Number 38

## ALL EYES TURNED ON E. CENTER STREET

WONDERFUL IMPROVEMENTS ARE  
SLATED FOR THAT THOROUGH-  
FARE THE COMING YEAR

New City Hall Will Be the Pride of Anaheim, and the Postoffice May Be Located Near It—Architect Preparing Plans for Samuel Kraemer's New Block—Possibility That Salt Lake Will Build Through and Build Its Depot During the Year.

Some weeks ago the scribe wandered out North Los Angeles street, and was so impressed with the wonderful building activity in that section of the city that he was constrained to write a story of the buildings under construction and the buildings in projection, as well as the new subdivisions being opened up and grabbed up by prospective builders. On a later occasion a stroll out West Center street convinced him that the west section of the city was just as active and enterprising as the northern section, and it was even money as to which was showing the greatest advancement or improvement.

As a matter of fact the sound of the saw and hammer is heard in every direction, but at the present writing all eyes are turned toward East Center street, and people are wondering what is going to happen on that thoroughfare during the coming year. Compared with the other three principal business sections, East Center has been lying dormant during the past two years, but it is awakening now, and lively times are anticipated in that fortunate thoroughfare during the next year.

Of course the most important of the new structures slated for East Center is the new city hall. After years of bickering, arguing and disputing the people finally voted \$15,000 for the city government and work will begin on it as soon as the bonds are disposed of. It will stand at the corner of South Claudia and Center, where the old city hall and the Hart building now stands. Seventy-five thousand dollars will build a beautiful structure, especially in brick. In the two old buildings will be used in it, and Samuel Kraemer will pay half the cost of the east wall.

Immediately adjoining this on the east the new Kraemer block will be built. This will be the largest business house in the city. It will extend from the city hall to the Southland hotel, and the ground floor is to be cut into four large store rooms. The upper story will either be office rooms or apartments. Mr. Eugene Durfee is drawing the plans now.

There is a persistent rumor that Arnold Kennedy is preparing to build a splendid business house on the valuable ground opposite the city hall at the corner of Emily and Center, which he purchased some time ago. Nothing definite is known as to his intentions, but it is said that he is preparing to erect a block that will overshadow his father's big building across the way.

Another building in this section that is a certainty is a business block which Loren Gates is going to build on the lot adjoining the Masonic temple, on the east. Mr. Gates just recently acquired these lots and will put up a two-story building with a fifty-foot front. It will contain two store rooms, one of which he will use himself, cutting a passageway between it and the room he now occupies in the Masonic building.

Tenants in the Rust building, between North Claudia and Los Angeles streets, have been notified to vacate the premises by the first of March, as it is the intention of the owners to put a fine two-story building on this ground, which is considered too valuable to be encumbered by a one-story building. The building is now occupied by McCullum's tea and coffee store, Dad Kennedy's Smoke House, and the Exchange furniture store, the Exchange people filling two rooms with their stock.

A couple of weeks ago William Falkenstein purchased the new Grand opera house, and there is considerable speculation as to what his ultimate intentions are with regard to the same. Mr. Falkenstein states, however, that he purchased the property as an investment, as it was a foregone conclusion

that property values on East Center were bound to advance, and he considered it a good buy. His present ambition is to merely give the people of the east side a first-class theatre.

Whether the postoffice will be located on the east or west side is a question at this writing which everybody is asking and nobody can answer. Bids for sites on both the east and west sides have been submitted and are being considered by postal authorities, and the decision will be made known probably within a day or two. Preponderance of opinion is that the east side will lose the office.

It is generally conceded throughout this section of the country that the Salt Lake railroad is preparing to build its extension on the right of way it purchased before the war put a stop to railroad building. The southwest corner of Center and Los Angeles streets was purchased by the road for its depot, and it was given out authoritatively that one of the finest depots in southern California would be erected on this site. Agents for the road have been through here recently, and there is a strong probability that work on the extension from Whittier to Santa Ana will begin shortly and that a beautiful new depot will be added to the architecture of East Center street, probably within a year.

## BOY SCOUTS RECUED FROM PERILOUS POSITION

Adventurous La Habra Youth Had a  
Narrow Escape From Death.

Pulled fifty feet by rope in the dark of night to the top of a precipice in Santiago canyon with a yawning slide of several hundred feet below them, Joe Masile and Fred Lindall, members of Troop I, La Habra Boy Scouts, are congratulating themselves on their rescue by Scout Commissioner S. J. Cornell, of Santa Ana.

Their rescue reveals a thrilling descent down the side of a steep canyon, up Cornell to where Masile and Lindall were clinging to the branches of a small tree, and a slow ascent to the top fifty feet above.

Masile and Lindall, who are in the party of county Boy Scouts encamped in Santiago canyon, started Saturday afternoon to climb Robber's peak, a mountain about a mile away from camp.

They lost the trail and believing they could find the way back to their camp, started to slide down the precipice which is not as steep near the top as it is farther below.

By the time they had slipped fifty feet they were able to catch hold of the trunk of a tree. Unable to move either way, the boys were forced to remain where they were with darkness forming about them.

Several other scouts, who were out on a reconnoitering trip and were returning to camp, heard the frightened shouts of Masile and Lindall and signalled to their camp by flash-lights from the top of the precipice.

Scout Commissioner Cornell and Scout Executive E. H. Hodel, realizing something was wrong, rushed to the ledge. A rope was tied tightly around Cornell and he was slowly lowered down the precipice while the scouts at the top held the end of the rope.

"I couldn't see five feet in front of me, it was so dark," said Cornell. "I had to judge where I was by the shouts of Masile and Lindall. I finally got to them and the scouts above pulled us up to the ledge."

## ELOPERS ACQUITTED

Testimony, brought out by the preliminary hearing of Soroco Gutierrez, Mexican, and his Spanish-American wife, Rosa Tinker, charged with perjury in swearing to a false affidavit in securing a marriage license at Santa Ana, showed that the girl was "eighteen when she worked" and "fifteen" when she was not.

The case was tried before Justice of the Peace Cox. It was full of surprises and peculiar angles. Judge Cox finally concluded that the girl did not know exactly how old she was at the time she procured a marriage license, and that her husband had no way of determining her age.

Mrs. Josephine Tinker, of Watts, formerly of Compton, swore to the complaint charging her daughter and Gutierrez with perjury. The couple secured a license, July 1 and were married by Judge Cox, following an deposition from the home of the young woman. Mrs. Tinker arrived in Santa Ana before dawn the following day on the trail of the couple. They were arrested several days later when they returned to Compton.

## ELECT OFFICERS CHAMBER OF COMMERCE

HARRY D. RILEY IS AGAIN CHOSEN  
HEAD OF THE BOOSTER  
ORGANIZATION

H. M. Adams and J. A. Claves, Vice-Presidents; Malcolm A. Fraser, Secretary; and H. H. Benjamin, Treasurer—Backs and Wallop Realign as Directors, Vic La Mont and George Ross Taking Their Places, Being Next Highest in Balloting.

The active management of the Anaheim Chamber of Commerce will continue during the coming year in the efficient hands of Harry D. Riley and Malcolm A. Fraser. The reelection of these gentlemen as president and secretary will give universal satisfaction to the four hundred members of the reconstructed chamber, as it is recognized a large part of the credit for the many things accomplished by that body during the past year is due to their activity and indefatigable labors.

The newly elected board of directors, the members of which were chosen at an election conducted by mail, met and organized at a luncheon held at the chambers Wednesday noon. The twelve men receiving the highest vote were H. M. Adams, H. A. Johnston, Harry D. Riley, W. T. Wallop, Leonard Evans, H. H. Benjamin, Charles E. Bygones, J. A. Claves, George Dunton, R. C. Berger, F. A. Backs, Jr., and J. P. Ahlborn. Fred Backs, who was treasurer during the past year, and Will Wallop, both tendered their resignations as members of the board, being unable to serve, owing to press of private business, and the next two highest on the poll, Vic La Mont and Geo. M. Ross, were declared elected as members.

In the election of officers Harry D. Riley was placed in nomination for chairman, and there was no opposing candidate. Mr. Riley did not want the job any longer, but being the unanimous choice of the directors, he accepted. He said: "I thank you for the honor, gentlemen, but I had much rather you had chosen someone else for the job. However, if it is your desire, I will accept, and do the very best I can, and will hope to have the full support of the board and the membership in carrying on the activities of the organization."

In the election of secretary the rules were suspended and the chair, instructed to cast a unanimous vote for Malcolm A. Fraser. H. M. Adams and J. A. Claves were elected vice-presidents, and H. H. Benjamin was chosen to take Mr. Backs' former job as custodian of the finances.

The chair was authorized to appoint a committee on budget and finances, committee on program of work, committee on committees, committee on incorporation, committee on membership and members' forum.

## ANOTHER GUSHER

Drilling operations at Huntington Beach were spurred on with the announcement that oil at the rate of more than 2000 barrels a day was now flowing from the E. J. Milroy well No. 1, which was brought in late Saturday afternoon at a depth of 2600 feet.

Indications were that the well was one of the best brought in at Huntington Beach. Examination showed the gravity of the oil to be 21, which was said to be extremely high when a well first produces. The gas pressure was 150 pounds.

The Milroy well is located on the Vista Del Mar tract, just on the east side of the railroad tracks, and approximately three blocks east of the subway.

It is the first well to produce as much as 2000 barrels a day in that district and the gravity is higher than any yet brought in there, it was said.

The well is owned by E. J. Milroy, well known oil operator, who has several other rigs either drilling or under construction and who, it is understood, plans shortly to extend his leases.

## CRISPIN SUSPECTED OF OTHER CRIMES

Believed to Be the Man Responsible  
for Attacking Women Here.

That Emil Crispin is the man who attacked women here for a year or more past is the opinion of Officer Carr, who obtained Crispin's confession at the county jail following his arrest on a charge of attacking Mrs. Slater some weeks ago. Carr believes that if he had been permitted to take Crispin to San Quentin he would have obtained from him confessions of the various attacks upon women which have occurred here. He was unable to get this assignment, although he was very desirous of trying to get other confessions from the convicted man. Carr secured a confession from Mike Group and the two brothers are now at San Quentin, Mike up for fifty years, and Emil for from one to fourteen. Carr has received the following letter from Emil Crispin:

San Quentin, Cal., July 12, 1921.  
Mr. O. K. Carr:  
I am up here now and don't know how long I will be here. I am only glad that I am paying for my mistake, and I am thankful you for the advice you gave me about confessing, in which I saved my money and also some of the county's money. You treated me like a brother, and also my wife. Now, Mr. Carr, my wife and my girl have nothing against you for you have done your duty as every officer should do. Have you seen my wife lately? If you do see her will you tell her that I wrote to you, thanking you for the advice you gave me, and also hoping to hear from you soon. Respect to Mr. Lucy and Joe, the jailer.  
Yours truly,  
EMIL CRISPIN,  
36128.

## ORANGE COUNTY FARM LABOR ASSOCIATION

Expected to Engage Labor for the  
Ranchers of the County

With an employment director engaged, directors of the Orange County Farm Labor association Saturday were directing efforts for the opening of an office in Santa Ana.

J. F. Jackson has been engaged to take charge of the office and direct its activities. He is ready to assume the responsibilities of the office. He was formerly with the Hummel Brothers agency in Los Angeles and was connected with railroad construction work as an employee of labor.

Final arrangements for starting operations of the office, were made at a meeting of the executive committee of the association Friday afternoon.

Directors and officers of the association are D. Myman Huff, manager of the Hewitt estate at El Modena, president; C. V. Newman, manager of the San Joaquin Fruit company, vice-president; W. J. Cheney, bean grower and a director of the Lima Bean Growers' association, secretary-treasurer; W. Jackson, manager of the Irvine ranch; C. A. Johnson, Orange county manager of the Holly Sugar corporation; Harry W. Lewis, president of the Santa Ana Walnut growers' association; Dr. I. G. McBeth, manager of the Bastanchury ranch at Fullerton; John Osterman, rancher of El Toro; Hugh T. Thompson, prominent citrus grower of Villa Park, and C. L. Crumrine, manager of the La Habra Citrus association.

Organization of the association has been under discussion for two months, having originated with the farm bureau, following successful institution of an association in Ventura county.

The association is organized and supported by the large ranch owners, grower associations and packing houses which are largely employers of labor.

Jackson will at once make a survey of the county, gathering data as to labor requirements of the farmers. This is to be compiled for ready reference and when he has this data in hand he will be in position to place labor as the needs of employers develop.

There will be no charge to laborers for placing them in positions. The purpose is to develop a source of labor supply when help is needed by agricultural interests.

The association will be in close touch with similar organizations throughout the southland, having complete and definite information on the labor requirements and supply at the various points.

## MOVE STARTED FOR MEDICAL INSTITUTE

CRIPPLED CHILDREN'S RELIEF AS-  
SOCIATION STARTS CAMPAIGN  
FOR CHARITABLE FUND

Want to Raise Ten Thousand Dollars for Treatment of Crippled and Deformed Children Whose Parents Are Not Able to Pay—The Johnston-Wickett Clinic Offers Medical Assistance Free of Charge, but Mechanical Appliances, Etc., Must Be Paid For.

A movement that promises to develop into the establishment of a medical institute that may make Anaheim eventually the mecca of crippled and deformed children, was explained at the directors' meeting of the Chamber of Commerce some days ago. Dr. H. D. Newkirk, of the Johnston-Wickett clinic, addressed the board and outlined the plans to be adopted, provided a fund of \$10,000 can be raised. Many prominent persons in northern Orange county are behind the humanitarian project. A society called the Crippled Children's Relief association was formed some months ago in this city, the object being to give part of medical treatment to crippled and deformed children whose parents are not able to pay the enormous fees necessarily charged by specialists and institutions. Dr. Newkirk explained that the Johnston-Wickett clinic, with its expert staff of physicians, is competent to handle all such cases, and offer its medical services absolutely free to all little patients brought to it through the relief association, but it expected the association will pay for the mechanical appliances and other paraphernalia necessary to the work. For this purpose it is proposed to collect a fund of \$10,000.

Members of the campaign committee of the association, who will endeavor to raise the needed funds are Charles E. Bygones, chairman; H. M. Adams, Dr. Newkirk, Paul Taggart, H. H. Benjamin, Mrs. M. E. Canby, all of Anaheim, and C. C. Chapman, Rev. J. T. Houser, S. C. Hartman, and Mrs. Frank Moore, of Fullerton. Officers of the Crippled Children's Relief association are: Dr. Jessica Raiche, president; Mrs. Frank Keenan, vice-president; Mrs. Frank N. Moore, secretary; Miss Elsie Pearson, recording secretary and treasurer; Mrs. M. E. Canby, secretary Anaheim division.

