

WHY PATRONIZE THE FOREIGN PEDDLER

THE LOS ANGELES FRUIT, VEGETABLE AND MEAT TRUCKERS SHOULD BE SQUELCHED

People Loyal to Their Own Homes Ought to Refuse to Purchase of These Men Who Are a Menace to Local Business—People Should Be Educated to the Fact That it is Their Interest to Trade at Home.

Some time ago the city officials decreed that hucksters or alien vendors of fruits, vegetables, etc., should not have their wares in front of the places of business, of local dealers in the same commodities. This was one step in the proper direction, but it would have been much better if these peddlers could be prohibited from coming inside the city limits. It is to be hoped the day will come when the cry of the "banana" and "apple" man, who comes down from Los Angeles, with his load of cheap stuff, will be heard on our streets no more, for ever, and the local merchant, who lives in our midst and helps maintain the city, will get a square deal.

The alien peddler, who is generally an Italian, loads up his wagon at the Los Angeles market with overripe or condemned stuff that cannot be handled by the legitimate trade. He goes out into the surrounding towns and peddles his goods at a price, frequently far below what the local dealer would have to pay for first-class goods. This man has no interest in the town. His interest ceases when he pockets and carries away the dollars he receives for his wares. He owns no property here, pays no taxes to maintain the city's government, its streets, and its schools. It is immaterial to him whether the town grows, stands still, or dies. He spends no money here, his sole business being to gather some of its dollars and take them to his home in a neighboring city, where he spends them. On the other hand the home dealer maintains a large business here, benefits the city, owns his own home, perhaps, and either owns or pays rent for his business room. He pays taxes and license, patronizes the municipal water and light plant, helps in every possible way to boost the city and advance property values, and the profits he receives from his business are spent among other business houses for the maintenance of his family. He helps keep up the churches, and subscribes to every project for the city's benefit. Dollars spent with him are put in circulation again in the same community, and help make the city prosperous.

It is incomprehensible why people will pass up their home dealer, their neighbor and friend, who perhaps patronizes them, and buy of the foreign peddler for the sake of saving a few pennies. Another peddler who occasionally does a thriving business is the meat vendor, who offers delicious hams at a price much below the local market. Many people who have patronized this gentleman have found themselves swindled, but that doesn't deter others from buying his hams under the impression that they are getting something for a little less money than the home dealer charges. George McPhoe, county sealer, has frequently arrested some of these fellows and caused them to be heavily fined for selling short weight goods, but the people, it appears, love to be swindled, and will continue to patronize them.

We might also remark, incidentally, that there are four good bakeries in this city, each turning out a quality of bread that has no superior on earth, yet several Los Angeles bakeries have established a trade here, and take a large volume of business away from the home institutions. People buy the imported bread on the hypothesis, perhaps, that it must be better than the home product because it is made elsewhere.

There is a class of people, also, who are of small benefit to their town, because they persistently patronize foreign merchants in preference to their home dealers. Like a breechy cow, they are obsessed with the idea that the pasture is better in the next field. They will use a dollar's worth of gas driving to Los Angeles, but are happy if they think they have saved two-bit.

These people derive their income from their labor or business here, but the bulk of it is spent to help build up some other city. If all the people of Anaheim were of the same opinion, this city as a business community, and as a busy, hustling town, would be wiped out of existence, and it would degenerate into a small hamlet of dwellings of people who own their property and cannot dispose of it. The bread-winner would have to go elsewhere to make a living for his family.

The dollars you spend in Los Angeles enriches that city at the expense of your own. The dollars you spend in Anaheim remain here and help increase the value of your own property.

Another thing you should consider before buying of a stranger. When you deal with a home merchant you are dealing with a man you know, a man who is your neighbor and friend, and whom you can trust. When you deal with a Los Angeles merchant you are dealing with a man whose only interest in you is the profit he can make out of you. Some time ago an Anaheim young man thought he could save money by buying a suit of clothes in Los Angeles. He was shown a suit that chanced to fit him passably well—at least the salesman made him think so. The price was marked down to the Anaheim young man because the suit had been made for another party who failed to take the clothes. The young man was well pleased with his bargain until he learned that the same suit could be purchased of any dealer in Anaheim for eleven dollars less than he paid for it.

This is only one of many instances that could be mentioned. Don't get the idea that you are saving money by patronizing an out-of-town dealer or a foreign peddler. You may save a cent or two on a single purchase, but you lose in the end.

CAMPBELL'S FUNERAL HELD IN THIS CITY

Was a Member of the Anaheim Lodge of Elks

Funeral services, were held in this city Friday afternoon for Jess V. Campbell, oil driller of Balboa, who was shot and fatally wounded by his wife, Mary Campbell, just outside their home at Balboa Monday last week.

The funeral services, were conducted from the parlors of Backus and were under the auspices of the Anaheim lodge of Elks, of which the deceased was a member.

It was stated that the funeral had been held in abeyance for more than a week in the former hope of locating relatives of the deceased. He was said to have been a native of Alabama, but all efforts to locate relatives in that state proved futile.

From authoritative sources it has been learned that Campbell is not the real name of the deceased and it is believed that because of the assumed name under which he was known, his blood relatives could not be found.

GOAL IS REACHED BY CHAMBER OF COMMERCE

MEMBERSHIP OF 363 SIGNED UP BY WORKERS IN FOUR DAYS' DRIVE

Major Adams Forces Enroll 197 While Mayor Eyegbrod's Squad Got 166 Names—W. T. Wallop's Company Carries Off the Honors With Fifty-Eight to Its Credit—Efforts Will Be Made to Increase the Membership to Four Hundred.

When the leaders of the Chamber of Commerce fixed upon a membership of 350 as the goal which they expected to reach in the three-day drive last week, it looked like they had set them, solves an impossible task, but it appears that nothing is impossible of accomplishment in Anaheim. If the right men get behind it. When the majors and the captains and the privates focused on the first return drive last week, it looked like they had set them, solves an impossible task, but it appears that nothing is impossible of accomplishment in Anaheim. If the right men get behind it. When the majors and the captains and the privates focused on the first return drive last week, it looked like they had set them, solves an impossible task, but it appears that nothing is impossible of accomplishment in Anaheim. If the right men get behind it.

A committee of forty-nine live, citizen-geed all the work, and to them belongs the credit of establishing a civic body that is expected to accomplish much for this city during the coming year. A. B. McCord was selected as chairman of the committee, and manager of the campaign.

The force was divided into two sections, each commanded by a major. Henry Adams was chosen major of the "Go-Get-'Em" division, and Charles Eyegbrod major of the "Valencia Tigers." Major Adams' captains were William Goodrum, H. G. Schneider, William Falkner, and W. L. McLean. H. E. W. Barnes, W. T. Wallop and Herman Stern. The captains under Major Eyegbrod were W. E. Alexander, Jr., W. D. Grafton, E. C. Camp, George M. Ross, J. A. Golsinger, F. N. Gibbs and Tom Wilkinson.

There was considerable rivalry between the two forces, each determined to turn in the largest list, although there were no buns, no premiums and no penalties attached to the work to compensate or punish. Both sides did good work, but the Adams force appeared to have been more active, or had better luck. The "Go-Get-'Em" turned in 197 names and the "Valencia Tigers," 66. Capt. W. T. Wallop's team won the honor by signing up fifty-eight men.

Major Charles Eyegbrod, commander of the losing force, accepted defeat gracefully, and was happy because the opposing side had signed up so many. He said, "I want to thank my team captains and workers for the splendid service they have rendered in building up a strong organization for Anaheim, and I want to congratulate Major Adams and his division on the showing they have made. I am glad they were able to make a better record than we, for all of us have the good of the city at heart."

Ben Schoobee, representative of the American City Bureau, which planned the campaign, and who was on the job here during the drive, was highly pleased over the results. "The people of Anaheim are certainly a splendid bunch to work with," said Schoobee. "They are up and doing every minute. It has been a long time since I had the pleasure of working with a better aggregation of business men. They have the vision and the spirit to make a great city of Anaheim. I will certainly look forward to years of important activity on the part of the organization they have just built. And in this work the American City Bureau stands ready, willing and anxious, to render every assistance possible in making this organization the greatest possible success."

Misses Alice and Bernice Strodtfod, of Los Angeles, daughters of Mr. and Mrs. O. W. Strodtfod, were guests the past week of Mr. and Mrs. Yungbluth. On Thursday evening they delightfully entertained a number of young friends when cards were played and refreshments served. They were driven to the beach Sunday by Mr. and Mrs. Yungbluth and returned to their home with their parents.

THAT NEW BRIDGE

What many at Orange regard as one of the most important pieces of bridge construction ever undertaken in the country, will be gotten under way when the board of supervisors awards a contract for the erection of a bridge across the Santa Ana river at a point near Olive.

The bridge will open a direct route from Orange and Santa Ana to the wealthy oil fields at Richfield and Placentia. It is believed the opening of the road will make these fields as accessible to Orange and Santa Ana as they are now accessible to Anaheim and Fullerton.

Business men of Orange have long been agitating the construction of a bridge at that point, having a keen eye to what the opening of a road into the rich district would mean.

Plans, as drawn by County Engineer J. L. McBride, call for a bridge with five hundred spans across the main portion of the river.

Reinforced concrete piers will be used, the superstructure to be of wood. The approaches to the bridge will be of pile trestle. The trestle approach on the south side will be 160 feet in length and on the north side 148 feet.

The trestle was chosen for the approaches for two reasons, one being that it is cheaper than a dirt fill and the other that in case of overflow from the river the water may pass through instead of backing up against the fill.

It is also expected the supervisors tomorrow will call for bids for building a bridge across the Santa Ana river at Seventeenth street.

WOMAN CITRUS GROWER FILES AN ANSWER

Will Fight Suit of the Placentia Growers' Association

Through her attorney, Leonard Evans, Mrs. Olive King, of Los Angeles, filed an answer to the suit brought against her by the Placentia Mutual Orange association for \$1130, alleged to be due because of a violation of a contract with the association.

The association alleges that Mrs. King joined the organization and signed a written agreement whereby she was to permit her citrus fruit crop to be picked, packed and marketed through the association. Failure of a member to abide by the contract makes her subject to a forfeiture of her own standard box.

According to Head and Hutan, attorneys for the association, Mrs. King disposed of 840 boxes of naval oranges and 1540 boxes of Valencia, grown on her 11-acre, citrus orchard near Placentia in 1919-20, through an agency other than the association. This, they claim, constituted a violation of her agreement.

In her answer Mrs. King denies that the association was ready and willing to pick, pack and market the fruit grown on her property until long after it had matured and until a large percentage of the fruit had dropped from the trees and become a total loss.

She also alleges that the association marketed citrus fruit grown by persons who were not stockholders to the exclusion of her own crops. Mrs. King also asserts that she sought information of a representative of the association in Placentia as to how she might withdraw from the organization but could get nothing tangible on this matter.

She claims that she gave written notice of her withdrawal from the association November 5, 1919, and understood that the issue had been settled satisfactorily.

REFORM COSTLY BUT SANTA ANA MUST PAY

IMPORTED SLEUTH FINDS LITTLE FIRE BUT STIRS UP BIG SMOKE

Mayor Employs Private Detective to Secretly Investigate Police, Which Somewhat Peeves Chief Jernigan—Officers Showing Clean Bill, Sleuth Arrests Jernigan, a Mexican and a Woman, and Charges City Nine Hundred and Some Odd Dollars.

Apocryphal of the recent so-called vice raid at Santa Ana, in which, according to published reports of the affair City Marshal Sam Jernigan played the star part as chief sleuth, an inside story is current that the head of the police department and the head of the Santa Ana city council are now doing the sleuthing and Jernigan is dodging responsibility for the near sensation.

For, according to rumor, that, so far has not been denied, the Santa Ana city council at the suggestion of its president, engaged a professional detective from Los Angeles to come to Santa Ana and thoroughly investigate the Santa Ana police department, the action being taken without the knowledge of City Marshal Jernigan or any of his staff, and after five days' unexcused sleuthing, report was made to Mayor Mitchell, that while the morale and morality of the Santa Ana police department of the vice were possibly not so deep as a well nor so wide as a door, there wasn't much the matter with them in a general way, and smiling Sam and his force might be given a conditional clean bill of health.

Then, according to rumor, the Los Angeles detective was introduced to Jernigan by Mayor Mitchell as having been engaged to clandestinely comb the city and root out all and sundry pimps, prostitutes, gamblers, boot-runners, boot-leggers and other undesirable, and Jernigan was requested and agreed to lend all possible aid and assistance by both himself and his men to enforce the law and incidentally comply with the mayor's instructions. And the campaign was on.

The "drive" didn't last long, however, for outside of the heated imaginations of certain would-be reformers, no real social conditions at the county seat across between the Juana and Sodom and Gomorrah, the detective drag-net failed to catch anyone of importance, the net result being the arrest of a couple of colored men and a colored woman, who were charged with keeping a house of prostitution.

The house of prostitution, the reputation of having openly sold booze for years and the capture of a Mexican and the confiscation of a stock of assorted caliche water being dispensed in the classic precincts of a local street, a so-called "vice" at some times known as Sonoma-town, and this aggregation was dealt with at what is freely characterized as a drum-head court presided over by the city recorder, who accepted a plea of guilty as charged from all concerned had assessed fines aggregating some five hundred dollars with the alternative of jail sentences where the money was not forthcoming. "Incidentally it dispenges on the testimony of certain of the victims that they were induced to plead guilty on the assurance that the Los Angeles detective was a federal officer and thus the shortcuts-cut? But of the difficulty was to test right up, the alternative being to be handed over to Uncle Sam for direct action on their cases.

Also, incidentally, one of the victims caught in the raid is a woman, residing temporarily at Babbion, who was a number of years, and has a long list of warm friends here, all of whom will extend congratulations and good wishes. He is cashier of the Golden State National bank, and is one of the most prominent young business men of the city. His bride has been engaged in departmental work in the Los Angeles schools. She is a highly educated and accomplished young lady, and will receive a hearty welcome here from her husbands' many friends.

An additional incident is the case of the Indian fish-peddler, who was fined three hundred dollars, but who was only able to scrape up one-third of

that sum, and who was allowed his liberty under a goodman's agreement that he pay the balance in fifty daily monthly installments.

Incident number four came in the way of a well written story of the raid based on alleged facts furnished by City Marshal Jernigan, who so far overcame his characteristic cynicism as to claim credit for the whole performance and incident number five followed quickly in a vehement protest from Mayor Mitchell, who repudiated Jernigan and all his works, asserting that he, and he alone had engineered the vice crusade and to him properly belonged the credit.

The newspaper that published Jernigan's story elected to stand pat, however, and although Mayor Mitchell is said to have stormed and threatened he evidently decided that discretion was the better part of valor and concluded to withdraw from the wordy encounter.

The mayor's attitude, however, convinced Jernigan that some one had intended to convert him into a large, woolly Angora and subsequent investigation is said to have fixed firmly in his mind the belief that he was to have been slaughtered to make a council mastic holiday.

