MOVEMENT FOR PALM STREET PAVING

P. L. A. N. I. N. G. COMMISSION ASKS CITY COUNCIL TO COMPLETE JOB

Regular Meeting Night of Council to Be Changed From Thursday to Tuesday Nights; Ordinance Will Be Passed At Next Meeting; Bids for Thirty Fire Hydrants Rejected, Will Buy in Open Market.

For many years the city council has held its regular meetings on the second and fourth Thursday nights of the month, but the board has decided to make a change. An ordinance was introduced Thursday night changing the dates of meeting to the second and fourth Tuesdays of each month. It will be adopted at the next meeting, and will take immediate effect.

Recommendation that the city immediately institute proceedings to pave Palm street from Broadway to Vermont avenue was made Thursday night by the Anaheim city planning commission in a communication to the city council. With 50 per cent of the right of way open from the city limits to Costa Mesa, and the assurance of county supervisors that the route will soon be opened, it is time for Anaheim to align its share of the project, the recommendation said.

Disbursements during the past two weeks were accounted for by the following by City Clerk Edward B. Merritt: General fund, \$1,621.30; interest and redemption fund, \$1,751.17; with a total expenditure of \$3,372.47.

Bids for thirty fire hydrants were rejected after a discussion in the council. The board decided to buy the equipment in open market.

Specifications for a quantity of cast iron pipe totaling more than 17,000 linear feet, in six, eight, and ten-inch diameters, were adopted and bids requested. The bids will also include figuring on 10,000 pounds of fittings. Bids submitted for an order of chlorine gas to be used in the outbreak sewer reduction process were referred to the sewer commission. Anaheim's share in the outbreak maintenance totaled \$20.75 for the month.

Meyer Retracts Bitter Charges

Supervisors Accept Retraction and All Is Peace

Possibility of verbal fireworks developing at the requested appearance of Editor Stan Reynolds at the Newport Beach news before the county supervisors Tuesday to explain a recent attack upon the board, has been averted since the following situation developed:

1. Editor Meyer had printed a retraction of the articles which stated that Fred Opp of Costa Mesa, had appeared before the supervisors to request an appropriation for roadside beautification, and had been cruelly refused because of Costa Mesa's vote against the bond funds.

2. Because of that retraction, the supervisors had nothing further to say to Meyer. They were satisfied, they said.

3. Editor Meyer would not have answered their questions anyway, having brought with him his attorney, Stanley Reinhaus, who advised him that he was not obligated either to appear before the board or to answer questions.

Reinhaus told the board that the subpoena, issued to demand the appearance of Meyer, was not such a subpoena, but was issued under purported authority of superior court, was an attempt to usurp the right of the board, and therefore in contempt of court. Reinhaus declared that he questioned the right of the board to summon Meyer under any proceedings.

Chief Deputy District Attorney L. W. Blodgett replied that the subpoena of the board was due to a typographical error and denied that it constituted contempt. He also advised the board that Meyer, being present, the board had the right to question him.

No advantage was taken of the opportunity, however, except that Supervisor George Jeffrey, who had been the principal target of the editorial newspaper article, observed that "when any body lied about him he wanted to know why." He also remarked that the article placed the board in a bad light.

Fred Opp, who had been mentioned in the article, admitted that it was unfounded on fact.

Deputies Find Threat Only Woman's Joke

The writer of a threatening note, who turned out to be a woman named Placenta, caused a neighborhood near Placenta a considerable commotion Monday, until deputy sheriffs arrived and learned that the receiver of the note was being made the butt of a joke. Deputy sheriff, who investigated, after receiving a frantic call for help, refused to divulge the names of the parties involved, when they learned that the note was written in fun.

The note read:

"The note of a black man at 7:30 p. m., this eve. He will have eyes full of fire and teeth that protrude. Do not notify police. When we see you. Have your money ready and nothing else will be said. I mean what I say. Don't scream. Be quiet."

The note was signed with a skull and crossbones, and in the upper right hand corner was a red blot of ink. The writer explained that it represented blood.

Soldier, Rest Thy Warfare's Over

Tans Sound for Man of Valor, Leaving Behind Warrior's Record

With sorrow prevailing the community where he had lived so many years, and with tears dimming the eyes of those who were near and dear to him, the mortal remains of a grizzled veteran of the Civil War were laid away in the great vault of the department of the state. Burial services were conducted at the chapel of St. Mary's, where a large number of the community gathered to pay a last tribute to his memory. The casket was covered with flags and flowers, and the service was held in a room where the deceased had lived for many years.

The deceased was a man of many virtues, and his death was a great loss to the community. He was a man of many virtues, and his death was a great loss to the community.

ALL THE COUNTY FIREMEN

HUNDREDS OF THEM TO BE HERE FROM ALL SECTIONS OF STATE

State Firemen's Association Will Find Hearty Welcome in Orange County; Sightseeing Tours and Interesting Programs To Be Provided; Anaheim City Park To Be a Great Attraction.

The program for the forthcoming convention of the California State Firemen's Association, which will be held in Anaheim, August 7 to 9, inclusive, has just been announced by R. H. Davis, general chairman acting for the Orange County Firemen's Association, which is sponsoring the convention.

The program, which may be slightly changed by the time of the convention, is as follows:

Tuesday, August 6, 1929

1 p. m.—11 p. m. Arrival of visiting firemen and registration of delegates. California hotel.

Wednesday, August 7, 1929

9 a. m.—12 noon. Registration and meeting of all executive committees.

1:30 p. m.—Sightseeing trip for all visiting ladies to Buena Park, Garden Grove, Huntington Beach, ending at the Greek theatre at Anaheim, where a program will be given all delegates and ladies.

1:30 p. m.—Official opening of convention at Mission County theatre by Rev. A. Meyer, pastor, Star Evangelical Baptist; prayer, Rev. Dudley B. Snudden of Fullerton; address of welcome, Mr. William Smith, chairman of the board of supervisors of Orange county; address, Mayor Bert Amelin of Fullerton; address, Chief J. C. Jones of Los Angeles; address, Senator Merittman of Long Beach; address, Senator Nelson T. Edwards of Orange; address, Assemblyman Ted Craig of Brea.

7:30 p. m.—Program Greek theatre, Anaheim, with swimming party.

Thursday, August 8, 1929

9 a. m.—Business session at convention theatre.

1:30 p. m.—Sightseeing trip for all visiting ladies to Laguna Beach to visit Art Galleries and lunch afterwards, proceeding down the coast to San Clemente, San Juan Capistrano, Tustin, Lemon Heights and ending at Irvine Park where a barbecue will be given to all the delegates and ladies and a dance with music furnished by the Los Angeles orchestra.

10:30 a. m.—Memorial address by Rev. George F. Tinsley of Fullerton.

1:30 p. m.—Adjournment of business session to the hotel and barbeque at Irvine Park.

6:00 p. m.—Barbeque and dance at Irvine Park.

Friday, August 9, 1929

9 a. m.—Business session at convention theatre.

1:30 p. m.—Sightseeing trip for all visiting ladies to La Habra, Brea, Orange, Placentia and Santa Ana, with lunch served at Birch Park, Santa Ana. After lunch visitors will be taken for a boat ride in the Newport harbor, Newport Beach, and to Costa Mesa.

12:00 noon. Adjournment of convention for lunch.

1:30 p. m.—Business session at convention theatre.

5:30 p. m.—Grand preview entertainment.

7:30 p. m.—Grand fireworks celebration, courtesy of the Fox Motion Picture theatre of Fullerton.

Big Production By the Insectary

Cryptoleneum Lead the List With An Output of 22,545,000 Insects

The report for the Orange County Insectary for the fiscal year ending July 1, 1929, shows the largest annual production of beneficial insects in the history of the county. The insects have been in operation since 1925, and have produced a total of 23,492,440 Cryptoleneum, 1,150,750 were used for reproduction in the plant, 22,545,690 were liberated in groves infested with citrus fruit, and 14,000,000 of these Cryptoleneum were liberated since January 1, which, at the rate of a single acre of 1 Cryptoleneum per tree, and an average of 700 Cryptoleneum per acre, would care for over 20,000 in.

The estimated total acreage of citrus in Orange county infested with Citrus fruit mealybug is approximately 45,000. Of this amount over 40,000 acres were inspected and graded by the district inspectors during the period from February to May, inclusive. Of this total nearly 7,000 or over 15 per cent would have a heavy infestation, over 12,000 acres or 25 per cent of medium infestation, and the rest graded light, or trace.

In spite of the fact that the 1929 season was higher than usual, the winter hold-over of Cryptoleneum was apparently very light, with only a few other conditions, permitted many heavy infestations to appear this spring. The insectary, which has been satisfactorily reduced at the present time, but there still remain a few old infestations additional Cryptoleneum have been liberated in an attempt to keep up the control.

In addition to the Cryptoleneum produced at the plant, approximately 11,000,000 of the Australian parasitic, Coccophagus gurneyi and Tetraneura coccophagus, approximately 3,000,000 of the European predatory thrips, and a small number of the small lady bird parasitic and the Australian Thrips, which have been liberated by us to be wholly untrue.

This statement could not be presented to Supervisor H. Chapman of Santa Ana, C. E. Ut of Tustin and Donald Dodge, Costa Mesa, for the reason that the district inspectors and could not be reached. It was not presented to Mr. J. J. Dwyer of the reason that he did not sign the engineer's report.

WILLARD SMITH, GEORGE JEFFREY, W. SCHUMACHER, (Continued on Page Three)

Local Police Capture Still

Raid Wednesday Evening Uncovers \$10,000 Still Within City Limits

AN OLD BARN, bespeaking temperance and calm in all its outward appearances, was found to be the very height of intertemperance and action when Chief J. S. Bouldin and some half dozen members of the Anaheim police department investigated it last evening with a search warrant and found a \$10,000 still in operation. The barn, standing some fifty feet within an orange grove on West North street, had been under suspicion by the chief for some time, but the desire to catch the bootleggers in actual operation prevented him from making a premature investigation.