Medical science has demonstrated that a large percentage of crippled and deformed children can be cured of their defects if taken in time, but many are doomed to pass through the world handicapped and dependent on the world for medical treatment, because their parents are not able to pay the bills. It is these unfortunate that the Crippled Children's Relief association proposes to assist, and it is expected the institution will find an unlimited supply of patients.

The action of the Chamber of Commerce directors in endorsing the drive for funds has stirred up a hornet's nest. Physicians of the city outside the Johnston-Wickett clinic declare the movement is an advertising scheme for the clinic, and the Chamber of Commerce is being used as a medium to boost the institution. After hearing the statements of the committee of doctors and giving the matter consideration the directors of the chamber decided to withdraw the endorsement and to remain neutral in the campaign. The following statement was issued by the objecting physicians:

"Dr. Beebe, Utter, O'Toole, Cole and Brastad met with the executive committee of the Crippled Children's Relief society and members of a special Chamber of Commerce committee on Saturday morning at 11 o'clock to discuss the proposed drive by the special Chamber of Commerce committee to raise funds for the Crippled Children's Relief society.

"Dr. Brastad opened the discussion with a few remarks, that in his opinion the drive should not be put on nor supported by the Chamber of Commerce, as such; that, after reading the articles appearing in the daily newspapers from day to day he could not believe that it was nothing more than a tremendous advertising

campaign put over by a commercial clinic operating in our city.

"Dr. Brastad stated that he was in favor of helping crippled children in every possible manner, but objected to this advertising campaign put on for personal gain.

Dr. Beebe spoke at length on the ethics of the medical profession, saying that it has always been obnoxious to any true physician and surgeon to get business in any other way than by doing good work and intimated that it was not the first time the Chamber of Commerce had been imposed upon by the same institution.

"Dr. Cole advised the committee to investigate thoroughly before going ahead with this drive, saying that the doctors working for salaries in similar institutions in the east were not at all competent; that merely advertising a man as a highly trained specialist did not prove him to be such.

"Dr. Utter paid tribute to the Orange county hospital, reminding the committee that we have such a hospital, one of the best in southern California, equipped with all the latest instruments and appliances for the relief of suffering humanity, where the poor people of Orange county are getting as good care as is anywhere obtainable and where all doctors and specialists are welcome to treat any unfortunate, crippled or deformed patient requiring specialized attention and have the support and assistance of our most capable county physician, and he further stated that if the society for the Relief of Crippled Children is the purely philanthropic society that it pretends to be it will avail itself of the advantages of this splendid public institution.

"Dr. Utter further stated that he is absolutely opposed to commercializing the practice of medicine by advertising but that he had had to compete with advertising doctors in Anaheim for the last ten years and that all he asked from the Chamber of Commerce was an impartial attitude toward all doctors practicing in this city."

## JACK IMAN SUCCUMBS TO HEART FAILURE

Drops Dead as His Son Is Announced  
Winner in Boxing Match

Jack Iman, formerly police officer in this city, and later under sheriff, died suddenly of heart failure while witnessing a boxing match in which his son, Harry Iman, was participating in the American Legion arena at Huntington Beach Wednesday night. The match was a hard three-round bout, and just as the referee was announcing young Iman as the winner, his father slumped back in his seat and expired almost instantaneously. He had been a sufferer for some time from heart disease, and his physician had warned him to avoid excitement.

The remains were taken to Santa Ana, where the funeral was held. He was 55 years of age and leaves a wife, one son and three daughters.

Iman came to Anaheim about nine years ago, and was on the police force for two years. He was one of the scores of men who took part for the hunt for Ira Jones, bandit, who killed Under Sheriff Robert Squires and Albert Prather, December 16, 1912, and who was later killed by Sheriff J. F. Stacy and others in the posse during a fight at Tomala Springs. Some of Iman's friends credited him with firing the shot that killed Jones.

When C. E. Jackson was elected sheriff in 1914, Iman was on the Anaheim police force. He was appointed under sheriff by Jackson, in January, 1915, and retained that position until about eighteen months ago. As under sheriff he became one of the best known officers in the county.

He went upon the police force at Huntington Beach last January as a night patrolman. When Jack Thinsley, present city marshal, took over that office in April last, he appointed Iman to day duty.

Iman was a fearless and active officer, big hearted and big in physique. His family has resided in Santa Ana seven years.

Reports that a group of Los Angeles hotel and business men were organizing a company to finance the erection of a \$250,000 resort and hotel at Alamitos Bay, were confirmed by W. F. Deebie, of the real estate firm of Deebie & Moore, Long Beach. Plans for the hotel, which it is announced, will be one of the most modern in the west, have been completed for some time. Construction will start soon. The hotel will overlook both Alamitos bay and the ocean. An elaborate boat landing and outdoor swimming pool are included in the plans.

## TRUSTEES VERIFY THE ELECTION FIGURES

LARGEST OPPOSITION VOTE CAST  
AGAINST CITY HALL, SMALLEST  
AGAINST FIRE PUMP

Bond Buyer Already Submitted Bid for the issue offering Premium of \$700—Eggabroad, Ross and Rimpau, Commissioners for Chestnut Street Opening—City Manager Steward is Granted Leave of Absence for a Month.

For the purpose of canvassing the vote cast in the bond election of July 19, the city trustees met in special session Monday night and verified the figures turned in by the two election boards. It was found that the four propositions ran pretty even, the greatest opposition being to the city hall, 501 votes being cast for it and 61 against. The least opposition was recorded against the pump which the fire boys have been demanding as an adjunct to their fighting apparatus. The vote in favor of the pump was 533 and against it 29. For the water works extension the total vote was 542 and against it 35. For sewer extension 630 votes were cast for it and 41 against it.

Already a firm of bond buyers, has made a bid for the issue, offering a premium of \$700, but the offer was laid on the table. Four times this amount will probably be paid when the bonds are ready and offered for sale to competitive bidders.

A board of commissioners has finally been appointed to appraise property values for the purpose of assessment in the Chestnut street widening proposition. The commissioners are Charles Eggabroad, George Ross and F. C. Rimpau. Each commissioner was required to give bond in the sum of \$5000, and each will draw \$5 per day as compensation. There appears to be some opposition to the proposition. H. E. Scott has filed a protest, and the trustees will hear him and consider his protest on August 11.

Tenants in the old city hall and the adjacent building, which stands on the city hall site, will be given notice to vacate by the first of September, as it is desired to begin the work of razing the building on that date.

The Southern Counties Gas Co. turned in a check for \$1059.80, being ten per cent of their sales during the past year.

City Manager O. E. Steward will turn over the reins of government to the other officials for the next month. He was given a leave of absence from duty for four weeks.

## THREE THOUSAND ALIENS IN ORANGE COUNTY

Sunday is the Last Day on Which They  
Can Register

County Clerk J. M. Backs said Tuesday that approximately 3000 aliens have registered in Orange county in compliance with the new alien poll tax law, which specifies that each alien shall pay a tax of \$10.

Sunday, July 31, is the last day on which aliens may register, according to the statute.

And it will be difficult for many to register Sunday, as most of the county deputies propose to finish their work Saturday, inasmuch as Sunday is a legal holiday.

Aliens who have not registered by the end of this week will be subject to arrest and imprisonment. Jack Thinsley, the registration in Orange county has been heavy. Every deputy registrar has called for more books and registration papers. They are instructed to turn in their books to County Clerk Backs within three days after registration closes.

County Collector of Taxes J. C. Lamb is scheduled to begin the collection of the poll tax next Monday.

A test case to decide the constitutionality of the poll tax has been arranged in Oakland between George Gross, clerk of Alameda county, and Albert H. Elliot, attorney for the Oakland Japanese association.

The law will be attacked on the claim that it is in violation of the fourteenth amendment to the United States constitution, which provides that no state shall discriminate in its treatment of residents, and also that it violates treaty rights.

# IN THE DAYS OF LONG AGO

Items of Local Interest Culled from the Files of Former Issues of This Paper

## 50 YEARS AGO THIS WEEK

A fine large bell, well mounted and of the best metal material, manufactured by Garrett & Co., of San Francisco, has lately been procured for the use of the Anaheim fire department at a cost of \$185, and is at present at the jewelry store of Mr. R. Lutzke. The bell tower, to be thirty feet in height, will be built as soon as proper material can be obtained, by Mr. Champlin, to whom the contract was awarded, his bid being the lowest of the proposals.

The coyotes are quite numerous at night in the vicinity of Anaheim, and they frequently make destructive raids upon poultry yards.

Mr. John Hanna has received a new eighteen horse power machine, with which to run his threshing machine, and is now doing big work. He will leave for Los Nietos next week.

About 75 men are employed upon the San Joaquin ranch, near Santa Ana, in herding sheep, building fences, etc. They are aggregately paid about \$1.00 per month. Irvine, Flint & Co. are now expending about \$15,000 in improvements.

We have been shown another splendid specimen of Barbary oats, the production of Col. J. L. Strong at his ranch in La Balsa Chica. The heads alone measure as high as twenty-three inches in length, and hang full of grain. This is a good showing for a country that is suffering severely from the combined plagues of drought and grasshoppers, and which is generally understood by outside barbarians to produce little else than cactus and horned toads.

It is a matter of surprise to many persons that our California still wines are held as such high rates by dealers. In original hands it is a superior variety that will command eighty cents, or one dollar per gallon, while a large majority of new wines can be purchased by wholesale at thirty-five or forty cents. Our wine merchants demand for these same varieties two, three and four dollars per gallon, which makes the price equal, and in some instances above that of the imported brands for which, as a general thing, there is a partiality. It is admitted that there is a difference in the flavor of California port, Riesling, Chamberlain and many kinds of white wines, is superior to corresponding brands of the foreign article. But the public at large can never be made to believe this, with their cost ruling so high as to act as a bar to their popularity.

We have been favored by Supt. McFadden with an extract from his forthcoming official report, showing the strength of the juvenile force of Los Angeles county. According to the late school census the number stands thus: Whole number of children under fifteen years of age, 6608; under five years, 1471; between five and fifteen years, 5137. This last number—that between five and fifteen years of age, are those who by law are expected to attend school, but it appears of these only 2148 have attended public school, and 1010 have attended private school, or altogether 3158, or only about 60 per cent of the whole number of schoolable children in the county have attended any school during the year. It is a matter of astonishment to most of us to contemplate the magnitude of the number of young America when he is counted, to turn out nearly seven thousand strong in a sparsely populated county like ours. There is just cause, of alarm, too, in the large number, 1979, nearly forty per cent of those between five and fifteen years of age, who have not attended any school whatever during the year. What kind of citizens will they make for the future? Certainly ignorant and degraded, and most likely vicious in character—of the class who now fill the criminal records of the county, and time at as regular public school, as sheep votes are bought at election time or as regular public school, as sheep votes are bought at election time or as regular public school, as sheep votes are bought at election time.

Where these ashes should not be dropped on the carpet, nor frequent pool, where they may be dropped with comment.

FOR SALE—Two year old budged Valencia orange trees, cheap. First-class stock; will bill ready for getting out. Inquire of J. Chevalier at office of W. R. Johnson, Baldwin Park, Calif.

## 25 YEARS AGO THIS WEEK

The report is current that the Southern Pacific will build its road up town, and tear up its old track from town to Polhemusville and beyond. The main line will be through Anaheim on Santa Ana street and south on Olive to intersect the Santa Ana line a mile or two south of town. This will bring all the railroad traffic through town. The Tustin line will be the through line to San Diego.

Peter Syre and Mrs. Louise Sonnenmeyer of Herr P. Rulman, of this city, were joined in the holy bonds of wedlock at the Catholic church yesterday afternoon at 5 o'clock. Rev. Father Cole officiating. Only the intimate friends of the bride and groom were present at the wedding, and after the ceremony came the reception at the home of the bride, where the hands of their friends. Mr. and Mrs. Syre will open the bakery at the corner of Los Angeles and Cypress streets, where they will be at home to all their friends.

Announcement of the wedding of August Nagel, of this city to Miss Emma J. Geyer, of Brookston, Indiana, has been received. The ceremony occurred on Tuesday afternoon, the 28th, at 5 o'clock. After a short honeymoon Mr. and Mrs. Nagel will return to this city to reside.

Prof. Woodbridge carried on his steaming experiments for the eradication of scale from orange trees at Mr. Rimpapa's grove on Friday last, and although sufficient time has not elapsed to show the destructiveness of the steam to the pest, sufficient confidence is felt in the method to carry on on a larger scale, and probably some orchard at Placentia will be selected for the trial. The steaming of trees at Alex Henry's place last week seems to have resulted favorably, and the scale appears to have been killed. If the new steaming process can be worked upon an economical basis, as to labor, probably the old and expensive cyanide fumigation process will be relegated into the oblivion of things that were. One of the most expensive things in connection with citrus culture is this necessity for fumigation for scale bugs, and if steaming can be made to take its place, the lot of the horticulturist will be happier. A number of orchardists attended the steaming of the trees in the Rimpapa orchard.

A letter received from our correspondent at the Landing yesterday says that the crowd, as coming in daily. During the week quite a large concession of campers for the season arrived. Among them are the families of Col. Tuffree, of Placentia; B. F. Porter and Mrs. Conliff, of Fullerton; Alex Henry, of West Anaheim; Dr. Champlin, of Anaheim; Mr. Slack, of El Monte, and H. D. Polhemus. A dance was given at the pavilion Saturday night which was well patronized and highly enjoyed. We are expecting quite an accession next week. Mr. Dickel's family will occupy the Lewis cottage. John Hartung will, no doubt, be with us shortly.

Mike Reagan, Volt Bontz, Sport Wetzel and Joe Frisk returned on Monday evening from a three weeks' camping trip to Smith mountain, San Diego county, and contiguous points, including San Juan hot springs, Oceanside, and on their return home. They report having a very up time, and from appearances we should judge they enjoyed the trip.

The Examiner Sunday prints a picture of Prof. Frantz and his ostrich in harness, but the professor has the bad luck to have the glory overshadowed by a Denver man. Frantz trained the ostrich and sold it to the Denver club, who is now reaping all the glory of the achievement. Such is the irony of fate.

Ed Zeus and Will Julian are spending a week's vacation at Long Beach.

Henry Knapke died at his home on Adams street Monday evening at 8:00 o'clock, of a cancerous affection of the neck. Deceased has been ill for several months past, and latterly little hope has been held out for his recovery. He has been a resident of Anaheim for many years, coming here in 1871, and had made this city his home uninterruptedly since that time. He was one of the early janitors of the water company. The deceased was married April 15, 1873, to Miss Anna Backs, sister of the Backs boys. He was 61 years of age.

## METAL MINING IN CALIFORNIA

Report by United States Geological Survey on Midyear Conditions in 1921

Metal mining in California during the first half of 1921 has been even more depressed than in 1920, according to Charles G. Yale, of the United States geological survey, department of the interior. Owing to the low prices of most of the metals and the increasing cost of production many mines have been shut down and others have reduced operations.

