as prepared in the state federation's office. This bill makes possible, the proper inspection, bonding and licensing of warehouses and the proper regulatory measures for grain inspection and grading. The California Farm Bureau Federation has been interested largely in the following legislation:

1. Better state drainage laws.
2. State grain standards and grades for general farm crops.
3. Agricultural co-operative law.
4. State dog law.
5. Statute for creating rural fire control districts.
6. Rice investigation station. a. Bean pest control. b. Forestry conservation.
7. Better seed laws.
8. Bovine tuberculosis.
9. Alien land ownership.
10. Taking protection off cotton-kill rabbits.
11. State highway legislation. a. Burning brush and control of puncture weed. b. Leads. c. Upkeep. d. Dirt side roads on hills.
12. Predatory animal law.
13. Fuel, oil and gas as public utilities.
14. Support of University and College of Agriculture.
15. Special appropriation for agricultural extension.
16. Mutual telephone companies.
17. Alien poll tax.

Our public utilities department is now a permanent working bureau with Judge F. S. Brittain (late of the appellate court in San Francisco) as chief of this bureau. Much has already been accomplished by this department for the farmers of the state, particularly in the investigation of rate increase asked by "Big 4" electric

public utilities corporations. England owns and controls the bulk of the world's supply of coal, with an estimated supply that will last 250 years. She owns and controls over 30 per cent of California's oil supply, which, as estimated, will last only 18 years. Last year there was over 100,000 barrels of oil shipped from California to Japan and to tankers, and yet our inactive fleet under the U. S. shipping board now numbers 642 ships, and the loss by inspection will be twenty-five million dollars the first six months of this year. Prices of oil delivered to Japan cost \$1.85 per barrel and at the same time local consumers were charged \$2.35. Don't blame the local representatives, they take their orders from London.

No one can foretell what the prices of fuel—oil, gas—may be in the future and we no doubt will be compelled to become greater users of hydro-electric power, and this is one of the chief reasons why the California Farm Bureau Federation has created a permanent department of public utilities and it is gratifying to know that Judge Brittain in his recent appearance before the California railroad committee in the matter of the San Joaquin Light & Power company hearings has already gained concessions that will save the San Joaquin valley farmers about \$42,000 this year and effect the rates all over the state.

This department will early develop into a broad usefulness and handle problems such as legislation, transportation, and many other issues directly and seriously concerning the agricultural industries in the state and it will be a wonderful realization for the Farm Bureau and the industries it represents when the various group and single efforts shall be fashioned together into a forceful unity for speaking authoritatively through its legal department on matters of common economic interests.

All danger of a financial panic or business collapse has passed; business, generally is rapidly adjusting itself to new levels, but personally I can see no hopes of an immediate material reduction of taxes. Europe owes us about ten billion of dollars, but the interest due of over eight hundred million. Of this amount England owes us about \$4 billion which she can and will pay if made to do so. She has gotten in real property (Germany's colonies, cables, ships, concessions, etc.) values that are worth dollars at the moment in the war. "Charity begins at home." Ten billions of dollars can only be had by the payment of prolonged or increased taxes. Must we raise the money by taxation in America or collect what is due us abroad.

All these questions are of vital importance to the American farmer for we pay about 50 per cent of the taxes and our national federation has experts working on equalization of taxes while another bureau is making an investigation on transportation which is important for the freight bills.

We stand for better rural schools. We find there is spent annually in the cities of America an average of \$53.90 per pupil against \$18.90 in the rural schools. We are proud of our city schools and wish them to be even better, but is not the country boy or girl entitled to the best we can give them?

We stand for a just and equitable, stabilized return for our farm products. There is no overproduction, but an under consumption due to a lack of knowledge of world markets and a faulty distribution system.

We stand for modern conveniences and comforts in our rural homes. 51 per cent of the people of the United States live in the cities. We demand the middle man's profits, that are unjustly taken so that we can give our families and family a refined, pleasing environment that is their inherent right, and then, and not until then, will we see the "Back to the Farm" movement a reality in fact.

REPUBLICANS FOR BONUS TO VETERANS OF WAR

House Members Intend to Again Go to Bat for Defenders of Country Who Gave Up All

That the bill providing a bonus for the soldiers and sailors of the United States who served in the world war will be reintroduced immediately and be rushed to final passage is the expectation of Republican leaders.