The alarm was given about 5:30 on Wednesday afternoon and by 6:00 p. m. the officers had raided the place. The barn was a two-story building, the first floor was a table set for supper and the upstairs for the evening. The officers found a number of men, some of whom were apparently operators of the still, and others who were the proprietors of the still. The house was found to contain a 5-gallon keg, a part full of wine, and a number of other things.

In the barn the officers found 25,000 gallon tanks of mash, a copper still of 500-gallon capacity, several carboys of yeast, sugar, and many brand new 5-gallon tins to be used as containers for the finished alcohol. The still, standing about 25 feet in the air, was a pipe the alcohol into the mash and the mash into the still. The mash was found to contain a 5-gallon keg, a part full of wine, and a number of other things.

Hot Repies To Denial Of Board

SUPERVISORS INDIGNANTLY DENY THE CHARGES OF COL. FINLEY AND OTHERS

The board of supervisors, members of the advisory committee on flood control and attorneys for the Orange county flood control district on Friday repudiated statements made recently by Col. A. H. Finley, former supervisor from Santa Ana, who indicated a belief that the board had been bought to hear on Paul Bailey, former flood control engineer, in inducing him to make a report in favor of a lower dam in the Santa Ana canyon.

The statement was not presented for signature to C. H. Chapman, supervisor from Santa Ana, C. E. Ut of Tustin, and Donald Dodge, Costa Mesa, members of the advisory committee, because they were away on vacation, and could not be reached.

The statement was not presented to J. J. Dwyer of Anaheim, a member of the advisory committee, because of the fact that he had not yet accepted the acceptance of the engineer's report.

The statement follows:

"THE PEOPLE OF ORANGE COUNTY: Since certain individuals and a newspaper, for whatever motives, have sought to attack the sincerity and good intentions of the Orange County Flood Control District, we make this statement to you, the people of Orange county, for the reason that we, with you, are deeply and chiefly concerned with the welfare of the county in securing adequate flood control and conservation of water, and in justice to this cause we cannot sit by and allow you to be misinformed or misled.

Throughout the Flood Control District's investigation, lasting nearly two years, we all recognized that the problem before us was one of high consequence to be settled by us for generations to come. As the investigation proceeded, every phase of the problem was reached, and by us, for generations to come. As the investigation proceeded, every phase of the problem was reached, and by us, for generations to come. As the investigation proceeded, every phase of the problem was reached, and by us, for generations to come.

Premium List For Buena Park Show Announced

The premium list for the Seventh Annual Orange County Dahlia Show, which will be held at Buena Park, California, on September 20 and 21, was announced by the chairman of exhibits, Mrs. L. T. Wilber. The show will be held, September 20 and 21.

The grand sweepstakes prize, a silver loving cup, donated by Buena Park business men, will be given to the exhibitor who is awarded the most points for entries of dahlias. The cup must be won three times for permanent possession.

The community prize, a silver trophy, is given to the community which displays the best basket of 18 dahlias, any type.

A silver loving cup will be awarded for the best exhibit of garden flowers (artistic arrangement and number of varieties considered).

Blue ribbons will be given for all material and will be ribbon for second place.

The program for the show will be calling a special council meeting to the Buena Park Club on the second day, and under the direction of the Woman's Club on the second day.

GAMBLING SHIP'S RESCUE TO OFFICERS

JOHANNA SMITH, OFF NEWPORT BEACH, DEFIES COUNTY AUTHORITIES

Supervisors Adopt Ordinance Prohibiting Water Taxis Carrying Passengers To It; Cannot Operate Inside of Newport City Limits; Newport City Council in Effort to Curb the Traffic.

Orange county authorities accepted the reported challenge that it could do nothing to prohibit carrying of passengers to the Johanna Smith, notorious gambling ship off the coast of Newport Beach. District Attorney Z. R. West, Jr., presented to the board of supervisors an emergency ordinance which the board was expected to pass upon and which would prohibit water taxis from carrying passengers to the ship.

Mayor Marcus Johnson of Newport Beach, stated that the possibility of calling a special council meeting to cope with the situation was being considered. The county ordinance cannot prevent operation of water taxis and their agents within the limits of incorporated cities, West explained.

"If it is humanly possible we will stop the operation of this ship off the Orange county coast," said West, recalling that open boats were reported to have been made to the effect that he could do nothing about the situation.

Four speed boats were carrying passengers from Newport Beach to the Johanna Smith, where the gambling tables, roulette wheels, dice games and other forms of gambling were reported to be under way. According to West, the boats were carrying passengers to the ship, and the purpose of the ordinance was to prevent the operation of this ship off the Orange county coast.

Mattis Student At Pensacola

Local Boy Receiving Instruction In U. S. Naval Air Station

Having completed his elementary work in Seattle, Washington, John M. Mattis, better known to his friends as Jack, is now in his third week of naval air instruction at the U. S. naval air station at Pensacola, Florida, where he is one of fifty young men comprising the class of "Reserve Student Officers." Four speed boats were carrying passengers from Newport Beach to the Johanna Smith, where the gambling tables, roulette wheels, dice games and other forms of gambling were reported to be under way. According to West, the boats were carrying passengers to the ship, and the purpose of the ordinance was to prevent the operation of this ship off the Orange county coast.

The Pensacola air station is probably the largest of its kind in the world, comprising an area a half mile square covered with hangars, barracks, shops, and warehouses, and lined on two sides by the seaplane beaches. There are also two land planes fields for the use of the station. There are usually about 60 planes on the fields, all containing government students. Along the beach are several high towers from which signals are displayed to control the course by which the planes are landed. The towers are usually of the course changed. Each plane is constantly covered by powerful telescopes in the towers, and in case of accident instructs speedy crash boats to the spot of the mishap. These boats are located at different points along the bay and are specially constructed with crash gear for use in case of crash-landings.

This week marks the beginning of actual flying instruction. For the first time in the history of the station, the 250 hour flying instruction ends in fast propulsion. The flying instruction also includes a course in navigation and observation. Student life at Pensacola, though difficult, is interesting. The Reserve Student Officers all enjoy officer privileges on station and at the country club nearby which elevate them above the regular men. The men and officers dress in white as the climate there is a tropical one. There is a large station library and moving pictures are held outside every night.

Fish Canneries Soon To Start

Two new fish canneries will soon start operating in the Southern California district, according to information furnished the Terminal Island office of the Commercial Fisheries Bureau of the Division of Fish and Game.

One will operate at Newport where L. Turk, former president of the Southern California Fish Company, and Ben Johnston, formerly superintendent for Turk, have taken over a plant that was operated during the war.

It is planned to can mackerel, sardines, and all fish that can be secured for canning.

At Huemene in Ventura county, Herbert Stasick, formerly of the Stafford Packing company of Wilmington, will start operations soon. Mr. Stafford has been in the canning and fertilizer plant from Wilmington to Huemene and will can mackerel, sardines, and all fish that can be secured for canning.

RETURNING FROM HAWAII

Mr. and Mrs. Fred A. Backs and Mr. and Mrs. H. Gaudier, Mrs. Florence Backs, return tomorrow from a five weeks' tour of the Hawaiian Islands. They are arriving at the Terminal Island office of the Commercial Fisheries Bureau of the Division of Fish and Game.

They have been to the good ship City of Los Angeles. Letters that have come from there are most interesting and enjoyable, with plenty of action during the entire twenty-four hours. They are very enjoyable sojourn at the seaside.

IN THE DAYS OF LONG AGO

Extracts From Files of *The Gazette* Issued Half a Century and a Quarter of a Century Ago. These Files Contain the Only Authentic History in Print of the Daily Doings of the Citizens of Anaheim and Orange County in the Days of the Pioneers.

50 YEARS AGO THIS WEEK

AUGUST 9, 1879.

The Board of Town Trustees met in regular session on Wednesday. The Committee on Public Improvements was instructed to procure the proper signature to the deeds drawn up under instructions of the preceding Board, conveying to the town lands for sidewalks along the principal streets. The same committee was authorized to accept or reject the water works when notified of their completion by the contractor, which will probably be on Monday or Tuesday next. R. W. Scott addressed the Board in the matter of licensing peddlers or dealers who sold the agricultural or mechanical productions of the state produced by themselves, and quoted law authorities showing that the Board had no power to exact a license from such persons. The matter was brought before the Board on a proposition to license Chinese vegetable peddlers, but in view of the law in the matter the Board cannot enforce a license against them. A vote of thanks was tendered Mr. Scott for his courtesy in explaining the law. The tank frame was accepted from the contractor, Mr. Dalton, and his bill was ordered paid. The marshal was instructed to collect the poll tax and dog tax before the next meeting of the Board. The tax levy for the year was fixed at sixty cents on the \$100 assessed valuation of property, the same as last year.

At a meeting of the school trustees of Anaheim district held on Thursday, it was decided to re-open the school on Monday 18th inst. The position of teacher in the intermediate department has been tendered to Mr. Henderson, but it is not known as yet whether he will accept. The primary department will be taught by Mrs. Reed and Miss Des Granges. A change has also been made in the salaries of the teachers of the intermediate and primary departments. The first named has been reduced from \$75 to \$70 per month and the second from \$70 to \$65 per month.

Mr. John Fischer, candidate for the County Recorder, has lived in Anaheim ever since the town was founded. He has been identified with every enterprise calculated to promote the prosperity of the place and has, in season and out of season, advocated Anaheim's interests with all his ability. He ought to receive the hearty support of his townsmen.

Col. H. G. Otis of the Santa Barbara Press, is in Alaska and writes to his paper that he has seen an orange tree and a rose bush growing in that frigid country. He hastens to explain, however, that they are potted plants, and flourish in the warmth of a fur-trader's parlor, where a fireplace continually gives forth heat.

O. W. Childs, John G. Downey and I. W. Hellman have given a large tract of land near Los Angeles, for the purpose of endowment, to the trustees of an educational institution to be established and known as the University of Southern California.

It is thought that seven thousand votes will be polled in this county at the coming election.