During the first six months of 1921 the United States mint at San Francisco and local smelters and refiners received from the mines of the state \$7,362,294 in gold, or \$482,000 less than during the first six months of 1920, when the receipts were \$1,086,239 less than in 1919.

The silver received during the first half of 1921 by the mint, smelters, and refiners amounted to 1,235,820 ounces or 726,636 ounces more than in the first half of 1920, and the first half of 1920 showed an increase of 376,310 ounces over the same period in 1919. This is somewhat remarkable, for several of the large copper mines of the state, from which most of the silver produced in California has usually been derived, have remained closed in 1920 and 1921. The deficiency thus caused has been more than made up during the last two years by the silver and silver-lead mines, more of which have been producing than in the preceding 25 years or more. Most of these mines are in Inyo and San Bernardino counties. By far the largest producer of silver in the state, is the Rand, in San Bernardino county, open in 1919.

No signs of immediate improvement in gold mining in California can be seen. The cost of supplies has diminished somewhat, but wages continue to be a source of contention between the operators and the miners' union. Within a few weeks two of the most productive deep mines of the State will probably be added to the number that are closed down. At one of the larger mines, which crushed more than 60,000 tons of ore last year, the cost of producing gold was \$15 an ounce, and this property has perhaps the best equipped reduction plant in California, making a total recovery of 97.1-2 per cent.

The decrease in output does not affect equally the deep and the shallow mines. The output of the deep mines is falling off about 16 per cent, whereas that of the placers is falling off only 12 per cent. The placer gold output is kept up mainly by the dredgers, which show little total loss, but other forms of placer mining are not so prosperous as formerly. The supply of water this year, however, has been much more favorable for the placers than in 1920.

Unfavorable conditions, exist not only at the gold mines but at those yielding copper and other metals. Most of the larger copper mines and all the smaller ones are still closed down, as they were in 1920. The most productive counties are Plumas, Calaveras and Shasta in the order named. The largest producer in the state is the Engels mine, in Plumas county, which continues its large output of the ore of adverse conditions. There has been an increase in the output of both lead and zinc, due almost entirely to the mines in Inyo county, although some zinc comes from Shasta county.

The Butte and Superior Mining Co. of Butte, Mont., has acquired control in the Santa Ana zinc and copper Co., at Winthrop, Shasta county, and has also bought the property of the Bully Hill mines. The experimental electrolytic zinc plant of the Shasta company began operations in April. The Argonaut mine, at Jackson, Amador county, one of the big Mother Lode mines, which was nipped out after the fire and flooding, is again producing, but its neighbor, the Kennedy, remains idle. The Utica and Gold Cliff mines, at Angels, Calaveras county, after more than half a century of production, have been closed down permanently and allowed to fill with water. The old Plumas-Eureka mine, at Johnsville, Plumas county, has resumed operations, and the Rainbow, at Allouebey, Sierra county, is to be reopened. The Fremont Consolidated, at Amador City, Amador county, after several years, is being pumped out for exploration. The famous old Ravine, at Jamestown, Tuolumne county, is being reopened, and a new 1800 feet shaft is planned for it. A new 10-stamp mill is being erected for the Kate Hardy, at Forest City, Sierra county, and another is being erected for the Virginia mine, at Angels, Calaveras county. A mill is also being built on the Grit property, at Spanish Dry Diglins, near Greenwood, El Dorado county. The Virginia-Belmont Co. has resumed development on the Virginia mine, formerly owned by the White Gulch Mining Co. The Ghost mine, on Railroad Flat, Calaveras county, is being reopened. A new 100 stamp mill is under construction at the Gordo Gordo mine, in Inyo county. The Juniper mine, Hayden Hill, Lassen county, which was re-

opened after a long idleness, has been running its mill steadily since February. The Blue Lodge copper mine, in the mountains of Shasta county, near the Oregon line, which has been producing copper with interruption since the war, has closed down, and the construction of the proposed \$50,000 electric power plant has been indefinitely postponed.

The reminiscence, of old miners as well as reports, official and other, of remains of the great bonanza in the bottom of the old Eureka or Hettig Green mine, at Sutter Creek, Amador county, idle for a great many years, induced certain prominent capitalists to pump out and reopen the mine. After sinking shafts, running drifts and crosscuts, and extensive diamond drilling in all directions, with the expenditure of about a million dollars, nothing of value was found, and the enterprise has been abandoned.

At Vina, however, a famous gold miner of California, who last worked the mine, evidently took out all the bonanza ore.

## DIAGONALITIS

Pedestrians afflicted with "diagonalitis" are one of the greatest contributing causes to auto accidents, according to officials of the Automobile Club of Southern California.

In analyzing the causes of hundreds of motor accidents throughout southern California, officials of this club have come to the conclusion that pedestrians who cross streets and roads in the center of the blocks, and diagonally at the corners cause a large portion of the grief reported in the newspapers.

Between intersections of streets and roads, it is pointed out, street and motor vehicles make their greatest speed, and it is here that most pedestrians are hurt when stepping suddenly out from between cars parked at the curb into the lanes of traffic.

Crossing diagonally at a street intersection, the pedestrian has to look back, as well as forward, to avoid being run down—while if he makes a square corner he has but two ways to look.

The human neck, point out auto club officials, is not constructed like that of an owl, and because it isn't, enables them to look around the points of the

compass when crossing a street diagonally, they are often injured.

The Los Angeles safety council, composed of the Chamber of Commerce, auto club and the safety engineers maintains that failure to observe the traffic officer's whistle not only exposes the pedestrian to danger, but ties up traffic to a large extent. Another bad habit indicated, it that of going around the back of street cars in the cities and emerging on the other side without hesitating to see if any vehicle is approaching.

Southern California is the only territory, it is pointed out, where strict laws do not govern the pedestrian as well as the vehicle.

## NOTICE OF SALE OF REAL ESTATE

In the Superior Court of the State of California, In and for the County of Los Angeles.

In the matter of the Estate of Julia Bruere, Deceased, No. 19762, Notice of Sale of Real Estate.

Notice, is hereby given that the undersigned executor of the estate of Julia Bruere, deceased, will sell at private sale on or after the 30th day of July, 1921, at the hour of twelve o'clock M., of said day, all the right, interest and estate of said Julia Bruere, at the time of her death, and also all the right, title and interest which said estate of Julia Bruere, deceased, may have acquired subsequent to her death in addition to that of the deceased, in and to the following parcel of real estate lying, being and situate in the County of Orange, State of California, described as follows, to-wit:

Lot 4, Block 104, Huntington Beach, in the City of Huntington Beach, County of Orange, State of California, as per map recorded in Book 3, page 46 of Miscellaneous Maps, Records of Orange County.

The terms of said sale will be cash, or one-half cash and the balance to be evidenced by promissory note of purchaser, said promissory note to be secured by first mortgage on the property to be sold, said note and mortgage to bear interest at the rate of seven (7) per cent per annum, due not more than two years after date; ten per cent of the amount so bid to accompany each bid, balance of said purchase price upon delivery of deed and upon completion of said sale by said Superior Court.

The undersigned will receive bids upon the real property hereinbefore described at the office of Haas & Dunnigan, 718 Citizens' National Bank Building, Los Angeles, California, at any time after the publication of this notice and before the making of said sale.

Dated this 12th day of July, 1921.  
WALTER F. HASS,  
Executor of the Last Will and Testament of Julia Bruere, Deceased.  
HASS & DUNNIGAN,  
Attorneys for Executor.

## NOTICE OF ABANDONMENT OF HIGHWAY

Notice is hereby given to all freeholders in Third road district that the hearing of the petition of John Sturges, et al, filed on the 5th day of July, 1921, to vacate, discontinue, abandon and abolish a certain highway (or certain highways, as the case may be) in Third Road District, in Orange County, California, has been set for Tuesday, the 26th day of July, 1921, at 10 o'clock A. M., at the room of the Board of Supervisors in the Court House at Santa Ana, California.

Notice is hereby given as the case may be) is described as follows: Commencing at a point in the East line of Section 1, Twp. 4 South, Range 10 West, S. B. B. & M., said point bearing North 0° 40' 20" West, 83.17 feet from the corner of said Section 1; thence North 50° 47' 46" East, 38.36 feet to a point 30 feet easterly of and measured at right angles from the southerly line of a 20 foot road shown on the northeasterly side of South Placentia Tract No. 1, as recorded in Miscellaneous Map Book 8, page 42, Records of Orange County, California, thence Northwesterly parallel to the Southwesterly line of the Kramer Tract 68.66 feet to a point 30 feet westerly of, measured at right angles from the southerly line of Section 1; thence Southerly parallel to said section line 197.08 feet, more or less, to a point 67.60 feet northerly of the South line of said Section; thence North 50° 47' 46" East, 38.36 feet to the point of beginning.

Also that portion of that certain 90 foot road reservation as made by the Starna Rancho Company on the common Section line between the common Sections 6 and 7, Twp. 4 South, Range 10 West, S. B. B. & M., the center line of said road reservation being more particularly described as follows:

A strip of land 60 feet in width, being 30 feet on each side of the following described center line: Commencing at a point 30 feet easterly of the Southwest corner of Section 6, Twp. 4 South, Range 10 West, thence Easterly along Section line 273.60 feet to an intersection with the easterly line of said Fractional Sections 6 and 7.

By order of the Board of Supervisors of Orange County, California.

Dated this 5th day of July, 1921.  
(SEAL)  
J. M. BACKS,  
County Clerk of Orange County, California, and ex-officio Clerk of the Board of Supervisors of said County.

SUGAR CAMPAIGN STARTS  
ON FIRST OF AUGUST

Santa Ana and Holly Factories Ready to Begin Slicing Beets

That the Santa Ana Sugar company's plant at Dyer will start turning beets into sugar August 1, was the definite announcement by C. L. Killin, superintendent of the big mill.

The Huntington Beach Sugar company will probably start the same day. It was intimated, although no word has been given. The Southern California mill, located on South Main street, the other concern owned by the Holly Sugar company in Orange county, will not operate this year.

Word has been sent out by the field managers of two plants that will run this season to several beet growers under contract, to start plowing next Monday.

From the fields the beets will be loaded into cars and run to the dumps of the two mills to await the whistles which will send the first of Orange county's 1921 crop to the mills. Growers near the factories deliver by wagon.

Superintendent Killin, of the Santa Ana mill, estimated that the 1921 campaign would last 100 days, or about until November 10, and that this year's run would exceed last year's by approximately 10,000 tons. Last year the Santa Ana plant handled 185,000 tons. Killin expects this year's run will be closer to 196,000 tons.

While there is probably a little less acreage this year than last, the beet crop seems to be about as good, and will probably average a high sugar content, it was said. The closing of the Southern California factory means that more beets will be handled at the Santa Ana and Huntington Beach plants than last year.

Both mills are said to be ready for the first shipment of beets. Forces of men have been employed at both plants for more than a month preparing for the campaign. Repairs, cleaning, painting and all of the necessary tuning up is over and the mills are ready for the work to go.

The Holly Sugar company has decided to return to the old schedule of 12-hour shifts, each running from 7 to 7. Wages will be comparatively the same as last year. There has been no labor shortage apparent at the mills, it is said, and all of the stations have been filled with experienced men. Cards will soon be mailed to each employee, by the foreman of each department, telling each applicant what he is to do and on what shift he will start the campaign.

C. A. Johnson, general manager of the Holly Sugar company plants in Orange county, has announced that G. J. Bailey will act as general superintendent of both the Santa Ana and the Huntington Beach plants. C. L. Killin is superintendent of the Santa Ana mill and G. W. Miles is at the head of the Huntington Beach concern.

## SAME OLD ANTI-TARIFF CRY

There may be grounds for criticizing some of the proposed schedules of the new tariff, but the character of opposition being voiced by the minority party is not worthy respect. The same old cry heard time and time again, is being raised. It is charged that the Republicans are legislating for their "heavy campaign contributors."

It is odd that the scattering Democrats left in congress after the groundswell election of 1920 have the temerity to repeat this parrot cry. The Republican campaign of June 1920 was the most remarkable in political history, since, publicity was enforced, in that there were no heavy contributors. More people contributed many times times over than ever before. The Democratic campaign funds of 1912, 1916 and 1920 were raised by the efforts of individual donations and even under Mr. Bryan's famous \$100,000 limit of 1908, Herman Ridder and family contributed \$37,000.

The Republican contributions came from all the states where the people over vote on issues and the names of Democrats of long standing were numerous in the list. They wished to have America run for Americans and they did not trust the wild experimenters who got such a conspicuous place in administrative affairs for eight years. The Republicans have been in charge only four months but they have been laying the ground-work for permanent prosperity of the country and for systematic economy and efficiency in governmental affairs.

In 1912 the Democrats made a campaign—in so far as anybody paid any attention to them at all, with the Roosevelt fight so bitter on reduction of the cost of living. They passed the most unskillful tariff in our whole history and the effects of it paralyzed the country, until the greatest war in history came to create an unprecedented demand for our products. In 1914 the army of unemployed men behind comparison with any before. Soup-houses were established in the middle of summer in St. Louis. When men were put on three shifts, each working a week, the return of a shift was celebrated, for psychological purposes as so many

new men going to work. The late St. Louis Republic did that once a week regularly. One issue it announced that men were wanted at a certain industry and thousands stood all night long, waiting for a chance for a job. Secretary of Labor Wilson called for harvest hands in Missouri and every freight train was laden with disappointed men who responded to the cry. Coxy organized a new army to march on Washington.

In 1914, of this, prices on articles imported continued to rise. It was found that after fear had closed American industries, importers charged all they could get for their products.

This bit of history, only seven years old, must not be forgotten. The Underwood tariff sent a \$10,000,000 steel mill and innumerable lumber mills to Canada, opened our markets to products from all over the world, threw our own people out of employment and failed to raise revenue. Before the great war began, our trade balance had dwindled to nothing and the passage of a so-called "tariff" was demanded.

With other countries taxing both imports and exports, the Underwood tariff was a place of utter folly. Nothing but the war, demands kept up from long and grinding hard times. Whoever praises it is ignorant of its true character.

## SLIGHTLY MIXED CASE

A damage suit against T. J. Barker, Los Angeles, is not for Mrs. Cornelia Marie Reid, wife of Edwin G. Reid, of Placentia, until she clears herself of a charge of burglary. She was held in the justice court at Huntington Beach to answer to such a charge. The charge was preferred against her it is alleged by her husband, as revenge for alleged jilting of Barker by Mrs. Reid. Reid was arrested on a similar charge and the case was dismissed when it came to trial.

Testimony introduced in the hearing on the charges against Mrs. Reid was to the effect that Barker had engaged Mrs. Reid to keep house for himself and mother.