This bill proposes to meet the national obligation to these veterans by presenting to them for their choice any one of four separate and distinct plans of remuneration. Briefly stated, these plans are:

1. Adjusted service pay, or \$1 per day for each day's home service and \$1.25 for each day's overseas service during the war, in excess of 60 days, in the military or naval forces of the United States between April 6, 1917, and July 1, 1919, said sum, if more than \$500, to be paid in 10 equal quarterly installments, and if less than \$500 in quarterly installments of \$50.
2. That the home service pay shall not exceed \$500 and the overseas service pay shall not exceed \$625 to any one person.
3. Adjusted service certificate plan,

which increases the adjusted pay service 40 per cent, allows 4.1-2 per cent per annum, compound interest, for 20 years, the whole amount payable upon the death of the recipient as insurance, and against which the applicant may borrow 90 per cent of the total amount due, including interest, from the third to the fifth year, inclusive, and 50 per cent due at any time between the fifth and twentieth years.

3. Vocational-training aid, which provides for the payment of \$1.75 per day for each day's service by the veteran in a course of vocational training, the total payment not to exceed 140 per cent of adjusted service pay.

4. Farm or home aid, the amount expended by the government for such assistance to be 40 per cent higher than the adjusted service pay.

Conceding the justice of this proposed duty to meet it, if it can be met without injustice to the public, conclusively follows.

What will it cost and how will that cost be distributed throughout the ensuing years under the terms of the bill?

It is not difficult to arrive at the minimum cost, the amount that would be paid by the government if, everyone in the military and naval service entitled to it should avail themselves of the provisions of the adjusted service pay plan, the maximum cost, if it simply a compound of carbon and hydrogen resulting from organic matter; but the ancient inhabitants of India knew better than the modern scientists. They believed the emerald came from heaven.

COMING DIRECT FROM HEAVEN

Peppy Belief Existing in India Concerning the Origin of the Beautiful Emerald.

Scientists say that the emerald's lively green color is derived from a compound of silicon, aluminum, beryllia, magnesia, soda, water and some organic matter unknown; others say that it is simply a compound of carbon and hydrogen resulting from organic matter; but the ancient inhabitants of India knew better than the modern scientists. They believed the emerald came from heaven.

Says Forbes in his "Oriental Memoirs": "A person was watching a meteor fall in the Indian sky one moonlight night. After hovering a time in the moonbeams, one particular fireball, more brilliant than the rest, alighted on the grass and there remained. A spectator, struck by its fiery and approaching to ascertain the cause, found not an insect, but an emerald which he appropriated and wore in a ring, and ever after the Indians believed that the fireballs were sacred insects which upon dying on the grass turned to emeralds for the adornment of man and the glorification of Buddha."

That is perhaps the reason why the price of this gem has increased so greatly with each generation. Of course no fireball can now make an emerald, but emeralds certainly do make the money.

When the Sun Was Blue.

A blue sun has been recorded only once. That was in August, 1883, in Java, says the Kansas City Star. A day or two before there was a very violent eruption of a large volcano about a hundred miles from Batavia. The eruption ended with an explosion in which a range of mountains was destroyed, a vast cavity being left in its place, more than a thousand feet deep at one point. Billions of tons of rocks, mud and dust were thrown high in the air and the sun was obscured over a large area. At Batavia the darkness became so deep that street lamps had to be lighted in the middle of the afternoon. That condition prevailed until toward sunset. Then the volcanic cloud began to clear away, leaving the sun visible. Instead, however, of it being red, as it usually is when veiled by a smoke cloud, it appeared as a magnificent deep blue disk, remaining that color until it sank below the horizon. The phenomenon was seen by everyone within 30 or 40 degrees of the equator.

Birds Hold Dances.

Many of the birds of South America have the regularly formed habit of meeting periodically in the same place for the purpose of dancing. Some sing as they dance, others accompany the refrain by something very like instrumental music. The rufous dance alone, says the Detroit Free Press. A bird of this species range themselves in a circle round level, mossy or soft ground, and one of them, bright with orange and scarlet plumage, leaves the circle and advances to the center of the space with the dignity of a courtier dancing a minuet. His wings spread and tail like a fan, he begins to dance, gradually increasing the speed of his gyrations until he terminates his performance by leaping and whirling.

Humanity in Art.