E. J. Baldwin has purchased 20,000 acres of land adjoining the Santa Anita Rancho, in this county, and announces that he will shortly commence the erection of a residence to cost \$20,000.

A Frenchman alighted from the train on Wednesday evening, whose action he was watching. He was suffering from poison. He was brought to town and under the ministrations of Mrs. Dr. Higgins was in a few hours comparatively well. His story is that he was decoyed into a low saloon in Los Angeles and induced to take a drink, after which he was robbed of \$45. The liquor put him in fearful pain, and he has no knowledge of how he got on the cars in Los Angeles or of who robbed him of his money.

The twelve-year-old son of Mr. E. W. Champlin, who has been seriously ill for some time with typhoid fever, is happily recovering. The physician says that the case was one of the most severe that he has ever encountered in this country.

The genial M. B. Craig of Westminster was in town on Monday. If our townsman, John Fischer, is not elected to the Recordship, we sincerely hope that Mr. Craig will be. He is an honorable, able man.

The citizens of Wilmington have petitioned the Board of Supervisors for an appropriation of \$250 with which to purchase fire apparatus. The district attorney reported to the Board that there is no law authorizing them to make any such appropriation.

The St. Helena Star says: A large grape grower informs us he has been offered \$22, \$18 and \$16 for this year's crop of grapes. The former for Zinfandel, the next for all foreign varieties and the latter for Mission.

The Democratic convention meets in Orange today to nominate a candidate for supervisor. It is said that Richard Egan of San Juan Capistrano, who is prominently mentioned as a candidate, has declined to allow his name to be presented. It is said that Mr. Philip Davis of Anaheim will probably be nominated. Anaheim is entitled to the supervisor this year and if Mr. Davis is elected we will have a supervisor who will see that the interests of this district are well cared for.

Stephen N. White has been nominated for district attorney by the W. P. C. of this county, vice Wilcox, who did not accept the nomination.

A Los Angeles paper says that the settlers of Las Bolsas Rancho are about to purchase Col. Baker's one-eighth interest in the ranch, and thus gain perfect title.

A. A. McKinnie has been appointed administrator of the estate of P. C. McKinnie, deceased, with bonds fixed at \$5,000.

The shareholders of the Calumet Irrigation Company will hold a meeting in Anaheim on the 18th inst. to devise ways and means for paying the company's indebtedness.

From the telegraphic list of passengers we see that Mrs. Julia Schneider and three children of Anaheim will arrive in San Francisco today by overland train.

25 YEARS AGO THIS WEEK

AUGUST 4, 1904.

J. B. Rae this week sold his walnut grove at Katella to Los Angeles parties, the price paid being \$40,000. A check drawn on the American Bank of Los Angeles lies in the vault of the First National Bank in that city, awaiting completion of the certificate of title. The purchasers are the Union Investment Company of Los Angeles, in which Mr. Botsford is interested, and M. J. Connell, a multi-millionaire of that city.

The orchard contains 80 acres of the finest walnut trees in the state. Half of the trees are thirteen years of age, the remainder being ten. The entire tract is included in the water district and it has as well a fine pumping plant upon it from which a large flow of water is secured. Mr. Rae purchased forty acres from the Stearns Rancho in 1891 at \$75 per acre. He set the acreage to walnuts. In 1891 he planted another forty acres to walnuts, adjoining the older orchard on the south.

The sale is the largest which has taken place in this neighborhood in some time. It fixes the price of similar orchard property at \$500 per acre. The crop of nuts upon the trees is estimated at \$8,000.

While there was nothing for miles around when Mr. Rae purchased the tract he laid thirteen years ago, now there is a continuous belt of orchard extending for miles in every direction. New orchard tracts are being set out on all sides. It is doubtful if any section of Southern California can show more substantial increase than the country about Katella. The name of the section, it may be added, was given it by Mr. Rae in honor of his two daughters, Miss Kate and Miss Ella, their given names being joined.

Col. S. H. Finley of the Seventh Regiment is in receipt of orders from the California National Guard headquarters placing him in charge of the Signal Corps and Troop D, as well as of the Seventh Regiment, for their transportation to the Henry ranch for the annual encampment. The National Guardsmen will assemble at Los Angeles on the afternoon of the 12th inst., when Col. Finley will assume command. The departure from Los Angeles will be that evening and they will arrive at their destination the following morning. Col. Finley has command of the train. There will be fourteen coaches for the soldiers, one for officers, and three box cars for horses, one for baggage and one for garri-son equipment.

John Pfeningner and mother have returned to Fullerton from Los Angeles and are occupying their new residence on Spadra road. John has given up his position as conductor on one of the city's electric car lines, and will in future devote his attention to his walnut orchard. Miss Pfeningner will continue to reside in Los Angeles, where she has a position in the city schools.

Road Overseer Porter of Fullerton has resigned his position and W. A. Barnes, former city marshal, has been appointed in his stead by Supervisor Lineberger. Mr. Barnes has proved a very satisfactory superintendent of streets and has had several years of experience under Mr. Porter.

Carl Zeus narrowly escaped fatal injury in an accident on Friday morning, while delivering groceries at Fred Maurer's place on West street. Carl had driven into the yard and had alighted when, as he stooped to pick up a rake lying under the horse's feet, he was kicked viciously behind the ear. The horse started to run, trampling upon the lad, who was rendered unconscious by the kick, and the wheels of the wagon passed over him. He was picked up by Mr. Maurer and carried into the house where restoratives were applied. He regained consciousness shortly, and the horse having stopped in the yard, he delivered the groceries and drove back to town. His injuries were such that he was compelled to go home, where he remained several days. Carl was on deck again on Monday morning, slightly disfigured but still in the ring.

William Crowther and daughters Misses Sarah and Ruby Crowther, have been sojourning at Newport Beach, guests of E. K. Benchley and family.

John Rimpau, who has been visiting relatives here for the past few weeks, returned some days ago to his home in Yuma.

Mrs. M. A. Toombs and her two charming daughters of Los Angeles are spending a month at their Placencia fruit ranch.

Assessor Berlin of Fullerton has completed the first assessment roll of that city. The total valuation on real estate is \$567,220 and on personal property \$55,745, making a total assessment of nearly \$700,000. The city tax rate will probably be between 50c and 75c on the \$100 assessed valuation.

Victor Brownings was a visitor in town on Tuesday.

A party of hunters composed of Johnny Hanna, Dr. Houck, W. B. Harrison and W. A. Newberry, went to the Truckee canyon on Saturday to hunt deer. They camped in the canyon overnight and early on Sunday morning started for game. They succeeded in getting a fine five-pronged 100-pound buck, the first one brought into town in five years. The party reports plenty of water in the canyon creeks, more than for a number of years.

Henry Davis was over from Santa Ana this week. He states his mother and sister have gone to Laguna Beach for a camping season, and on their return will go to Los Angeles to reside permanently.

Frank Dyer made a trip to the Landing on Monday, to enjoy a dip in the briny.

Otto and Gus Strodtzoff and sister, Miss Adele Strodtzoff, have gone to Catalina for a week's stay.

Michael Neipp and family are at San Juan hot springs for a month.

P. A. Schumacher of Fullerton has received direct from Africa, a lot of scutellaria cyanea, the black scale exterminator, and has placed them at work in the orchard of George King of La Habra valley.

REORGANIZING THE EXECUTIVE BRANCH

According to press dispatches from Washington, on the fourth day of the month when the youth of the nation was making its best to make a lot of patriotic noise, and the older folks were trying to get into the country to escape the noise, President Hoover heaved the heat of the National Capital and remained at his desk busy with the problem of the re-organization of the executive government's many bureaus and commissions, along lines which will make for economy and efficiency of administration.

We have heard a great deal during the past few years about the re-organization of the executive branch of the government to permit the wheels of the administration to run more smoothly and efficiently. Back in the administration of the late President Harding it was recognized that something along this line should be done and an inquiry into the overlapping of various government departments was entered into under the direction of Walter F. Brown, who has since become Postmaster General in President Hoover's cabinet.

Up to this time, however, nothing tangible has been accomplished. Many of the bureaus which it is sought to change are composed of men who are in Washington for a long time and resent any effort toward changing them. They came into being, many of them, so easily and noiselessly that they seem like Topsy, to have just appeared. Many of the bureaus of course have stalwart friends inside Congress as well as out and this has slowed up the process of consolidation and co-ordination.

According to the news dispatches from Washington President Hoover has for some time been studying the question of simplifying and co-ordinating the bureau activities in the interest of efficiency and economy, and he hopes to have a definite program ready to present to Congress at the next regular session. That this program will be an interesting and comprehensive one goes without saying. It will meet with some opposition, of course, some of the reasons for which have been enumerated above, but there is little doubt that sooner or later the organization of government departments will become a reality. Friends of the administration who favor the reorganization plan say that if it is put into effect, the savings in the executive department of the government will be such that a reduction in taxes in 1930 will be made more likely. This assertion, of course, will be a trump card in the hands of those who favor the plan.

It will be remembered that President Hoover has long been in favor of such reorganization and coordination of the government departments. The plan was more or less of an issue in the campaign. It is not surprising therefore that the President is busy at work these hot summer days on a plan designed to carry out this policy he made in the campaign. The people of the nation, regardless of politics, will be in sympathy with his effort to make the government at Washington more efficient at less expenditure of money. At any rate, the national government has never been popular in America and it has become even less so during the past few years.

It used to be that the scenic resorts of the country were the only places to attract visitors, but now they publish pictures of—oh, well, you go on and finish it.

A physician who has been investigating says that since they became so athletic our modern girls have much thicker wrists than formerly. If this is true, it is a good thing for the erring husband that the rolling pin has gone out of fashion in the home.

A woman never gets really old until she quits worrying about whether she has her hair combed in the proper way.

Mother!

