

SEEK REASON FOR HALTING SURVEY OF RIVER BASINS

Supervisors Delay Completing Data for Use by County Water District Board

Why doesn't the Orange county board of supervisors want an official survey of the Santa Ana river basin completed?

Two surveys, one by Engineer-Bailey and the second by Engineer-Elliott, were authorized and nearly completed during the past decade. On each occasion, however, the board of supervisors withdrew financial support just as the engineers were ready to finish surveys of tributary streams and run-off areas, thus not giving a truly comprehensive study to the board of supervisors for action. Each survey resulted in a flood control plan, one being submitted to the people, and meeting defeat.

Either survey can be completed with the expenditure of a few thousands of dollars.

Previous boards of supervisors withdrew financial support just in time to prevent both engineers from finishing their work. The directors of the newly-formed Orange county water district have appealed to the present supervisors on several occasions for sufficient funds, a small amount being needed to complete either of the surveys, with the work to be done under the flood control act. Two organizations of this county, the Yuba Linda Water company and the Orange County Engineer's club, last week adopted resolutions asking supervisors to accede to the request of the water district board.

By Thursday morning, however, the supervisors still were "considering." Supervisor Bill Jerome is understood to be against voting necessary money to complete the survey on the grounds that the water district cannot cover the entire county; however, the flood control act, under which the board is asked to appropriate the money, does represent the entire county. It was under this flood control act that the two surveys were started.

The water district board, which has the power to levy a tax upon which to carry out its activities, limited to the water district, cannot cover the entire county; however, the flood control act, under which the board is asked to appropriate the money, does represent the entire county. It was under this flood control act that the two surveys were started.

"In order to speed up the work of conserving our water resources," Water District Director William T. Wallop told members of the Yuba Linda Water company and engineers of the county last week, "we need a completed survey of the tributary basins of the Santa Ana river. We already have notified Cuenca that this county intends to protect its rights jeopardized in spreading operations. We could take similar steps, lessening by a year or more the necessary waiting such protection to a head with others we suspect of robbing this county of water, if we had the necessary data which would be obtainable from a completed survey. It makes no difference to us which of the surveys is finished. We need the information to study now in order to hasten our work. Anyway, the whole status of the county is dependent upon the water supply. This urgent need should receive the immediate support of the board of supervisors."

20 Census Takers Canvassing County

Twenty business house census takers this week were canvassing every place of business in Orange county under the direction of Clarence Wilson, 12th district supervisor of Los Angeles, for the census bureau of the department of commerce, Washington, D. C. The census takers received their training last week. They are seeking information on all lines of business, large and small, for submission to authorities at Washington.

turn to page 5 and follow Mary Imlay Taylor's "The Dollar Bride". This is only the second installment; you'll get a "kick" out of Nancy Gordon, a beautiful girl who "got in wrong" when trying to do right.

HERE'S HOW

—By Albert T. Reid

Estimates County's Population 119,460

Increase of 786 From 1930 Census Till 1934 Credited to This County

Orange county has had an increase in population estimated at 786 persons since the federal census was taken in 1930, according to a study of the population of California counties, recently completed by California Taxpayers' association. In 1930 the county showed a population to have been 119,460.

The increased use of per capita figures in the study and control of governmental expenditure makes the accurate estimating of population for the years between census takings of vital importance, Paul V. Lane, of the research staff of the association, points out. "An error of a few thousand in the population may make the per capita cost of some governmental service show a downward trend, when actually it is going up, or it may hide actual and commendable economies," says Mr. Lane.

Estimating the increase in population of the entire state between 1930 and the time honored method of estimating present population by projecting above past rate of growth is likely to be faulty in the extreme. The association uses elementary school enrollment and average daily school attendance, together with vital statistics of births and deaths, in estimating population. An independent estimate of the entire state is used to control the total of the individual counties.

Fumigation Strike Collapses Quickly

Coercion attempts by strikers to prevent fumigating in Orange county collapsed Tuesday night. A dozen crews in the Santa Ana-Tustin area, overpowered by a large number of strikers, were forced to leave their jobs Monday night. Because of the impressive show of force, which induced the crews to leave without physical protest, bloodshed was averted, according to investigators. All of the crews of Aldrich and Graves, Tustin, who had eight of their nine crews walk out Monday night as a result of strikers' activities, returned to their jobs the next evening when Sheriff Logan Jackson promised protection. Deputy Sheriff patrolled the fumigation area, with no disturbances reported. The strikers' meeting scheduled at Orange Tuesday failed to materialize.