On June 15 she is said to have engaged Fred Lang, an expressman, who is held jointly with Mrs. Reid on the burglary charge, to take the furniture from the house the following day, which was Sunday. On that day she, Marie Reid, and another went on a picnic. When the Barkers went home, it was charged, the furniture was gone. Edwin C. Reid, the husband, has filed suit for \$30,600 for alleged malicious prosecution against Barker, claiming the latter caused his arrest on a burglary charge because Mrs. Reid had spurned Barker's attentions.

ORANGE COUNTY FAIR  
TO LAST FOUR DAYS

Preparations Making for the Huntington Beach Show

The orange county fair at Huntington Beach this year will continue four days, instead of three, as in former years, and the dates are Wednesday, September 28, to and including Saturday, October 1.

Such was the decision the fair committee, of the Huntington Beach Chamber of Commerce reached at a meeting in the library building there Wednesday night.

The four days, it is believed, will give everyone in the county an opportunity to attend and see the wonderful display of products that will be provided, the industrial and automobile displays, the concessions, and other features. The admission charge will be 50 cents for grown-ups and 15 cents for children of grammar school age each day, entitling the purchaser to go inside the tents morning, afternoon and evening.

Some of the farm centers and chambers of commerce in the county, it was reported, already have committees appointed and plans well under way for community exhibits and this department is expected to be much larger than ever before.

No entry fee will be charged for community exhibits, but each center or other body participating has been requested to co-operate by donating \$5 or more to the prize list. Cash prizes for the five best community exhibits are \$100, \$50, \$25, \$15, and \$5, and the competition is sure to be keen among the various districts.

Five large tents have already been engaged, with a total of 74,000 square feet of exhibit space. It was announced, nearly double the space available last year, and it is expected that all departments will show a substantial increase in quality and quantity, justifying the slogan "Fairness of the Fairs."

The two main tents, for agricultural and industrial displays, are each 100 feet by 220 feet, and the other three are of unequal size, but will be used for tractor displays, 80x150, to be used for entertainment features; and 60x140, to house the poultry and pet stock displays.

A sickly grin is better than none.

PEACE AND JUSTICE  
THE AMERICAN POLICY

Those who have been, more or less sincerely, clamoring for a revelation of the international policies of the Harding administration, are gradually being enlightened.

In a series of notes characterized by vigor, clarity and consistency with the pre-election pledges of the party in power, Secretary Hughes is making the world understand the attitude of the American government. The administration stands for the policy of keeping America first in mind—not selfishly, but with a due comprehension of the value to the world of maintained American nationality, with its traditions and ideals.

Secretary Hughes has made clear, in his note on the "open door," in the Orient, that this government has returned to the policies of McKinley and Hay, with their assurance of protection and justice to China. These policies mean that the United States is asking special privileges in China, but that this government is against special privileges wrested from China for the benefit either of this or any other government.

The announcement that President Harding has invited the great powers associated with this nation in the world war to a conference to consider disarmament, marks the longest step toward the goal of world peace that has been taken in all history. President Harding makes it clear that along with disarmament is to be considered the question of justice to China, and, therefore, China's advice and consent are sought in the deliberations to which the powers are summoned.

Peace with justice is the great need, the great desire, the great hope of the world. President Harding is seeking the direct road to that goal by proposing the one means through which it can be attained. Only through mutual disarmament can we hope to end war as a means of settling international disputes. No world government will do it. No mere resolutions in behalf of peace, or plous professions of an intention no longer to wage war will do it. Only disarmament, by bringing humanity's hope of permanent peace nearer to realization. And let the pacifist remember that it is only because this nation is a power to be feared and respected on land and sea, and because the world has seen that we intend to do it, that our disarmament will bring humanity's hope of permanent peace nearer to realization.

Let the pacifist remember that it is only because this nation is a power to be feared and respected on land and sea, and because the world has seen that we intend to do it, that our disarmament will bring humanity's hope of permanent peace nearer to realization. And let the pacifist remember that it is only because this nation is a power to be feared and respected on land and sea, and because the world has seen that we intend to do it, that our disarmament will bring humanity's hope of permanent peace nearer to realization.

## WALNUT CROP

From a trade circular issued by the California Walnut Growers' association we learn that spot walnuts of 1919 and 1920 crops have long since been exhausted. Prospects for foreign crop are that it will be considerably short. Of course, no hint of future prices can be given this early, but regarding total output the circular says:

"Our early prospects were for by far the largest crop of California walnuts ever produced. In fact, our early predictions were for a 60 million pound crop, but the United States department of agriculture to the Alaskan-American Paper corporation. The timber is located along the east shore of the Bohm canal, Revillagigedo island, about 32 miles from Ketchikan, the largest city in the territory. The contract price of the timber was 50 cents per 100 cubic feet, plus 100 cents for cedar, and 30 cents per 100 cubic feet for all other species. The sale area covers 46,000 acres and extends for 55 miles along the coast. Twenty per cent of the forest is spruce, 66 per cent hemlock, and 14 per cent Alaska and western red cedar."

A conditional award has been made by the forest service to the company pending approval by the federal power commission of their application for a hydro-electric power license. The timber sale contract covers an initial period of 32 years, or until 1953. The price of the stumpage will be redevalued and fixed by the federal government in 1928, and every five years thereafter. Cutting must begin by October 1, 1923, thus allowing two years for organization and construction of improvements. The contract also requires the establishment of a pulp mill or not less than 25 tons capacity by October 1, 1926. A yearly cut of from two and one-half to three million cubic feet is contemplated.

The award of this sale is in line with the general policy of the forest service for making available the timber resources of Alaska as a means of increasing the supply of pulpwood for the United States. The national forests of the territory probably contain 100,000,000 cords of timber suitable for the manufacture of newsprint and other grades of paper. Under scientific management, experts say that these forests can be made to produce 2,000,000 cords of pulpwood annually for all time, or enough to manufacture one-third of the pulp products now consumed in this country.

## WHO REMEMBERS

Any summer in which the high temperature record was not broken in your home community?

## SHORT CHILI CROP

That the outlook for this year's chili pepper crop is not as good as it was at this time last year, was the statement today by officials at the J. A. Knapp receiving house at Garden Grove. Garden Grove is the center of the industry in the county.

Indications now are that the total acreage this year will be fully 35 per cent less than it was last year. Early dry hot winds tended to spoil the chili plants in the center of the fields and consequently this means a yield for this year of perhaps half that reached last year.

Green chili will probably arrive at the Garden Grove receiving plants a little earlier than last year, however. The first amount of consequence are expected about the last of October or the first of November. It was said today. Shipments after drying will follow soon after.

Much of the Garden Grove chili is sent to the California Packing corporation plant on East First street, Santa Ana, where it is packed and sent all over the United States.

Chili pepper prices are lower at present than they were last year. The contract price to growers at the beginning of the season last year was 20 cents a pound. The present price is under 15 cents a pound, but is expected to reach a higher figure before the start of the 1921 campaign, it is believed.

## COST OF AIDING POOR

County Aid Commissioner Walter Gregg has submitted to the board of supervisors his annual report of expenditures for out-relief for the fiscal year ending June 30, 1921.

The report shows that the county spent \$29,012.54 for groceries, rents, drugs and medical attention, transportation, funerals, etc., in behalf of families who were in dire need of assistance.

It also shows that the administrative expense of the county aid office was \$3,629.43. This brings the gross expenditures up to \$32,641.97. The sum of \$9,977.66 was refunded to the county by the state orphan's aid, making the actual cost to the county for the year \$22,664.31.

This is an increase of \$3,468.84 over the previous year. The largest sum expended by the aid commissioner was for groceries. This figure is \$13,413.36, as compared with \$12,293.31 for the same period in the previous year.

Other sums expended were: Cash, \$8,464.48; rents, \$1,788.50; drugs and medical attention, \$2,107.65; transportation, \$341.35; burials, county, \$2,116.50; ex-soldiers, \$750; miscellaneous, \$41.70.

The administrative expense is listed as follows: Salaries, \$3,200.97; office supplies, \$113.34; field, etc., \$315.12.

A total of 376 persons were receiving relief from the county on January 7, 1920. From that date to July 1, 1921, 711 more were added to the list while 687 left the county. This left 1,399 who were still receiving aid July 1, 1921.

## ALASKA PULPWOOD

One million cords of pulpwood on the Tongass national forest, Alaska, has just been sold by the forest service of the United States department of agriculture to the Alaskan-American Paper corporation. The timber is located along the east shore of the Bohm canal, Revillagigedo island, about 32 miles from Ketchikan, the largest city in the territory. The contract price of the timber was 50 cents per 100 cubic feet, plus 100 cents for cedar, and 30 cents per 100 cubic feet for all other species. The sale area covers 46,000 acres and extends for 55 miles along the coast. Twenty per cent of the forest is spruce, 66 per cent hemlock, and 14 per cent Alaska and western red cedar."

A conditional award has been made by the forest service to the company pending approval by the federal power commission of their application for a hydro-electric power license. The timber sale contract covers an initial period of 32 years, or until 1953. The price of the stumpage will be redevalued and fixed by the federal government in 1928, and every five years thereafter. Cutting must begin by October 1, 1923, thus allowing two years for organization and construction of improvements. The contract also requires the establishment of a pulp mill or not less than 25 tons capacity by October 1, 1926. A yearly cut of from two and one-half to three million cubic feet is contemplated.

The award of this sale is in line with the general policy of the forest service for making available the timber resources of Alaska as a means of increasing the supply of pulpwood for the United States. The national forests of the territory probably contain 100,000,000 cords of timber suitable for the manufacture of newsprint and other grades of paper. Under scientific management, experts say that these forests can be made to produce 2,000,000 cords of pulpwood annually for all time, or enough to manufacture one-third of the pulp products now consumed in this country.

The Alaska forests also contain the

second chief essential of a pulp and paper manufacturing industry, namely water power. No accurate survey of the power resources has yet been made, but known projects have a possible development of over 100,000 h. p., and it is believed that a complete enumeration of the national forests in southern Alaska will show not less than a quarter million potential horse power that can be developed from water.

Forest service cruisers are now working in Alaska collecting data for further use and development of the forests. One block of timber containing 335,000,000 cubic feet—enough to keep a 100-ton pulp mill running, has been advertised and is now ready for sale.

## GERMAN WAGES AND PRICES

German wages at the present time are reported to be about \$5 in gold weekly, or roughly one-half of the pre-war normal. German prices in terms of gold seem to be on the average around 20 per cent above the pre-war normal. The German industrial interests seem to have been able to deceive the German workmen with the depreciated German mark, says Wallace's Farmer. In terms of marks, the German workmen may be getting five or six times what they were before the war, but in terms of what the money will buy, they are getting far less. It is a strange thing that people have come to worship money that they will allow themselves to be deceived. As long as German money has a fluctuating gold value, it is likely that the United States will find Germany a very hard competitor to beat. With a currency of uncertain value, it is possible to make labor do more work for less return than would otherwise be the case. Germany will eventually pay for the war by the self-denial of her laboring people, a self-denial enforced by a manipulated currency system.

## DESERVED DEATH

"What's become of the old-fashioned dramatic critic who used to write about an 'Uncle Tom's Cabin' show and compliment the dogs?"

"I've located his successor in a little western town."

"Well?"

"In reviewing 'Hamlet,' as presented in the local theatre, he said the large number of fatalities at the end of the play reconciled the audience to the performance.—Birmingham Age-Herald.

## SOUTHERN COUNTIES GAS COMPANY OF CALIFORNIA

Offers Its Preferred Stock—an 8 Per Cent Investment  
For California investors this stock is unusually attractive, offering both security of investment, assurance of fixed income at an attractive rate, and other advantages of especial interest.

## 1. Security of Investment.

(a) The company supplies an every day necessity. Its business, is therefore, inherently stable. Its earnings have increased in every single year of the company's history.

Numbers of Consumers June 30, 1912..... 6,573  
Numbers of Consumers June 30, 1921..... 77,470  
Gain..... 70,897  
Gross business 1912..... \$ 176,815.36  
Gross business 1921..... \$3,332,576.83  
Gain..... \$3,155,761.47  
\*Twelve months to May 31, 1921.

(b) The company's growth has increased continually throughout its existence.

Number of miles of mains as of December 13, 1913..... 20.32  
Number of miles of mains as of May 31, 1921..... 1,286.76  
Increase..... 1,084.75  
Cubic feet of gas sold year ending June 30, 1912..... 136,264,710  
Cubic feet of gas sold year ending May 31, 1921..... 6,187,062,800  
Increase of 4440 per cent over sales of 1912.

(c) Field of operation unexcelled. Supplies forty-three cities in the counties of Orange, Los Angeles, San Bernardino, Ventura, and Santa Barbara and adjacent territory. It reaches and supplies the richest agricultural and rural territory of California, and the most rapidly growing urban and suburban portions of the state.

(d) Sources of gas supply. Its lines connect with and its system (except Santa Barbara) is supplied from all of the substantial gas-producing fields in Southern California, assuring a permanency and continuity of supply of gas of unexcelled quality so long as natural gas is available. The extent and character of these gas-producing fields afford a most unusual, as well as secure, source of supply for many years to come. The company's system is designed to change from natural gas to an artificial gas system can be readily effected, as and when the natural gas supply diminishes, without loss to the company or interruption of service.

(e) Operation by trained organization. The management of the company has had long experience, and its ability is unquestioned. The company enjoys the confidence and good-will of the people whom it serves. Experienced district managers are familiar with the local needs and requirements of the territory served.

A continuous eight per cent return upon your investment makes this stock a most attractive form of investment. Dividends \$8.00 per share per annum, payable at the rate of \$2.00 every three months, by check mailed direct to the shareholder.

Price: \$99.00 per share if purchased outright and \$100.00 per share if paid in installments.

Orders may be placed or further information obtained at any district office of the company, or at

11th Floor Corporation Bldg.,  
724 So. Spring Street, Los Angeles, California.

(h) Equity behind preferred stock. The value of the tangible property of the company, including the proceeds from the sale of this stock after deducting bonded and all other indebtedness, leaves an equity of approximately \$717.92 per share behind this issue of stock.

(i) Supervision by Railroad Commission of California. Supervision by the Railroad Commission of California is a factor of safety which constantly operates to protect the interests of both stockholders and company. The issuance of this preferred stock has been authorized by the State Railroad Commission of California.

## 2. Special Advantages

(a) An immediate and direct return of eight per cent per annum is received by the investor in this stock.

(b) Interest at eight per cent per annum, payable quarterly, upon all installment payments upon purchase price, giving the investor an eight per cent return upon his money from the very beginning.

(c) This issue of \$1,250,000.00 preferred stock is the only preferred stock issued by the company.

(d) Free from state, county and municipal taxes in California except inheritance taxes.

(e) Exempt from normal federal income tax.