Watch Child's Tongue

California Fig Syrup is Children's Harmless

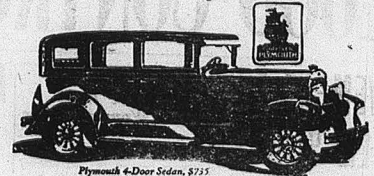

Laxative

When your child is a malnourished, bilious, colic, feverish, breath, coated tongue, or diarrhea, a teaspoon of California Fig Syrup will cure it. It cleans the stomach and promptly cleans the bowels of poisons, gases, bile, souring food, and waste. Cures cramps or overeating. Contains no narcotics or soothing drugs. Children love its delicious taste.

Ask your druggist for genuine "California Fig Syrup" which has full directions for babies and children of all ages, printed in bottles. You will see why "California" or you may get an imitation of syrup.

Perils of Childhood

It must be all of twenty years ago that mother first gave her Syrup Pepsin

For those Fevers, Colds and Bowel Troubles of Childhood

How timely relief. My good mother has gone to her rest, but I have faithfully relied upon her judgment and have given Syrup Pepsin to my two children since they were born. It is certainly a noble medicine and never fails of its purpose. I like to recommend it." (Name and address will be sent upon request.)

And in the Evening of Life

When age comes creeping on, with bowels relaxed, muscles weak, digestion poor and blood thinned, then is when constipation does its evil work in a night. Dr. Caldwell's Syrup Pepsin is so palatable, sets so well in the stomach, works so easily, so gently, so kindly with old folks as to accomplish its purpose without gripes, pain or other distress. For biliousness, sour stomach, coated tongue, headache, fevers, colds and constipation from indigestion to old age Syrup Pepsin is recommended everywhere and sold by all druggists.

For a free trial bottle send name and address to Pepsin Syrup Company, Monticello, Illinois.

Calliope Wail Graces Screen

"Dangerous Curves" Provides All Typical Sounds of "Big Top"

A sixty-four year old, well familiar to amusement "sectors" throughout the world has been brought to the motion picture screen. It is the musical wail of the circus steam calliope and it is heard in "Dangerous Curves," Clara Bow's new Paramount talking picture. The steam calliope first joined the circus in 1885 with the flag-back, Wallace show. It was a tremendous sensation and proved a great crowd gatherer. One by one the other shows took up the calliope until now it is as much a part of the circus as the "Big Top," leonards, peanuts and elephants. In every stand or town placed the calliope provides part of the lullaby by parading the streets. In circus parlance this is called "tong up."

All phases of circus life from the action in the rings to the colorful routine existence of the performers are pictured in the new movie picture. This "It" girl portrays a performer who turns from an equestrian to a circus stunt. Richard Arlen, her leading man, takes the part of a tight-wire performer.

"Dangerous Curves" will be the feature on the program at the Fox theatre Saturday and Sunday.

Delinquent Tax Is All Collected

W. C. Jerome Distributes \$103,000 in County and Cities

Tax delinquencies in Orange county are practically a minus quantity, it was announced at the office of County Auditor W. C. Jerome, as appropriation to county funds and payment to cities of \$103,000.25 in overdue tax payment for the year ending June 30 has been made public. This total represents the taxes collected through the auditor's office after the date on which they became delinquent for payment to the tax collector.

Of this sum \$85,454.08 has been appropriated to county and district funds, while \$18,224.21 in checks has been mailed to cities for which the county collects taxes. Last year the appropriation transfer amounted to \$25,515.99, checks to cities totalled \$12,095.51, and the total of delinquent collections was \$76,312.50.

Banta, Ana has received a check covering \$448.02 for city taxes, \$317.08 for street assessments and \$3,177.08 for street assessments.

Fullerton has received a check for \$116.76 in city taxes, \$117.77 for lighting taxes, and \$68.50 for road assessments. Laguna Beach has received \$107.88 in city taxes, La Habra, \$169.23 in city taxes, Placentia, \$71.23 in city taxes. Seal Beach has received \$24.08 in city taxes, \$194.31 for street assessments and \$20.88 for road assessments. The Laguna Beach County Water Works district has received a check for \$1,134.28.

Complete Report On Fruit Fly

The most complete authentic information yet made available on the Mediterranean fruit fly will be mailed to citrus growers during the week of July 29 in the form of the Handbook of Citrus Insect Control for 1929, by R. S. Woglum, entomologist for the California Fruit Growers' Exchange.

Mr. Woglum has added a section on the fruit fly to his regular annual report and the exchange is mailing the booklet to all member growers, associations, district exchanges and field men. Copies will be mailed to non-exchange growers upon request to the Pest Control Bureau of the exchange.

Mr. Woglum had the cooperation of Dr. F. R. Cole, United States Bureau of Entomology, who prepared a number of charts and color plates on the fly. Exact color reproduction, enlarged of the Mediterranean fruit fly in all stages and of other common fruit flies, done by Dr. Cole, are declared to be the best and most helpful information yet published. A chart showing the complete life cycle of the fly and other maps, charts and photographic illustrations add to the handbook, which gives most complete information on detection and eradication of this serious pest.

The booklet contains a report of the program of pest control in every citrus district of the state—a program based on the most effective, economical and safest insecticide methods—and definite control recommendations.

Another federal entomologist, E. A. McGregory of the Lindsay office of the Bureau of Entomology, cooperated with the exchange by providing the chapter on Central California.

Scale Treatment To Begin at Once

Reports from various districts in Orange county show that the black scale hatch is nearing completion and treatment will start during the last few days of July for the control of this pest. Parts of the county have a very serious infestation this year due to late treatment and an uneven brood of scale starting 1928.

It is interesting to note that the scale is hatching practically a month later than last year, due no doubt to the late spring season. This same lateness in the season has caused the new crop of fruit to be retarded in growth, so that in some cases fumigation will be postponed a few weeks to permit fruit to size up. Combination treatment work should start at once, where possible, in order that the entire territory may be covered during the effective season.

Detailed recommendations for citrus pest control for the season appeared in last month's news letter. The recommendations applicable at this time are more fully summarized.

BLACK SCALE. Treat as soon as the scale have hatched and before they reach the invulnerable stage.

PURPLE SCALE. Early fumigation for black scale will, in most cases, also control purple scale. A second fumigation may be necessary, however, seven to nine weeks after the first treatment.

RED SCALE. Resistant red scale or heavy infestations along with black scale are best controlled by the combination treatment, spraying by fumigation, gives the best known results on both scales.

CAST IRON PIPE AND FITTINGS. Notice is hereby given that sealed proposals will be received by the City of Anaheim, at the office of the City Clerk, at 10 o'clock P. M. of the 22nd day of August, 1929, for the furnishing to said City of the following approximate quantities of Cast Iron Pipe and Fittings:

2400 in. ft. 10-inch pipe, A. W. W. A. Class B, or equal.

2400 in. ft. 8-inch pipe, A. W. W. A. Class B, or equal.

16,000 ft. 10-inch pipe, A. W. W. A. Class B, or equal.

16,000 ft. 1/2097152-inch pipe, A. W. W. A. Class B, or equal.

Clara Bow and Richard Arlen in a scene from the Paramount Picture "Dangerous Curves"

"Dangerous Curves," an all-talking picture, comes to the Fox theatre for two days, Saturday and Sunday.

Fox Theatre, Name For Popular Theatre

Beginning Saturday evening with the opening of Clara Bow in "Dangerous Curves," an all-talking production, the former California theatre will be known as the Fox theatre.

This will also mark the completion of the \$7,500 improvement project plan, which included the installation of 175 comfortable new type lounge divans, the \$3,000 velvet drop curtain, new draper furniture, carpets and light fixtures.

This opening will also mark the day of the christening of the huge new movie electric Fox sign by a popular movie star.

Since this theatre is rated as one of the best in sound reproduction, it will serve the public as a 15-day pay-off house.

EDUCATIONAL OUTLAY

California is very generous in providing for its schools. This state has a great system of popular education through its public and parochial schools. The state, according to the state superintendent of public instruction, will appropriate out among the fifty-eight counties, more than \$25,000,000 for the fiscal year 1929-30 for the support of elementary and high schools and junior colleges of the state. This huge sum all goes for payment of salaries of teachers.

Add to this the immense sums raised by taxation each year by the counties and municipalities of the state for support of its schools.

Each proposal must be accompanied by a certified or cashier's check, payable to the City of Anaheim, in an amount not less than ten per cent of such bid, and the successful bidder will be required to furnish, within ten days after the award of the contract, a surety bond payable to said City and subject to the approval of the City Council, in an amount not less than 100 per cent of the aggregate amount of said contract, which said bond shall be conditioned upon the faithful performance of said contract.

Specifications and further information may be obtained at the office of the City Manager.

All proposals must be on forms furnished by the City Manager.

The City Council of said City reserves the right to reject any and all bids.

Dated the 26th day of July, 1929.

EDWARD B. MERRITT,
City Clerk of the City of Anaheim.

NOTICE OF SALE OF REAL ESTATE UNDER EXECUTION

In the Superior Court of the County of Orange, State of California.

Sheriff's Sale

WILFRIED L. FAIRHART, Plaintiff,

vs.

ANNA SIGHELE, Defendant.

Under and by virtue of an Execution issued out of the Superior Court of the County of Orange, State of California, wherein Wilfred L. Fairhart is plaintiff, and Anna Sighele is defendant, upon a judgment rendered by the court of February 1928 for the sum of Four Hundred Forty-Seven and 41/100 (\$447.41), Dollars Lawful Money, together with interest, and the sum of \$475.75, as credit by partial payment of \$109.75, July 27, 1922, with interest from the 1st day of February, 1923, is now said judgment, on the 27th day of July, 1929, levied upon a certain piece of real estate and I have all the right, title, claim and interest of said defendant and to the following described real estate, to-wit:

Situated in the City of Anaheim, County of Orange, State of California, and more particularly described as follows, to-wit:

Lot Twelve (12) in Block Three (3) of Res's subdivision of a part of Vineyard Lot "D" as shown on a Map recorded in Book 2, Page 22 of Miscellaneous Maps, Records of Orange County, California.

Together with all and singular the tenements, hereditaments and appurtenances thereto belonging or in any wise appertaining.