\$17,000 Permit Is Issued Fruit House

Anaheim Citrus Fruit association Wednesday obtained a permit to construct a \$17,000 addition to its packing house at 804 East Center street, for the purpose of providing additional storage for packing boxes. The addition will be 50 by 100 feet, of concrete construction.

RAZE GHOST CITY BANK BUILDING TO SAVE ON TAX BILL

Relic of Boom Town of Carlton Discarded After Half Century of Usefulness

Last traces of Orange county's Ghost City—Carlton—were vanishing from view at Fullerton this week as George Amerigo ordered the once-famous bank building of the noted boom town torn down to save taxes.

The one-story frame building was erected in 1887 to house the busy bank in the incorporated community of Carlton, the bustling community which grew at the base of the coast range east of Fullerton where the Anaheim-Olinda-Pomona railway project centered. The plan to connect sea-borne commerce at Anaheim Landing, where freight was brought in by lightering, with the railway at Pomona failed after a year the town thrived, incorporated and was placed on the state map. Then, when funds for the undertaking vanished, it died.

The bank building, practically new, was moved to the corner of Center and Philadelphia streets, Anaheim, where it was used as a tailor shop for a number of years. Other buildings in the "ghost" city were left to fall apart, or were torn down for other purposes. After many years of usefulness in Anaheim, the old bank building was bought by George and Ed Amerigo and moved to Spadra, near Commonwealth avenue, Fullerton, where it was used for a number of businesses.

And now to save taxes, the one-room structure, which has seen nearly half a century of usefulness, is being torn down by order of George Amerigo, one of the two brothers who laid out the town of Fullerton shortly after it was named for a San Francisco businessman who was influential in getting the Santa Fe railway to route its line through that district.

DEMOCRATS CANCEL DINNER
Because of conflict with another celebration to be held in Santa Ana in observance of President Franklin D. Roosevelt's birthday January 30, the Orange county Democratic club cancelled its dinner originally scheduled for that evening, also in observance of the birthday, according to President James L. Davis.

TELLS CWA ACTIVITIES
County CWA Administrator Robert W. Ramsey outlined county activities resulting from the federal government's re-employment plans to members of the Anaheim 20-30 club at their meeting in the Marigold cafe Monday evening. He said 245 men are working at the present time, drawing a \$46,000 total weekly payroll, while January expenditures will exceed \$400,000.

Boy Saves 2 Lives When Bank Traps 4

Victim of Cave-in at Atwood Is Buried Wednesday; Children Digging "Playhouse"

Ten-year-old Edmond Mendez, although he saved the lives of a brother and sister by frantically digging sand from a fallen bulk away from their heads Saturday morning, this week continued to mourn the fate which prevented him also from saving his eight-year-old brother, Ernest.

The four children were digging a "playhouse" in the embankment near their home at Atwood when the wall suddenly gave way. Edmond was only partially buried. He wriggled free in time to uncover the heads of Mary Ellen, 12, and Alfonso, 6. Ernest was buried beneath a huge boulder, which struck his stomach. Edmond ran for help. Neighbors rushed Ernest to the Orange county hospital where an emergency operation and two blood transfusions Sunday failed, the lad dying at 5:30 p. m. January 21.

An autopsy held over the body at Higgenfeld's funeral parlors Monday revealed death by internal injuries and eliminated need for an inquest.

Funeral services for the lad were held from the Mexican Free Methodist church at Atwood Wednesday at 2 o'clock, with Rev. L. Morales officiating at Loma Vista cemetery. The body was buried by his two brothers and a sister, who were playing with him, another sister, Esperanza, and his parents, Mr. and Mrs. Carlos Mendez.

Jury Indicts Two For Grand Theft

Criminal indictments charging eight counts of grand theft and violation of the corporate securities act were returned against Sam Hill of Santa Ana and W. L. Nix, former mine promoter, by the county grand jury in Superior Judge H. G. Ames' court Wednesday. Judge Ames ordered bench warrants issued, with bail fixed at \$5,000 each.

Planting of First Valencia Trees To Be Celebrated Feb. 1 By Native Daughters

An event of interest to many citrus growers and pioneer residents of Orange County will be the dedication on February 1, under the auspices of George Parlor 242, Native Daughters of the Golden West, of the planting of the first Valencia orange orchard in California. This will take place at the Placentia Fruit company grove on Placentia avenue, one-fourth mile north of Chapman avenue, where R. H. Gilman began growing seedling oranges in the 1870's and started the first commercial Valencia planting in the early eighties. This was about ten years after the first navel orange trees had been introduced at Riverside. Mr. Gilman, now 88 years of age, will be the honor guest at the dedication, which will take place at 2:30 p. m., Thursday, February 1. Everyone interested is welcome to attend. Paul Armstrong, general manager, California Fruit Growers Exchange, will speak.