And so war is said to have been declared with both sides digging in, with the prospect of active hostilities being resumed just as soon as favorable opportunity offers.

And in the meantime the Los Angeles sleuth has collected a bill for something less than one thousand dollars for professional services in assisting to suppress vice and the city stands a chance of being compelled to pungle up the amount of the fines collected on the ground that the evidence adduced was obtained by false pretense and intimidation.

FALKENSTEIN PURCHASES GRAND THEATRE BUILDING

Merchant Thinks East Center Street Property Good Investment

The grand theatre building on East Center street, is now the property of William Falkenstein. A deal was completed Tuesday by which the property passed from the hands of H. C. Suttle, of Los Angeles, to Mr. Falkenstein, the Simpson Road, just outside the deal. The price is not given. The property has a frontage of 100 feet on Center street and a depth of 135 feet. In addition to the theatre, which is under a long lease, there are two store rooms on the ground floor, one occupied by the Anaheim Beauty parlor and the other by the Astoria Music Co. The majestic apartments utilize the entire second story.

What Mr. Falkenstein expects to do with the building eventually is not known. It was offered to him at what he considered was a bargain and he purchased it as an investment. He has unlimited faith in Anaheim's future, and considering the contemplated improvements on East Center street, thinks that is a desirable portion of the city in which to invest.

E. E. SMITH WEDDED TO LOS ANGELES GIRL

United in Marriage Monday to Miss Leta Atkinson of the Angel City

E. E. Smith's numerous friends here have generally considered him a confirmed bachelor, therefore it was something of a surprise to them when they learned of his marriage at Los Angeles Monday. Mr. Smith's bride is a Los Angeles girl, Miss Leta Atkinson, and the marriage took place at the home of her parents, Mr. and Mrs. John Atkinson, at 1983 South Harvard boulevard. Rev. Daniel Trundell, pastor of the Alvarado Christian church performed the ceremony, about fifty relatives and friends being present. Mr. and Mrs. Adolf Thomas, of this city, were among the guests.

Mr. Smith has lived in Anaheim for a number of years, and has a long list of warm friends here, all of whom will extend congratulations and good wishes. He is cashier of the Golden State National bank, and is one of the most prominent young business men of the city. His bride has been engaged in departmental work in the Los Angeles schools. She is a highly educated and accomplished young lady, and will receive a hearty welcome here from her husbands' many friends.

After spending two or three weeks on a honeymoon trip the young couple will settle down at their home on Illinois street.

What's become of the old-fashioned young widow who was mourning for several years?

SIGNS CONTRACT FOR FINE NEW BUILDING

SAMUEL KRAEMER TO BUILD THE FINEST GARAGE IN ORANGE COUNTY

William Goodrum Garage on South Los Angeles Street to Be Replaced by a Splendid Building, Costing \$30,000—Dimensions 65x154 Feet—Reported That Mr. Kraemer Also Intends Construction of Business Block on East Center.

That Anaheim really is a safe investment, and that the city is bound to continue its upward strides, appears to be the opinion of Samuel Kraemer, the millionaire citrus grower and oil magnate. Several years ago Mr. Kraemer made his first purchase here, and the last year or two he has made heavy purchases, and it seems, he is determined to cover his grounds with substantial and beautiful buildings.

Saturday he signed a contract with Wilson and Beaver for the construction of what, it is claimed, will be the finest garage building in Orange county. This building will be erected on South Los Angeles street, just south of the First National bank, and directly opposite the fine new building now in course of construction by Mr. Kraemer, south of the Dreyfus building. It will cover the site of the garage building now occupied by William Goodrum, also the vacant lot adjoining it. These properties were recently acquired by Mr. Kraemer.

The new building will have a 65-foot frontage on Los Angeles street, and a depth of 154 feet, and will be occupied by Mr. Goodrum when completed. The show-room will be forty by sixty-five feet, with tile floor and marble baseboards. The exterior walls will be of hollow tile, with the exception of the front, which will be of brick. The plans were drawn by Archibald Eugene Durfee, chief of the building will be in the neighborhood of \$30,000.

Mr. Kraemer also contemplates building a business block on property he recently purchased east of the old city hall. It is reported. What he expects to do with the old Ford garage property at the corner of Cypress and Los Angeles streets, which he acquired a short time ago, is not yet known, but it is believed it is his intention to cover it with a business building.

QUIET BUT PRETTY WEDDING AT PLACENTIA

A quiet but pretty wedding took place Wednesday night at 7:30 at the home of Rev. E. H. Roades, at Placentia, when his son, Albert Roades took for his bride, Miss Madeline Siefken, daughter of Mr. and Mrs. Girard Siefken, of Anaheim.

The house was beautifully decorated with Shasta daisies and carnations. The bride was charmingly gowned in a dress of blue chambray with blue embroidered overcoat and a veil of white net. She was attended by her sister, Miss Ida Siefken, who wore a dress of lavender crepe de chene. Both carried bouquets of carnations and ferns. The best man was the groom's brother, Mr. Lester Roades.

The single ceremony was performed by the father of the groom, Rev. E. H. Roades. The ring was of white gold and engraved with orange blossoms.

After the ceremony light refreshments were served. Friends and relatives present were:

Mr. and Mrs. P. B. Heard and daughter, Mr. and Mrs. H. Roades, and daughter, Mr. and Mrs. J. B. Heard and son, Mr. and Mrs. R. F. Roades and son, Mr. and Mrs. J. O. Slate and son, Mr. and Mrs. J. C. Clott, Mr. and Mrs. Evan Pugh and baby, Mrs. Jessie Norkirk, Mr. and Mrs. L. Heard and daughter, Mrs. E. H. Roades, Mrs. Noble State, Irvin Roades, Misses Alma Clott, Ida Siefken and Ethel Dunham.

The young couple left immediately on a short honeymoon at Venice and upon their return will make their home in Placentia.—Courier.

Mr. and Mrs. Eicholtz, of the Boston bakery, are sojourning at Catalina and will return home, next week. They also visited in San Bernardino, where Mr. Eicholtz conducts one of the leading bakeries in that city.

IN THE DAYS OF LONG AGO

Items of Local Interest Culled from the Files of Former Issues of This Paper

52 YEARS AGO THIS WEEK

Major Truman, editor of the San Diego Bulletin, was in Anaheim last week and among other nice things he wrote about this city for his paper we extract the following:

"The vineyard of Anaheim are watered through an artificial process, the water being conveyed by means of an irrigating canal from the Santa Ana river. This stream takes its rise in the San Bernardino mountains, and is the largest in southern California, being nearly 120 miles in length. During very wet springs this river sometimes finds its way to the sea, but generally it flows itself five or six miles from the mouth. The ditch commences at a point in the river eight miles above its disappearance during the driest season ever known, and is ten miles in length.

"Viva in Anaheim! Zwi! Lager! In southern California is not at present, indeed, the favorite grape-growing country in the world. It is destined certainly to attain that rank, and also to become one of the most extensive. Although there are several counties that produce larger quantities of grapes, and are largely and successfully engaged in the manufacture of wine, Los Angeles county is the oldest and best grapegrowing district in the state, and last year made more wine and brandy than all the other counties put together. There is not a particular way but that the grape industry of California is beginning to assume that vast importance which was foreseen for it by those who have paid attention to the subject. Yet, owing to circumstances, our vine-cultivators have not until lately succeeded in making these interests a common one. That as delicious still wines, especially white and red, as can be imported, will yet be (if not already) transported to eastern and domestic markets, is a proposition that none will attempt to gainsay. At present, in fact, some of the larger firms of Los Angeles are putting into an eastern market a splendid quality of white and Angelica wines, a fair specimen of port, and a superior quality of brandy."

The people of Anaheim will be glad to know that Carl Van Gulpen and wife, assisted by able talent, will present them with a musical soiree this evening at Richard's hall. Prof. Van Gulpen was once a resident of this place, and his friends would pay him a handsome compliment by a general turnout tonight. A ball will take place after the performance.

At latest accounts they had not yet got over the late picnic at Capistrano. A tourist from that famous locality, informs us that broiled ome are eaten daily in shady groves during brief interludes in dancin and merry-making by the happy and very jolly denizens of that locality. Keep it up.

By the latest steamer Don Juan Foster received fifty thoroughbred Durham bulls to add to his already large herd of cattle at Santa Margarita. He is to receive thirty-eight more, by the next steamer.

We have information of a plan in contemplation for the building of a narrow gauge railroad from Anaheim to Los Angeles. The parties interested have made figures upon the grade and fixtures, and estimate the whole cost of the work at \$300,000. It would be a great convenience to our people to have a railroad of this description. By it we would gain both speed and transit, and economy in pocket. While on the subject of railroads, we will inform those who have not already heard of it, that there is a rumor that the Anaheim Landing company ask \$300,000 for their franchise and right of way, and will not let the narrow gauge men build unless they "come down" with this large amount. When our citizens were encouraging and aiding this railroad scheme, they were deluded with the idea that the projectors working for the good of Anaheim, and not exclusively and directly for their own pockets.

Mr. H. D. Polhemus and Mr. John Hanna, with their families and friends, are camping out at the Santiago canyon.

The board of trustees met in regular session Tuesday evening, Mayor Rust in the chair. Marshal Steadman reported the following collections, for June: For license, \$172.35; for water, \$144.55; electric light, \$155.55; total, \$472.35. Clerk Nebelung's monthly financial statement showed \$131.13 in the general fund, \$170.34 in the improvement fund, and \$190.08 in the electric fund. The time honored difference of a cent between the clerk and treasurer again appears. This difference went into the accounts so long ago that the memory of the oldest inhabitant runneth not to the contrary, and it arises like Banquo's ghost at each monthly meeting. It will not out, damned spot, as it were, and the reports were filed.

Fritz Reisman is having the bakery building at the corner of Cypress and Los Angeles streets thoroughly renovated. Substantial improvements are being made, and the place is being made to look like new. The building will be occupied soon by Peter Stry, an expert baker who will take to himself a holdover in the person of a well-known lady of this city, and will open a first-class bakery.

Between the houses of Carrisosa and Ruiz, although they live neighbors in Sonoratown, there have long existed an irreconcilable feud. Carrisosa owns the race horse, Lightfoot. Several times he has raked in the checks to the extent of a good round sum, and great has been his joy thereat, to the unspeakable discomfiture of those who bet upon the other horse. Sunday last Francisco and Juan Ruiz appeared at Carrisosa's house, to banter him for another race. A dispute arose which finally developed into a run battle in which Francisco Ruiz was shot in the thigh. Great excitement prevailed in the Mexican quarter Sunday and Monday. The partisans of both sides were out in force, and we are informed that from behind each tree peeped an armed Mexican. A single shot would have precipitated active hostilities.

Andrew Gillison, chairman of the Buena Park tree growers' association, was in town on Saturday and informs us that beside the erection of the contemplated sugar factor at Alamitos, on which work has already practically commenced, the prospects are good for a second sugar factor at the Carrisosa ranch about two miles north of Alamitos ranch house, Jonathan Elisy having informed him that it is his intention to erect one at that place.

Harry Hanna is down in Guatemala in the employ of a government minister, and has just received by his folks here a day or two ago, brings the information that he is gaining in health and amassing a competence. Harry is abundantly satisfied with his Central American home, and will remain and grow up with the country.

Miss Minnie Zeyn returned on Tuesday from Alamo on the steamer, Mexico, by way of Redondo, after an absence of two months during which she visited with relatives.

Ernest Bentz is in receipt of a letter from Col. Otis, of the Los Angeles Times, apologizing for the ignoring of his Times last week that Ernest had been arrested for burglary, when he was merely the complaining witness against a Mexican for petty larceny. The colonel says the mistake was due to the incomprehensible thick-headedness of a Times reporter—so many Times reporters have been thick-headed before. We bet the colonel didn't do a thing to that reporter.

Gus Stern came down from Whittier on Tuesday after an absence of several weeks, during which time he has been conducting a store at that place. Gus and Herman Stern, accompanied yesterday to his home in Los Angeles to bid him and his family bon voyage, on their trip to Europe.

The Ladies' Euchre club met at Mrs. Landell's last Friday. Mrs. A. L. Lewis was the first prize, Mrs. L. F. Lewis, second, and Mrs. Adolf Rimpau, the consolation.

Misses Sara and Ruby Crowther leave next week for their summer's outing at Santa Catalina.

The directors of the Orange county fair have fixed upon October 6 as the time for holding the fair. The fair will continue to and including the following Saturday, when it will wind up with the usual free for all picnics, etc.

CHANCE FOR INVESTING IN LOCAL COMPANY

Gas Company Offers Its Eight Per Cent Preferred Stock to the Public

The Southern Counties Gas company of California, in order to better enable itself to keep up with the increasing requirements of this growing community, has decided to give its consumers the opportunity of becoming partners in its business by offering them the right to purchase its eight per cent cumulative preferred stock upon a plan which will yield the investor eight per cent return upon his investment. The company has mailed to all of its consumers in this district interesting circulars, showing the enormous growth of the company during the past few years, and setting forth the advantages of its preferred stock from an investment standpoint.

Under the authority of the state railroad commission of California the company is now offering \$1,250,000.00 of its preferred stock at a price of \$90 per share. In order to encourage the small investor to participate in this stock, the company also will permit the purchase of stock on the installment plan of ten equal monthly installments of ten dollars per share, or a total price of \$100 per share, when purchased on this basis.

The rapid and substantial growth of this company is shown by the fact that where, on June 30, 1912, the company was supplying 6,573 consumers, or an increase of 70,897 consumers in nine years. During the same period of time the gross business of the company has increased from \$175,815.36 to \$3,332,575.83. The value of the tangible property of the company has increased from a valuation in 1912 of \$674,225.48 to a valuation on May 31, 1921, of \$7,526,345.69.

The Southern Counties Gas company of California for many years past has been its consumers in this district a quality of gas far superior to that ever served in the larger cities of the state of California, and it is the purpose, and desire, of the company to continue to give its consumers a gas service superior to that enjoyed by people in the larger cities as long as it is within its power to do so. The splendid gas service rendered by this company to this community has contributed materially toward the development and growth of this community, and the company points out that it will be materially added in keeping up with the growth of this community, if its consumers in this territory will assist by becoming partners with it in its business.

It is the purpose of the company to conduct an active campaign for the sale of this stock through its own organization. Friday evening a very enthusiastic meeting of all of the employees of the company in Orange county was held at St. Ann's hall, at Santa Ana, at which time the officers of the company outlined to the local organization its plans with relation to the sale of this preferred stock, and the employees of the company in this district promised the officers of the company their most hearty co-operation and support in offering this stock to the community.

Full information regarding this stock issue may be had at any office of the company in Orange county, or by addressing the home office of the company, 11th Floor, Corporation Building, Los Angeles, Calif.