Notice is hereby given, that on Thursday, the 22nd day of August, 1929, at ten o'clock A. M., of said day, I will proceed to sell in front of the Court House door, South Entrance, to the highest bidder for cash in Lawful Money of the United States, a certain life estate and all the right, title, claim and interest of said defendant, in and to the above described property, or as much thereof as may be necessary to raise sufficient to satisfy said judgment with interest and costs.

Given, under my hand this 21st day of July, 1929.

SAM JERNIGAN,
Sheriff.

By CORA M. KURILE, Deputy.

Wm. J. M. Helm, Anaheim, Calif., Attorney for Plaintiff.

Girls Commended As Fire Fighters

Eighty Campfire Girls, appropriately dubbed "the midy blouse brigade" by state forest rangers, were singled out by State Forester M. B. Pratt for special commendation as a result of their success in combating a fire which started in the timber belt near their Nevada county camp.

Mobilized as an emergency fire-fighting organization by Mrs. Hope Taber Winkler, temporarily in charge during the absence of their camp supervisor, Miss Helena Silver, the eighty girls fought and conquered the blaze with "the weapons at hand," according to Pratt.

When State Ranger W. F. Sharp arrived on the scene, Pratt said, he found a blower-led troop of girls beating out the final trace of fire with their midy blouses.

Eighty blackened blouses, and a scattered array of buckets and diphans testified as to the means employed in extinguishing the fire before it could

spread from the pine needles to the brush and trees.

"These girls, by their willingness to tackle a hard job and ruin their clothes have given new proof that Californians are becoming 'fire conscious' and real conservationists," affirmed the forester.

"Women, in fact, seem to be awakening to a fine sense of responsibility for their out-door playgrounds before the men."

"This story is a pleasing contrast to the one disclosed in another northern county, just recently, where our rangers found that a camper who allowed his campfire to escape, had fled in such haste that he left his camp equipment and some of his clothes behind him."

A surplus of nearly two hundred millions at the end of the fiscal year and a balance of reducing the national debt over a half billion, indicates that Uncle Andy Mellon hasn't lost his batting eye.

Skeletons are on the free list in the new tariff bill. This ought to enable every family to have one.

LOCAL BREVITIES

Mr. and Mrs. B. F. Porter and family of Fullerton are enjoying an outing in their cottage at Newport Beach, where they are enjoying sea bathing, and Mr. Porter is striving to break the record of champion fisherman with fair prospects of success.

A happy party of picnickers motored down to Laguna Beach on Wednesday where they spent the day. They returned in the evening, after partaking of a picnic supper on the beach. Those in the party were Miss Winifred McLoone, Miss Esther Grewen, Mrs. Singleton, Mrs. Zeppenfeld, Mrs. Konig, Esther and Marian Zeppenfeld and Dick McLoone.

Clayton Allen and family left on Sunday for a two weeks' outing in the northern part of the state. They will visit many points of interest and look for an interesting trip.

Mrs. A. J. Lawton, well known club woman and civic leader of Los Angeles was recently appointed by Mayor Porter a member of the civil service commission of that city. Mrs. Lawton has many friends in this county, having resided in both Anaheim and Santa Ana prior to removing to Los Angeles, and they will be happy to hear of this recognition of her abilities.

Bill Cook, coach of football and track at Santa Ana J. C. is spending the summer with his wife at Laguna Beach where the Cooks are building a beach home. He and Mrs. Cook were in town early in the week.

Mr. and Mrs. A. Perotti and family of Placentia are spending the summer at their cottage at Newport Beach. They enjoy surf bathing every day and are having a very enjoyable outing. They will return next month, when school begins.

California Oil Company Expanding

Physical consolidation of the Walburn Petroleum company, Acewood Petroleum company, and other units making up the recently organized Richfield Oil Corporation of New York will be effected tomorrow, when the corporation opens its new offices in the Chanin Building, 122 East 43rd street. The entire 14th floor of the building, midtown's newest skyscraper, will be occupied by Richfield.

Richfield Oil Corporation of New York, a subsidiary of the Richfield Oil Company of California, has developed wide retail distribution in New York, New Hampshire, Vermont, Maine, New Jersey, Pennsylvania, Massachusetts, and Connecticut, and will have a number of ocean and bulk distributing terminals throughout the territory which it serves.

Aged Chinaman Awaiting Trial

Wong Keong, the aged Chinaman charged with possession of more than the legal amount of opium, was given his preliminary hearing Tuesday afternoon at 4 o'clock before Judge Eldon W. Stark, and was held to answer to the superior court. Bail was set at \$2,000, which Wong was unable to furnish.

A. E. Robinson and Otto Schenke of the state narcotic detail who, in company with Captain Marcus Andrade of the Anaheim police department, made the raid which resulted in the Chinaman's arrest, were witnesses. They were accompanied by an interpreter as Wong Keong understands and speaks but little English.

Wong Keong, whose name was supposed to be Wong Kem or Wong Cum, was placed in the Orange county hospital under the care of a physician, as he is said to have smoked opium for the past half century. Officers feared that suddenly deprived of the drug, serious convulsions might result.

FINE GRANDSON ARRIVES

Mr. and Mrs. Ernest Borchert were apprised by telegram on Sunday morning of the arrival of a fine grandson, Richard Murray Bland, at the home of their daughter, Mrs. George Murray Bland, at Berkeley, the new-comer having put in his appearance earlier in the day. Mrs. Bland was formerly Miss June Borchert, a lovely girl who had many admirers. She was married in Berkeley a year or more ago to a rising young business man of that city. Mother and child are doing well. Mrs. Borchert contemplated proceeding north in a week or so to give her first grandson the once over.

OUR MURDER RATE

CALIFORNIA is regarded as a peaceable state with reasonably good law enforcement according to American standards. But the Pasadena Star-News, after looking up the homicide statistics, says that California averages a murder a day and has so averaged for several years.

This is an astounding statement and one which ought to stimulate for the most indifferent the terrible toll of crime in the state. To explain it probably would be to explain the general situation throughout the country and to give the basis for President Hoover's declaration that we have undergone a subsidence of our moral foundations.

Back of it, however, we are convinced that the analyst will find one fact; namely, the lack of certainty of punishment for crime. "Getting away with murder" used to be only a figure of speech descriptive of successful audacity in many undertakings. Now it describes a literal fact which appears in communities all over the United States. Many times more persons "get away with murder" than those who pay the actual penalty for the crime. Until punishment is swift and certain, the appalling murder rate will continue.

Gus Sonnenberg At Santa Ana

Dartmouth Wrestling Champion Guest at Inter-fraternity Dinner

Anaheim college fraternity men who journeyed over to Santa Ana to the monthly meeting of the Orange County Inter-fraternity Association, last Monday, were privileged to meet and hear from Gus Sonnenberg, heavyweight wrestling champion of the world and a former Dartmouth College football player.

Monday night was Kappa Sigma night and its alumni members in the county provided the program. As Sonnenberg is a Kappa Sig, he agreed to be present and his talk on wrestling was interesting to hear. He told of his endeavors to make the game straight so that it would rise in popular opinion, saying it was his intention to return to Southern California to live when he could start wrestling.

Kappa Sigma men rounded out the evening's entertainment, and the recent National Kappa Sigma convention at Los Angeles was discussed.

Death of Mrs. Herman Melcher

Mrs. Herman Melcher of Culver City, formerly Miss Murray of this city, died on Monday evening last and was buried on Friday morning. Funeral services were held in the Little Church of the Flowers in Glendale. Mrs. Melcher had been in ill health for some time, but death occurred suddenly. Mr. Melcher was called from Yuma, Ariz., where he is engaged in the construction of a high school building, and arrived several days before his wife passed away.

Mrs. Melcher was for a number of years a popular employee of Pathe's Department store until her marriage some ten years ago, she leaves besides her husband, one child, a daughter five years of age, to mourn her loss. Mr. and Mrs. Kurt Epstein, Mrs. Herman Backs and Mrs. Mary Mickel attended the funeral services.

JULY BRINGS IN MONEY

Chief J. S. Bouldin today turned in to City Treasurer Chas. Bove a check for \$10,693.40 for city licenses collected during July. For dog licenses he collected \$22.50 for the city treasury. The total number of dogs and cats who were given their tickets to the next world because of housecleaning here has not yet been computed.

RIPE FRUIT SPOTS ON CITRUS FRUIT

The occurrence of brown or black spots on oranges this season has caused much concern. Field observations have shown the following results:

1. Some spots plainly due to fumigation burn, characteristically dark, sunken and not enlarging.

2. A few spots showing a "sun-burned" appearance following lime sulphur spraying for spider.

3. A considerable amount of orange orange worms.

4. A large number of brown spots, varying from small to quite large, enlarging slowly, only skin deep, from light brown to quite dark, almost always on the upper half or stem end of the orange. These last are plainly the ones of which complaint is made by consumers. These spots are not the same as "Brown Spot" described by Pawett and Lee in "Citrus Diseases and their Control," and by Smith in Bulletin 211 of the California Experiment Station which is definitely a disease of pitted and pocked or stored fruit. They are not quite the same as Smith's "Shoulder Spot" but are related to it in cause and development. They are typically trouble of ripening fruit and are abundant this year perhaps because of conditions which led to early ripening of at least early coloring of the crop, perhaps also because many trees carried an overload of fruit, shading the tree and producing some of the characteristics of premature ripening.

When an orange ripens, reaches the end of its normal life and begins to deteriorate, it weakens first at the stem end. If the weakening occurs before the fruit is picked it becomes subject to disease first, in its upper half, and upon the slightest provocation may be infected with fungi or may even develop "rots" in which no infection can be found. Pawett points out that at least three fungi, Colletotrichum, Alternaria and Fusarium, may produce spots of this general character under such conditions, or may enter and infect spots due to injuries even if very slight. The presence of a fungus is not proof that it was the primary cause of the spotting.