Miss Yungbluth Is Bid Bon Voyage by Scores of Friends

Popular Anaheim Girl Presented with Gifts and Bouquets as She Leaves on 3-Month Trip

As Miss Dorothy Yungbluth, popular and attractive daughter of Mr. and Mrs. P. A. Yungbluth of West Broadway, is crossing the broad expanse of the Pacific between San Pedro and Honolulu, she carries touching memories of the 60 or more relatives and friends who gathered at the Matson line's docks at Wilmington Wednesday afternoon to 5 o'clock to bid her bon voyage on the newly-appointed liner Lurline, off on a three-month cruise.

Miss Yungbluth will arrive at Honolulu Monday, sailing that evening for Pago Pago, Samoa islands, then to Suva, Fiji islands; Auckland, New Zealand; Sydney, Australia; Port Moresby, British New Guinea; Padang Bay, Island of Bali; Samarang, Java; Batavia, Java; Penang, Straights Settlements; Palkam (Bangkok), Siam; Hongkong, China; Shanghai, China; Chinanfu, China; Kobe, Japan; Yokohama, Japan; Honolulu, Hawaii; and finally, San Francisco, California, on Saturday back at San Francisco April 14, 1934.

Three score or more friends and relatives trekked to the harbor in individual cars, and in groups. Miss Yungbluth was becomingly attired in a green tweed sweater suit with brown accessories, and wore a corsage of gardenias. Her mother and father and brother, Edward; Hugo Strodtloff of Anaheim; Mr. and Mrs. Gus Strodtloff of Long Beach; Mr. and Mrs. Otto Strodtloff and three daughters of Los Angeles were relatives at the boat to see her depart.

The popular Anaheim girl joined her chum, Miss Adelaide Scandrett of Oakland, who boarded at San Francisco. Together they appeared on the dock as the boat cast off, with the orchestra playing. Serpentine, confetti, flags flying and waving handkerchiefs added to the gaiety of the occasion. Miss Yungbluth took with her many bouquets of flowers, gifts and letters to be opened at sea, given by friends who wished her a delightful trip.

For several weeks the attractive local girl had been feted by numerous friends, being presented with scores of gifts. Sunday night she was the honored guest of Mr. and Mrs. Theodore B. Kuehl of 547 South Lemon street at a dinner party. Monday evening she was honored by members of the St. Agnes Guild, who held a handkerchief shower for her.

ELKS SPONSORING PRESIDENT'S BALL ON TUESDAY EVE

When Tuesday evening roll round scores of Anaheim residents will gather at the Anaheim B. P. O. Elks clubhouse to join the rest of the nation to listen in on President Franklin D. Roosevelt's address, and to celebrate the president's birth at an elaborate ball.

Arrangements for the dance and entertainment are in the hands of Committee men George Reid, J. A. Morgan and Joe Elliott. The dance will start at 9 p. m. All entertainment and dancing will cease to permit those attending to listen to the president's address. A portion of the funds taken in will be sent to the Crippled Children's hospital in Georgia, in which the president is interested.

Although the Elks club is sponsoring the ball, other civic groups of the city are joining in support of the entertainment. The public is invited.

RAIN TUESDAY NIGHT

Rain Tuesday night added .03 of inch to the total rainfall of this city, bringing the season's total to .747 inches, as compared with .82 inches a year ago.

\$450,964 LOCAL RELIEF IN '33 BY U. S. AND STATE

Orange county received \$119,258.52 of federal relief funds and borrowed \$11,706 from the state for relief purposes during 1933, according to a report received this week from the state emergency relief administration. The report shows that Orange county was sixth among 45 counties receiving federal aid, and fifth among 21 counties borrowing from the \$20,000,000 state relief bond issue voted in 1932. Total expenditure from public for unemployment relief in California during 1933 was more than \$36,700,000. The reconstruction finance corporation loaned \$3,890,000, or 26 per cent, of this amount to counties. The federal relief administration contributed \$7,900,000, or 21 per cent, of the total. Orange county received \$450,964, or 14 per cent, from loans from the state unemployment bond issue; county funds provided the balance of \$13,800,000, or 38 per cent.

Stanton Fighting Gas-Tax Splitting

Urges Californians to Develop Natural Resources; Says New Roads Pay For Selves

California's famous natural advantages, especially undeveloped resources on the interior, are headed for oblivion if the League of Municipalities' program of tax-splitting is carried through to its ultimate conclusion, according to Highway Commissioner Phil A. Stanton of Anaheim.