(f) Dividends paid directly to you four times a year—January 15, April 15, July 15 and October 15.

(g) Investments may be made in any amount from one share upward.

(h) Payments can be made in ten equal installments if desired.

(i) The development of the company served by the company will be aided by your investment in this stock.

(j) Information regarding the company is available at all times to stockholders.

 Chilean Dance—Manana, Misad.  
 Serenade Mexican—Mi Rocio, Barnhouse.  
 Popular—My Sweet Little Linda Lou Smith.  
 March—La Sorella, Bar-Clerc.  
 Star Spangled Banner.

### GOING UPON A BUDGET

In preparing a detailed budget for the coming year, County Engineer J. L. McBride has taken a step that is bound to bring about excellent results. A carefully worked out budget in public business is necessary to proper financing.  
 The proposed budget for Orange county, totaling \$875,911, presents a formidable proposition. The care of the dirt roads and paved highways and the construction of new bridges is no small job. Only through careful planning and proper organization methods may the work be done and done well.

The making of a budget is fraught with some uncertainties always, and the making of a budget for the care of paved roads in any county of this state at this time presents a good many difficulties. The bit of pavement that is standing up well today may be subjected to unusually heavy traffic tomorrow, and it may be knocked to pieces in short order.

The destruction of a portion of one street menace another. Heavy trucks pounded great holes in West Fifth street. When West Fifth street by the acts of the trucks themselves became unfit for travel, the trucks began to travel on West Fourth street, and at the rate of disintegration now going on there West Fourth street will soon be a match for West Fifth.

What has happened to this city street may happen to some of the county roads. County officials unfortunately are not gifted with prophetic powers. In making up a budget, therefore, they lay their plans according to their best judgment.

Once the task is outlined and through the fixing of tax rates money is made available for the work, the engineering force may tackle its task with a great deal more forcefulness than is possible when it hardly knows from month to month what is ahead of it.

The estimated expenditures reach a huge total—\$875,911. Why? The question has been answered too often to need an answer. Everyone knows that unlooked-for development of heavy trucking furnished the reason for the going to pieces of our paved highways. Repair work alone will mount high. All new roads are being built stronger than was thought necessary ten years ago.

Our board of supervisors is to hold a conference at Riverside next Monday with supervisors from San Bernardino and Riverside counties. At that conference the question of adopting a uniform load limit for trucking in the three counties is to be discussed, and probably some limit will be set upon.

Since the state legislature failed to pass a measure reducing the load limits for trucking, the counties ought to waste no time in passing ordinances to protect their highways. Orange county already has a load limit of 23,000 pounds. Nearly everyone who has studied the matter declares that the limit here should be cut materially. The reduction of 2000 or 3000 pounds will do little or no good. Drastic action is necessary. That the supervisors of the three counties could meet and not take some drastic action seems unbelievable. Things cannot go on as they are, for the roads are going to piece faster than they can be repaired.

A budget is an important step in the high direction of a county. It is the first step in planning and for all kinds of trucking that breaks up our roads is equally important.—Register.

A shiny nose doesn't necessarily indicate a bright mind.

## COUNTIES WILL UNITE TO PROTECT HIGHWAYS

Orange San Bernardino and Riverside to Limit Trucks to 23,000 Pounds

Ordinance placing a load limit of 23,000 pounds gross on a single truck and 22,000 pounds net for a truck and one or two trailers is to be passed by Orange, Riverside and San Bernardino counties.

The attitude of the state highway commission in its controversy with the Automobile Club of Southern California was approved.

An agreement for the organization of a tri-county diesel control committee, with a tentative agreement to appropriate \$2000 from each county treasury, was reached.

These are the three outstanding acts of supervisors of Orange, Riverside and San Bernardino counties, at a joint meeting held Monday afternoon at Riverside.

The meeting was called for two purposes, one the consideration of the passage of a uniform truck control ordinance for the three counties, and the other for the reaching of an agreement looking toward Santa Ana river flood control activities by the three counties.

Each object was accomplished. Windling up the meeting, the declaration of the attitude toward the attack that has been made on the state highway commission by the Automobile Club of Southern California, in company with the California Automobile club, was taken up on the suggestion of Supervisor T. F. Flaherty, Riverside.

"The automobile clubs want to tell the highway commission what to do," said Flaherty. "The club wants to expend all available funds in building very heavy highways, and let the rest of the highways take care of themselves. This auto club plan means that the entire available funds would go to building heavy pavement between Los Angeles and San Francisco. The highway commission has faced problems, but it is doing its very best to live up to its pledges to the people of California who voted this money. If the highway commission took the program laid down by the auto clubs a sink in justice would be done to the people of this state."

"The highway commission ought to be commended highly for the stand it has taken in the face of the unfair tactics and unjust criticism of the auto clubs," declared Supervisor Wassum, of Tustin.

A motion was put and carried unanimously approving the attitude of the highway commission. Some of the supervisors wanted also to go on record as condemning the attitude of the auto clubs. However, the motion was not carried through with the commendation for the highway commission, which, as was pointed out, carried its own message as to the opinion of the supervisors concerning the auto club.

## FORD TAKES UP WATERWAYS

Back of Henry Ford's proposal to take the Muscle Shoals project off the government's hands there is said to be a pioneering project bigger and more spectacular than anything yet undertaken by this unconventional business man. It is a practical utilization of the country's interior waterways for the combined purposes of manufacture and transportation.

Mr. Ford's possession and operation of the ultrate plant at Muscle Shoals would be apparently, only an incident in his general plans. He is supposed to want the water and the land along the Tennessee river at that point mainly for the purpose of manufacturing Ford cars and tractors. There is plenty of iron and coal near at hand. This his raw materials would be more accessible than they are in Michigan.

But the water and the land are thought to be in his mind no less important. The Tennessee is navigable from Muscle Shoals to its mouth, and he would keep it so, improving the channel. Through it he would gain access to the whole great system of waterways which include the Mississippi, Ohio, Arkansas, and other navigable streams. Thus Mr. Ford would be able to ship his cars and tractors by water, cheaply and easily, anywhere over a vast and populous area. Through the Mississippi, too, he would have direct access to the rest of the world for foreign countries. He might reasonably expect, also, to gain good water connection with the Great Lakes, thus joining his Alabama plants with his Michigan plants, and having another valuable water exit eastward via the New York barge canal to New York City or down the St. Lawrence to Europe.

Other people have talked much about the value of the nation's waterways. If Mr. Ford, with his characteristic directness and practicality, proceeds to do something about the matter without delay, he will be a fine example for the government itself and for private enterprise in other industries.

An automobile is a luxury, of course, what isn't in these H. C. L. days

## KEEP BATTERY PLATES COVERED PLATES COVERED

A Little Care Will Save Trouble and Expense Says Vesta Man

"Serious damage can easily result if motorists do not keep the plates in their battery fully covered with the electrolyte (water and acid) at all times," say West Bros., of the local Vesta service station, in making a few suggestions for the care of batteries.

"This is especially important to remember in warm weather when the evaporation is much more rapid than in winter. As the plates become exposed to the air, a layer of lead sulphate is formed on their surfaces clogging the pores and retarding the flow of current. When this happens the battery can often be saved by giving it a long slow charge which will dissolve the sulphate of lead. But if this remedy is delayed for a long time the sulphation will become so heavy that it is likely to ruin a battery. This coating of sulphate is the reason that it sometimes takes four or five days to charge a battery properly."

"By being careful to keep the battery full of distilled water at all times this trouble may be avoided. The Vesta service station is always glad to inspect your battery no matter what make it is and to fill it with distilled water as often as necessary. Especially during the summer will it pay the motorist to have his battery inspected frequently."

West Bros., proprietors of the Auto Electric Maintenance Co., have recently opened a branch station at Placentia, where motorists may receive the same efficient service as at their main station in Anaheim.

## FORMING SHRINER CLUB

City Marshal San Jernigan, local representative of the potentate, Mystic Order of Shriners, has taken the initiative in organizing a Shriner's social club for Orange county.

As a step in this direction Jernigan is securing a roster of all members of the lodge who reside in Orange, Anaheim and Fullerton. He has prepared blank posters which he has distributed among lodge members in the three cities and all of the lodge members are showing a keen interest in the proposed club.

"What we want," said Jernigan, "is a social union to promote and foster closer relations and good fellowship among our lodge members and provide an organized and hospitable means of extending fraternal acquaintance."

"As soon as the rosters are completed I will call a meeting which will be held at the motor hotel house at Santa Ana. We will then formally organize by appointing officers."

"It is our intention to make the club one of the finest in Orange county. All of the nobles of the order are interested and it will not be difficult to get the club established."

## STRIKING PACKERS RETURNING TO WORK

Orange Union Accepts Reduction of Half Cent a Box

The strike of orange packers in the packing houses at Orange and vicinity is virtually at an end, with the schedule of 5 1/2 cents a box for packing remaining effective.

With the recently organized packers voting at a meeting to return to work the strike is at an end. The packers should be back to work, and the managers of the various packing houses announcing their intention not to penalize the strikers by refusing them employment, the strike was considered more or less a closed incident.

According to the statement of Mrs. Lila King, of Orange, secretary of the Orange organization of the International Fruit and Vegetable Workers' union, many of the strikers at the meeting expressed a desire to return to work under the reduced prices per box inaugurated by the packing houses two weeks ago.

The result of the discussion in the union meeting was a decision to accept the new rate and for all strikers to return to work, providing discrimination were not shown against members of the union.

## WHEAT HARVEST LARGE

The wheat harvest season in the United States as it affects the world's supply is being watched this year as it has at no time since the signing of the armistice by officials of the bureau of markets, United States department of agriculture. Estimates thus far indicate that this country will have a crop around 809,000,000 bushels, as compared with 787,000,000 bushels last year, which, it is thought, will make up somewhat for less encouraging reports from the wheat parts of the wheat producing world.

The southern hemisphere—Australia, Argentina—started the present calendar year with two good crops, which seemed to assure the importing countries of ample supplies for the remainder of the present crop year, which ends July 31. India began the season's wheat harvest in the northern hemisphere, completing cutting in May; and the outcome was, as had been forecast, a short crop. Indian is not only out of the exporting list for the next 12 months, but may, and probably will be, an importer.

With the winter wheat prospects in the United States cut down 55,000,000 bushels to a total of 574,000,000, estimated in the July report of the bureau of markets and crop estimates, and the spring wheat conditions reduced by a fourth, the outlook for the importers will apprehensively watch the harvest in every country until Canada's farthest north crop is finally secured. Canada's wheat is threatened by drought and rust.

## SURPRISED AT OUR GROWTH

"Whenever men of affairs foregather in the Bay district, the conversation eventually turns to the oil development of Orange county," said Dr. Thomas R. Randall, prominent physician of San Francisco. "The eyes of the men of affairs seem to be on Orange county. I have spent two days, now roaming about its highways and byways, after an absence of six years and I am returning home tonight firmly convinced that this county is, indeed, 'nature's prolific wonderland.'"

## EGG LAYING CONTEST

Plans for the southern California farm bureau egg laying contest which will be held at Pomona beginning October 1st are about completed. The site was selected some time ago and the egg laying contest committee composed of Prof. J. E. Daugherty, of the university farm at Davis; G. E. Gordon, assistant farm advisor for Los Angeles county; C. G. Rose, of Pomona; E. J. Hauser, of Fontana, and M. A. Schofield, of the poultry producers of southern California, has decided upon the shed-roof type of house which the university recommends. The birds will be kept in pens of about 100 birds each in order to make the contest comparable as nearly as possible, with the conditions on a good commercial poultry farm. All birds will be trap netted and the birds with their records will be returned to their owners at the end of the year, on October 1, 1922.

The contest will be for entries from southern California only for the first year and will be limited to fifty entries. Poultrymen from all of southern California, should support this in order to make it a truly representative southern California contest. Rules and regulations as well as application blanks have been gotten out and may be secured from members of the committee as mentioned above or from the farm advisors of any of the southern counties or from the office of the Poultry Producers in Los Angeles.

It has also been decided to conduct some experimental work and it is desired to get 400 White Leghorn pullets for this phase of the work. The committee is asking that poultrymen donate two pullets to the contest committee to be used for this work. This will aid the committee materially in financing the work and will not make a burden on anyone. Anyone desiring to donate these pullets should make known their wish to any one of the committee. Application for entries in the contest should be made to G. E. Gordon, 361 Court House, Los Angeles.

## HOW TO KILL A CHICKEN

One of the most satisfactory and humane ways to kill a bird is to hang it head downward and cut the main veins in the neck at the base of the skull, so that quick bleeding is assured, says home economic specialists, United States department of agriculture. As soon as the veins are cut the brain should be pierced with a sharp, stiff, slender knife, to kill the bird and cause the feathers to loosen. If the proper area in the brain are destroyed by the knife thrust, the feathers may be plucked easily and without tearing the skin. The common way is to plunge the carcass into boiling water, but this destroys the natural appearance of the skin and increases the chances of decomposition. A bird should be cooked as quickly as possible, preferably by keeping it in a dry cool place. In warm weather, it should be cooled in cold water. Dry chilled fowls are better than those cooled in water.

Few things are harder than having faith in the masses when they don't have faith in you.

The finest lake breezes come from an electric fan.

## SONG OF THE RIVER

Cool and cool, clear and cool,  
 By laughing shallow and dreaming pool;  
 Cool and clear, cool and clear,  
 By shining silver and foaming weir;  
 By wharf, and sewer, and slimy bank;  
 And the tired wail where, the church bell rings,  
 Undisturbed by the undisturbed;  
 Play by me, bathe in me, mother and child.

Bunk and foul, dank and foul,  
 By the smoky town in its murky cowl;  
 Foul and dank, foul and dank,  
 By wharf, and sewer, and slimy bank;  
 Darker and darker the further I go,  
 Baser and baser the richer I grow;  
 Who dare sport with sin-defiled  
 Shrink from me, turn from me, mother and child.

Strong and free, strong and free,  
 The flood-gates are open away to the sea;  
 Free and strong, free and strong,  
 Cleansing my streams as I hurry along  
 To the golden sands and the leaping bar,  
 And the countless tide that awaits me afar.

As I lose myself in the infinite main,  
 Take a soul that has sinned and is pardoned again,  
 Undisturbed by the undisturbed;  
 Play by me, bathe in me, mother and child.

—Charles Kingsley.

## PUEBLO RELIEF

The Pueblo relief fund needs \$250,000 more to complete the rehabilitation work placed in the hands of the Red Cross relief operations, according to a statement by W. Frank Persons, vice-chairman of the national society, who has just visited the scene of the disaster, according to word reaching here from San Francisco.

Red Cross chapters in the Pacific division have been advised to call public attention to the imperative need and to transmit funds collected either to the division office in San Francisco or to the treasurer of the Red Cross relief operations, Percy Hagerman, Colorado Springs, Colo.