Pictures must not be too picturesque. Nothing astonishes men so much as common sense and plain dealing. All great actions have been simple and all great pictures are. The Transfiguration by Raphael is an eminent example of this peculiar merit. A calm, benignant beauty shines over all this picture, and gives directly to the heart. It is usually said to call you by name. The sweet, sublime face of Jesus is beyond praise; yet how it disappoints all fond expectations. This familiar, simple, home-speaking countenance is it if one should meet a friend—Emerson.

FEW OWE FAILURE TO FATE

Man Who Has "Lost Out" Generally Unjust in Blaming the Fact on Circumstances.

"He who is bitter is bent. This is a distillation from a life," said a wise observer of his kind, a writer in Philadelphia's *Record* remarks.

Often one meets the man who has become soured by his own life through his own fault—though he blames it all on the chances and circumstances of destiny.

He will not admit that the hand of a bad habit dragged him down or kept him from rising; that he made a misstep or took the wrong turn of the road.

He prefers to charge impersonal fate with his personal failure.

But he had the same right to struggle and win that we all have. The man whom he regards with envy had to prove that the stuff was in him, against odds.

The old proverb says that fortune favors the brave—but that saying really means that fortune plays no favorites and confers her gifts only upon the man who has the will to win.

Success is not hereditary. We must qualify on our own merit. Any fool can inherit money and be perished from poverty. The respect of the community, which is life's chief reward, goes to him who earns it on his own account. In that continuing effort the fragrant memory of a life well lived is a valuable asset and a great inspiration.

CAME DIRECT FROM HEAVEN

Peppy Belief Existing in India Concerning the Origin of the Beautiful Emerald.

Scientists say that the emerald's lively green color is derived from a compound of silicon, aluminum, beryllia, magnesia, soda, water and some organic matter unknown; others say that it is simply a compound of carbon and hydrogen resulting from organic matter; but the ancient inhabitants of India knew better than the modern scientists. They believed the emerald came from heaven.

Says Forbes in his "Oriental Memoirs": "A person was watching a meteor fall in the Indian sky one moonlight night. After hovering a time in the moonbeams, one particular fireball, more brilliant than the rest, alighted on the grass and there remained. A spectator, struck by its fiery and approaching to ascertain the cause, found not an insect, but an emerald which he appropriated and wore in a ring, and ever after the Indians believed that the fireballs were sacred insects which upon dying on the grass turned to emeralds for the adornment of man and the glorification of Buddha."

That is perhaps the reason why the price of this gem has increased so greatly with each generation. Of course no fireball can now make an emerald, but emeralds certainly do make the money.

Pictures must not be too picturesque. Nothing astonishes men so much as common sense and plain dealing. All great actions have been simple and all great pictures are. The Transfiguration by Raphael is an eminent example of this peculiar merit. A calm, benignant beauty shines over all this picture, and gives directly to the heart. It is usually said to call you by name. The sweet, sublime face of Jesus is beyond praise; yet how it disappoints all fond expectations. This familiar, simple, home-speaking countenance is it if one should meet a friend—Emerson.

IRRIGATION SUCCESS

Advertising occasionally produces a volume which has more than transient interest. Such a book, "The Marvel of Irrigation," is just off the press.

"The Marvel of Irrigation" is a record of a quarter century in the Turlock and Modesto irrigation districts in California. It contains new and valuable data collected under a co-operative arrangement between The Anglo & London Paris National bank and the division of farm management of the University of California; and two articles covering the legal and financial aspects of irrigation district bonds, written by bond experts. The book is being issued, without charge, by the bond department of the Anglo & London Paris National bank, which has for many years taken a leading part in the great development.

The hope is expressed in "Foreword" that the book, "will be something more to the reader and to the public generally, than a mere bond circular advertisement." It is fair to say, that the book is indeed much more than that. It is, as the "Foreword" goes on to say, "the record of an agricultural revolution."

The two irrigation districts mentioned, Modesto and Turlock, adjoin each other and lie in the southern part of the San Joaquin valley. They are typical of the great interior valleys of California. Thirty years ago, and earlier, these two districts were the heart of the great grain producing belt of California. That was at a time when California was one of the most important wheat producing states in the union, and when the San Francisco grain exchange occupied a place in that trade.

In the "Marvel of Irrigation" it is set out how utterly depressed became the people of these districts—indeed, the very soil itself was depressed to the extent that it would no longer produce much more than was put into it. Without some radical change, Modesto and Turlock, and indeed the greater part of California's large grain fields, bid fair to go back to the semi-desert of which the pioneers had brought them.