THE COUNTY LIBRARY

Feeling that a definite step toward the materialization of the county free library has been taken with the appointment of Miss Anna Bell Bailey, of Fullerton city, as librarian, the fourth district Congress of Mothers and Parent-Teacher associations is formulating plans and ideas that will make the library accessible to all of the rural districts.

According to Mrs. Earl Morris, of Santa Ana, one of the prime movers in the long fight waged before the supervisors for the establishment of the institution, branch libraries will be established wherever they may be desired.

Miss Bailey, the librarian, will make her headquarters in Santa Ana, but will be a frequent visitor to each branch library. Some of the smaller towns in the county have already picked an office or home that will be utilized as a branch library. The Santa Ana headquarters has not yet been decided on.

It is not known at this time just how many books will be ordered to form the nucleus for the library. This is a matter that is to be left to the discretion of the librarian. The greater number of books, however, will be kept in the Santa Ana branch. Any book desired by a resident of the county may be had upon application, distribution being made free of charge.

A tax levy of two cents on every \$100 of assessed valuation will supply the necessary funds for the books and other expenses incident to the operating expenses. This tax levy applies to

rural districts only and does not include incorporated cities, which have their own libraries. The tax levy will be executed some time in August and collections will follow in due course.

Miss Bailey, recently appointed by the supervisors as the county free librarian, will take up her duties on or about August 1. Her salary will be \$1800 a year, this being the only library expense that will come out of the general county fund.

Miss Bailey is one of eight women who were recommended for the position. Because of her excellent recommendations she was suggested for appointment by Supervisor Howard Wassum and seconded by Supervisor Schumacher.

The battle for the library continued over a period of two years. About two months ago the project seemed lost, when the supervisors voted to reconsider their resolution establishing the library.

This step was taken after scores of letters had been received voicing objection to the library because of the additional tax levy.

The fourth district Congress of Mothers and Parent-Teacher associations refused to back down, however, and appeared frequently before the supervisors with arguments in favor of their project.

This organization felt that it had won its final round when the supervisors last Tuesday appointed a librarian. Loud applause greeted this action.

Supervisors Finley and Edwards have opposed the library practically from its outset because of the increase in taxation.

Supervisors Talbert, Schumacher and Wassum favored the project.

In commenting on the establishment of a branch county library at Brea, the Rev. W. E. Spicer, pastor of the Christian church, speaking for the community, said:

"It is with gratitude to the board and to the faithful work of Mrs. Earl Morris, president of the county Parent-Teacher association, and to Mrs. Charles Harvey, chairman of the library committee here, that the people of this district are in the successful outcome of the county free library movement."

"Brea people are in touch with many parts of the county and have wanted the county free library for all of the non-library districts, embracing, as it does, half the population of the county."

"With the many new buildings now going up here, it should not be a problem to house the Brea branch."

"Orange county," said to be the twelfth in wealth in the United States and third in the least taxation in California, has joined the forty-five forward-looking counties of California on this best and most economical plan for promotion of citizenship intelligence through popular libraries."

You may do a man a dozen favors, but if you refuse him the thirteenth you will never have granted him any.

NOTICE OF ABANDONMENT OF HIGHWAY

Notice is hereby given to all freeholders in Third road district that the hearing of the petition of John Strickland, et al., filed on the 5th day of July, 1921, to vacate, discontinue, abandon and abolish a certain highway (or certain highways, as the case may be) in Third Road District, in Orange County, California, has been set for Tuesday, the 26th day of July, 1921, at 10 o'clock a. m., at the room of the Board of Supervisors in the Court House at Santa Ana, California.

Said road (or roads, as the case may be) is described as follows:

Commencing at a point in the East line of Section 1, Twp. 4 South Range 9 West, S. B. & M., said point being North 4° 40' 20" West, 32.17 feet from the Southeast corner of said Section 1; thence North 50° 47' 45" East, 33.25 feet to a point 30 feet easterly of and measured at right angles from the East line of said Section 1; thence, Northerly parallel to said Section 1 line 115.87 feet to an intersection with the southerly line of a 20 foot road shown on the northwesterly side of South Placerita Tract No. 1 as recorded in Miscellaneous Map Book 8, page 42, Records of Orange County, California; thence, Northwesterly parallel to the Southerly line of the Kramer Tract 68.66 feet to a point 30 feet westerly of the Easterly line of Section 1; thence Southerly parallel to said section line 187.08 feet, more or less, to a point 67.60 feet northerly of the South line of said Section; thence North 50° 47' East, 33.36 feet to the point of beginning.

All that portion of that certain 60 foot road reserved as made by the Kramer Tract No. 1 as recorded in Miscellaneous Map Book 8, page 42, Records of Orange County, California, on the common Section line between Fractional Sections 6 and 7, Twp. 4 South, Range 9 West, S. B. & M., the center line of said road reservation being more particularly described as follows:

A strip of land 60 feet in width, being 30 feet on each side of the following described center line: Commencing at a point 30 feet easterly of the Southwest corner of Section 6, Twp. 4 South, Range 9 West; thence Easterly along Section line 27.50 feet to an intersection with the easterly line of said Fractional Sections 6 and 7.

By order of the Board of Supervisors of Orange County, California. Dated this 5th day of July, 1921. (SEAL)

J. M. BACKS, County Clerk of Orange County, California, and ex-Officio Clerk of the Board of Supervisors of said County.

CERTIFICATE OF INDIVIDUAL TRANSACTING BUSINESS UNDER FICTITIOUS NAME

The undersigned, Wilford B. Holland, does hereby certify that he is engaged in the business of buying, selling, vending and dealing in electrical supplies and electric fixtures and of installing electric wires and electrical fixtures, under the name or designation of "Holland Electric Company," that the office and principal place of business of said Wilford B. Holland is the City of Anaheim, Orange County, California.

That the name in full and place or residence of said Wilford B. Holland are as follows:

Wilford B. Holland, No. 108 N. Claudina Street, Anaheim, Orange County, California.

WITNESS my hand this 24th day of June, 1921.

WILFORD B. HOLLAND,

State of California, County of Orange.

SS:

On this 24th day of June, A. D. 1921, before me, Homer G. Ames, a Notary Public in and for the County of Orange, State of California, residing therein, duly commissioned and sworn, personally appeared Wilford B. Holland, known to me to be the person described in the foregoing instrument, and whose name is subscribed thereto, and he acknowledged to me that he executed the same.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed my official seal, the day and year in this certificate first above written. (Notarial Seal)

HOMER G. AMES, Notary Public in and for County of Orange, State of California. 6-3051

NOTICE OF ABANDONMENT OF HIGHWAY

Notice is hereby given to all freeholders in Third road district that the hearing of the petition of A. E. Christensen, et al., filed on the 5th day of July, 1921, to vacate, discontinue, abandon and abolish a certain highway (or certain highways, as the case may be) in Third Road District, in Orange County, California, has been set for Tuesday, the 26th day of July, 1921, at 10 o'clock a. m., at the room of the Board of Supervisors in the Court House at Santa Ana, California.

Said road (or roads, as the case may be) is described as follows:

Commencing at the Northwest corner of Lot 2, Section 5, Twp. 4 South, Range 9 West, S. B. & M.; thence North 43° 23' 15" West, 20.1 feet to the West line of the Kramer Tract; thence westerly 20.1 feet; thence southerly parallel to the West line of the Kramer Tract, a distance of 20 feet therefrom, measured at right angles, 175.67 feet, more or less, to an intersection with the north line of Corona Ave., thence North 30° 44' 58" East, 34.90 feet to an intersection with the easterly line of the Kramer Tract; thence North 4° 23' 15" West, 125.02 feet to the point of beginning.

Allowed: A plan of said road (or roads, as the case may be) particularly described as follows: Beginning at the Southwest corner of Lot 1, Section 5, Twp. 4 South, Range 9 West, S. B. & M., and running thence North 4° 23' 15" West, 20.10 feet; thence, South 38° 29' 15" East, 125.02 feet to the point of beginning.

By order of the Board of Supervisors of Orange County, California. Dated this 5th day of July, 1921. (SEAL)

J. M. BACKS, County Clerk of Orange County, California, and ex-Officio Clerk of the Board of Supervisors of said County.

A. U. W. CO. PROCEEDINGS

The regular meeting of the board of directors of the Anaheim Union Water Company was held on July 3, with Directors Tuffrey, Anna, Holmes, Rust, Miller and Thomas present at roll call. The minutes of the last regular meeting were read and approved.

Upon motion duly seconded the following transfers of stock were granted: 6 shares M. L. Dickerman, pledge for H. R. White, to T. T. Turner; 5 shares J. H. Burson & Son to J. H. Burson.

Reports of the superintendent and treasurer read and upon motion accepted and ordered filed. Report of the finance committee read and upon motion accepted and warrants ordered drawn in payment of the various demands therein recommended.

Oil committee reported upon conditions on the Amalgamated lease and upon motion were granted more time and given permission to secure the services of Attorney Thomas in addition to Attorney Head.

The vault door committee granted more time. Gas engine committee granted more time.

It was moved by Holmes, seconded by Miller, superintendent instructed to fence the Gember tract.

The budget committee submitted a report and same was laid over until the next meeting.

Upon motion the request of Mr. Murphy for an adding machine was refused.

Letter read from William Loftus regarding the north line of the district. This was referred to the advisory committee.

Moved by Miller, seconded by Rust, superintendent instructed to connect up the gate which Mr. C. W. Bowen put in company measuring box.

Director Holmes reported on trip up the river with Engineer Kellogg for the purpose of making water measurements.

Upon motion the meeting was adjourned.

SUPERVISORS' PROCEEDINGS

Demands on the county of Orange
were allowed as read.

Anno Bell Bailey was appointed
county librarian for a term of 4 years
commencing August 1st.

The clerk was instructed to notify
J. H. Seale to appear before the board
on July 13th, at 10:00 a. m.

George McPhee was appointed county
sealer of weights and measures for
a term of 4 years.

Linn L. Shaw, harbor commissioner,
was granted a leave of absence from
the state for thirty days, commencing
July 7th, 1921.

The purchaser was instructed to
purchase a computing machine for the
county assessor.

No bids being received for the \$20,-
000 bonds of the Bay City school dis-
trict, the matter was continued to July
12th, 1921, at 11 a. m.

The county engineer was directed to
prepare plans and specifications for
the improvement of Seventeenth street
from Prospect avenue to the Newport
road.

The petition of S. W. Price et al for
a county road 40 feet wide in the Sec-
ond district was granted.

Deed of right of way from John Stir-
rat et al was accepted, and declared a
public road.

Deed for right of way from C. R.
Vesper et al was accepted and declar-
ed a public road.

The petition of A. E. Christensen et
al to vacate and abandon a certain
public alley in the Third road district,
was set for hearing July 28, at 10 a.
m.

The petition of C. R. Vesper et al
to vacate and abandon certain public
alley in the Third road district, was
set for hearing July 26, 1921, at 10:00
a. m.

The petition of John Stirrat et al
to vacate and abandon a certain public
alley in the Third road district, was
set for hearing July 26, 1921, at 10:00
a. m.

Bids for the improvement of Seven-
teenth street bridge, Second road dis-
trict, will be received up to 11 a. m.,
July 26, 1921, at the office of the coun-
ty clerk and then publicly opened.

South Glenside, Fairhaven street and
Grand avenue in the Fourth road dis-
trict, as improved by Steele Finley,
was accepted.

Concrete oil pits, as improved by
Chris. McNeill, contractor, was accept-
ed.

Resolution was passed creating of-
fices in the county engineer's depart-
ment, and fixing salaries.

The board adjourned to July 12, 1921,
at 10:00 a. m.

CULINARY TEMPERAMENT

"Charley, dear" said Young Mrs.
Torkins, "the new cook is going to
leave unless your quit playing the
phonograph."

"Yes. But she says those jazz re-
cords set so rapid a tempo she forgets
herself and works three or four times
as fast as her wages call for."—Wash-
ington Star.

The best pickpocket, do not take
your money in a crowd but they come
right into your office, where you are
alone and tell you to "sign on the dot-
ted line."

DON'T BE MISLED

Anaheim Citizens Should Read and
Heed This Advice.

Kidney trouble is dangerous and of-
ten fatal.

Don't experiment with something
new and untried.

Use a tested kidney remedy.

Begin with Doan's Kidney Pills.

Anaheim citizen's statement
forms convincing proof.

It's local testimony—it can be in-
vestigated.

Mrs. G. Click, 411 N. Philadelphia St.,
Anaheim, says: "I am glad to recom-
mend Doan's Kidney Pills for I know
they will do what is claimed for them.

My kidneys were weak and inactive.
I felt dull and languid and my back
was weak and lame. Doan's Kidney
Pills had been used in my family for
years so I decided to try them. Doan's
cured me from all signs of kidney com-
plaint."

Price 60c, at all dealers. Don't
simply ask for a kidney remedy—get
Doan's Kidney Pills—the same that
Mrs. Click had. Foster-Milburn Co.,
Mfrs., Buffalo, N. Y.

WHAT HE PREFERRED

"And did you say you preferred
charges against this man?" asked the
judge, looking over his gold-rimmed
spectacles.

"No, Your Honor," was the quick re-
ply of the man to whom money was
owed: "I prefer the cash!"—Yonkers
Statesman.

ANAHEIM CITRUS FRUIT ASSO-
CIATION

Notice of Stockholders' Meeting to
Consider Increase of Capital Stock.

Notice is hereby given that in pur-
sue of the resolution and order of the
board of directors of Anaheim Citrus
Fruit Association, organized and
existing under the laws of the State
of California, unanimously adopted
at a regular meeting of said board
held on the 1st day of July, 1921,
at the principal place of business of
said corporation, to-wit: At No. 150
East Santa Ana Street, in the City of
Anaheim, County of Orange, State of
California, a meeting of the stockhold-
ers of said corporation is hereby called
for and will be held at the principal
place of business of said corporation,
to-wit: At No. 150 East Santa Ana
Street, in the City of Anaheim, County
of Orange, State of California, on Fri-
day, the 15th day of September, 1921,
at 2 o'clock P. M., for the purpose of
considering and acting upon the pro-
position to increase the capital stock
of said corporation from \$50,000.00
divided into 50,000 shares of the par
value of \$1.00 each, to \$500,000.00,
divided into 500,000 shares of the par
value of \$1.00 each.

By order of the board of directors.
Dated July 1, 1921.

W. H. SCHUREMAN,
Secretary of Anaheim Citrus Fruit As-
sociation.
7-7-Sept 15

NOTICE TO CREDITORS

Estate of James M. Cornelius, De-
ceased.

Notice is hereby given, by the un-
dersigned, administratrix of the estate
of James M. Cornelius, deceased, to the
creditors of and all persons having
claims against the said deceased to
file them with the necessary vouchers
in the office of the clerk of the superi-
or Court of the County of Orange,
State of California, or to exhibit the
same with the necessary vouchers, to
the said administratrix at her place
of business, at the office of Ames & Mc-
Fadden, at Suite No. 2, Odd Fellows
Building, at No. 133 West Center
street, in the City of Anaheim, in the
County of Orange, within ten months
after the first publication of this notice.