Persons' statement concerning the work being done follows:  
 "The governor of Colorado and citizens of Pueblo and La Junta have full confidence in the Red Cross and relief work in both places is fully in its charge."

"There is now no need for guesses or misunderstandings. The need is great and the facts are clear. There are 2025 families in the Pueblo district alone and 139 more in the La Junta area that need help in varying degrees. Most of these families have lost their furniture, bedding and clothing. Many have lost the houses which they owned in whole or in part."

"In the Red Cross relief fund there is now \$300,000 in cash. Making due allowances for all supplementary funds raised by a local or special committee, at least \$250,000 more is imperative if the conditions and the means of self-support are restored to those who have lost all."

## PREPAREDNESS

A certain emergency always felt it his duty to give each couple a little serious advice before he performed the marriage ceremony. He usually took them aside one at a time and talked very soberly to each regarding the great importance of the step they were about to take and the new responsibilities which they were to assume.

One day he talked in his most earnest manner for several minutes to a young woman who had come to be married. "And now," he said, in closing, "I hope you fully realize the extreme importance of the step you are taking, and are fully prepared for it."

"Prepared!" replied the bride innocently. "Well, if I ain't prepared, I don't know who is. I've got four common quilts and two nice ones and four brand new feather-beds, ten sheets and twelve pairs of pillow-slips, four linen tablecloths, a dozen spoons and a new six-quart kettle, and lots of other things."—Houston Post.

## WALTER WAS IRRITATED

It is, perhaps, unnecessary to give the name of the New England city which is the residence of the lad who figures in this story.

There had been a visitor, and to this lad she said: "And so this is little Walter. My, my, what a big boy you've grown to be. I wouldn't have believed it possible."

"Mother," said Walter when the visitor said, "I don't know how you can comprehend how persons in whom one would naturally expect an ordinary degree of intelligence appear to believe, all history and nature to the contrary, that the children of their acquaintance will always remain infantile and persist in expressing surprise when they observe the fully natural increase in one's stature?"—Washington Star.

## Where Quality and Service Talks

**GOT THE BEST OF HIM**  
 As Harry, who is six years old, came into the back door, he was saying to himself: "Well, I got the best of him that time!"

His mother happened to be in the kitchen. "Harry, have you and the neighbor boy been fighting again?" she asked.

Harry was quick to reply: "Not this time. You know when he was over here last week, we made a kite, and you made me let him take it home with him. Yesterday we made a birdhouse, and he had to take it home. So today we dug holes, and he didn't take them home with him."—Indianapolis News.

## Beach or Ballroom! Each Claims a Fabric of Its Own

Whether it's the waves or a waltz, the occasion demands a special fabric. Jaunty Ginghams to start the morning blithely! Gay silks that would a-sporting go! Linens and organdies to blossom on Summer porches! Voiles and crepes to float like flower-sprays over ball-room floors!

Our piece-goods department is always presenting something new, something just a bit better than the day before. It would be hard to deny oneself just a frock or so more. But fortunately denial isn't necessary. For this Summer, coincident with our famously moderate prices, is an additional saving made possible by a wonderful new invention—

### THE DELTOR

With New Butterick Patterns

Saves 50c to \$10 on Every Frock You Make

By a picture chart the Deltor shows you exactly how an expert would lay out the pattern you have chosen in the store. In the ample width of material, every view of pattern is included. Because of this wonderful chart, you buy from 14 to 1 3/8 yard less material than you ever bought before—a saving of at least 50c to \$10 on every frock you make.

By a picture guide the Deltor shows you exactly how an expert fitter would join each piece to the next. It makes every step of the putting together so simple, so easy to understand, that without effort, you almost unconsciously attain that perfect seal of collar, sleeve and every part that is the despair of all but the artists of Paris.

By finishing hints the Deltor gives you all those important little tricks—those means of securing distinction in ornament, trimming and finishing—that so absolutely individualize the finished charm of Parisian handwork.

### THE S.Q.R. STORE

Misses Ida Bentz and Lela Steadman spent Sunday at Laguna Beach.

Mr. and Mrs. Leo Eicholtz are home after a visit to San Bernardino and Catalina Island.

Mr. and Mrs. George Ziegler and family have arrived from New York. They have acquired a piece of land and will reside here permanently. Mr. Ziegler is the son of our well known fellow townsman of the same name.

Mr. and Mrs. William Falkenstein, with wife, Stanley, and daughter, Edith, left the first of the week for Catalina, where they will spend a couple of weeks.

Mr. and Mrs. Harry Arthur leave being spending a week's outing at Big Bear. They have acquired a piece of land, real estate, and contemplate building a summer cottage at this popular resort.

Mrs. F. A. Backs, Jr., and her daughter, Miss Florence, are at Balboa for a several weeks' visit at the sea shore.

H. H. Arnbrust, wife and daughter, Norma, went over to Catalina Island Tuesday, where they will enjoy an outing of several days.

Thirty-two candidates were taken into the Elks lodge at the regular meeting last night. The Anaheim Elks lodge now numbers more than 800 members.

Miss Sue Annack, chiropractor, who has been in the county jail for the past ninety days, where she was incarcerated for practicing her profession, contrary to the wishes of the state medical board, was released Monday.

Mrs. Sadie Horrick, secretary California Spiritualist association, will give a talk followed by messages and psychometric readings at the First Spiritual church, 202 N. Los Angeles St., July 28th, at 7:30 p. m. Every body welcome.

Mr. and Mrs. N. H. Mitchell leave in a few days for a trip to Yellowstone park and other points in the Northwest. They will go on to Indiana, where they will visit their daughter, Blanche, and will later make a tour of the eastern states. They will be absent two months.

Charles Squires and Miss Louise Hunt were married at Orange early Saturday morning, and left for a honeymoon trip to Catalina. The bride is a daughter of Mr. and Mrs. W. H. Hunt, of East Charters street, while the groom is an Olive rancher. They will make their home at Olive.

Mr. and Mrs. E. H. Adams returned from their trip to the Paschal ranch at Bakersfield several days ago, bringing with them Mrs. Annie Adams, mother of Mr. Adams. Miss Francis Adams and Sam Adams, who have been sojourning at the ranch for several weeks past, came home with them.

Orange county motorists will be interested in knowing that contract has been let by Los Angeles county for paving three miles of road in the city limits from the Orange county line. That will mean, that two miles of dirt road, the plan being to pave that next year, giving time for the fills made this year to settle.

Gene Adams drove to the Paschal ranch on Thursday, accompanied by his family and Mrs. Murray Paschal, who has been visiting with his family here. The party left here at 1 o'clock in the afternoon, reached Bakersfield at nine and twelve miles further on came to a stop because of a broken axle. They camped on the spot for the night, and Mr. Adams returned to Bakersfield the next day, procured a new axle, and the journey to the ranch was continued without further mishap.

An alleged old wizard, W. M. Guest, walked into the office of A. Bradford, at the present bank and made the startling statement to him that he could locate wells without fail with an instrument of his own invention. Mr. Bradford, who has a "show me" nature although he is not from Missouri, took him out to see what he could do. He had an instrument that looked something like a magnet, and as they rode along the instrument would at intervals turn downward which indicated, so it was maintained, that there was oil on that particular spot. Very likely Mr. Bradford got some valuable "hunches."

A rattlesnake was killed in the heart of Santa Ana's business district one day last week, and the mystified citizens are wondering how it got there. Perhaps it escaped from some drug store or doctor's office. We remember that back in Kansas certain druggists and doctors were said to keep rattlesnakes on hand for the use of thirsty customers or patients who were so beastly healthy they couldn't get a prescription for booze. A rattlesnake bite was good for a gallon of prohibition whiskey, and the snake's venom was as harmless as milk when it came in contact with the antidote. This Santa Ana snake may have escaped from captivity.

The Santa Ana Elks ball team went into the contest with the Anaheim Elks Sunday with a picture in the box of being expected to have the wild and untamed Anaheimers eating out of his hand before the game ended. But he didn't last the game out—in fact, he was unmercifully swatted, and before the game ended three other pitchers had been treated the same way. It was an awful slaughter. The locals tried to hold themselves down to a respectable score, but couldn't hold it below twenty. They allowed the Santa Anas to make seven runs, just to keep them from throwing up the game before the end of the ninth inning. This is four straight Anaheim has won over the league series. Next Sunday they play Long Beach again at Fullerton.

Richard Melrose and his little grandson, Dickie, are in San Francisco visiting Allan Melrose. They will be away a couple of weeks.

Mrs. H. S. Jayne and sons, Stewart and Robert, who have been spending a couple of weeks at Catalina, returned home the first of the week.

A. J. Schwartz, of the Youngbluth store, is taking a vacation this week, but at last accounts he hadn't made up his mind where to go. He expected to enjoy himself, however.

The Anaheim Municipal band has been engaged to give concerts every Tuesday night at the plaza in Orange. Prof. Tozier reports that great crowds come out to hear the music. The band is also giving concerts each Sunday at Seal Beach.

E. A. Beard, manager of the Pacific Telephone company, is taking a vacation. Tuesday, accompanied by Geo. Dutton, Attorney Roger Dutton and Capt. Hunt, of Los Angeles, he left by auto for Monterey county, where the party expect to spend two weeks hunting deer.

O. H. Renner and family returned several days ago from an extended motor trip into the north, which took them as far as the state of Washington. They had an enjoyable trip and saw many sights of interest, but Mr. Renner, who is a member of the sections visited average up with southern California.

No bids being received on either the \$20,000 issue of bonds for the Bay City school district or the \$25,000 issue of the Yorba school district at the last regular meeting of the board of supervisors, the date for receiving bids has been advanced to next Tuesday. The board has been attempting to dispose of the Bay City school bonds for more than two months and the Yorba school bonds have been on the market for about three weeks.

A number of Orange county avocado growers are interested in an announcement that the chamber of commerce of Puerto Rico, to hold what it calls an avocado field day Saturday, July 30, starting at 10 a. m. Avocado ice cream is to be served at noon. The meeting is to be held in a new walnut packing house. Visits to several avocado orchards are arranged for. Dr. Will R. Manning, of Fillmore, will give a demonstration of cleft grafting, and S. W. Funk, of Charter Oak, is to demonstrate side grafting. Carter Barrett, of Puente, is to talk on avocado pruning.

Residents of the little settlement consisting of forty families near the sugar factory, have just received word from the state railroad commission that a hearing would be conducted in the city hall at Anaheim Friday morning at 10 o'clock on the complaint filed by residents of the Swan tract demanding the W. S. B. Lawrie, who has furnished the sub-division with water for ten years, more or less, resume such service. His defense is that his pumping plant broke down June 6th. The hearing will be conducted by Commissioner Benedict. Marks & Launer, of Fullerton, are attorneys for the petitioners.

Today is potato day. Whether there will be a shortage of potatoes next year, with consequent high prices, will depend largely upon the success of potato day, according to statements of farmers in the San Fernando and San Gabriel valleys. The crop this season is not moving rapidly and prices are low, as compared with the cost of production, they say. Many growers in these valleys and other potato growing sections have declared their intention to quit planting flat crops. It is said serious losses have already been sustained, by reason of high freight rates preventing shipping at a profit under prices being paid. Governor William Stephens has issued a proclamation declaring Thursday potato day and urging that everyone who can buy a sack of potatoes. Hotels, restaurants, jobbers and retailers, it is stated, have agreed to boost the sale of tubers.

Officer Joe Murillo, at Fullerton, thought for a time he might be on the trail of an attempted murder there Friday night when a wild-eyed Mexican reported to him that he had been shot in the leg by one of two other Mexicans who accosted him on the street. According to the man, whose name was not learned, he was sauntering along the street at Fullerton when he encountered two Mexicans, one of whom pulled out a gun and shot him in the leg. Murillo examined the wound and found that the shot had entered the leg just above the knee and had gone straight down. Murillo came to the conclusion that the Mexican had shot himself accidentally and was afraid to admit it, probably fearing he would be arrested. After much searching Murillo allowed the "victim" to go his way. The wound was only slight.

Wallace Reid will be on the screen at Fairyland tonight in "Too Much Speed." This picture is one more thrilling roller coaster reason why Wallace Reid is the screen's most popular actor. A romance of race-track, love and business. Roaring with daredevil-driven speed cars! Tlingling with rivalry, trickery, danger! Strewing a thousands smiles on the road to happiness. A picture that starts the heart to thumping and gives old Father Time the laugh. Also Pathé Review and comedy. Tonight is vaudeville night, and Mary Miles Minter will also be seen in a play entitled, "Don't Call Me Little Girl."

Prevention is better than cure in the poultry business, as in any other department of life. Filth, dampness, improper ventilation, improper feeding, and introducing infected birds into the yard are common causes of disease. Clean the dropping boards daily, and the people of Olive. The Olive Milling company and the Olive Improvement association were represented at the hearing. The application set forth that the present minimum rate of \$1.25 per thousand cubic feet of water does not produce sufficient operating revenue to sustain the plant. After a long and heated argument, Commissioner Benedict took the application under advisement.

H. Stanley Benedict, member of the railroad commission, conducted a hearing at Olive on the application of the Olive Milling company for an increase in the rates on domestic water served to the people of Olive. The Olive Milling company and the Olive Improvement association were represented at the hearing. The application set forth that the present minimum rate of \$1.25 per thousand cubic feet of water does not produce sufficient operating revenue to sustain the plant. After a long and heated argument, Commissioner Benedict took the application under advisement.

Phillie Daniels, whose friends have long considered him a confirmed and hopeless bachelor, slipped over to Riverside, one day last week accompanied by Mrs. Mabel Farrell, and was carried to that young lady. On their return they began housekeeping in the bride's home on Santa Fe avenue, but Phillie will shortly build a residence on North Los Angeles street. Phillie is employed at the Hollister & Holland store and has long been one of the most popular grocery clerks in the city. Good wishes of numerous friends of both the bride and groom are extended to the young couple.

Superior Judge R. Y. Williams at 1:30 Thursday found in favor of the plaintiff in the case of the Plaintiffs Mutual Orange association, which sued Mrs. Olive King, of Los Angeles, for \$1190, alleged to be due in connection with an asserted violation of contract. In deciding that the association was not liable for the recovery, the court pointed out that a similar case had been tried. This action was taken into the appellate court, which decided that members of mutual citrus marketing associations were bound in every way by the by-laws of such organizations and could not with impunity market their product through other agencies.

Bebe Daniels will be at the Grand tonight in a funny picture called "Oh, Lady, Lady!" May Barber tries to help her old beau out of trouble on the day of his marriage, and she learns that another woman is trying to break up his marriage. Unfortunately, she mistakes the right girl for the wrong girl and successfully busts up the romance, and her own into the bargain. And it takes three reels of side-splitting fun to get everything straightened out again. You can count on Bebe Daniels, Harrison Ford and Walter Hiers to make this a hit. Comedy, "The Artist's Muddle." Harold Goodwin will be seen in "Oliver Twist, Jr.," tonight, and Saturday night will appear in "Black Sheep."