By adding one-quarter of a cent to the amount cities receive out of a dinner party of three-cent gasoline tax, and assuming maintenance obligations on six thousand miles of additional secondary highway system which relieves both cities and counties of large maintenance costs, the state highway commission has shouldered a burden which will restrict its development of new highways within the state. Commissioner Stanton said.

"The quarter of a cent split with the cities takes six millions of dollars from the state highway fund," Commissioner Stanton said. "This new secondary highway system adds a system maintenance cost of another six millions of dollars, thus taking 12 millions from our new construction budget."

"When we consider highway costs do not forget to take into consideration the fact that new roads, shortening of others, and building of proper curves and cut-offs really pay for themselves in a surprisingly short time. Take the cut-off route between Los Angeles and Bakersfield as an example. That new road, which eliminates hundreds of trips across the state, saves time over the ridge-route by more than an hour, will pay for itself within six years, despite the fact that it cost well over three millions of dollars. Savings come not only in time, but in consumption of gas, wear and tear on machinery and tire mileage, all of which goes right back into the gas-consuming public's pocketbook."

"There are vast portions of California yet to be developed by an adequate highway system. We must remember that when we build roads to Death Valley, for instance, or over the Sierra Nevada, we are developing the rural sections which otherwise could not afford such projects. But the cost is returned many-fold to the cities, because development of rural areas in California merely feeds the metropolitan districts."

"We must not forget that California is a state unique in its natural advantages. It has the oldest living things in the world, the giant redwoods; in the Lake county region there are more hot springs than in entire Continental Europe; Mt. Whitney is the highest peak in the United States proper, and Death Valley boasts the lowest place in the North America; our own combination of sea shore, orange groves, and desert in Southern California fascinates the world."

"Let us think twice before we take any more money away from the highway commission."

Vigorous Upturn In Late '33 Business

Ending the most eventful year in a generation with a decided upturn, the Bank of America index of far western business registered 64.7 (preliminary) in December, the highest point reached in the past 20 months.

BANK DIRECTORS APPROVE PLAN OF REORGANIZATION

Stockholders to Consider New Plan Monday Evening; \$25,000 Paid

Tentatively approved by the board of directors a plan to reorganize the Anaheim First National bank will be submitted to stockholders by the directors at a joint meeting to be held Monday evening at the bank.

This decision was reached at a meeting Tuesday evening when directors threatened over several plans to reorganize, deciding upon one which will call for raising of a substantial amount of additional capital. If the stockholders approve this plan, it will be sent to Washington for approval of the comptroller of currency.

"We have high hopes of successful reorganization," President William A. Dolan states. "Depreciation of certain bonds is what caused all our trouble. Since the bank was placed under a receivership last week, these bonds appreciated \$25,000 by Wednesday. This increase in capital, plus additional capital which I believe we can raise in the community, would put us on what I believe would be a solid financial footing. Of course, if our bank is reorganized and thus opened, all accounts under receivership would be guaranteed by the government. We still retain our national charter."

In the advent that the bank is not reorganized soon, Receiver J. V. Hogan will speed up liquidation, according to Mr. Dolan.

At the time the comptroller of currency placed the bank under a receiver, it was carrying an average of \$50,000 in new accounts, all held in cash government bonds or as deposits with the federal reserve bank. Receiver Hogan issued a call for all depositors of new accounts (those who have deposited money or opened accounts since the bank holiday) to appear this week and get federal reserve bank checks for their entire balance. During Monday and Tuesday approximately \$25,000 were issued to about half the new depositors. All the balance must be drawn out, with indications Wednesday that the necessary funds would be available. Additional warnings to new depositors to come and get their money in full.

High School To Resume Classes Monday, Jan. 29

Unless present plans go awry, Anaheim Union High school will resume regular classes Monday. Alteration of two buildings moved to the premises, as well as changes in portions of the high school, has delayed start for occupancy, were going on at a rapid pace Thursday, with indications pointing to sufficient completion to open school Monday. Offices of the school were moved from the condemned administration building to the renovated commercial building. All classes formerly held in the administration building and the auditorium building will be conducted in the structures moved from other school properties.

Present plans call for continuing the spring term one week longer in June and eliminating the spring vacation in April to make up the two weeks lost through condemnation of school buildings.

NEW CWA REGISTERING

Under the new segregated rural for city and county workers, placing them on separate projects, the CWA registrars early this week underwent a general shakeup, with A. R. Benson being established in the city hall at Anaheim to register local applicants.