Dated this 7th day of July, 1921.

ADA L. CORNELIUS,
Administratrix of the Estate of James
M. Cornelius, Deceased.

you of this summons—if it is served
within the city and County, township
or city in which this action is brought;
but within ten days if it is served out
of said township or city; but in the
County in which the action is brought;
and within twenty days if served else-
where.

And you are hereby notified that un-
less you so appear and answer as
above required, the said Plaintiff will
take judgment for any money or dam-
ages demanded in the Complaint, as
arising upon contract or said Plaintiff
will apply to the Court for the relief
demanded in the complaint.

Given, under my hand this 3rd day
of May, 1921.

J. S. HOWARD,
Justice of the Peace of said Township,
ROGER C. DUTTON,
Attorney for Plaintiff,
Anaheim, Calif.

DO NOT
Hold America Back

Be one of the over Six Million who are real American Home Own-
ers.

If you need a home its time to build now; make a start today, se-
cure your lot on favorable terms, or start a "Home-Saving Fund" in the
Savings Bank or Home Saving Association.

If you have a Home, and have idle capital help others to secure
homes by giving them a life—for a real American Home is the best se-
curity you can hope to find upon which to loan your savings.

If you do not wish to be troubled with the details of making such a
loan, our Building Loan Associations will look after these matters
through their organization for you.

ENCOURAGE OTHERS TO MAKE THE BEST INVESTMENT IN
LIFE.

FULLERTON UNDERTAKER
 MUST ANSWER QUESTIONS

Charged County for the Burial of an
 Overseas Soldier

J. E. Seale, Fullerton undertaker, has been cited to appear before the board of supervisors to answer questions concerning a demand for \$75 filed by him for the burial of an overseas soldier, whose body was recently brought from France and buried at Fullerton.

The supervisors want to know why the claim of \$75 should have been filed with the county when the federal government pays the entire expenses of the transportation of the body and of the funeral.

The information received by the county officials is that the federal government makes an allowance of \$100 for the expense from the time the body arrives at the station until interment is made.

The claim of \$75 presented to the county was made by the Fullerton undertaker under a state law that has been in operation for a number of years. This law provides that when any former soldier, sailor or marine of the United States dies an indigent, the county shall provide proper burial. Burial must not be in a pauper lot. The charge against the county under the law must not be more than \$75.

In order to operate under this act, the board of supervisors must appoint somebody as its agent or inspector. This agent must file with the board of supervisors with the claim of the undertaker a statement certifying that the soldier, sailor or marine died an indigent.

In the case of the overseas soldier recently buried at Fullerton, a statement was filed by O. V. Knowlton, of Fullerton, who is the agent named by the board of supervisors, to the effect that the soldier died without funds.

The claim was referred by the board of supervisors to County Aid Commissioner W. S. Gregg for a report.

In the case of the overseas soldier, Gregg's report will doubtless show that the government allowance of \$100 was more than ample for all expenses of the funeral, and moreover that the overseas soldier was not to be classed and never should have been classed as an indigent. While he may have died leaving no property of his own, his parents were able to pay the expense of burial had the government not made provision in this case, as it does in all other cases of the return of the bodies of overseas men.

BOY HIT BY HAND-CAR

Ramon Zuniga, 9-year-old Mexican, is confined at the county hospital with serious injuries sustained when he was struck by a Pacific Electric hand-car at Stanton about 5 o'clock Thursday evening. According to Dr. H. E. Zaiser, the boy has cuts and bruises all over his body, but no bones are broken. Zuniga was herding cattle along the Pacific Electric right of way when he lay down on the track and fell asleep. The hand-car which struck him did not run over him, but dragged him along the track for several feet.

There were four men on the hand-car and none of them saw the boy before he was struck. All were operating the hand power lever and had their faces toward the floor of the car. The men were returning to their homes after a day's work and did not expect to find a boy asleep on the track.

Nearly all of the clothing was stripped from the boy's body. He was lacerated from his head to his feet and unconscious when brought to the county hospital.

According to Dr. Zaiser, he will recover.

County Engineer J. L. McBride is drawing plans and specifications for two new pieces of pavement in Orange county. One piece of pavement will be built on Seventeenth street between Prospect avenue and Newport road, to be paid out of the fifth supervisorial district funds. Bids for concrete base and also for asphaltic concrete will be called for. The second piece of pavement is on North street between Pleasant avenue northeast of Anaheim, and a point three-fourths of a mile south of the Richfield station of the Santa Fe. The length of the pavement planned is three miles. It is to be paid for through a road improvement district including the Golden State tract. Asphaltic concrete is to be used.

INTERESTING TRIP EAST

George Bauer, of Anaheim, and Albert Wintter, of Fullerton, returned July 12, from their auto trip through some of the western, eastern and southern states and Canada, having traveled 8682 miles on the round trip. In Ohio and Indiana they visited with relatives. Mount Vernon, Va., Baltimore, Philadelphia, New York, Buffalo, Niagara Falls, Detroit, Toledo, Indianapolis, Columbus and St. Louis were among the places visited. A 200-mile run into Canada from Niagara Falls to Sarnia, Canada, and across the river to Michigan, was also enjoyed. They left Anaheim on April 24, accompanied by Lester Stuber, who remains at his home near La Fontaine, Indiana. Bauer and Wintter left the latter place on June 27 for their home trip, returning by way of Illinois, Iowa, Nebraska, Wyoming, Utah and Nevada. They visited Lake Tahoe and enjoyed the Sierra highway ride to Placerville, Calif., through the Tierras. The trip continued to Sacramento and Oakland, and they visited relatives at San Francisco, returning home by way of Fresno and the Ridge route on to Pasadena, Fullerton and Anaheim.

The start of the Pacific-Atlantic trip from Anaheim, Cajon pass, and on to Arizona, New Mexico, Louisiana, At Shreveport, Louisiana, the party was deterred from going to New Orleans on account of floods in the southern states, and they returned to Texas, going thence to Oklahoma, Kansas, Missouri, Illinois, Indiana, Ohio, West Virginia and Maryland to Washington, D. C.

NURSES GRADUATE

Exercises that were both beautiful and impressive marked the graduation of Katharine Kottler, of Tustin, and Miss Ruth Kottler, of Garden Grove, from the nurses' training school of the Orange county hospital. The exercises were held in the hospital chapel Wednesday evening of last week. The chapel was beautifully decorated in Harding blue crepe paper and with yellow and white flowers, class colors are Harding blue and yellow.

The program included songs by Mrs. F. W. Slabaugh, prayer by C. C. Collins, talks by Dr. F. W. Slabaugh and Dr. Albert K. Zaiser, the presentation of diplomas by Miss Beatrice Grant, matron of the hospital. Following the exercises at the chapel, a luncheon was served at the nurses' home near the hospital.

The training received by students at the county hospital is thorough and along varied lines. Dr. Zaiser, superintendent, and Miss Grant, matron, are exceptionally well qualified, by disposition as well as training, as instructors.

The graduation of Miss Pohndorf and Miss Kottler leaves room for the enrollment of new student nurses at the hospital. These young women have finished three-year student courses. The nurses starting now will be enabled to graduate in two years and eight months, a new state law having shortened the course for student nurses at the county hospital.

CELEBRATES ANNIVERSARY

Celebrating its first anniversary by issuing a special edition of sixty-four pages, including an eight-page rotary section, the Breckenridge Daily American, of Breckenridge, Tex., has established one of the most remarkable records in the history of American newspapers.

Copies of the anniversary number of this enterprising Texas daily, which first appeared on June 30, 1920, as a four-page sheet, have been received here. The paper, which is now equipped with the latest type presses and served by the Associated Press and other press syndicates, was founded by Thomas L. Baxter, who is a former editor of the Brea Free Press, published in the Fullerton oil fields.

The Daily American began publication opportunistically with the development of oil drilling activities in and around Breckenridge, which from a community of 1836 persons in 1920, now boasts of a population of 27,000.

Mr. Baxter sold his interest in the paper to a corporation headed by Emil Edward Hurja, who directs the daily's policies, as editor and general manager.

Audubon Valjean, a former newspaper man of this city, is on the editorial staff of the American.

BAND CONCERT

Following is the concert to be given at the city park tonight:
 March—Lakesonian, Lake.
 Overture—Morning, Noon and Night in Vienna, Supp.
 Popular—Blue Jean, Fox; Bright Eyes, W. B. Snyder; Palestine, Bernstein.
 Caprice—Humoresque, Dvorak.
 Fantasia—Hungarian, Tóbal.
 Patrol—Guard Mount, Ellenberg.
 Selection—The Spring Maid, Reinhardt.
 Star Spangled Banner.

Nearly 68 per cent of current government expenditures grow directly out of the cost of American participation in the world war Wilson kept us out of. Twenty-five per cent more is used in keeping up an army and navy as a means of preparedness against possible future wars to which the lamentable failure of President Wilson to bring about an actual decision for disarmament at the peace conference leaves us exposed. Yet the Democratic politicians and all the mindless thinkers who take their outcry seriously are complaining because the Harding administration has not yet brought governmental expenditures down to the old Republican pre-war level.

The beaches, and other points of interest on the Fourth of July were made available to 6550 persons by operation of the Crown stage lines, according to figures on the number of passengers carried given out by A. B. Watson, owner. The fifty-three buses and cars in operation today covered a distance of 10,150 miles and consumed 862 gallons of gasoline. Not one passenger was injured and no property damage was sustained by the stage line during the rush day. Every station was cleared by midnight, evidence of considerable interest in the festivities desiring to celebrate the day at a point distant from home. The number of passengers carried was more than twice the number transported a year ago. The service to the increased number was given with only six cars more than were in use on the Fourth in 1920. Special schedules were made effective for the one day.

SALT LAKE LINE LOOMS NEARER

Construction operations in completion of the building of the Salt Lake branch from Pioche station to Santa Ana was believed near at hand, following announcement that the Union Pacific, which recently acquired the Salt Lake railroad properties, is preparing to expend \$50,000,000 in extending and improving the Salt Lake system.

Considerable interest is attached to the announcement that Carl R. Gray, president of the Union Pacific, and other officials of the company are scheduled to visit Santa Ana.

Gray is in the southland looking over the field and it is said that he has been so impressed with the possibilities of development of big industrial plants in southern California that he is prepared to recommend an extensive program of expansion of the Union Pacific lines and operations.

It is said that the company proposes standardization of the Salt Lake in accordance with the equipment of the Union Pacific system. Ninety pound

rails will be laid and a complete connection with the Union Pacific will be made.

The Union Pacific is credited with coming through the war period with a fairly creditable balance in its treasury and it is said that the directors were prepared to lay out a program of expenditure beyond the \$5,000,000 limit, but the interstate commerce commission blue-penciled some of the proposed improvements and extensions.

G. G. HIGH SCHOOL

R. B. Richey, J. O. Arkley, William Lendhart, S. Ohmar and Henry Hickman will serve as the first board of trustees for the Garden Grove high school district of the district at the election held at Garden Grove Monday.

It is said there is talk now of holding an election in the near future to vote bonds for the erection of permanent high school buildings, instead of levying a special tax to raise funds for a temporary building.

It is believed that possibly some of the grammar school rooms can be used for the coming fall term, which will make it possible for the district to arrange for providing permanent buildings.

With plans under way for the grammar school district of Bolea and Almiton, joining with Garden Grove in a union high school district, it is probable that no definite action will be taken by Garden Grove district in providing permanent buildings until after an expression of voters in the other districts has been obtained on the proposed union district.

MEXICAN BADLY HURT

Francisco Aguilar, 37, Mexican, is believed to be dying at the county hospital of pneumonia and other complications which developed following an accident late Saturday night in which he was badly hurt. Dr. H. E. Zaiser said that the man's recovery was not expected.

Aguilar and another Mexican whose name has not been learned by the authorities were riding in a buggy on Myrtle boulevard between Flores and Catalina street, Los Angeles, late Saturday when their rig was struck by an automobile driven by Felix Stoppe, of Los Alamitos.

The accident to Stoppe there was no fault on his part, the possibility of lights on the buggy and it was being driven on the wrong side of the highway. He says he did not see the vehicle until he was almost upon it and had no time to avoid a collision.

Both Mexicans were thrown from the buggy. Aguilar sustained a deep cut in his forehead and internal injuries.

The S. Q. R. Store

Judge J. S. Howard and family spent Sunday at Huntington Beach.

E. J. Horsley and C. W. Brakeman and their wives have returned from an outing at Yosemite.

Miss Gladys Head spent a day or two the latter part of the week visiting friends at Long Beach.

John Cook and family have moved to Laguna Beach, where they will enjoy the ocean breezes during the next two or three weeks.

Dr. and Mrs. Leander Stark were visiting with Mayor William Stark and family Sunday.

W. A. Dolan and family drove up to Hollywood Sunday and spent the day with Mr. Dolan's parents.

Officer O. B. Baxter is having a vacation and he and his wife have gone to Bishop to spend several days.

Mrs. Max Junge and daughter, Miss Margaret Junge, came down from Fresno Monday on a visit to friends.

Mrs. Louis Kroeger is at Anaheim Landing, where she will spend a couple of weeks.

Mr. and Mrs. Frank Tausch and Mr. and Mrs. Al Nowotny went out to the Modjeska ranch Sunday and spent the day.

Mr. and Mrs. F. W. Schmidt and family and Mrs. Will Lavelly and children visited in Los Angeles Sunday.

Constable A. W. Wood left the latter part of the week with Emil Crespin, whom he placed safely behind the gates of San Quentin penitentiary.

Leo Porter has returned from Elmore hot springs, where he remained several weeks taking the baths. He is recovering from serious illness consequent upon being bitten by a pet dog a month or more ago. His many friends are delighted to hear of his recovery.

The jury which tried Dr. Philip Dudley, chiropractor of Orange, charged in superior court with practicing a mode of treatment without a state medical license, failed to agree last Thursday, and the trial will come up again. This is the third time a jury has hung in the prosecution of a chiropractor.

G. M. Simpson has returned from Kingman, Arizona, where he has been to investigate conditions at the Standard Mineral company, a concern made up mostly of Anaheim residents. Simpson announced that the difficulties have been made on the property which will make the mines the greatest producers of molybdenite in the world.

There being no league game scheduled for last Sunday, the Anaheim Elks baseball team proceeded to trounce the American Legion team from Los Angeles to the tune of seven to five. The Legion team is a good one and put up a stiff game. Next Sunday there will be a league game on the Fullerton grounds between Anaheim and San Bernardino. Hughes will be on the mound for the locals.

"The apollis system is beginning to get in its fangs at Washington," walls the Columbia (S. C.) Record. To create a few hundred thousand new jobs and fill them with deserving Democrats is the "merit system," to appoint an occasional Republican to a federal office is the "spoils system." In the view of a hard boiled Democratic organ in a state where a Republican who even tries to vote is in danger of tar and feathers.