Chiropractor Says Pain Is a Blessing

A new definition of pain is expected to be originated in Los Angeles during the sixth annual convention of the National Progressive Chiropractic association, August 12 to 18.

"Pain is a blessing in disguise," according to Dr. Charles H. Wood, general convention chairman. "It is the danger signal, which telegraphically warns mankind there is something wrong in some definitely located tissue."

War on all physical disfigurement will constitute the keynote of the convention, the general chairman said. The best minds of the chiropractic profession, hailing from almost all states in this country, will devote hours of discussion, he stated, toward banishment of humanity's suffering.

A convention highlight will be a "physical perfection" or "perfect back" contest, to select a young man and a young woman to stand as "California's best." Photographs and statuary will be made of the winning pair, to be sent chiropractors centers throughout the country.

Hundreds of applicants have registered for the contest at the Los Angeles College of Chiropractic, where the

convention will take place. Wood declared entrants represent a high state of feminine poise, health, or many strength.

A display will be made of chiropractic paraphernalia, which speakers will use in illustrating their talks. All delegates have been invited to take to the convention the most effective apparatus which they have evolved for treating patients.

DEMAREE ELECTED

Paul H. Demaree, history professor and varsity track coach at Anaheim High school, became president of the Anaheim Toastmasters' Club for the next six months, at the regular meeting Tuesday evening. With him for the ensuing term will be Arthur S. Porter, vice-president; A. P. M. Brown, secretary; and Ernest DuBois, treasurer.

Professor Demaree was elevated to his present office from the vice-presidency and will lead a group of members in speech improvement, has popularized oratory to a marked degree through its speech contests in the local high school.

William Payne was named by retiring President Price to conduct formal installation rites at the club's next meeting, Tuesday evening.

CALIFORNIA DIAMOND JUBILEE STATE FAIR
 AND WESTERN EXPOSITION
 AUG. 31-SEPT. 9

—C. N. P. A. Service

One month from today California's exhibition year will be more than a Diamond Jubilee. State Fair spectacular, more magnificent than ever before.

For the past year the State Agricultural Society has been planning for the notable event.

Celebrating the 75th anniversary of the first California State Fair, the

one of the loveliest pavilions with striking displays of their products and resources.

All Californians will benefit from this record-breaking anniversary exposition, and all Californians should rally behind it enthusiastically.

Entered at the Anaheim, California, Postoffice as second-class matter.

JUDGING BY THE PAST

Just now we are hearing a great deal about our foreign trade from importing interests and how it will expand and make us more prosperous, if we will only reduce our tariff and permit Europe to export goods to us. We are told that this would benefit the farmer, and this despite the fact that the American market consumes about four-fifths of our production, and that in giving it over to the foreigner we would be sacrificing the richest market in the world.

One-half of the claims of the free traders are true. Our imports from Europe doubtless would increase if our tariffs were lowered so that European goods, manufactured by cheap and underpaid labor, could underbid the American product. But would the farmer and the American worker gain by such a transaction? The only way we can be sure of this is to judge the future by the past. In this regard it is well to quote from the Protectionist which said in a recent issue:

"No free trade forecast of today is more sanguine than Roger Q. Mills was in 1904. Mr. Mills declared that the low tariff bill he favored would, if it became a law, bring us an increase in imports to the extent of \$900,000,000, with a corresponding increase in exports. He looked toward an extraordinary sale of farm products abroad, and was applauded by those who found comfort in the large sales of our grain in 1847 and 1848."

"However, our shipments of food supplies in 1847 and 1848 were not due to the low tariff of 1846. They were due to the Irish famine and to the shortage in various parts of Europe. Should the grain supply of the Old World fall below the normal, then the New World furnishes the needful store. Europe does not buy grain because we lower our tariff schedules or refuse to buy it when we raise them." Mr. Mills ignored this, and grew enthusiastic over gigantic exports of our food supplies, which did not materialize.

"He was correct in supposing that imports would increase. British imports of goods, manufactured and partly manufactured, were fifty per cent greater in 1895 than in 1894. Woollen and worsted manufactures nearly quadrupled. No doubt in these things imports rose, but our exports did not. American farmers did not enlarge their foreign market, and their home market was narrowed because of unemployment."

A great many of us can remember the lean years following the enactment of the Wilson tariff in the second Cleveland administration, and can remember that although our imports from Europe increased, we got no increasing foreign market for our farmers. The result was that the American manufacturer had to shut down, and the American market, the best in the world, was destroyed so far as the home producer was concerned. Certainly the farmer was not helped by this low tariff, despite the fact that the same arguments were used then as are being employed now. Wheat and oats were a drug on the market and it will not be forgotten how the western farmers burned corn for fuel in the cold, bleak winters of that free trade period. Where was the rich foreign market then, which was to take care of the farmer's surplus product?

We have had but one low tariff since then—the Underwood law, and all of us can remember the noticeable slowing down of industry which followed, a slowing down which might have resulted in economic disaster had not the European war come along at a critical time.

Now if the American market was important back in the Cleveland administration, and its loss spelled economic calamity, it is many times as important today because our purchasing power is so much greater. The American people will not countenance any juggling with the home market in the hope of getting something better across the seas.

A BRIGHTER PROSPECT

The farm bill has passed and is now the law of the land. The new Farm Board which is to handle the provisions of the new statute is now in process of formation. Judging from the splendid appointments to the Board which the President has already made there is every reason to believe that the new law will be wisely and properly administered and that it will give to the farmer whatever benefit it is possible to get from a mere act of Congress.

That the farmer will get some benefit is evidenced by the fact that already there has been a stiffening in grain prices due in part to the fact that the country is expecting something from the new farm legislation. The new law will have one beneficial effect aside from its legal provisions. That is its psychological effect.

For years we have been hearing that the farmer ought to be helped and that he was going from bad to worse. That he really did need assistance is a fact which all must admit, and it was generally conceded that he was entitled to all the aid it was possible for Congress to give him. But during all these years of agitation going back to the days following deflation in 1920, nothing tangible has been accomplished in the way of farm legislation. There was always a great difference of opinion as to what ought to be done, and it was not until this year that the legislative and executive departments of our government could agree on what was generally admitted to be a sound and constructive measure.

The result of this agreement was the passage of the farm relief bill. The country set back thankful that it had been accomplished. The farmer had been given a relief bill and it was generally agreed to be the best that could be passed under all the circumstances. The discussion now is to await the effect of the farm legislation and to hope for the best. There are of course still a great many doubting Thomases but the great majority of the people, including our representatives of all parties, hope that the bill will work and that the condition of the farmer will steadily get better. At least something constructive has been done. It is no longer a matter of talk but of work, and the fact that something has been done will improve the situation psychologically. For the farming areas have been discouraged and convinced that nothing could or would be done to help them. Now that something has been done there is a stirring of hope. This in itself will be a big help, for if the farmers become convinced again that they can be put on the high road to prosperity, their entire viewpoint will change. For after all no business can succeed if the men who are in it not only are discouraged, but are advertising and admitting the fact that their business is in a bad and a little chance of getting better. Optimism will help in itself and this effect of the recent farm legislation must not be overlooked.

A Good One—To Pass Up

By Albert T. Reid.

75 YEARS' PROGRESS

When we read that the average unimproved European regards America as a land of millionaires where every citizen owns a high-powered motor car and a cottage by the sea, we are often mildly surprised and moved to wonder "how they get that way." The explanation usually given is that the American movies, so popular in Europe, have given the people over there an idea of luxurious American life. That American stenographers wear silk hose to work, and that American workers ride to the scene of their labors in six cylinder motor cars, must indeed be a source of wonder to nations in which the majority of the workers are still confronted with the problem of keeping the wolf from the door.

But if Europeans marvel at our prosperity it is equally true that Americans, especially those who do not travel abroad, often fail adequately to appreciate it. In this respect it is well to call attention to a few sentences from an address delivered recently at Jackson, Mich., by Arthur M. Hyde, the United States Secretary of Agriculture, referring as these sentences do to our prosperity and progress. Mr. Hyde declared:

"The progress of America in the last seventy-five years is a record of unparalleled achievement. In population we have grown from 25,000,000 to 120,000,000. Our railroads have increased their mileage from 18,747 to 29,122. Our national wealth has grown from billion dollars to about 420 billion dollars. Our per capita wealth has increased from about \$100 to about \$2,500. Since 1850, the number of farmers in allabourers per hundred thousand population has decreased 6 per cent; the number of children in schools per hundred thousand population has increased 25 per cent. We number but six per cent of the world's population, yet we consume 78 per cent of the world's automobiles, 50 per cent of its telephones, 48 per cent of its radios. We use 25 per cent of the world's coal, 51 per cent of its petroleum, 25 per cent of its water power, and 40 per cent of its electricity. Our manufacturers require 43 per cent of the pig-iron of the world, 48 per cent of its copper, 30 per cent of its lead, 25 per cent of its zinc, and 40 per cent of its tin. Our people consume 16 per cent of all the wheat grown on the earth, 23 per cent of the sugar, 51 per cent of the coffee; 26

per cent of the cotton, 17 per cent of the wool, 72 per cent of the silk and 66 per cent of the rubber. Considering the fact that we are less than one-sixteenth of the peoples of the world, all this indicates a very high standard of living. The quality of life is higher. The quality of clothing is better. The houses are more comfortable. The standard of education throughout all the classes of our people is equalled only by the increase in the standards of education. America has achieved a wider distribution of the good things of life than has ever been achieved by any nation on earth.

Small wonder that many people of Europe look upon us as a nation of millionaires and are eager to flock to the shores of a land where every one seems to live in what they regard as comparative luxury.

PROCLAIMING THE PLEDGE

President Hoover wrote a special page for his administration's history, Wednesday by his official proclamation of the Kellogg anti-war treaty as a feature of the international policy of the United States. We are now formally committed before the world to a renunciation of war and to a promise that the settlement of any dispute in which our country may be involved, "of whatever nature or whatever origin," shall "not be sought except by pacific means."