JOE GISH

JOE BARROWS IS A MIGHTY BROAD-MINDED MAN, WHEN IT COMES TO MATTERS THET DO NOT CONCERN HIM...

Report Of BOARD of AUDIT For the Year Ending December 31, 1933

Anaheim, Calif., January 15, 1934.

To the stockholders of the Anaheim Union Water Co.:

Gentlemen—Your Board of Audit submits the following report for the year ending December 31, 1933.

STATEMENT OF LOSS AND GAIN, DEC. 31, 1933

I. WATER AND GENERAL ACCOUNTS:

Water deliveries	\$ 95,586.92
Rentals	1,120.00
Consent, hauling, pipe, sundries	864.77
General Expense	6,565.02
Repairs	6,400.67
Cleaning general	5,502.95
Cleaning, Tuffree Reservoir	5,008.34
Sand Pumping	547.95
Electric Power	21,772.71
Pumping	3,091.39
Pumping Plant Repairs	3,706.47
Water Distribution	9,902.56
Salaries, Office and Directors	3,425.00
Attorney's Fees	600.00
S. A. R. D. Co. General Expense	7,923.23
Taxes, except oil wells	1,705.46
Interest	17,091.24

TOTAL OPERATING EXPENSE—\$ 94,844.89

TOTAL OPERATING INCOME—\$ 94,844.70

NET GAIN FROM OPERATIONS—\$ 597.41

II. OIL ACCOUNT:

Oil Royalties	12,635.92
Oil Salary	567.40
Oil Land Taxes	2,756.99
Oil Well Expense	127.50
Oil Well Depreciation	370.08

TOTAL OIL INCOMES—\$ 12,855.92

TOTAL OIL EXPENSE—\$ 8,651.97

NET INCOME FROM OIL—\$ 4,203.95

III. DEPRECIATIONS:

Tools, Sand Pumps, Dredger, etc.	1,156.22
Trucks	1,083.00
Furniture and Fixtures	70.15
Pumping Plants	724.00
Construction	38,216.22

TOTAL DEPRECIATION—\$ 47,778.64

NET LOSS—\$ 5,642.81

TOTALS—\$ 145,509.90 \$ 145,509.90 \$ 47,778.64 \$ 47,778.64

BALANCE SHEET, DECEMBER 31, 1933

RESOURCES

Real estate and improvements (appraised at double assessed value)	\$ 7,840.00
Lot and office building, City of Anaheim	97,200.00

1932, Gross Production	133,873.72	12,816.92
1933, Gross Production	110,202.01	12,855.92
TOTAL	5,595,698.09	\$729,813.36

The balance of the outstanding bonds of the Company were paid off this year, and the debt of the Company was reduced \$8,600.00 during the year. The remaining debt of the Company is in the form of notes to individuals. The maturity dates of these notes have been spread so that no very large amount matures during any one year, thus making it impossible to embarrass the Company by too large demands for payment. The credit of the Company is, of course, very high, and we do not anticipate any such large demands, but think it well to provide against it.

You will note that the operating income just about balances the operating expense this year, although the water rates were lowered and less water was used.

No decision has as yet been given in the Lillbridge suit. The Santa Ana River Development Company continued to purchase water from the Lillbridge plants, these plants were pumped continuously for over six months putting over 3,000 acre feet of water into the river trade.

During the year the Company has leased to Bardeen Petroleum Company, Ltd., the La Habra Reservoir site and they have one well drilled to a depth of 270 feet. The Associated has quit-claimed all of their lease with the exception of five wells on the west side of the lease.

The undersigned members of the Board of Audit have carefully examined all books, papers and other records pertaining to the business of the Company for the year ending December 31, 1933, and find that the same have been kept in a correct, neat, clear and intelligent manner, and the foregoing is a full, true and complete report taken from the books covering the above mentioned period.

We wish to commend the office force and the executive departments for the careful and efficient administration of the business of the Company.

Respectfully submitted,

ARTHUR STALEY,

S. C. HARTRANFT,

Board of Audit.

CONSTRUCTION

No construction of any importance was undertaken this year.

WATER DELIVERIES

We started delivering water the 1st of March and ran steadily until the 13th of December, when we had our first good rain.

Water sales for 1933 were approximately 116,000.00 less than in 1932 mostly due to the cut in rate of 26c per hour from March 1st to Dec. 1st.