Carrying \$5,000,000 in insurance on motor equipment of its members, the Orange County Automobile club has on its books policies written so far this year that indicate that 1921 will pass that amount, according to A. S. Ralph, secretary and general manager of the club. The development of that volume of business within seven years tells the story of the progress and popularity of the Orange county organization. The club was launched seven years ago when a group of local business men with foresight penetrating the future and anticipating the auto development of today, decided that an organization should be effected that would offer insurance and service at actual cost. The club has grown from a mere handful of enthusiastic motorists until today it has 2,600 members. Its methods and organization are absolutely up-to-the-minute. All the efficiency of the larger companies has been used in making the local club one to be proud of. Through its indemnity exchange, insurance is issued and claims are adjusted and settled as rapidly as in any of the largest clubs.

Some men seem to have been born to go through life conceding defeat.

## Falkenstein's

Padro, a "faith healer," has wrapped the drapery of his couch about him and departed from Talbert, where he has been operating. Peace-loving inhabitants of this district, who were disturbed by the series of strange chants, and strident yells that were supposed to play an important part in the alleged healing process, have resumed their customary routine and all is serene. Padro, who is said to be a disciple of the Pentecostal "apostles" active in other parts of the county, catered to the Mexican population and set up his "shrine" in the store formerly occupied by a Japanese. His "cures" were supposed to be instantaneous and accomplished by binding parts affected with a so-called "blessed" handkerchief. To us no miracles have been reported, it is said.

That Orange county chiropractors will soon launch a vigorous educational campaign over the county in behalf of chiropractic, became known following a meeting of their association at Orange. A committee of three, with Dr. J. A. Hatch, of Santa Ana, as chairman, was appointed to take charge of the forthcoming campaign, the opening date of which has not been announced. Griffith Jones, Los Angeles attorney retained by the state association as counsel for chiropractors, will be the chief spokesman at the series of mass meetings through which the campaign will be waged. It is understood. Entertainment features to precede the lectures are under consideration, it is said. The campaign will be financed by the Orange County Chiropractic association.

WANTED TO RENT—A small stand for conducting a card-writing business. Must be separated from other business. In a doorway of some vacant building will do if no other place is open for rent. Location to draw attention. State price. Write A. T. Soderstrom, Los Angeles, Gen. Del.

Charged, in two separate complaints, with violating the county prohibition ordinance, Jack Talamantes, proprietor of a rooming house at Los Alamitos, Thursday was confined in the Orange county jail in default of \$500 bail. Judge Cox having fixed his bail at \$300 on each count. Talamantes will be tried August 23 at 10 o'clock. According to Deputy Sheriff Herman J. Zabel, two quart bottles of wine confiscated in the raid are being held in evidence against the prisoner. The raid was enacted Wednesday night by Sheriff C. E. Jackson, Under Sheriff E. E. French and Deputies Zabel and C. M. Wood. The officers claim they caught one man in the act of buying liquor from Talamantes. They searched his rooming house from the basement to the attic, but failed to find an alleged supply of liquor.

WANTED—Lady canvasser to sell useful novelties for women and men. Will give sole agency. For particulars write under J. R., Anaheim Gazette.

FOR SALE—Peaches, and Plums, 4 1/2 and 5c a pound at the ranch. A. G. Smith, East Stanford street, Garden Grove.

WANTED—Salesmen for 6000 mile guaranteed tires. Salary \$100.00 weekly with extra commissions. Cowan Tire & Rubber Co., Box 784, Chicago, Ill.

FOR SALE—Best pulp at our silo at Los Alamitos. Los Alamitos Sugar company.

LOST—Friday, May 20, brown leather bag; name inside: Mrs. E. B. Haune, St. Paul, Minn. Reward if returned to Hotel Rosslyn, Los Angeles. Golden State Auto Co.

Anaheim Gazette, fifty-two weeks for \$150.

## NOTES ABOUT THE OIL FIELDS

### Items of Interest Gleaned From Southern California's Producing Fields and Progress Made.

The Petroleum Midway's success at Buena Park continues. At 2450 the formation is a hard sand, but the drilling is going nicely.

The Standard Oil company is close to 2500 feet at Garden Grove. About a hundred feet of hole a week is being made. Close watch is being kept on the formation changes.

The Westminister Oil company is making splendid progress in spite of the exceptionally hard formation struck after drilling out the cement at 3000 feet. At 3300, the present depth of the hole, the formation shows hard shell and shale. The formation seems to be rather broken up and makes the logging a little difficult. It appears now that the Westminister well may have to go to 3500 or deeper before getting the oil sand.

The Placentia-Pacific expects to drill out the cement this week and make a bottom water test at 3565. The first cementing failed to get all the bottom water. Conditions have been very favorable for a good well.

The Placentia Oil company will be making hole and drilling ahead before the end of the week. The cement has been drilled out at 2875 feet and a water test will be made today. The management does not anticipate any difficulty with the water.

The Union Oil company of California still holds first place in the heavy development of the Richfield district. Coyle and Bogue No. 2, drilled to 3394, looks like a 200-barrel well. The rods are being put in.

Chapman No. 5 is drilling on bottom again in the oil sand at 4055 feet. Chapman No. 10 is showing a nice sand at 3254; Nos. 18, 19 and 20 are drilling.

Thompson-Goodwin No. 4 shows shale and shell at 2865. Preparations are being made to bring in McFadden No. 2 at 3290 feet. It does not look like a big well. Morse No. 3 is at 3400 feet, showing oil sand. Dickson No. 1, at 3565 feet, is fishing, the formation is gray sand and is not encouraging. Yorba No. 1 is also in the gray sand at 3740 feet.

Siena No. 1 is in oil sand at 3420 feet and looks good. Placentia-Orchard No. 1 is drilling at 1650 feet. Shacklin No. 1, drilled to 3150 feet, lost some hole and is now redrilling at 1900 feet.

The Union's big producer, Chapman No. 6, continues to flow 2400 barrels daily. No. 1, the discovery well of the field, is still good for more than 600 barrels a day.

On the Morse property No. 2 continues to be the big well; it is doing 525 barrels daily.

The Richfield-Yorba Oil company is now putting in 4 1/2 perforated and getting ready to put its new 500-barrel well on production. Sand heaving has hindered the work the past week somewhat. But knowing that a well is in sight the trouble of putting it on production is of no consequence.

The Brea Canyon Oil company will not abandon the 4200-foot test well drilled at Brea until further tests of the upper oil sands are made. At 4187 feet the deep well, No. 32, produced about 12 barrels. The 4 and 6 inch strings are to be cut and pulled and the sands at 3200, 3400 and 3600 tested out. Some oil showings were noted at these depths as the drilling proceeded. No. 33 has been recovered at 3200 feet, the 6-inch is now going in and drilling going ahead in new hole.

At 3600 feet the Fullerton Oil company's No. 15 is drilling in hard sand and showing quite a quantity of oil and gas. No. 6, drilled to 3300 feet, lost some hole and is now redrilling at 2855 feet. No. 14 stands cemented at 2395 feet and No. 17 is a new well marked with a rig.

The General Petroleum, the Tonner field in Brea canyon on the map, has but one well drilling in that field now. Tonner No. 1, redrilling and deepening at 2150 feet, has drilled through almost 500 feet of oil sand and looks like a big well.

Olinda, California's first commercial oil well, still continues to furnish producers. On the Santa Fe property the Petroleum Development company completed No. 29 at 3004 feet. No. 93, drilling at 2855 feet, is looking very good. No. 94, at 2800 feet, is showing oil and gas. No. 95 is a rig.

On the Bradford property the Petroleum Development company has completed No. 4 at 4265 feet and put the new well on production. It will probably settle down to about 200 barrels a day.

Bradford No. 1 continues to increase its output a few barrels each day and is now making 250. Bradford No. 3 is drilling in gray sand at 4375 feet and shows little indication of oil. Bradford

### HOME DEPARTMENT FOR FARM BUREAU

The Women of the County Demand an Organization

Pursuant to a decision reached here at a meeting of women representing every farm center in the county, formal application for the establishment of a home department, in the Orange county farm bureau, was presented to the directors of that organization in Santa Ana.

That the directors would act favorably on the application, seemed assured.

The request was presented by a committee named last Thursday, the personnel being: Mrs. Julia Saunby, Alvin Block and Lena Schofield.

The women representatives of the county's farm centers met in the forenoon jointly with the farm bureau directors. Each delegate had been empowered to act for each center concerned.

W. M. Belling, of Tustin, president of the county bureau, presided.

Miss Lillian Clark, demonstration leader from the state university, outlined the manner in which the home department should be launched. She stated that application for a demonstrator, who would supervise the work of the department after its organization, might not be followed by the arrival of such a demonstrator for from one to ten months. She stated in explanation that the demand for such aid was so great throughout the state that there is not sufficient funds available to pay the salaries of the necessary workers.

It was decided, however, that the work of organization need not be delayed, and the resolution to request the approval of the bureau directors followed.

The representation of the farm centers was said to be a remarkable one, in the elimination of the farm bureau officials, and showed the interest taken in the matter by the women.

From this, Anaheim center were Mrs. B. L. Chandler, Mrs. C. W. Martin and Mrs. W. C. Brumage; Garden Grove was represented by Mrs. C. C. Violett; Tustin sent Mrs. Sidney Saunby and Mrs. Lillian Marchant. Representatives of other centers were: West Orange, Mrs. W. H. Murphy and Mrs. N. A. Dyers; Orange, Mrs. W. O. Hasmann; La Habra, Mrs. W. M. Snow; Fullerton, Mrs. G. W. Sherwood and Mrs. S. S. Twombly; Costa Mesa, Mrs. H. B. Woodruff; El Toro, Mrs. John Osterman; Capistrano, Mrs. Aaron Buckheim; Brea, Mrs. Anna Belding and Mrs. Lena Schofield; El Modena, Mrs. Laura A. Crist, Mrs. H. Paddock and Miss Nellie Crist; Villa Park, Mrs. E. J. Browne, Mrs. R. B. Johnson and Mrs. W. P. Perry; Cypress, Mrs. C. R. John and Mrs. V. K. Chandler; Norwalk, Mrs. George T. Kellogg, Mrs. J. F. Quigley and Mrs. Murray Horne.

At the close of the morning business session, all members present adjourned to Birch park, where they enjoyed a picnic dinner composed of all the delicious foods which a farmer's wife is capable of preparing. Hot coffee, with cream and sugar, was served through the courtesy of the farm bureau board of directors.

For the first time in a good many months the Hurst Oil company No. 1 is standing idle. A fishing job and a desire to await further developments in the field as given as the cause of shutting the well down.

Miley-Koek No. 2 is one of the Huntington Beach producers. Completed at 2925 feet this new well went on production, making 100 barrels. Nos. 3 and 4 are also producing. The 6 inch rig and offset the Republic Petroleum big producer. No. 5 is rigging up for the rotary.

At 2379 feet the Motor Oil and Refining company got a showing of oil. The showing was sufficient to request the setting of pipe at that depth. The state's request was complied with and the 10-inch set.

Cleaning and washing out of Panteg-Huntington No. 1 resulted in almost doubling the production. The well is doing close to 400 barrels. Formerly the production ranged around 250 barrels.

The Petroleum Midway's first producer in the field, Columbia 31, has doubled its production. Drilled to 3007 feet the well came in at about 30 barrels. The production has increased to 66 barrels.

The State Consolidated No. 1, completed at 3300 feet, went on production last week and started off flowing by heads, about 200 barrels.

The Sun Oil company's No. 8 is making a strong bid to get into the field's production list. Sand is the thing that is preventing the well from making regular production. As it is the well is making about 100 barrels.

Sun No. 1 is standing cemented at 2437 feet. No. 2 is a rig and No. 4 drilled out the cement at 2135 feet and was dry. Preparations are now being made to run in screen 8 inches and put the well on production.

At 2535 feet the Standard Oil company is halting A-9 with the intention of bringing the new well in. Bolas No. 2 is also being halted down and will be put on production soon. Jones Community No. 1 is holding its initial production of 300 barrels nicely and is making 25 gray oil.

On the Huntington A property the Standard has two wells standing cemented, six wells drilling and two new rigs up. Huntington B-2, 3 and 4 are drilling. Huntington D-1 is standing cemented at 2665 feet; D-2 is a location; B-1 is cemented and stands at 2, 335 feet; E-2 is drilling at 1100 feet; E-3 is rigging up; Bolas No. 4 has been located; Jones Community No. 2 is being located; Thompson No. 1 shows 2500 feet, and Torrance No. 1 is washing out at 4104 feet.

J. S. Howard, Justice of the Peace of said Township, ROGER C. DUTTON, Attorney for Plaintiff, Anaheim, Calif.

### CURIOSITY

In a street car the other day a man and his wife saw a cockroach on the floor.

"I never see one of those things," said the man, "without wondering where it came from."

"And I never see one," said the wife, "without wondering where it is going."—Youngstown Telegram.

### ANAHEIM CITRUS FRUIT ASSOCIATION

Notice of Stockholders' Meeting to Consider Increase of Capital Stock. Notice is hereby given that in pursuance of the resolution and order of the board of directors of Anaheim Citrus Fruit Association, organized and existing under the laws of the State of California, unanimously adopted at a regular meeting of said board held on the 1st day of July, 1921,

at the principal place of business of said corporation, to-wit: At No. 150 East Santa Ana Street, in the City of Anaheim, County of Orange, State of California, a meeting of the stockholders of said corporation is hereby called for and will be held at the principal place of business of said corporation, to-wit: At No. 150 East Santa Ana Street, in the City of Anaheim, County of Orange, State of California, on Friday, the 16th day of September, 1921, at 2 o'clock P. M., for the purpose of considering and acting upon the proposition to increase the capital stock of said corporation from \$50,000.00 divided into 50,000 shares of the par value of \$1.00 each, to \$200,000.00, divided into 200,000 shares of the par value of \$1.00 each.

By order of the board of directors. Dated July 1, 1921.

W. H. SCHUREMAN, Secretary of Anaheim Citrus Fruit Association.

7-7-Sept 15

### NOTICE TO CREDITORS

Estate of James M. Cornelius, Deceased.

Notice is hereby given, by the undersigned, administrator of the estate of James M. Cornelius, deceased, to the creditors of and all persons having claims against the said deceased to file them with the necessary vouchers in and on the clerk of the superior court of the County of Orange, State of California, or to exhibit the same with the necessary vouchers, to the said administrator at his place of business, at the office of Ames & McFadden, at Suite No. 2, Odd Fellows' Building, at No. 133 West Center Street, in the City of Anaheim, in the County of Orange, within ten months after the first publication of this notice.