This is a large promise. It has been officially signed by more than fifty nations and is already in effect for about two-thirds of the world. If it could be sincerely lived up to, the dawn of world peace could be definitely announced, for under its sweeping terms all wars, whether of self-defense or in vindication of national honor, are barred.

Yet it is unlikely that any diplomat affixing his country's signature to this document did so without certain mental reservations. And it would be too much to hope, in view of humanity's age-old habits, that the signatories actually expect to abide by the full spirit of its provisions. China and Russia, for example, are both parties to the treaty, but it is not yet certain that they will settle their present difficulties in accordance with the principles which, specifically, the pact demands. A devotion to peace which has extended from the mere infancy and a tendency among all peoples to make idols of their military heroes cannot be overcome in

stantly by the mere signing of a paper. Nevertheless, the treaty is a demonstration of the underlying hope which has filled the breasts of men and women for generations—a hope that the eternal folly of wholesale slaughter and cataclysmic destruction might be replaced by appeals to reason. It is a manifestation of the new order in which expression of this dream by statesmen is no longer met by silence or ridicule. Even since the days of Woodrow Wilson, whose league of nations was denounced by many of our own professed leaders as "visionary and idealistic," we have progressed far when proclamation of a mere pledge outlawing war is acknowledged as the occasion for "We are gaining, in theory at least, a great ceremonial."

We have the solemn word of practically all the powers of earth never to settle their differences "except by pacific means." We have a world court, functioning with the backing of every great nation save our own. We have a league of nations embracing all the major nations except the United States, Russia and Turkey. If all this equipment can not stave off war and deliver mankind from the horror and economic burden of international murder, then our civilization has little chance to survive.

RECORD BUSTING

This endurance flight business is becoming positively discouraging to new paper men.

A record is no sooner made than it is broken, and heaven only knows what the end will be. The Question Mark record was considered wonderful, only to look like nothing at all when Robinson and Kelly got through with it. Then came Mitchell and Newcomb to surpass the record by a couple of more hours.

When Reinhardt and Mondell came down after 246 hours aloft, all sane men felt they had done something that would be a record for at least the remainder of the year. As this is written, however, Jackson and O'Brien at St. Louis lead within striking distance of the record and will undoubtedly surpass it today.

Their threat is to remain up three weeks, and who is there to doubt they may do so? A week ago 246 hours looked like all eternity. Today it is just another record and nothing more.

OBSERVATIONS

HEY, EDDIE, FETCH UP A BARREL

The warm sun turned and now the wife has an inning. A man complained that his mate was of the Amazon type, carried a wallop in either mitt, and to cap the climax, she took all his clothes away from him.

FIFTY-FIFTY

At a gathering up state the other day a man caused the whoops when asked whether or not he had ever heard a certain man talk over the radio. "I'll tell ye, brother, it can't be done at our house; every time I turn him on, the wife turns him off."

WHEN IN ROME, ETC.

Imogene—What, for the love of Lu! is a penitentiary? Gwendolyn—That big word refers to a guy who is clothed with authority, or something. When he arrives he brings his flag with him and that gives him protection. And after he is all fixed up here—he is just like he was at home. If he has personal habits that do not dovetail with those around him, he can go the limit and you can't touch him, should he crave a snifter, the old folks at home send it to him. But what the meek and lowly pebbles would like to know is, so long as this country is dry why do they send over fellows who are wet?

HEY, YOU STARTED SOMPIN'

Horatio—What the dickens is a qu? Alfonso—Why, brother, that has all the earmarks of a puzzle, but when the proceedings lengthen into days and nights, when many inroads and detours are injected into the subject, it develops into a full-fledged parliamentary dissertation.

ASLEEP AT THE SWITCH

It is reported in the paper that a juror up state sometime, somewhere, had taken a drag out of a fragile container, and thenceforth simultaneously had accumulated a severe dose of inebriation, and a headache.

FEVERISH EXCITEMENT SUBDUED

When a scion of a titled family in Europe came over incognito, derby hat and everything, he succeeded in running the gauntlet, or something, for a while, and then the sleuths discovered his identity. It required the best of the master minds to get a reduction of the reparations, but that theory was knocked into a cocked hat after an intensive survey had revealed that the lad had just come over to the movie colony to see his sweetie, and enjoy the sunkist and salubrious Southland.

SITTING ON TOP OF THE WORLD

Five hundred millions for a board to assist an organization so that people can go to work. There are a lotta guys, if they had that mazuma, wouldn't do a thing.

WILL WONDERS NEVER CEASE?

After reading about a "wild party" staged by some celebrity up state and roudabout, you wipe off your specs and settle back in your swivel (if you have one) believing that the "epic" has been reached and all would now be good. But lo and behold, there is another "frolie" put on the first page which puts all others into eclipse, and you go out and cut the lawn, or something, or maybe you turn on the radio and try to figure out what the wild waves are saying.

CURBSTONE BROADCASTING

Hello, folks! How are you? Eh? Yes, the arbiter was acquitted. Do you think she was drowned? No—doesn't seem so. Well, do you believe she was kidnapped? Dunno; she said she was. Well, say, do you think she was at the seacoast cottage? Search me; she said she wasn't. Do you think we will have a Fourth of July celebration this year? Dunno; there are too many other kinds of fireworks these days. People are pretty well fed up on excitement. When do you think they will build the Boulder dam? Dunno; it all depends when they get started. Well, come over some time; bring your knitting and stay all day. And, say, s-h-s-s, what did you do with that formula? Got one of those new-fangled refrigerators now. Good day.

SHOOTING STARS

Quite often you see in the paper where a certain member of the amusement world has been stepping out and the things that you read about lead you to believe that some naughty doings were on tap—or maybe it was in the ice chest. And as time rolls on some of the faces that were once familiar grow less and you wonder what has become of them.

HEY, EDDIE, BRING A BARREL, QUICK!

In many places it is currently reported that the wimmin have discarded their stockings altogether; but it remains for a town out East to have ladies who show all the vertebrae, excepting the last joint.

TWO REELS (Not a Serial)

A man received a hurry call to come to a hospital. As he reached the first floor a nurse told him it was a boy. When he bounced up on the second floor another nurse informed him there were twins. He mopped his brow, saying, "Thank heavens, I'm glad she wasn't on the top floor."

NOTHING ELSE—BUT

When you pick up the paper nowadays and read all the murders, and whatnots, you are a bear if you do not get a brain storm or a dizziness.

IT'S PA AND MA WHO PAY

The popular indoor game of suing the "in-laws" for alienating the affections of your wife grows by leaps and bounds—provided the old folks have the jack. All you have to do is to have a friend wife get mad and go home to mother. Then the fireworks go off. If you are short of change, you can place the figures six in a row. If you win you are in clover; but if you lose you go on short rations and a diet.

REAPPORTIONMENT OF SEATS NOW IN ORDER

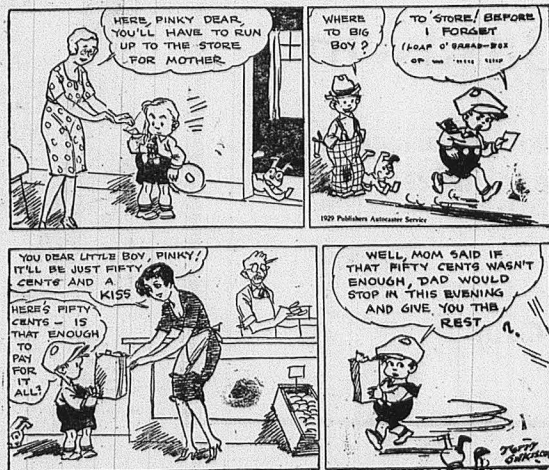

There awhile ago a newspaperman in a city up the boulevard said eleven years ago they had 200 saloons, and now they had 400 "saloons." From a numerical viewpoint the deduction arrived at is that the old town surely is growing.

BURNING THE MIDNIGHT OIL

For months a story has been told and retold about a couple who were said to have occupied a cottage where the wild waves were sighing. But that is nothing to get excited about, because many couples do that very thing. What the breathless public would like to know is who struck Billy Patterson!

SCENES IN PASSING

The Amazon with a bum looking knee may get by without any comment by the sheiks on the sidelines; but, believe it or not, the gal with the bowlegs should be given credit for having a lot of nerve.

Water Users Not Destructive

Stuart H. Lucas Offers Pertinent Suggestions on Recent Flood Control

During the flood control campaign the charge was frequently made by proponents of the project that the efforts of the Water Users' Association were destructive rather than constructive, and that its members did not have to make such an effort if successful in defeating the bonds. It is needless to state here that such charges were not true. The great majority of the members of this association were sincere in their desire to substitute a more economical and desirable project for the one which was voted upon.

For various reasons there appears to be a tendency upon the part of many people to look to the Water Users' Association at this time for some recommendations relative to a possible flood control and water conservation project. The majority of such people are sincere

in their position in this respect, although there are doubtless those who would like to emphasize the association it were possible to do so. Appreciating the fact that there are those who may have reason to expect the association to take some forward step in the matter, the association wishes to make clear its position.

First, it must be realized by everyone that to complete plan along the lines in question and to carry it out without the expenditure of considerable money. The association feels that such an expenditure should be a public charge against the county as a whole, and even though it had funds available, which it has not, they would not be spent for such a purpose. The association can, however, at least expense, and through the cooperative aid of its various members, draft several propositions which might be worth consideration by the electorate of the county. Consequently the association will present, during the coming few weeks, several rough outlines of projects which have their individual merits.

The public must appreciate at the onset that such presentations are not based upon extensive and expensive engineering and legal investigations, and it will be impossible, therefore, to definitely recommend any one project as the best at this time. The association has its choice of proceeding further under the Orange County Flood Control Act, or of utilizing other legislation as a general matter. The great fault to be found with the Flood Control Act is the fact that it does not give the association under its authorization which are commensurate to the benefits received. All property in the county under this act, must be taxed on an equal basis. In the face of this it must be remembered that there are two classes of benefits to be received, flood protection and water supply, and the degree of benefit under each of these headings has a tremendous degree of variation within the county.