Two hundred Anaheim Elks are expected to be in the great parade at Los Angeles today, and the Anaheim Municipal band will lead them. Dozens of bands will be in the line, but none will make better music than ours. There will be hundreds of lodges in the long procession, but none will be more imposing than No. 1346. No doubt the boys will bring a lot of eastern visitors down to show them what a real live town looks like.

Jose Rey, 18, a native of Luzon, was sentenced to the Preston school of industry at Ione, where he is to remain until June 14, 1924. Judge West denied Rey's application for probation, but it is understood that he is to be released into court again for further orders. Rey is alleged to have robbed the E. K. Benchley home at Fullerton of several hundred dollars' worth of clothing and jewelry, which he sent to a friend in New York city. Probation Officer Paul Wright has succeeded in recovering most of the loot on information furnished him by Rey.

The Commercial Hotel company of Fullerton is functioning, following its capitalization for \$200,000, with C. C. Chapman, well known orange grower, as president; F. C. Keane, prominent banker as vice president; J. C. Thamer as treasurer and Dan O'Hanlon as secretary. A stock selling committee was named which it is understood will sell between \$60,000 and \$75,000 worth of stock. Of this amount \$30,000 worth has already been sold. C. C. Chapman taking \$25,000 and R. E. Durkin the remainder. Durkin, it is understood, will lease the new hotel for ten years and will pay for his lease 14 per cent of the building cost.

Contractor E. G. Schenck, of Fullerton, has commenced the work of excavating for the basement of an eight-room, two-story dwelling on West Orangehorpe avenue for J. A. Schulte, prominent pioneer orange grower of the avenue. The house will be a frame structure with tile on the outside covered with stucco, and will be elegantly finished on the interior, the living room and dining room in quartered oak, the den in red gum, and the remainder of the house in ivory and white. Contracts now let on the building aggregate about \$15,000. Mr. Schenck is also just completing a six room stucco building on the corner of himself and a five room building on W. Whitting for Mr. Zhold.

W. E. Atkins, editor of the Brea Progress, died at a hospital in that city Wednesday evening of tuberculosis. Mr. Atkins came to California a year ago, hoping to benefit his health. He gave up his work and entered the hospital only a few hours before his death.

An election for directors of the Chamber of Commerce is now in progress. Ballots have been mailed to all members, and each is supposed to vote for twelve directors and return the ballot to the secretary by tomorrow night. A constitution and set of by-laws was adopted at a meeting of the high school auditorium Monday night.

L. B. Weber left on Saturday for a five weeks' sojourn in Alaska and other northern points. During his absence his book and music store will be under the management of Miss Kantling. This is Mr. Weber's first vacation for a long time and he looks forward with anticipations of great pleasure to meeting his relatives in the north and making a tour of Alaska.

Burglars Monday evening looted the place of Alfred Hansen at Hansen station and carried off a centrifugal pump, weighing 1000 pounds, 34 feet of ten-inch suction pipe, with several elbows, and pipe fittings. This is the third time the pump house has been looted within a short time. In making his report to the sheriff Tuesday, Mr. Hansen said that the only thing left in the pump house is a gas engine and he expects that to disappear in a week or two.

After having been arrested twice in Los Angeles on their wedding day and paying a fine because they said they were from Orange county, Mr. and Mrs. Julian Allee returned to Placentia Friday from their honeymoon trip to Yosemite valley, having had no more serious mishaps than one blowout on the entire trip. The couple spent a week at Camp Curry, visited Bridalveil falls, Inspiration Point, Glacier Point, and Mariposa grove, and carried on a conversation in Spanish with the aged Indian woman, Yosemite Lucy, who is now 119 years old.

Allice Huba and Sue Amack, Anaheim chiropractors, who are serving terms in the county jail, will soon be released. Miss Huba's term expires July 20, and Miss Amack will be released five days later. Both declare their jail sentence has not altered their determination to continue their practice and both say they will keep up their offices, when released. Both wish to thank their many friends for kindness shown them during their jail terms. They have received scores of letters commending their stand, and patients have visited them almost daily.

Charles Peltzer recently returned from Reno county, Kansas, his former home. He makes an annual pilgrimage to the Sunflower state to look after his extensive ranch. This year only 280 acres of wheat was grown on his ranch, but the yield is splendid, the average being 30 or 35 bushels per acre. Mr. Peltzer said one of the interesting spectacles he witnessed was a number of growers hauling last year's wheat crop to market at \$1.15 per bushel, the same wheat they had refused \$2.75 for the previous year. The farmers, it appears, entered into a combine, and signed an agreement to hold their wheat until they were offered three dollars a bushel for it.

Emil Crespin, who pleaded guilty to the charge of assaulting Mrs. Blanche Staley, near the Presbyterian church on the night of June 9, was sentenced by Judge West Thursday to San Quentin for a period of not less than one, nor more, than fourteen years. Crespin is 23 years of age, and has a wife and small child.

According to word received by District Attorney A. P. Nelson, attorneys for the Birch Oil company will appear before the county board of equalization today. It is understood that the Birch company will make its usual annual fight against the assessment figures as fixed by County Assessor Jas. Sleeper. The Birch assessment this year totals \$1,153,045 as against \$884,376 last year.

Justice Howard, of Anaheim, presided in Justice French's court at Fullerton Friday. Solie Falkenstein, who was taken off a train while on his way from Los Angeles to San Bernardino, was arraigned on a charge of evading railroad fare and was given twenty days in the county jail. Claude Ellison and Jack O'Brien, in court on a similar charge, were given a 30-day sentence, suspended on condition that they pay their fare to their destination.

County Sealer of Weights and Measures George McPhee has been reappointed to his office for a period of four years by the county board of supervisors. This marks the beginning of McPhee's third term of four years. The supervisors expressed themselves as being thoroughly satisfied with the manner in which McPhee conducts his office. A letter, from Charles F. Hayden, chief deputy sealer of weights and measures, at Sacramento, recommending McPhee for reappointment, was read to the board of supervisors.

Bids were opened Thursday for the construction of the new Zion Lutheran church which is to be located at the corner of Emily and Chartres streets. Of four bids submitted, the lowest came from A. H. Pibel. His was for \$44,016. It was stated that the congregation of the church numbered about 250, has already subscribed \$25,000. There are many prominent and prosperous members among the congregation and no trouble is expected in raising the remainder. The new church is to be a combination of gothic and mission style of architecture, about 100 feet in dimensions. The main auditorium will have a seating capacity of 650. There will be fifteen other rooms with a basement. A large pipe organ will also be a feature.

The board of supervisors Tuesday awarded to Frank Hudson the contract for the construction of one of the most important bridges designed for Orange county, the span over the Santa Ana river at a point near Olive. Hudson's bid was \$44,009.80. It was accompanied by a certified check for \$2,177.50. Other bids came from the following firms: Mercereau bridge and construction company, \$52,318; W. M. Leadbetter, \$44,183; West Coast Construction company, \$45,511.02; C. McNeill, \$51,835; E. T. Wheeler company, \$48,512.50, and S. M. Kearns, \$48,512.50. The bid for the construction of the ball road went to Contractor Oglesby, who bid \$7,390.80. Other bids were submitted by Wells and Bressler, \$9,252, and B. R. Ford, \$8,217.60.

Really transactions are becoming more numerous at Buena Park and there is much activity in evidence. Mrs. Allen reports the sale of a house and lot on Tenth street from Mr. and Mrs. Calvin Ledford to Mr. and Mrs. Claire Miller. Also the sale of two lots in the Ritter sub-division to Mr. and Mrs. S. Y. Porter, of Huntington Beach. Mrs. Allen has purchased the house and garage recently built by Mr. Ritter on the same sub-division. Mrs. Allen and M. S. Nuttall have purchased the house and one acre of Carl Gifford, who moved to Whittier. Acreage in the Fobb sub-division is moving rapidly. Sam Little has purchased one acre and S. Compton four acres. Messrs. Coombs and Nunes, of Taft, have just purchased two and six-tenths acres.

Capt. Victor Schumacher, who lives in Fullerton, but spends a considerable portion of his time in Anaheim, was in the city Monday greeting old friends. The captain is one of the old timers of this neighborhood, having come here in 1887. At the time of his first visit here he was captain of police in Chicago, and his prospect of soon becoming chief of the Windy City's police force was very bright. But a two months' leave of absence caused his undoing as a peace officer. He came to California in search of his vacation, fell in love with the county, purchased a ten-acre ranch on East Commonwealth avenue, resigned his job as captain and his future prospects of being head of the police department, and became an enthusiastic Californian. He made his ranch one of the show places of this neighborhood, but sold it four years ago and moved to Fullerton.

Falkenstein's

An action brought by N. M. Durkee, Anaheim realtor, against E. Walter Pyne, the National Bank and Trust company of Pasadena, the Richfield United Oil company and others to clear title to certain oil properties in the Richfield district was on file in the superior court Monday. Durkee also seeks to compel the delivery of certain oil stock said to be illegally held by Pyne. In the complaint it is alleged that Pyne obtained possession of oil rights in an illegal manner. He is said to have joined several persons in a plan whereby certain property was leased to the bank and through which he made a secret profit on the deal. The complaint asks that Pyne be required to account for and pay Durkee all benefits received in the alleged venture. An order of the court, decreeing that Durkee is the owner of capital stock involved in the litigation is requested.

A deal involving millions and of considerable local interest is announced. The adjoining mining properties in Sonora of Charles C. Chapman, of Fullerton, and Frederick C. Emery have been consolidated under one management as the Aztec Consolidated Mining Co. The announcement disclosed a mining deal of great importance for the group of mines, takes in virtually all of the known minerals in an area of 200 square miles, forming one of the largest mine holdings in America. There are some 40 distinct mines of gold, silver, copper, lead, mica, manganese and vanadium in the group. Mr. Emery will be president and general manager of the company, and C. Stanley Chapman, of Fullerton, son of Charles C. Chapman, will be a member of the board of directors. He has just returned from an inspection trip. H. N. Wells, of Los Angeles, who recently inspected the properties and had much to do with the consolidation, will also be a director. The company will have headquarters in the Charles C. Chapman building, Los Angeles.

Anahim Gazette, fifty-two weeks for \$1.50.

WANTED TO RENT—A small stand for conducting a card-writing business. Must be separated from other business. In a doorway of some vacant building will do if no other place is open for rent. Location to draw attention. State price. Write A. T. Soderstrom, Los Angeles, Gen. Del.

WANTED—Lady canvasser to sell useful novelties for women and men. Will give sole agency. For particulars, write under J. R., Anaheim Gazette.

FOR SALE—Two year old budded Valencia orange trees, cheap. First-class stock; will bear ready for setting out. Inquire of J. Chevalier or at office of W. R. Johnson, Baldwin Park, Calif.

FOR SALE—Peaches and Plums, 4 1/2 and 5c a pound at the ranch. A. G. Smith, East Stanford street, Garden Grove.

\$7000.00 to estate L. Nemetz, 10-room house, 60-foot front N. Olive; corner lot, garage, cemented cellar; fruit trees, chicken yards and house, 124 N. Olive street.

WANTED—Salesmen for 6000 miles guaranteed tires. Salary \$100.00 weekly with extra commissions. Cowan Tire & Rubber Co., Box 784, Chicago, Ill.

FOR SALE—Beet pulp at our silo at Los Alamitos. Los Alamitos Sugar company.

LOST—Friday, May 20, brown leather bag; name inside: Mrs. E. B. Haus, St. Paul, Minn. Reward if returned to Hotel Rossini, Los Angeles. Get den State Auto Co.

FOR SALE—Beet Pulp at reduced prices. Sliced pulp \$3.00 per ton with usual discount of \$1.00 per ton to our best growers. Los Alamitos Sugar company.

Man to Man!

SPEAKING of the way we do business:

It's a man's business all the way through: from the time one of the clerks shows you a new idea in cuff-links, until the time another man understands your idea of a suit that's becoming

And it's "Man to man" when something goes wrong. No big store stuff for ours. We do it friendly-like and quickly.

"By All Means Get a Fit."

F. A. YUNGBLUTH

The Home of Hart, Schaffner & Marx Clothes

LEARNING CONSERVATION

Greatest of all our natural resources and most zealously to be safeguarded and preserved is the water supply of southern California. When all other resources have been exploited, even perhaps foolishly squandered, there will still remain a glorious future for the growers' paradise of the Pacific, providing its water resources are harbored and intelligently utilized. For with water, the desert is made to blossom as the rose, without its life-giving presence, all the elaborate plantings of man would wither, leaving the land the forbidden region it was before the advent of the hardy pioneers. The matchless development of the past quarter century, which has made southern California what it is, and admiration of the rest of the world has been indisputably tied up with development and utilization of water for irrigation purposes. Two hundred thousand acres of ever beautiful orange and lemon orchards, 50,000 acres of state and private, and equal acreage of deciduous fruits, and countless acres of field and truck crops, the backbone of the prosperity of southern California, depend absolutely upon the availability of irrigation water.

And who can prophesy the future? The beginning has but been made. But we should remember, and must remember, one fact—the future development, as has that of the past, will be continued by the conservation and the efficient use of irrigation water. Little worth while is to be had without effort—that is certain—and it was foreseen, defined of nature that southern California should be great. The water supply of this great empire is not illimitable. If maximum development is to occur here, it will necessitate the fullest possible utilization of this, our greatest resource.

This is the day of conservation. It might almost be called the day of our economic awakening along agricultural lines. The past year has seen the clearest demonstration of the growing realization of the necessity of water conservation in the launching of a number of stupendous projects for the harboring of the precious irrigation supplies of the southwest. The Marshall plan for the irrigation of the great interior valleys, called visionary by many, at least reveals the hold that conservation ideas have upon the public realization of the Colorado river, with the placing under irrigation of countless thousands of acres of virgin soil, between a public realization of the waste of water and power resources allowed through neglect of this great stream. The San Gabriel reservoir project, designed to effectively solve the flood problem of the greater part of Los Angeles county, while at the same time saving valuable water for irrigation purposes, has attracted the widest interest.

The past three or four years of deficient rainfall have very definitely indicated that the wasteful use of thumb methods of applying water in use by many farmers and fruit growers must be abandoned in favor of intelligent use of water applied in the most approved way and at the right time. Over hundreds of acres of drought injury has occurred, due in many instances not to inadequate amounts applied, but to lack of intelligent timing, and therefore entirely preventable. Lowering water tables over large areas and the cutting down of stream flow have also emphasized the necessity for efficient methods of application as well as greater development of supplies. Add to these, increased costs of water due to higher power rates, higher water scales, greater lifts and other causes, and there exist many and sufficient reasons for farmers and fruit growers to be much more alive to irrigation problems, than ever before. And that they are alert to the situation is clearly evident from the rapid developments in irrigation knowledge and practice made during the past year or two by growers, manufacturers of irrigation equipment, and by investigators, official and private.