Dated this 7th day of July, 1921.

ADA L. CORNELIUS, Administrator of the Estate of James M. Cornelius, Deceased.

7-14-21

### NOTICE TO THE STOCKHOLDERS OF THE ANAHEIM UNION WATER COMPANY

Notice is hereby given that an adjourned meeting of the stockholders of the Anaheim Union Water Company will be held at the office of the Company at Anaheim, Orange County, California, on the 30th day of July, 1921, at the hour of 10:00 o'clock A. M., of said day for the purpose of hearing the report of the Advisory Committee, and the Board of Directors, regarding an amendment of the Articles of Incorporation, definitely fixing and describing the boundaries of the District and of acting on an action entitled as above, brought against you in the Justice's Court of Anaheim Township, Orange County, State of California, within five days after the service on you of this summons—if it is served within the city and County, townships or city in which the action is brought; but within ten days if it is served out of said township or city but in the County in which the action is brought; and within twenty days if served elsewhere.

And you are hereby notified that unless you so appear and answer as above required, the said Plaintiff will take judgment for any money or damages demanded in the Complaint, as arising upon contract or said Plaintiff will apply to the Court for the relief demanded in the Complaint.

Given, under my hand this 3rd day of May, 1921.

J. S. HOWARD, Justice of the Peace of said Township, ROGER C. DUTTON, Attorney for Plaintiff, Anaheim, Calif.

### CERTIFICATE OF INDIVIDUAL TRANSACTING BUSINESS UNDER FICTITIOUS NAME

The undersigned, Wilford B. Holland, does hereby certify that he is engaged in the business of buying, selling, vending and dealing in electrical supplies and electric fixtures and of installing electric wires and electrical fixtures, under the name or designation of Holland Electric Company; that the office and principal place of business of said Wilford B. Holland is No. 119 North Los Angeles Street, in the City of Anaheim, Orange County, California.

That the name in full and place of residence of said Wilford B. Holland are as follows:

Wilford B. Holland, No. 108 N. Claudina Street, Anaheim, Orange County, California.

WITNESS my hand this 24th day of June, 1921.

WILFORD B. HOLLAND,

State of California, County of Orange, SS:

On this 24th day of June, A. D. 1921, before me, Homer G. Ames, a Notary Public in and for the County of Orange, State of California, residing therein, duly commissioned and sworn, personally appeared Wilford B. Holland, known to me to be the person described in the foregoing instrument, and whose name is subscribed thereto, and he acknowledged to me that he executed the same.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed my official seal, the day and year in this certificate first above written.

(Notarial Seal)

HOMER G. AMES, Notary Public in and for County of Orange, State of California.

### NOTICE OF ABANDONMENT OF HIGHWAY

Notice is hereby given to all freeholders in Third road district that the hearing of the petition of A. E. Christensen et al. filed on the 5th day of July, 1921, to vacate, discontinue, abandon and abolish a certain highway (or certain highways, as the case may be) in Third Road District, in Orange County, California, has been set for Tuesday, the 26th day of July, 1921, at 10 o'clock a. m., at the room of the Board of Supervisors in the Court House at Santa Ana, California.

Said road (or roads, as the case may be) is described as follows:

Commencing at the Northwest corner of Lot 2, Section 5, Twp. 4 South Range 5 West, S. B. & M.; thence North 4° 23' 15" West along the easterly line of said Block "C" of the Kraemer Tract, a distance of 20 feet therefrom, measured at right angles, 175.67 feet, more or less, to an intersection with the north line of Corona Ave., thence North 30° 44' 58" East, 34.90 feet to an intersection with the easterly line of the Kraemer Tract; thence North 4° 23' 15" West, 125.02 feet to the point of beginning.

Also a triangular shaped parcel of land more particularly described as follows: Beginning at the Southwest corner of Lot 1, Section 5, Twp. 4 South Range 5 West, S. B. & M. and running thence North 4° 23' 15" West, 20.10 feet; thence South 88° 29' 15" East, 20.10 feet; thence South 43° 28' 45" West, 26.97 feet to the point of beginning.

By order of the Board of Supervisors of Orange County, California. Dated this 5th day of July, 1921.

(SEAL)

J. M. BACKS, County Clerk of Orange County, California, and ex-Officio Clerk of the Board of Supervisors of said County.

### NOTICE OF ABANDONMENT OF HIGHWAY

Notice is hereby given to all freeholders in Third road district that the hearing of the petition of C. R. Vesper et al. filed on the 5th day of July, 1921, to vacate, discontinue, abandon and abolish a certain highway (or certain highways, as the case may be) in Third Road District, in Orange County, California, has been set for Tuesday, the 26th day of July, 1921, at 10 o'clock a. m., at the room of the Board of Supervisors in the Court House at Santa Ana, California.

Said road (or roads, as the case may be) is described as follows: Commencing at the Southeast corner of Lot 18, Block "C" of the Kraemer Tract as referenced in a map made and filed in the Miscellaneous Records, Book 12, pages 87 and 88, Records of Los Angeles County, California; thence South 5° 42' 15" East, 28.48 feet to an intersection with the Southerly line of said Forty foot road 11.66 feet to the point of beginning of this portion of road to be vacated.

Thence North 30° 44' 58" East, 49.71 feet to a point 40 feet easterly of measured at right angles to the easterly line of said Block "C" of the Kraemer Tract; thence South 4° 23' 15" East parallel to said Kraemer Tract line 34.33 feet to a point; thence South 73° 10' 30" West, 25.30 feet to the point of beginning.

By order of the Board of Supervisors of Orange County, California. Dated this 5th day of July, 1921.

(SEAL)

J. M. BACKS, County Clerk of Orange County, California, and ex-Officio Clerk of the Board of Supervisors of said County.

# SMALL CLAIMS COURT READY FOR BUSINESS

Will Conduct Lawsuits in Which Lawyers are Barred

The small claims court, established by the last legislature, which will be conducted by justices of the peace, will be open for business on Friday, July 25.

The purpose of the court is to enable a creditor to collect small debts without delay or expense. Attorneys are not to be allowed to appear for either the plaintiff or defendant and no fees are to be charged.

Proceedings before the "Small Claims Court" are to be informal and no claim for money exceeding \$50 in amount will be heard.

The new law was originated by Assemblyman Rosenheck, of San Francisco. Through its passage seventeen new sections were added to the code of civil procedure.

Methods of carrying out the work of the court were described by Justice Cox as follows:

A creditor desiring to bring suit against anyone owing him money not exceeding \$50 must appear before the court and make affidavit to the debt in not less than five days nor more than 15, both creditor and debtor must appear in the small claims court.

Both of the principals in the action must then present such evidence as they have and the judge makes whatever award he considers proper.

Assigned claims or suits to recover goods will not be heard in the court.

The defendant will have the right of appeal, but the plaintiff cannot appeal.

Attorney's fees of \$15 must be paid by the plaintiff by the defendant in case the defendant appeals and loses in the higher court.

Subpoenas are to be served by registered mail.

## MRS. CAMPBELL TO FIGHT HER BATTLE ALONE

Wealthy Daughter, Apparently, Will Not Assist Her

Apparently assuming an attitude of indifference toward her approaching trial for the murder of her husband, Mrs. Mary Campbell, who is slated to come before the justice court for her preliminary examination August 3, is willing away the hours by reading light fiction and magazines.

Frequently she appears at the barred window of her cell and gazes out into the street. She has seen no one lately besides the jail matron. And, according to Mrs. B. A. Swanwick, deputy sheriff, she gets less mail than any other prisoner confined in the jail.

Attorney Clyde Bishop stated that he has practically withdrawn as counsel for the defense. He said that neither Mrs. Campbell nor any of her relatives had come to terms with him and that he does not propose to act as her attorney without an understanding. It is rumored that Mrs. Campbell is not getting the financial support that was expected from her reputed millionaire son-in-law, A. G. Wilkes, old promoter of San Francisco. Neither Wilkes nor his wife have come to Santa Ana to see her.

Mrs. Swanwick says that Mrs. Campbell has not received more than two letters from San Francisco and that these came soon after her arrest, June 9. It is known, however, that Wilkes, her son-in-law, sent a representative here from the Bay city to interview Mrs. Campbell.

Just what transpired between Mrs. Campbell and the visitor is a matter of conjecture. It is intimated that there are strained relations between the prisoner and her son-in-law and daughter, inasmuch as neither have shown enough concern over her situation to make a personal call.

Shortly after Mrs. Campbell's arrest, Clyde Bishop announced that he had been retained as the woman's counsel. Guy Eddie also was mentioned, and he did, as a matter of fact, appear in the justice court July 6, when Mrs. Campbell was brought in for examination. Both Bishop and Eddie, requested a continuance and preliminary was reset for August 3.

Mrs. Campbell appeared on the verge of a nervous collapse when she was arraigned and again when her examination was continued. She said little or nothing and had to be supported by the jail matron and a deputy sheriff, as she walked to the court house and back again to the jail.

## YEAST BREAD DELICIOUS WHEN WELL MADE

Cleanliness, Care and an Oven of Right Temperature Are Essentials in Good Bread Making

A well-made loaf of bread is a source of satisfaction as long as it is soft, warm and palatable with a spongy texture. It is tempting none but the starving. The following directions for making yeast bread are given by food specialists in the United States department of agriculture. If the directions are followed carefully, a delicious loaf is the result.

Everything connected with the process of bread making should be scrupulously clean. All utensils, therefore, should be washed carefully; the ingredients should be kept from the dust; liquid yeast should be kept cold and well covered; the hands should be washed and the dough cleaned before they touch the dough. Wooden tools, which can be used for cleaning the walls and then thrown away, are a convenient part of the equipment for bread making.

In making stiff dough out of the sponge, or out of the liquid containing yeast, the flour should be added gradually, and what is more important, the dough should be beaten thoroughly, or, when it gets too stiff for this, kneaded after each addition of flour. If this is not done, too much dough is likely to be added and this spoils the texture of the bread. The time to stop putting in flour is when the dough can be kneaded without sticking either to the hands or to the board, even when they are unfoured. If for any reason more flour than is needed is added, the dough should be softened again by means of water or milk.

Beginners often have difficulty in determining when the dough is ready to be divided into loaves and put into the pans. A good rule is to measure the dough. When it is ready to be made into loaves, the dough for each loaf, if made out of hard-wheat flour, should amount to 3 pounds; if made from soft flour, to about 2 1/2 pounds.

Recipe for two loaves of wheat bread—

2 cups lukewarm milk, water or a mixture of them.

1 cake compressed yeast or

1 1/2 cups lukewarm milk, water or

mixture of them.

1 1/2 cup liquid yeast.

2 teaspoons salt.

2 tablespoons sugar.

But, if used, 2 tablespoons or less.

5 cups, or 3 pints, after flour.

Boil the water or scald the milk. Put

the sugar and salt (and fat, if used)

into a mixing bowl. Pour the hot li-

quid over it and allow it to become

lukewarm. Mix the yeast with a little

of the lukewarm liquid and add it to

the rest of the liquid. If convenient,

get this aside in a warm place, not over

86 degrees F., for one hour; if not con-

venient to set it aside, add the flour at

once, putting in a little at a time and

kneading until the dough is of such

consistency that it sticks neither to

the bowl nor to the hands. This re-

quires about 10 minutes.

Dough should be kept covered while

it is rising, for otherwise a crust will

form on top and interfere with the ex-

pansion. Some housekeepers brush

the dough over with melted fat, but

this is not necessary if the dough is

well covered.

Cover, and allow to rise 1 3/4 hours

at a temperature of 86 degrees F.; it

may be better to set it at a lower tem-

perature the longer the time required

for rising. Cut down the dough, from

the top of the loaf, and divide it into

slightly. Knead a little and set aside

to rise again for one hour. With a

good bread flour, the dough should

weigh about twice its volume. Divide

into portions of standard size (1 1/2

pounds). Allow to rise until a light

touch will make a slight dent. With

good bread flour this happens when the

dough reaches the top of the pans.

Bake for 60 minutes.

Bread can be made during the day

by what is known as the "short

sponge" method. All the ingredients

are the same as for the "short or

straight-dough" process, but the flour

of the flour is added at a sponge. In

this mixture, which is called a sponge,

is so light that it will fall at the

slightest touch. It is ready for the

addition of the rest of the flour.

Use the same proportions as for the

short process in overnight sponge

method, except in the case of the

yeast, which should be one-eighth cake

of compressed yeast for each loaf. Use

water rather than milk. In the evening

mix the yeast with water, salt, and

half of the flour, and beat thoroughly.

Cover and place at a temperature of

66 degrees to 70 degrees F., or that of

an ordinary room. In the morning add

the sugar and the rest of the flour and

proceed as in the case of the short

process.

HIS BEQUEST

A lawyer was known to be a bit

greasing. He had just made out a will

for an old lady client, who was passing

away. The next day the old lady, very

early in the morning, called on the lawyer.

"Now, say what you were going to

say."

"I've given—you—" and she stopped,

her breathing becoming more and more

labored.

"Yes, yes," urged the lawyer. Then

she finished:

"I've given—a deal of trouble!"—La-

sa Home Journal.

## SANTA ANA HERO BURIED AT ARLINGTON

Body of Stamey Elliott, Killed at Chautau Therly Brought to America

The body of Stamey Elliott, who fell in the battle of Chautau Therly, has arrived in New York, and, in accordance with the wishes of his mother, it will be placed in the national cemetery at Arlington, Va., there to rest with thousands of others of America's heroic dead.

Word that the body had arrived from overseas came by wire to the mother, Mrs. Martha Elliott, 708 East Walnut street, Santa Ana.

Stamey Elliott was one of the contingent of thirty-five Santa Ana men from Company L, 160th infantry, who went from Camp Kearney to France in June, 1918. Scattered to different companies, nearly every one of these men saw some of the hardest fighting in which Americans participated. They were in the front line continuously generally without the protection of artillery.

Stamey was transferred to the 58th infantry and was a member of a squad of men headed by Jacob Flier, of Santa Ana, who, later in the fighting, was awarded first a medallion militaire by the French government and later a distinguished service cross by the Americans.

"We were advancing on August 7, 1918, said Flier in telling of the end of that campaign, and saw him sitting down under direct fire of German machine guns, running forward, throwing ourselves on the ground, firing and running forward again. Stamey was in my squad. I heard him call out, 'Good-bye, Flier; I'll see you later.' I twisted my head around and saw him sitting on a stretcher as he was being carried away. He waved his hand. I didn't think, at that time, he was badly wounded. I learned later, after his death, that he had six or eight machine gun bullets through the abdomen."

Stamey was transferred to the 58th infantry and was a member of a squad of men headed by Jacob Flier, of Santa Ana, who, later in the fighting, was awarded first a medallion militaire by the French government and later a distinguished service cross by the Americans.