Those private lands which are menaced by flood waters will receive a very considerable benefit through the removal of such a threat. There are doubtless instances where land will be doubled, and possibly be traded in value through the flood protection to be afforded. Remaining lands in the county are directly interested in it in proportion only to the extent of the participating ownership in the county road, bridges, or other property which might be affected. This interest is, of course, very slight.

As there are several separate and distinct watersheds in the county, it is readily seen that those lands in the various areas will benefit from an increased water supply only through work done in their particular section. It is impossible to conceive of any project which will benefit equally all the lands of the county with respect to increased water supply. From the foregoing it would appear that there is ample food for thought in this angle of the problem for the citizens of Orange county.

If it is deemed best to proceed under the Orange County Flood Control Act, despite the inequitable means of assessing the benefits thereunder, the question arises as to what project shall be favored. The Water Users' Association made itself clear during the recent campaign to the effect that in no far as available evidence was concerned the Trade dam site was immeasurably superior to the Esperanza (lower site), or any other site suggested. Nothing has occurred since the election to change the situation with respect to these two dam sites. The association believes, however, that the Trade site should be more thoroughly explored before its possible acceptance. It appears to be a most admirable site, and in all probability a competent and honest investigation will confirm appearance. The lower site is of course definitely out of the picture and the association would regret exceedingly if its further advocacy should result in a further waste of time and money. Consideration should also be given to a possible participation by Orange county in a tri-county project, or a tri-county project helped with state aid. Information along such lines hitherto has been both scant and vague. From present indications, however, it may be possible that much data concerning this phase of the problem will be available

In the near future.

While no public mention has been made of the Water Users' Association Act of California, this bill, which is general in its application, merits some consideration. The bill provides for flood control and water conservation district may be formed which will include any part, or all of the county. Directors of the district would be elected by the people, which would be a good thing. Bonds could be voted, as in the case of the Orange County Act, by a bare majority. And under this act a special board could assess all the property in the district directly in proportion to the benefit it would receive.

It must be noted, however, that another election can be used under the Orange County Act, and the above reason of the situation will show the voter that there are many angles to consider before arriving at a final conclusion. No time should be lost, however, in giving this problem the study it merits. The Water Users' Association, as previously stated, stands ready to aid to the limit of its ability and responsibility. Further articles will elaborate more fully upon the various paragraphs touched upon in the above paragraphs.

S. H. LUCAS.

Pectin Is Becoming A Valuable Product

The manufacture of by-products is a very important link of the activities of the organized citrus industry. One of its most interesting products is pectin. Besides alcohol, essential oils, citric and tartaric acid, pectin is one of the new food materials of fruit origin which may find uses in other manufactures than those of the fruit industry.

Pectin seems to be destined to play a much more varied and even more important part in industrial chemistry. German chemists lately have increased themselves in pectin and a brief review of its uses is of interest. Pectin is a natural substance found in the cell walls of plants. It is a polysaccharide, a complex carbohydrate, and is found in the cell walls of plants. It is a natural substance found in the cell walls of plants. It is a polysaccharide, a complex carbohydrate, and is found in the cell walls of plants.

Another interesting application was a jelly made of pectin, acid and sugar without heating. This was of importance to the pastry baker. The "fruit" "thickening" which, in fact, was nothing but starch paste, now has been replaced by a real jelly-making, made of pectin with or without fruit juice. This may real fruit tarts can be made by using a fruit jelly filling. There are other uses. Candy and marmalade, filling and artificial honey, for example.

Comparatively recently experiments have been made in Germany for other uses of pectin in pharmaceutical chemistry and in the cosmetic industry. It seems that pectin solution possesses the quality to make emulsions permanent. Pectin has been recommended as a non fatty base for salves. Vaseline, by the addition of pectin, becomes hygroscopic so that water soluble salts can be added to it. Talcum can be made, insecticide emulsions and other uses have been mentioned. In certain combinations

Rare Birds Feature Orange County Fair

Dr. C. P. A. Service
The feature tent of the Orange County Fair to be held August 28th to September 2nd will have an attractively beautiful variation from former like events, in the arrangement of exhibits.

This year in addition to holding the display exhibits of a number of farm centers, cities and chambers of commerce there will be placed also in this building a variety of horticulture showings—flowering plants, cut flowers, etc.

In the midst of these exhibits will be placed the "rare and beautiful birds" department. The red and blue macaw (Ara Chrysolaos), a native of Guatemala, shown above with Miss Lenora Roney, is the property of Dr. Leon Patrick. It is a fitting illustration of one of the wide variety of birds to be exhibited.

Making the feature tent even more attractive, the Orange County Fair will show several hundred feathered songsters in a contest of competition for the prizes offered.

contain large percentage of colloidal substances—that is pectin. If the importance of this fact is properly realized, these fruit products will find much greater appreciation as a food. Pectin thus becomes more than a useful jelly medium; it will be recognized as a physiologically most important ingredient.

According to German chemists pectin also has the characteristic to form a neutral compound with alkalis; a pectin salt, as for instance, sodium pectate, can be taken internally as a harmless equalizer in cases of extremely acid condition of gastric juices, as this salt, together with hydrochloric acid, forms sodium chloride and—harmless—pectic acid.

Pectin certainly will become an ideal tonic as soon as it finds its place among the physiologist. It will not be long before we will hear that the pectin contents of our fruits and fruit products are one of the most valuable components of these foods.

THESE CHANGING TIMES

Many tears are being shed and many lamentations are heard for the passing of ancient landmarks, cherished traditions and national institutions. The tears and lamentations increase as the "departures" increase, and in this progressive era the "departures" are many. Kansas misses her horse rails and posts. Several states have hidden fond farewells to canals and canal lines, which have been abandoned because of the inability of the waterways to compete with the railroads. Mountainous states regret the forcing of the old

watering trough off the roads by the automobile and improved highways. And virtually everywhere the barber pole is passing into oblivion.

Traffic conditions, city planning commissions and different business conditions are combining to persuade more and more barbers to "take in" the sign of their trade. In some towns and cities none survive the onslaughts of progress and modernity.

Barbering flourished as a business in Biblical times. Ezekiel mentions this craftsman in the Old Testament. A barber was one of the central figures in an Italian novel written by Alessandro Manzoni in the first half of the nineteenth century, the plot of which was suggested by an historical incident which occurred in 1520, and which involved a Milan barber.

The barber pole with its stick-candy effect once advertised the fact that the barber within not only shaved heads and trimmed hair, but "let blood" for the ill and extracted teeth on occasion. The ball which has long surmounted the barber pole supported several decades back a copper basin with a gap on one side which represented a similar instrument that was placed around the customer's neck to protect his clothing from the latter and clipper hair.

One of the literary masters, Shakespeare or somebody, said that living is the soul of wit. If this is true, it's a wonder we all don't die laughing at some of the modern signs the girls are wearing.

George Washington never wore straw hat before June 1—nor after.

Telling Fish's Age By Scales on His Back

That old wheeze about being able to tell a fish's age by the scales on his back is due to be dumped in the discard, if the brand new method of bringing the fish into a cannery that has been developed here by one of the leading packers of sardines works as it should.

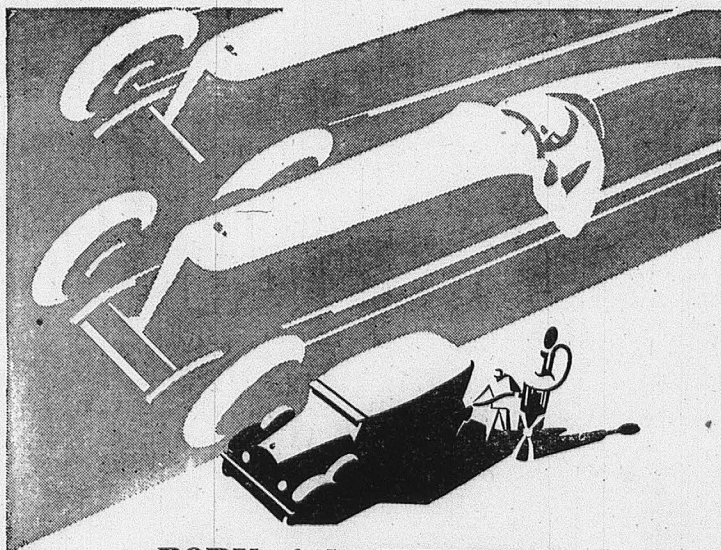

Sardines will be brought into the cannery from the fishing boats through an eight-inch pipe by suction, a smaller pipe furnishing the air and a powerful pump supplying the motive power.

The centrifugal force of the salt water driving the fish through the pipe will remove the scales and when the sardines arrive in the cannery, they will be ready for washing, cutting, and putting in cans.

Thus the scales will be dropped, the fish will come in "clean" as far as outer scales are concerned, time will be saved, fish will be saved, and the expense of a scaling machine will be eliminated. A suction system of this exact type has never been used before, but elaborate tests have shown that it works and that it will provide for greater efficiency and speed in the canning of sardines.

The burning issue among the girls nowadays is whether to bob it again or let nature take its course.

If you want to know how quickly a public figure is forgotten just ask the next ten men you meet the name of the captain of the "Im Alone."

BORN of the SPEEDWAY ...motor's greatest proving ground!

FOR MANY years Richfield gasoline has figured prominently in speedway victories and other great motor events of the country where it has been the exclusive choice of the world's greatest pilots, men who know gasoline and have the choice of every kind made.

It is here in these gruelling competitive events that great motor improvements originate and are tested... and out of this experience, Richfield has developed a finer gasoline for high compression motors... a gasoline that is faster, more powerful, more responsive and more efficient than any other present day motor fuel.

To this new Richfield has been added ETHYL fluid, the only genuine anti-knock compound. The result is a super fuel that gives super results in every type of motor... the finest gasoline you have ever tried in your car.

Try Richfield-Ethyl today for a real racing thrill.... at every station where you see the blue and gold Richfield-Ethyl pump.