Perhaps the principal advance in irrigation science made by investigators during the past two or three years is the demonstration of the beneficial results from winter irrigation in the prevention of certain sorts of winter fruit injury, in the production of heavier yields and in the production of a better quality product. It has been demonstrated that a deficient soil moisture supply the latter half of the growing season, when the fruit buds for the next season's crops are being formed, is the cause of weak fruit bud formation, with a consequent failure to set, and mature maximum crops the following season. It has also been shown, however, that too much water during this period may keep the trees growing so late as to be susceptible to winter frosts and, in addition, decrease the likelihood of a good crop, due to the depletion of plant food reserves.

Again it has been shown that a bone-dry soil during the late fall months before the growth has fully ripened results in death or serious injury to much of the tender new growth from desiccation. It has further been demonstrated that the only time to thoroughly wet a dry subsoil is during the winter months, it being practically impossible to do so during the growing season, when even if possible, it would be attended with serious drawbacks and even dangers to the health of the trees. Winter irrigation has been found to materially improve both the size and quality of most of the fruits grown here. In short, the application of water during the winter months has been found to be a matter of great importance and fully as complicated as vitally important summer irrigation.

Improvement in pumps and the engines that operate them has been constant for years, until today machinery of this character may be had of every size and for every use. The finding of a suitable pumping equipment where it is necessary to lift underground water is easy, thanks to the study given the subject by the best engineering minds in the land. It is the same with valves, gates and other appliances used in irrigation.

One of the developments on the part of irrigation equipment manufacturers during the year or two has been the demonstration of the enormous variability in concrete irrigation pipe, much of which, it has been shown, is leaky and comparatively short lived. A concrete pipe, especially during the late growing season and in early spring, are of the greatest importance, in assuring size and quality in the nuts, and in the development of strong fruit buds for the next season's crop. Moreover, ample irrigation water has been shown to do much to offset the work of aphid, and to result in a much thicker and heavier yielding tree, as well as preventing winter drought effects, so prevalent the past two or three years. As the walnut is a deep-rooted tree, it is necessary to hold the water on walnut orchards longer than on crops with citrus or deciduous, in order to allow deeper penetration. Water should penetrate not less than eight feet in order to properly supply the needs of the walnut, and ten feet is better.

Methods of application include the furrow system and ridge basins, the latter being perhaps the most used plan.

In conclusion, it may be said that the wasteful use of irrigation water must be abandoned, not only because it is economically impossible to continue it, but (in many regions) for an additional reason—the filling of the soil at lower levels resulting in the raising of the water table with the inevitable accompaniment of alkali accumulation. Thousands of acres of once fertile soils in southern California are today barren waste, due to the careless and wasteful use of irrigation water on the higher lands nearby. And the solution to the problem of reclaiming these lands, drainage, will involve the expenditure of large amounts of money and must and will take years to be effected.

A NEW COVER CROP

Much interest is being displayed in the California trials of a new "annual white sweet clover" discovered in the greenhouses of the agricultural experiment station at Ames, Iowa, and later proven to be native to Alabama, together with the mining state. This new form seems to be a mutant or sport. It has been tried on the Pacific coast at various points and the roots have lived through the past winter and made new tops. It is doubtless biennial, perhaps triennial. Farm Advisor Hodgson, of Los Angeles county, says he has placed it in about ten different localities and that it is growing vigorously at each station. The Iowa state college says:

"The new Hubam clover has surpassed all previous records in the many tests made with it during the past year. When the Iowa station first announced the discovery of this clover in 1916 it was the statement that it had made the remarkable growth of 4 1/2 feet in 3 1/2 months from seedling, while medium red clover and common sweet clover grown in comparison and under exactly the same conditions measured 5 inches and 14 inches respectively. Many tests, from Maryland to Oregon, showed growths of from 6 to 8 feet in 1918, while the past season the clover grew 9 feet high in 3 1/2 months, or just twice the growth reported by the Iowa station. Growth of from 7 to 10 feet have been reported from nearly every state and many foreign countries."

"A seeding of Hubam made in New York on June 1 of last year measured exactly 108 inches (9 feet) in 103 days (3 months and 13 days) from the first seeding. When the Iowa station first announced the discovery of this clover in 1916 it was the statement that it had made the remarkable growth of 4 1/2 feet in 3 1/2 months from seedling, while medium red clover and common sweet clover grown in comparison and under exactly the same conditions measured 5 inches and 14 inches respectively. Many tests, from Maryland to Oregon, showed growths of from 6 to 8 feet in 1918, while the past season the clover grew 9 feet high in 3 1/2 months, or just twice the growth reported by the Iowa station. Growth of from 7 to 10 feet have been reported from nearly every state and many foreign countries."

"While we may not want a 10 foot clover for hay, and how might have some difficulty in getting the tender topmost leaves, the vigor of the growths reported gives some idea of the possibilities of the plant for green manure, pasture and honey production. Grown under crowded field conditions, the clover makes a much finer growth and may furnish two cuttings

of hay or an abundance of highly nutritious pasture for such animals as cattle, horses or sheep.

It is the remarkably rapid and vigorous growth made by this clover in only one of the many interesting demonstrations of the year. When seeded with small grain at Ames it produced six times the growth of medium red and mammoth clover and three times that of the bicolor clover, sweet clover, or following the removal of the small grain crop. When seeded broadcast on a weedy and poorly prepared seedbed the last of May it overcame the weeds, made a growth of 5 1/2 to 7 feet and matured a seed crop.

"The drought resistant qualities of the clover are reported from several states as remarkable. In one instance, without irrigation and with less than one inch of rainfall after the clover was seeded, it grew to a height of 7 feet and showed no ill effect of the drought when all other vegetation perished in the worst drought experienced since 1882.

"The growth when carefully measured has often averaged over 1 1/2 inches per day, with a maximum under greenhouse conditions of 2 1/2 inches in 15 hours.

"The best seed setting character is indicated by seed spikes which have measured 20 inches in length. Planted in rows 3 feet apart the seed yields have average 5 to 8 bushels per acre, while with closely spaced growths the yield has run over 10 bushels per acre of clean, well developed seed.

"While Hubam clover has gained many friends the past year, the most uniformly enthusiastic group of men are the bee keepers. The most widely read and oldest bee journal in the United States carried extensive discussions of its merits, with many illustrations, in eight of the twelve issues of the year 1920."

MORE CAREFUL THINKING; LESS RECKLESS TALKING

Abuse of congress seems to be the favorite indoor sport at present of most of those who feel called upon to abuse somebody. Congress is cursed because it failed, within a three months' session, to rehabilitate an economic, political and industrial structure well nigh wrecked by an administration recently relieved from duty. The noisier of the denouncers of the slow progress made by the wrecking crew are the very politicians who caused the wreck. They are seconded by numerous thoughtless talkers and writers who do not stop to give consideration either to the cause of the test, or to the consequences of the test. Finding immediate remedies for the evils and abuses to be cured.

Congress is also being denounced by federal functionaries who do not get all they want by way of appropriations or authorization to pad present payrolls or create new ones. The custom of denunciation of the legislative branch of government by administrative office holders was one which flourished under the Wilson administration. It was a phase of that reckless and irresponsible spirit of authority which has cost the American people so much in recent years, and which the voters by an impressive majority, rebuked in November last.

The greatest disservice that can be rendered the American people at this time is thoughtless denunciation of the national legislature, which has even been bitterly criticized because, as the appropriating power, it performed a worn duty in investigating the criminal waste of the people's money by executive agents under the last national administration.

It is to be expected of Democratic politicians and newspaper editors that they will pick every possible flaw in the Republican record. Let those who have no partisan interest in the campaign to discredit the administration, particularly the legislative branch, remember that the violent, contemptuous and unreasonable attacks now being made upon congress will have the effect of fanning the flames of revolutionary radicalism that is very likely to be the alternative to which the people of this country will turn if they become convinced that the attacks made upon congress have justified justification.

Congress has halted the legislative and administrative program which had put this country on the high road to bankruptcy and state socialism. It has thwarted the attempt to involve this country in the political system of Europe, and thereby prevented the violent and reckless financial, political and economic disaster and probable permanent change in the very character of our institutions. In harmony with the executive branch of government it is doing its very best to reduce expenditures, decrease taxes and safeguard the future of American industry that the condition of depression and unemployment, inherited from the Wilson era may be corrected at the earliest possible moment. For all this it is entitled to the commendation and assistance of all those honestly interested in the welfare of the administration and of the American people.

Those who are trying to throw monkey wrenches into the machinery and are adding their voices to the clamor

being raised by those who wish the Harding administration to fail, ought to be greeted by the thought that what they are really doing is helping to push the country down the hell bent road of state socialism, with all its attendant features of confiscation, expropriation and complete ruin of everything for which the American system of government has always stood. This is the practical state of the case, no matter what its theoretical phases may be.

THE HOUSING PROBLEM

We hear a lot these arid days about the housing shortage. A problem no one thought of in the whiskey, beer and pot age.

The reason seems quite evident. To one who is a victim of landlords and John Barleycorn, each one of whom has licked him.

How well do I remember when (preceding prohibition) All men to bar-rooms did repair For alcoholic ignition.

But nowadays, a man's first thought is of his "smoke and collar." That is, of course, if he should be a residential dweller.

And so, 'tis plain, this general And urgent need for houses: The bar-room patrons of the past Are now home-loving souls.

NO DOUBT ABOUT IT

Walter found his mamma talking to a very stout woman.

"Walter," said his mother, "this is your greatest enemy. He is a very stout woman. 'Yes,' said Walter, gazing at her ample proportions, 'she looks like a—Houseton Post."

ORANGE COUNTY BUSINESS COLLEGE

Santa Ana, California

Enrollments now active for our fall term. We can train you in a few months for a good position paying from \$15 to \$150 a month. The year's greatest need is for men of great. Salaries were never so high. We cannot fill half the positions placed at our disposal. We must have more students this year to place the wheels of business moving. Ask today for our FREE catalogue. SOUTHERN COUNTIES GAS COMPANY OF CALIFORNIA

Offers Its Preferred Stock—an 8 Per Cent Investment
For California investors this stock is unusually attractive, offering both security of investment, assurance of fixed income at an attractive rate, and other advantages of especial interest.

1. Security of Investment.

(a) The company supplies an every day necessity. Its business is, therefore, inherently stable. Its earnings have increased in every single year of the company's history.

Numbers of Consumers June 30, 1912 6,573
Numbers of Consumers June 30, 1921 77,470
Gain 70,897
Gross business 1912..... \$ 176,815.36
*Gross business 1921..... \$3,382,575.83
Gain \$3,166,760.47
*Twelve months to May 31, 1921.

(b) The company's growth has increased continuously throughout its existence.
Number of miles of mains as of December 31, 1913 201.32
Number of miles of mains as of May 31, 1921 1,285.75
Increase 1,084.75
Cubic feet of gas sold year ending June 30, 1912 136,204,710
Cubic feet of gas sold year ending May 31, 1921 6,187,062,390
Increase of 4440 per cent over sales of 1912.

(c) Field of operation unexcelled. Supplies for twelve cities in the counties of Orange, Los Angeles, San Bernardino, Ventura, and Santa Barbara and adjacent territory. It reaches and supplies the richest agricultural and rural territory of California, and the most rapidly growing urban and interurban portions of the state.

(d) Sources of gas supply. Its lines connect with and its system (except Santa Barbara) is supplied from all of the substantial gas-producing fields in Southern California, assuring a permanency and continuity of supply of gas of unexcelled quality so long as natural gas is available. The extent and character of these gas-producing fields afford a most unusual, as well as secure, source of supply for many years to come. The company's system is designed so that the change from a natural gas to an artificial gas system can be readily effected, and as when the natural gas supply diminishes, without loss to the company or interruption of service.

(e) Operation by trained organization. The management of the company has long experience, and its ability is unquestioned. The company enjoys the confidence and good-will of the people whom it serves and its experienced district managers are familiar with the local needs and requirements of the territory served.

A continuous eight per cent return upon your investment makes this stock a most attractive form of investment. Dividends \$8.00 per share per annum, payable at the rate of \$2.00 every three months, by check mailed direct to the stockholders.

Price: \$99.00 per share if purchased outright and \$100.00 per share if paid in installments. Orders may be placed or further information obtained at any district office of the company, or at MAIN OFFICE.

11th Floor Corporation Bldg.,
724 So. Spring Street, Los Angeles, California.

FOUR YEARS' EARNINGS

Available for on \$1,250,000 Paid

1921 as of May 31st..... 7,620,447.69

(h) Equity behind preferred stock. The value of the tangible property of the company, including the proceeds from the sale of this stock after deducting bonded and all other indebtedness, leaves an equity of approximately \$171.92 per share behind this issue of stock.

(i) Supervision by Railroad Commission of California. Supervision by the Railroad Commission of California is a factor of safety which constantly operates to protect the interests of both stockholders and company. The issuance of this preferred stock has been authorized by the State Railroad Commission of California.

2. Special Advantages

(a) An immediate direct return of eight per cent per annum is received by the investor in this stock.
(b) Interest at eight per cent per annum, payable quarterly, upon all installment payments upon purchase price, giving the investor an eight per cent return upon his money from the very beginning.
(c) This issue of \$1,250,000.00 preferred stock is the only preferred stock issued by the company.
(d) Free from all state, county and municipal taxes in California except inheritance taxes.
(e) Exempt from normal federal income tax.
(f) Dividends paid directly to you four times a year—January 15, April 15, July 15 and October 15.
(g) Investment may be made in any amount from one share upward.
(h) Payments can be made in ten equal installments if desired.
(i) The development of the community served by the company will be aided by your investment in this stock.

(j) Information regarding the company is available at all times to stockholders.

NOTES ABOUT THE OIL FIELDS

Items of Interest Gleaned From Southern California's Producing Fields and Progress Made.

At Buena Park the Petroleum Midway is making good time drilling. Benet No. 1, at 2350 feet the formation is sand brown shale and the digging is excellent.

The Lessors' Oil company, a new concern in this new field, has put up a rig on property six miles west of Anaheim. Local capital is behind the Lessors' Oil company. Drilling is scheduled to begin soon.

The Standard is making splendid progress on its Garden Grove wildcat. Drilling is now at 2400 feet and formation changes are being closely watched.

The California-Oregon Development company is a new concern that made its appearance on the Palmes ranch, 2 1/2 miles west of the Standard. Oil company in Garden Grove well. The rig is now in process of construction.

The first real mishap of any consequence struck the Westminster Oil company at 3100 feet. At 3000 feet the drilling out of cement was quickly done, and going on to 3100 feet a string of tools was lost in the hole. The loss of the tools presents a rather difficult job, but it is not believed that the drilling will be held up very long.

Falling to get a complete shut-off on what was believed to be intermediate water the Placencia Pacific has recommended its well. The cementing was done on bottom and will test conclusively the source of the water.

The Richfield United Oil company No. 1, drilled to 2240 feet and completed about three weeks ago, has settled down to a 200-barrel run. The production is running 20 gravity and is cutting .15 of 1 per cent, making it rank with the element wells in the field. Preparations are being made to start a second well.