Had the 1932 rate been maintained in 1933 our sales would have amounted to approximately \$106,000.00 or \$3000.00 less than 1932. In other words we delivered about 35% less water in 1933 than we did in 1932, due no doubt to the efforts of every one to cut production costs—and right along this line, our total pay roll covering operation for 1933 was \$5000.00 or 14% less than 1932, which in turn was \$20,000.00 or one-third less than 1931, showing that the improvements put in during the past few years are paying big dividends in decreased cost of operation each year.

WATER LEVELS

The following table gives the water conditions at two locations at the Gomber Tract and Crowthers Corner for the past three years:

	Crowthers Corner	Gomber Tract
1931	186 feet 2 inches	190 feet 6 inches
1932	166 feet 2 inches	185 feet
1933	171 feet 6 inches	197 feet 9 inches

Showing a total loss for that period of 5 feet 4 inches at Crowthers Corner and 7 feet 9 inches at Gomber Tract. However, since the heavy rains of Jan. 1 and 2, 1934, water level at Gomber Tract is rising and with water still running in the river at Yorba Bridge we feel that this loss will be greatly reduced by spring, and conditions for 1934 will be practically same as 1933.

WATER SPREADING

We are again spreading water at both Gomber Tract and Crowthers Corner. Last year records were kept on the water spreading activities at Crowthers Corner by the State Division of Water Resources on a plot of ground covering 214 acres and the results showed this soil absorbs 1.79 A. F. of water per day and the gross amount applied over a 31 day period was 55.69 A. F. per acre.

TUFFREE RESERVOIR

For the past few years we have been dredging and dragging the Tuffree Reservoir, with very satisfactory results. As it is a great deal cheaper to drag silt in a dry state, we have practically drained the reservoir and are again operating our drag line which is doing a fine piece of work.

FREE DIRT

We have several thousand yards of good rich silt which has been taken from the Tuffree Reservoir, which our stockholders are welcome to without charge.

PUMPING PLANTS

P. P. No. 6 at Crowthers Corner was pulled, thoroughly overhauled and lowered 12 feet.

Due to conditions of well at Gomber No. 5, the big pump could not be lowered and it was removed and replaced with a No. 1-1/2 stage "Q" type B. J. which develops the same amount of water with greater efficiency.

Crowther No. 3 was pulled, overhauled and lowered 12 feet and a new 150 H. P. synchronous motor installed in place of the regular induction motor. This motor cost \$1200.00 more than the regular motor, but we saved \$350.00 on our electric bill due to an allowance made by the Edison Co. for a savings created. As this plant was only operated 1841 hours or 96% days of 24 hours, it represents a savings of approximately \$6.00 per day.

Halliday No. 2, 5 and 7 were pulled, sand pumped, repaired and replaced. Halliday No. 3 was pulled, sand pumped, and equipment from No. 4, which is practically a dry hole installed in No. 3. No. 4 will not be operated.

All of our plants are in first class condition for 1934 season.

We are now drilling a 24-inch hole on Gomber Tract in which we will install the No. 4-8 stage "Q" type pump and 300 H. P. motor which was removed from Gomber No. 5 and this will be operated in place of Gomber No. 4 which well will have to be abandoned due to conditions in well at 200-foot level.

GENERAL EXPENSE

This account shows an increase over 1932 of approximately \$1000.00 due to the fact that rock and boulders washed down from Clay Mine canyon during a cloud burst practically dammed the river channel just below the Head Gate.

We spent the above amount moving this rock and gravel to the North side of the channel, clearing the brush and trees out of main channel and straightening same from the bend in the river above the Head Gate to a point about one-half mile down stream.

ORANGE COUNTY WATER DISTRICT

During the 1933 session of State Legislature Senate Bill No. 1201 creating the Orange County Water District was passed, and your Board of Directors were very active in behalf of the bill. Your President Mr. H. H. Hale and Superintendent W. T. Wallop were sent to Sacramento on two different occasions and at election of Directors of the District held on Oct. 21st, your Superintendent was elected Director in District No. 3. As you are all more or less familiar with the Bill and its possibilities will state that so far the only real action taken by the Board was securing an appropriation of \$7800.00 of CWA funds for purpose of preparing the River Channel between Yorba Bridge and Chapman Street Bridge for spreading of flood waters.

Respectfully,

WM. T. WALLOP, Superintendent.

IN THE DAYS OF LONG AGO

Extracts From Files of The Gazette Issued Half a Century and a Quarter of a Century Ago. These Files Contain the Only Authentic History in Print of the Daily Doings of the Citizens of Anaheim and Orange County in the Days of the Pioneers.