Then came irrigation.

"The Marvel of Irrigation" does not contain a love story, nor does it show the trials and successes of any one man, but it does, to a degree that might have been thought impossible, seize the interest of a reader, in a manner that some of the best romances could not do.

The reason is plain. It is dealing with very human things, even though through figures; and behind those figures one senses the romance of achievement. It is the sort of achievement which every one engages in a story—the renewing of life.

ILLINOIS REUNION

Ever live in Illinois? Great state. We'll never forget her. The loyal Illinoisans of all our southland will meet for their happiest day together in Sacramento Grove park, Los Angeles, Saturday, April 30th, 1921. Hear the life and drum corps. Listen! County registers, silk sovereign badges, hot coffee, basket dinners, brief program, amiable, jolly good time. Shall we make it 20,000? Henry J. Brubaker will preside. The officers of every loyal Illinoisan organization invited to the platform. Inquire of C. H. Parsons, secretary, the federation of state societies, Illinois headquarters, Continental National Bank, 901 S. Main street. Phone 10261. See the Illinois register. Our loyal Illinoisans meet the first Friday evening of each month in Forum hall, 203 Mercantile Place. May the 6th next meeting. Keep this in sight.

CHAUTAUQUA

Make Chautauqua Week
Your Vacation Week

MUSIC

Chautauqua is a veritable festival of music. Laurence's Little Symphony Orchestra is scheduled for two notable concerts. Then there is the Sam Lewis Company, headed by the prominent Welsh tenor, Sam Lewis; The Orpheus Four, a quartet's foremost male quartet; The Jugo-Slav Tamburica Orchestra; Walter Jenkins; The Roach-Freeman Company. Twelve concerts in all—certainly the music alone is worth far more than the cost of the season ticket.

LECTURES

Many notables appear on the Chautauqua lecture staff this season. Stefanson, the famous Arctic explorer, is one of the head-liners. Peter Clark Macfarlane, noted American writer, is another. Add to these two celebrities the name of Tom Skehill, just back from Russia, Hunt Cook of the Chicago Art Institute, Father Cronin and Burnell Ford, inventor and electrical scientist.

ENTERTAINMENT

An outstanding entertainment event is scheduled for the fifth night in a big play production presented by the Keighley Broadway Players with an all-professional cast. Another entertainment feature of note comes in two programs to be presented by Ada Roach and Ruth Freeman on the second day. This is a duo with a country-wide reputation.

Season Tickets On Sale Soon

Adults, \$2.75; Students, \$1.50; Child's, \$1.00. No War Tax. Illustrated Programs Now Being Distributed. WATCH FOR YOURS

PHILOSOPHY

"Some of these mail order graters make Jesse James look like a gentleman."

Wickesheim Implement Co.
Fullerton, Cal.

WICK'S PHILOSOPHY

These mail order concerns do not pay your local taxes; employ local people, build up your community, support your schools, or other local institutions. Jesse James and his gang held up individuals here and there, but did not operate like these mail order graters.

Our gross margin on sales is 14 per cent. Out of this margin we pay all of our overhead including the support of over 65 employees and dependants, support local enterprises, pay local, state and federal taxes, maintain an industrial plant and the remainder our net profit, is kept working for you right here at home.

We serve this community with Fords, used cars, Fordsons, farm implements, and such other merchandise just as essential to the welfare of this prosperous community. As our stock is complete we make immediate delivery at your homes if desired.

Phone us your orders.

WARNING TO POTATO MEN

The finding of eel worm in potatoes which were intended for planting in this county makes the selection of clean seed potatoes the most important question at the present time, not only to potato growers, but to fruit growers as well.

This eel worm is equally destructive to potatoes, tomatoes, prunes, peaches, plums, grapes and figs and many other of our products and when once established in the soil it is practically impossible to ever eradicate it.

This worm forms small warts on the potatoes, and on the roots of the plants and trees it destroys. It is spread by planting infested trees, plants or by such agencies as spreading manure in which potato peelings occur which were infested with the worms. It is therefore very important that the farmer should examine closely and boil every potato peel thrown out on the compost or manure pile.

There is no way of disinfecting eel worm infested potatoes except by boiling. All potatoes intended for planting which are not known to be absolutely free from eel worm should be inspected as it does not pay to take a chance. No market will accept these potatoes either for food or seed purposes.