The Petroleum Development company has developed three producing wells on the Bradford property at Richfield. Bradford No. 3, drilled to 4117 feet, is making 240 barrels. Bradford No. 4, drilled to 4100 feet, is producing about 150 barrels. Bradford No. 5, the deep well of the lease, is down 4255 and flowing 125 barrels.

Bradford No. 2 is being rigged up to proceed with the rotary at 3865. Bradford No. 4 stands cemented at 4010. Bradford Community No. 1, at 4550, is in shell and shows only faint oil indications.

Richfield No. 2 is drilling in gray sand at 3200, and Richfield No. 3 is a new well building rig.

The Pullerton Oil company's Anaheim Union No. 1 is taking on some of the appearance of a gusher. New hole is being made in the sand shale at 4675 feet. The gas pressure has so greatly increased at this depth that some difficulty is being experienced in holding the well down. Every indication now points to a Kraemer gusher. For the Pullerton Oil company at Anaheim Union No. 1. It will probably be the biggest deep producer in the Richfield district. Superintendent Daily is watching it closely.

On drilling out the cement and making a water test the Richfield-Giant found that its 4200-foot well contained a little water. It will be only a matter of a few days until the water is located and cemented off. Richfield-Giant officials do not believe the delay will amount to very much. The well has been showing very good.

The Wonder Co., Ltd., continues its record breaking drilling at Kraemer home place No. 2. Last week's work shows 700 feet drilled. It is understood that the Reed roller bit is responsible for the fast time that is being made. No. 1 still stands at 1200 barrels and is also making a record for consistent production.

The Union Oil company will soon increase the Chapman lease production with another well. Chapman No. 5 is re-drilling at 3850 feet, less than 100 feet off bottom. The re-drilling is in oil sand and the well is getting into shape rapidly.

No. 10 shows 3200 feet of hole; No. 11 is ready to test water at 3034 feet. Hard sand at 3225 feet in No. 12 resulted in the cable tools being put back. No. 14 is drilling at 2000 feet; Nos. 18 and 19 are getting under way fast and are close to 2000 feet deep; Nos. 15 and 16 and 20 are rigged up. On the Thompson-Goodwin lease No. 3 is rigged up and No. 4 shows 2450 feet drilled.

J. W. Newell No. 3 is drilling at 3400 feet, and No. 4 stands rigged up.

On the Towell lease No. 4 is the drilling well at 3100 feet in shale. McFadden Nos. 2 and 3 are drilling wells.

Dickson No. 1 is now at 3900 feet in gray sand and shows but little oil. Morse No. 3 at 3250 feet looks like another nice well. No. 5 is also in the oil sand at 3450 feet.

Coyte & Bogie No. 1 is nearing production at 4095 feet in oil sand.

Yorba No. 1, drilling at 3750 feet in gray sand, shows little encouragement. Placencia Pacific No. 1 is held with a 6 1/2 inch bit at 1600 feet.

Avers and Parsons No. 2 is in the oil sand at 2975 feet.

Yorba Linda group has two wells drilled. No. 1 at 2975 feet in hard sand, and No. 2, drilling at 3235 feet, shows shale and shell.

Chapman No. 6, the Union's premier producer, is making 2675 barrels daily. The next big producer is Chapman No. 2, doing 1300 barrels.

The Clark Oil company's Wetzel No. 1, drilling at 3865, is showing some oil in the shale. About a year ago the well was drilled to 4115 and showed very little indications. It appears that the rotary might have passed up something in the original drilling.

Satisfied that going on would be a needless expenditure, the Union Oil company is abandoning San Juan Capistrano at 4835 feet. From 4000 feet on the formation showed nothing but a reddish brown shale. The only showing of any importance was a little gas struck between 3200 and 3500 feet. The well was drilled with an electric motor and cable tools. The attempt to find oil at San Juan cost the Union close to \$100,000.

In spite of the water troubles, sanding up and other difficulties that have attended almost every well that has come into production at Huntington Beach, the development work is going ahead stronger than ever.

He gives the following brief resume on points of economy which he says should be practiced by every grower if he is to get the maximum efficiency: "First: Economy in irrigation. In many of our heavier loam soils, excessive quantities of water are being used. By the use of the soil auger one may examine the moisture content of the root zone and determine if water is necessary. Oftentimes 60 or 90 day intervals are sufficient, provided proper irrigation is given between applications.

"Second: A careful study should be made of ranch horsepower, to determine whether to use the tractor or horse. The tractor has its place in the general orchard routine for heavy work, but must be used in a hurry, such as deep plowing in the early spring. There is a great deal of light work which may well be performed with the horse more economically. Orchard management companies have been organized in a number of citrus districts to do custom tractor work and horse labor. Where this organization is co-operative the expense of orchard tillage may be kept down to a minimum. The one factor which must not be overlooked, on the other hand, is that the various operations be done on time.

"Third: Fertilizing. The expense of heavy judicious applications of barnyard manure or organic fertilizers may be economical from a production point of view. If one can make his trees produce 400 boxes to the acre by supplying 75 worth of barnyard manure where he has only got 100 boxes without manure, such expense would be economical.

"Fourth: Liming. If the soil lacks lime—and such soils are scarce in Orange county—an application of good time will accelerate the availability of certain plant foods that soil which must be turned under another economical feature. Be sure your soil needs lime, however. Thousands of dollars have been wasted in useless applications of lime where no benefits will accrue.

"Fifth: Pruning should be conservative. Thinning out and spacing and pruning all dead wood should be practiced as a practice of the past. This applies to lemons as well as oranges.

"Sixth: Pest control. It is false economy to cut down on efficient fumigation. By proper control of insect pests the tree is able to yield a good crop, where otherwise the number of boxes is cut down appreciably. Money spent for good fumigation is an economical spray for the control of scale insects have proven expensive, when the kill is taken into consideration and the quality of fruit.

"In conclusion, it is economy to increase the productivity of the normal tree by giving it proper fertilization and keeping the pests in control. This may mean a greater cost 'per acre' but a less cost 'per box.'

"To the investment hazard, because of the inevitable damage to oil wells and the oil field itself which comes from congested drilling. Experienced oil operators are having great difficulty in properly excluding unexpected water sands in this field in order to get producing wells.

"The management of concerns whose principal energies are directed toward the realization of quick returns from the sale of stock, cannot indefinitely circumvent these conditions of fact. The Huntington Beach oil pool existed long before town lots were laid out. The management of concerns who pool should be made the theater of stock speculation, instead of normal oil field development.

"Experience of normal development in California shows that an oil well, in order to be a going concern, should have an allotment of at least five acres from which it can draw oil with a minimum amount of interference. Oil wells are normally operated for profit, and it is fair to assume that, if greater profit could be made, by drilling wells closer together than is now the practice in developed fields, they would be so drilled.

"In the Huntington Beach oil field it requires anywhere from ten to seventy-five town lots, dependent upon their size, to make the equivalent of a minimum five acre normal oil well. Many holdings fall far short of this minimum area."

MUST STOP LEAKS

Injudicious management of orange and lemon groves is responsible for leaks that absorb much of the profit of citrus fruit growing, in the opinion of H. E. Wahlberg, farm advisor.

After careful investigations and observations since he took hold of the local office, he advises that careful check be kept on the cost of horsepower with a view to determining which is the more expensive, tractor or horse.

Per box cost, he declares, should be the basis of operation, and not the per acre cost, his point being that if manure costs \$75 an acre and its use increases production 400 boxes per acre where formerly only 100 boxes were gathered, the manure would be more economical than commercial fertilizer if the latter did not produce results in proportion to the barnyard fertilizer.

He declares that while the climate and soil conditions of Orange county are conducive to better returns of oranges than obtain in most orange growing sections, the cost of production has mounted very high on the average.

"There as a good many leaks in the upkeep of the grove which may be entirely or partially stopped by judicious management," said Wahlberg.

He gives the following brief resume on points of economy which he says should be practiced by every grower if he is to get the maximum efficiency: "First: Economy in irrigation. In many of our heavier loam soils, excessive quantities of water are being used. By the use of the soil auger one may examine the moisture content of the root zone and determine if water is necessary. Oftentimes 60 or 90 day intervals are sufficient, provided proper irrigation is given between applications.

"Second: A careful study should be made of ranch horsepower, to determine whether to use the tractor or horse. The tractor has its place in the general orchard routine for heavy work, but must be used in a hurry, such as deep plowing in the early spring. There is a great deal of light work which may well be performed with the horse more economically. Orchard management companies have been organized in a number of citrus districts to do custom tractor work and horse labor. Where this organization is co-operative the expense of orchard tillage may be kept down to a minimum. The one factor which must not be overlooked, on the other hand, is that the various operations be done on time.

"Third: Fertilizing. The expense of heavy judicious applications of barnyard manure or organic fertilizers may be economical from a production point of view. NOTICE OF SALE OF REAL ESTATE

In the Superior Court of the State of California, in and for the County of Orange.

In the Matter of the Estate of Frank Thiry, Deceased. Notice of Administrator's Sale of Real Estate at Private Sale.

Notice is hereby given that the undersigned, the administrator with the will annexed of the estate of Frank Thiry, Deceased, will sell at private sale, to the highest bidder, upon the terms and conditions hereinafter mentioned, and subject to confirmation by the Superior Court of Orange, on or after the 11th day of July, 1921, all the right, title and interest, in and to the estate of the said Frank Thiry, Deceased, at the time of his death, and all the right, title and interest that the said estate has, by operation of law, or otherwise, required, other than or in addition to that of said deceased, at the time of his death, of, in, and to those certain lots, pieces, or parcels of real estate, lying and being in the City of Anaheim, County of Orange, State of California, and more particularly described as follows, to-wit:

Lots Twenty-four (24) and Twenty-five (25) of Block "A" of the "Laird Subdivision," as per map recorded in Book 5, page 12 of Miscellaneous Maps, Records of Orange County, California.

Terms and conditions of sale: Cash, in full coin of the United States; 10 per cent of the purchase price to be paid at the time of sale; balance on confirmation of sale. Deeds and abstracts at the expense of the purchaser. The purchaser to assume the payment of, and take, the property purchased by him subject to, all the state and county taxes, and all assessments of whatsoever name and nature, which are now or may become hereafter due and payable on or against the property purchased by him.

All bids, or offers must be in writing, and may be left at the office of Wm. P. Webb, Jr., attorney for said administrator, at Suite 4, Odd Fellows' Bldg., in the City of Anaheim, County of Orange, State of California, or may be delivered to said administrator personally, at Number 413 South Melrose street, in the City of Anaheim, County of Orange, State of California, or may be filed in the office of the Clerk of this Court, at any time after the first publication of this notice and before the closing of the sale. The above described property will be sold as a whole, and bids must be made and will be received accordingly.

Dated, this 22nd day of June, 1921.

HATTIE DUGAS, Administrator with the will annexed of the estate of Frank Thiry, Deceased.

Address, 413 South Melrose Street, Anaheim, California.

WM. P. WEBB, JR., Attorney for Administrator. Address, Suite 4, Odd Fellows' Bldg., Anaheim, California.

NOTICE OF CO-PARTNERSHIP

The undersigned, George E. Diehl and Joseph W. Diehl, do hereby certify that they are co-partners engaged in business together in transacting and carrying on the business of conducting and managing a certain hotel in the City of Anaheim, County of Orange, California, known and designated as the Hotel Valencia, under the name and style of "DIEHL BROS.," that the principal place of business of said co-partners is at the Hotel Valencia, at No. 182 West Center Street, in the City of Anaheim, Orange County, California, and that the undersigned, George E. Diehl and Joseph W. Diehl, are all of the members of said co-partnership and that their places of residence are respectively as follows, to-wit:

George E. Diehl, No. 118 North Helena Street, Anaheim, Orange County, California.

Joseph W. Diehl, No. 118 North Helena Street, Anaheim, Orange County, California.

GEORGE E. DIEHL, JOSEPH W. DIEHL.

Dated this 9th day of April, 1921.

State of California, County of Orange.

On this 9th day of April, in the year of our Lord one thousand and nine hundred and twenty-one, before me, Homer G. Ames, a Notary Public, in and for said county and state, residing therein, duly commissioned and sworn, personally appeared George E. Diehl and Joseph W. Diehl, known to me to be the persons described in and whose names are subscribed to the annexed instrument, and they acknowledged to me that they executed the same.

In Witness Whereof, I have hereunto set my hand and affixed my official seal, the day and year in this certificate first above written.

HOMER G. AMES, Notary Public in and for said County and State.

CERTIFICATE OF TRANSACTING BUSINESS UNDER A FICTITIOUS NAME

I, the undersigned, do hereby certify that I am transacting a general electrical business, under the name and style of Anaheim Electric Company; that the principal place of said business is at 209 West Center Street, in Anaheim, Orange County, and that my residence is at No. 325 Blue Place in San Pedro, Los Angeles, California.

In witness whereof I have hereunto set my hand this 20th day of May, 1921.

CHAS. W. WALSWORTH.

State of California, County of Los Angeles, SS.

On this 20th day of May, A. D. 1921, before me, a Notary Public in and for said County and State, residing therein, duly commissioned and sworn, personally appeared Charles W. Walsworth, known to me to be the person whose name is subscribed to the within instrument, and acknowledged to me that he executed the same.

In witness whereof I have hereunto set my hand and affixed my official seal the day and year in this certificate first above written.

C. H. HAMLIN, Notary Public, Los Angeles County, California.

CERTIFICATE OF CO-PARTNERS TRANSACTING BUSINESS UNDER FICTITIOUS NAME

The undersigned, Henry M. Adams, Addison C. Bowers, Elmer L. Bowers, do hereby certify that they are co-partners engaged in the business of buying, selling, vending and dealing in lumber, lath, ash, doors, windows, lime, cement, roofing materials and other building materials, and conducting a planing mill under the name or designation of Adams-Bowers Lumber Co.

That the office and principal place of business of said co-partnership is in the City of Anaheim, County of Orange, State of California.

That the names in full of all of the members of said co-partnership and their places of residence are respectively as follows:

Henry M. Adams, 417 S. Los Angeles St., Anaheim, Orange County, California.

Addison C. Bowers, 1401 North Main St., Santa Ana, Orange County, California.

Elmer L. Bowers, 116 East Washington St., Santa Ana, Orange County, California.

WITNESS our hands this 17th day of May, A. D. 1921.

HENRY M. ADAMS, ADDISON C. BOWERS, ELMER L. BOWERS

State of California, County of Orange, SS.

On this 17th day of May, A. D. 1921, before me, Homer G. Ames, a Notary Public in and for the County of Orange, State of California, residing therein, duly commissioned and sworn, personally appeared Henry M. Adams, Addison C. Bowers, and Elmer L. Bowers, known to me as the persons described in and whose names are subscribed to the within instrument, and they acknowledged to me that they executed the same.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed my official seal, the day and year in this certificate first above written.