25 YEARS AGO THIS WEEK

FEBRUARY 4, 1909

The inauguration by the City Trustees of a day and night electric service found special commendation during the recent rainy weather. Lights burned in many stores during daylight hours and in this office they were indispensable. Service and the continuity of the "juice" was a joy to contemplate. The plan works successfully and it is a pleasure to note the works are self-sustaining. Municipal lights and water may have their opponents but the theory of eliminating the large profits of private corporations, many of them paying dividends on watered stock, and the accommodation of the people by the lessened cost of the service works out well in Anaheim. A day and night lighting service may be an ambitious move for us, but nothing is too good for Anaheim.

Rain began falling at 6 o'clock yesterday morning with every prospect of developing into another storm. To date this year the precipitation, according to Mr. Dickel's gauge is 10.83 inches, last year to date, 6.76. During January 6.54 inches fell, which breaks the record for that month's rainfall since the winter of 1884-85.

Organization of the new board of directors of the chamber of commerce, who held their first meeting Monday evening was effected by the election of A. A. Mills as president, Hans Weisel as vice-president, and C. M. Ross as secretary-treasurer. Other directors present were A. Thomas and Geo. L. Deitrich. Bills for expenses connected with the recent banquet were allowed amounting to cover this expense. The general opinion was that the first and most important object at present is the improvement of streets in and near the city. The pavement proposition inherited from the former board will be pushed to a final issue—successful if possible. In company of Supervisor Linebarger, Messrs. Mills, Deitrich and Weisel of the good roads committee went over the thoroughfares in this neighborhood which the chamber of commerce desires oiled and otherwise improved. Mr. Linebarger said the improvements desired would cost \$20,000, and there is only \$3500 in the road fund for this district. New highways are being opened up constantly and travel over the roads in the district it is estimated has increased tenfold in five years. Mr. Linebarger said he would make improvements to various roads, including the Ball road, the Garden Grove road, the road to Placentia and other thoroughfares in this section.

Captain Williams speaking of the blizzard raging in Pittsburgh said on Tuesday that that day was "ground hog day" in the town which formerly claimed him as a citizen. "If the sun shines on the 2nd of February in Pittsburgh," he said, "and the ground hog sees his shadow, he goes back into his hole and stays six weeks. If the sun doesn't shine, and the ground hog doesn't see his shadow, he stays out, and they have a soft winter."

News of the death of H. Cahen at his home in Los Angeles on Tuesday came as a shock to his many friends here, where he formerly resided for many years. Deceased was a native of Algiers and came to Anaheim in the 70's. He engaged in the merchandizing business and for many years was a leading merchant of this city. He disposed of his store and entered the banking business, in which he was engaged until his removal to Los Angeles six years ago. Deceased is survived by a widow, two sons and two daughters. He was aged 62 years.

The wedding is announced of Miss Emma Boege, daughter of Mr. and Mrs. T. J. F. Boege, to John Bauer, both young people of West Anaheim. The ceremony took place in Los Angeles, Feb. 1st, only immediate relatives of the bride being present. After a trip through the northern part of the state they will make their home in Salinas, California, where Mr. Bauer is engaged in business.

L. P. Webber has moved his stationery store from the store-room adjoining the postoffice to the premises formerly occupied by Kincaid Bros. The Southern California Music company occupies the room jointly with him. The premises vacated by him will be maintained as a cleaning and dye works by Mr. Kimball.

Miss Louise Nicolas, daughter of P. Nicolas of Fullerton, was married Tuesday evening last at the family residence to Leon Fighiera, a sculptor artist of Los Angeles.

As Mrs. C. Heiman, formerly of this city was returning to her home in Los Angeles after church some evenings ago, accompanied by her daughter and a neighbor, a footpad approached from behind, snatched her handsatchel and ran. The satchel contained a lorgnette which Mrs. Heiman prized as an heirloom, and a small sum of money. The thief was fleet of foot and made his escape.

Mrs. J. H. Brunworth entertained the Ladies' Whist club on Wednesday afternoon at her home on East Center street. The first prize a crocheted center piece was won by Mrs. Ferdinand Hills and the consolation, two small crocheted ties, was won by Mrs. Wm. Heying. Refreshments were served after the game. Mrs. L. Z. Kroeger will entertain the club next month.

A society vaudeville will be given by local talent at the opera-house the evening of Feb. 22nd for the benefit of St. Michael's church.

Next Sunday will be the fifth anniversary of Rev. Markle's pastorate at the Christian church. The subject for the morning sermon will be "Five years in Anaheim."