MOTORISTS TO BE SERVED
SATURDAY AFTERNOONS

One Garage to Be Kept Open in Each of County's Cities

"Service for the public." This is the motto of the California Automobile Trades association and is being exemplified by the Orange County Automobile Trades association.

It is being exemplified in the maintenance of service Saturday afternoons and Sundays for assistance to motorists who may find themselves in trouble when out on a vacation trip Saturday afternoon and Sunday.

Complete closing of garages Saturday afternoon and Sunday would work a hardship on motorists whose cars suddenly develop trouble, the local association members realize, and while having agreed to Saturday afternoon closing, they have arranged, in order to make service available, that one or two places in each of the larger cities of the county be kept open Saturday afternoon and Sundays.

The Motor Dealers' craft at its regular monthly meeting at the Blue Bird cafe in Anaheim Friday night went squarely on record as recognizing an obligation to the public in rendering service on the general closing days.

One man was appointed each for Santa Ana, Orange, Anaheim and Fullerton to see that such service is available.

The committee men will arrange service in their respective cities. Robert Brown was named for Santa Ana, John Knox for Orange, Harry Riley for Anaheim and E. F. Wickersheim for Fullerton. In those places where garages are not operated on the twenty-four hour schedule seven days a week, arrangements will be made for garage operators to alternate on the general closing days. Cards will be posted on the closed garages advising where service may be had.

In Santa Ana there are two garages that operate practically on the twenty-four hour schedule. They are the C. L. Davis garage and Cadillac garage. They will render the service for Santa Ana. Heavy repair work will not be done, but minor motor troubles will be taken care of.

Robert Atkinson, in retiring as chairman of the motor craft, having served for the past year, expressed his appreciation of the hearty co-operation given by the members to his efforts to make the craft meetings interesting and profitable in an exchange of opinions on problems confronting the craft.

He was given a sincere vote of thanks for the efficient manner in which he had conducted the affairs of the craft.

Bob White assumed the chairmanship and in a brief address in acceptance of the honor conferred on him by his fellow members, and suggested a number of things that he thought would advance the interests of the craft.

Next month's meeting will be held at Balboa, with Paul G. Hoffman, Studebaker distributor in Los Angeles, as a possible speaker.

Robert Brown was appointed a committee to make arrangements, if possible, with Hoffman to make an address on salesmanship.

CHILD ACCOMPANIES
MOTHER TO COUNTY JAIL

Mrs. Talbert Awaiting Trial for Beating Aged Woman

Too young to recognize the domicile in which she is residing for the time being, Miss Catherine Talbert, aged 2 years and six months, is a guest at the county jail pending the adjournment of her mother, Frances Talbert, 20, who is awaiting trial on the superior court here on a charge of brutally beating her benefactress, Mrs. Carrie A. Collins, of Seal Beach.

The little girl has won the hearts of several of the women prisoners in the jail. She has also brought cheer to Deputy Sheriff Theo. Lacy, Jr., and his assistants. She plays about the jail grounds, basking in the sunshine, and then goes back into the "hotel" to be with her mother again.

Frances Talbert who gives a preliminary hearing before Justice of the Peace G. M. Morrison, of Seal Beach, Wednesday, and bound over to the superior court. She is alleged to have thrown a couch cover over Mrs. Collings' head at 1 a. m., May 21, and then to have beaten her with a guest.

Mrs. Collings saved herself from possible death by pretending that she had been knocked unconscious. The girl, who is said to have been aided by a man whose identity the authorities have not learned, then permitted Mrs. Collings to fall to the floor.

A comment later Mrs. Collings tore the cover from her head. She saw the accused girl standing in the room with her in her arms. A man had been involved in the slugging he was not to be seen.

Mrs. Talbert was arrested in Los Angeles, July 25 by Sheriff C. E. Jackson.

A report that Mrs. Collings executed a will in the girl's favor several months ago, whereby the girl was to inherit all of the aged woman's property could not be verified. "The authorities" disclaim any knowledge of this.

A SUPERSTITIOUS INDIAN

Called as a witness in the case of Pascuala Hernandez, charged with disturbing the peace of Hickory and English streets in Santa Ana, Manuella Marino, an Indian woman, refused to testify because, she said, she had dreamed of a dead man.

All efforts on the part of Deputy District Roland Thompson, Charles C. Carillo, court house interpreter, and Justice of the Peace Cox to get the woman to testify proved futile. Justice Cox tried to get her to talk by pretending he would send her to jail, but that did not disturb her.

The complaining witness in the case was Juan Torres, the Mexican whom Justice Cox flogged with a whip Monday last week. He admitted beating his wife with the same whip and requested Cox to give him blow for blow.

Torres claimed that Pascuala Hernandez called him various insulting names and she retaliated by declaring that Torres had called her a "daughter of an end man in a minstrel show." It also appeared that Senorita Hernandez thought Torres was responsible for her husband lavishing his attentions on another woman.

Marqueita Torres, wife of the complaining witness, corroborated the testimony of her husband. She said that she heard the defendant use insulting language toward Torres.

As a side issue of the case, Deputy District Attorney Thompson decided to issue a warrant for the arrest of the defendant's husband, who has neglected to support her for several months.

Judge Cox dismissed the parties to the action after giving them a good lecture through the medium of Carillo.

STATES PROTECT ROADS
AGAINST OVERLOADING

Motor truck legislation designed to protect highways against overloading constituted the dominant feature in a number of state legislatures, the sessions of which have recently been concluded.

In Ohio one of the most bitter legislative fights of the session was held over the Burke act. This measure was opposed by commercial trucking interests and the governor ventured the suggestion that its terms were too severe, nevertheless he signed the bill when literally thousands of messages were sent to him asking for its approval.

Motorists in Ohio who favored this bill insisted that trucks were largely unregulated and the state tax they paid did not recompense for the damage done.

Under the Burke act, violators where possible are fined under local order where they can be taken immediately to court. Otherwise, overloaded trucks are ordered off the highways. So popular is this measure that it is said there will be literally thousands of volunteers to see that the statute is obeyed.

In Wisconsin the outstanding feature of a bill to regulate truck traffic is found in a proposed classification of roads under three heads.

Class A are high type roads, and the load limit is placed at twelve tons. California's load limit is fifteen tons.

For class B, the load limit is seven tons, and for class C, three and one-half tons.

Classification of roads is determined by the Wisconsin highway commission for the state highway system and by local authorities for local roads.

In Maryland, if a truck load exceeds the weight allowed under the statute, which is ten ton gross weight of vehicle and load, the driver is forced to unload the excess weight at once and leave such excess weight by the roadside or wherever he may be when the traffic officers discover the overweight.

Through the use of loadmeters, the necessity of taking a truck to a stationary scale is avoided.

AGRICULTURAL CLUBS
FINISH SUCCESSFUL YEAR

The coming of summer months and close of school for vacation time marks the close of agricultural club work in Orange county for this spring.

The boys' and girls' club work as a part of regular extension work at University of California, and co-operating with the United States department of agriculture, has been carried on locally by Assistant Farm Advisor J. R. Waters, through the county farm bureau.

Agricultural clubs are a means whereby the young person can profit from farming through actual practice in competitive groups. Thus the real object of such clubs is to capitalize for young people their work with crops and animals.

On October 23rd, last, eight boys and three girls organized a pig club in the Tustin community and each raised a pure-bred Duroc-Jersey barrow for the following four months. On March 5th the club showed their stock at the school grounds and prizes were given by merchants and farm center of

that district. The first prize winner was Iven Brown, who was guaranteed the expense of a trip to the university farm, Davis, next fall to attend the annual agricultural club convention. The next five contestants finished in the following order: Elmer Ritter, Marshall Lindsey, Alice McDougall, Byron Orr, Lydia Fields, and each was given a small prize.

A garden club was organized at Costa Mesa, December 28th, with seven boys and one girl growing winter vegetables. The club met at Billie Middleton's home and was officially closed Friday, July 8th. The contestants were all quite pleased with their project for this year. As this is a fast-growing poultry section it is very probable a poultry club will be organized next fall.

Six boys from Garden Grove grammar school entered a pig feeding contest, each starting with a pure-bred Poland China. The club closed on March 12th, and contestants finished in the following order: Lelley Smith, John Allan Fitz, Paul Doster, Emerson Stanley, James Parks.

The agricultural club movement was discussed in Cypress farm center and then presented at the grammar school. Four boys and three girls formed a pig club and started their four-acre race the last part of January. After hard work for one hundred and thirty-three days they closed their club and showed their porkers at the community picnic on June 4th. The first three contestants finished and were placed by the committee as follows: Robert Bingham, Colvert Stanford and Belle Kelly.

The progressive farmers of San Juan Capistrano who are affiliated with the farm bureau began to see the value of agricultural club work in various districts, and in co-operation with Club Leader Waters, presented the club movement to the school boys and girls. Thirteen students chose to form a pig club.

On July 2nd a big barbecue was staged for the entire community and the closing of the pig feeding race. The agricultural club committee—Aaron Buchheim, W. J. Galle and Frank Porter—made it possible for each of the club members to give a personal note at the First National bank for their stock. On July 6th the club visited the bank and each of the members paid off their notes in a business-like manner.

Two during the summer months have been made by the young swing growers to Diamond Bar hog ranch, at Spadra, California, to observe the methods of feeding and herd management. The Garden Grove club made a trip to the Irvine ranch in February and systems of planning, control of diseases and harvesting were explained.

Summing up the results of agricultural club work in Orange county the past year shows that it has interested many young people in the county and in each locality, a definite value has been placed upon this important educational movement. This work will be continued the coming year and it is hoped more communities will become interested.

FARM WOMEN MEET FRIDAY

County Delegation to Consider Home Department

A committee of three women from each farm center in the county has been appointed to meet at a county conference, Friday, July 15th, 10 a. m., at the farm bureau headquarters, Santa Ana, to consider the formation of a farm home department.

About forty representative women will be in attendance. For some time, the women from various centers have asked for demonstration work in farm home economics. The farm bureau women have felt that they have been overworked; that the many problems of the home offer a good field for extension work and demonstrations.

There has been considerable demand for dressmaking demonstrations, also millinery, dress forms, cooking, food preservation, home decoration, child feeding, home sanitation, etc. These can all be obtained through the organization of a farm home department of the farm bureau.

Miss Lillian Clark, demonstration leader from the university, will explain the farm home work to the women, who will probably recommend the decision to the board of directors of the farm bureau.

The directors will have a joint meeting with the women on Friday morning.

HELP WANTED

A motorist came upon another whose machine had broken down on the road. In the disabled car sat a woman.

"Need any assistance?" inquired the newcomer courteously.

The other man lifted his flushed and grimy face from under the hood. "Yes," he replied, "I wish you'd answer my wife's questions while I'm fixing this infernal engine.—Boston Transcript.

Men admire the screen vampires, but none has any ambition to pay the bills of one of them.

SEPTIC TANKS TO BE SHOWN

Many farmers are now provided with water pumping and storage systems so that modern sanitary conveniences such as kitchen sinks, bath and toilet tubs can be introduced into the home. The progressive farmer with the welfare of his family at heart must reckon with these matters—they mean better health, comfort and economy. How to get rid of the sewage when modern plumbing is installed in a country home is a most important problem. There is, as a rule, no community sewer system with which to connect; hence a special method of sewage disposal must be employed.

The most reliable and satisfactory means under such conditions is usually the septic tank method. The septic tank serves to receive the raw sewage from patent toilets, kitchen sinks and bath. The function of the septic tank is to liquify solid matter by discharging it from the toilets and partly to dewater the same. This can be satisfactorily accomplished by a home made septic tank. The septic tank must not be relied upon to purify the sewage. Typhoid bacteria should be disinfected before being disposed of in any open ditch. The effluent must be put into the septic tank, for the useful bacteria will thus also be destroyed.

The liquifaction of the soils is brought about by the action of immense numbers of bacteria which do their work when the oxygen of the air dissolved in the sewage, is used up. The liquifaction is best effected by confining the sewage in a special tank capable of holding the entire sewage from the house for eighteen to thirty-six hours, the tank being so arranged as to permit the solids to settle quietly to the bottom, where the bacteria can work on them.

The septic tank should be placed underground, partly to eliminate odors and partly to get it out of the way of animals, persons, etc. The tank should be placed at a distance of not less than 200 feet from the house, if possible, and an equal distance from the nearest well, spring, or stream, so as to avoid contamination in case of improper operation or leakage.

While there are several septic tanks in use in Orange county, comparatively little is known about them by the persons coming in immediate contact. In order to demonstrate the simplicity of the construction of these tanks, as well as the correct method of planning and building them, demonstrations of this will be held August 23rd and 24th.

Professor Bolton, of the agricultural engineering division, will, under the auspices of the Orange county farm bureau, conduct these demonstrations, which will show actually the construction of the forms, the planning of the tank, mixing the concrete, and all operations necessary for successful construction.

Any, and all persons, interested in this modern convenience, are invited to be present. Announcement of the location of these demonstrations will be made later.

HOME EVAPORATOR
DEMONSTRATIONS

Women Shown Methods of Evaporating Fruits, Vegetables and Meats

A return engagement has been arranged by Farm Advisor Wahlberg in answer to many requests for further demonstration meetings on the home evaporation of fruits, vegetables and meats.

Miss Lillian Clark, who conducted these demonstrations for Garden Grove and Buena Park farm centers some time ago, will return to repeat the work at Santa Ana, Friday afternoon, 2 p. m., at Birch Park, and Costa Mesa, Saturday morning, 10 a. m., at A. E. Black's residence. The method of building a simple drying box and the preparation of the food will be shown.

All women interested in this most economical preservation of foods are invited to attend these meetings. The women of Garden Grove and Buena Park came out in large numbers and were well pleased. As a result a number of evaporators are now operating in the homes of these districts.

WHAT, INDEED?

When the automobile first came in to furnish it caused considerable trouble in the rural districts because it frightened the horses on the public highways. Two small children were discussing this phase of the question one day.

"Why do you suppose horses are so scared of automobiles?" one asked the other.

"Well, it's like this, I guess," the other ventured to explain. "Horses are used to seeing other horses pulled, and they don't know what to think when they see a carriage going down the road without any horse hitched to it. What would you think if you saw a pair of pants walking down the street without any man in them?"—Progress Magazine.

WIRELESS MARKET SERVICE

POPULAR IN NEBRASKA

Nebraska has been quick to see the value of the radio information service sent out by the bureau of markets, United States department of agriculture, and various forces in the state are taking steps for increasing the facilities there for receiving and disseminating the news. The counties have organized and are receiving radio information with much satisfaction to both the trade and the producers.

The radio station at the state university at Lincoln is receiving the radio reports daily and supplying them to the state bureau of markets, which releases the information through the local press. The chief of the state bureau recently informed the Omaha office of the federal bureau of markets that there was a growing demand for the radio news, and that the state department of agriculture was contemplating organizing the state into three districts to distribute the information more quickly.