A. W. Danforth was in town a day or two ago from Los Angeles. He is selling real estate, dealing in ranches and knows something about the business after ranching at Miraflores for twenty years.

City Clerk Merritt reports the building permits issued by the trustees during January amount to \$10,250. Total permits for 1907, \$76,750. The new year starts well.

Mr. and Mrs. John Hartung, Mr. and Mrs. J. P. Hatzfeld, Peter Weisel and J. W. Dickenson were visitors at the Los Angeles auto show last week.

F. A. Yungbluth was a business visitor in Los Angeles on Friday last.

Fred Tufree was in town from his ranch at Placentia the first of the week meeting with old friends.

50 YEARS AGO THIS WEEK

FEBRUARY 2, 1884

All rain is opportune in Southern California, therefore the very commonly spoken words "what an opportune rain," are hardly expressive enough in referring to the rainfall of last Sunday and Monday. The heavenly zanjero who orders the distribution of the waters from above cares not one whit for irrigation district boundaries, his all embracing love makes no fine distinctions, hence the whole state was blessed by this timely rainfall. From Siskiyou to San Diego come jubilant tidings, and the rather gloomy reports regarding the outlook for crops in the various counties, reported in the Gazette last week, show the reverse of affairs as they are today under very favorable conditions—that if no drying, fierce north winds prevail during the next two months, the raising of a large crop of cereals is assured even without further rain. But there is every reason to hope for more rain. A ride throughout the county is quite inspiring. The grass is growing so fast as to be almost visible in its growth, and in a week or ten days there will be an abundance of feed on the plains. The Santa Ana river is swollen to greater proportions than it has been for years. The day before the rain there was not a hundred inches of surplus water in the river—all was taken out by the various irrigating ditches. Now a hundred ditches could not begin to take out the water which is flowing to waste. The mountains are covered with snow and this will keep the river well supplied with water for some time to come. The fall for the 27th, 28th and 29th was 1.84 inches which makes the season's rainfall to date 5.21 inches. In 1883 the total rainfall was but 5.17 inches. Friday, Feb. 1st—During the night there was a light but steady fall of rain and as we go to press appearances indicate that the storm is not yet over. The fall of last night amounted to .42, making the total for the season, according to the town gauge 5.63 inches. At Mr. Saxton's the fall was half an inch, and the total for the season 6 inches.

It rained much more in the foothills than in the valleys, and in consequence all the irrigating ditches were somewhat damaged. The Cajon ditch, the Anaheim ditch and the Santa Ana ditch suffered considerably by being filled at certain points with sand and rock washed down from the hills. The damage to the two first named ditches will be repaired within a week. The extent of the damage to the Santa Ana ditch we have been unable to ascertain.

On last Tuesday morning as Mr. Henry Neill was driving from Santa Ana to Anaheim he had a damp adventure in crossing Santiago creek. A torrent of water was flowing in the creek at the crossing place, and so swift and deep was it that Mr. Neill's buggy was overturned and he had a lively "pull for the shore." The loss of two buggy robes, a thorough wetting and a great shock to his feelings comprised all the damage.

It is a well settled fact that phylloxera will never obtain a lodgment in vineyards which are annually irrigated. It is equally well known that resistant vines, so called, will after a time lose their resistant qualities and succumb to the phylloxera's attacks. Those, therefore, who desire to embark in the business of grape-growing should remember these facts and lay their plans accordingly.

It is a hissing reproach to San Francisco that upon the occasion of John L. Sullivan's arrival in that city fully ten thousand people congregated to do him homage in the slugging and rough. Now, if Sullivan should come to Anaheim not half that number of people would turn out to see him.

The following figures are taken from the report of second quarterly apportionment of the school fund. The apportionment is made in accordance with Section 1858 of the political code. J. W. Hinton, county superintendent of schools kindly furnished them to us.—Anaheim \$900; Alamitos \$180; Artesia \$360; Centralia \$180; Downey \$720; Garden Grove \$360; Laguna \$180; Los Angeles \$11,160; Newport \$360; Norwalk \$180; Orange \$540; Orange-thorpe \$180; Olive \$360; Pasadena \$180; Placentia \$180; San Juan \$540; Santa Ana \$1080; Westminster \$360; Wilmington \$720; Yorba \$360.

Sowing is being prosecuted with great energy. A much larger area of crops will be planted this year than during many previous years and the outlook is quite flattering for a heavy yield. Certain it is that the ground is now more saturated with moisture than at anytime during the past five years.

It is quite possible that either through laches or fraud on the part of a former municipal council the city of Los Angeles has parted with a valuable water right. The Los Angeles Water Works claim that according to their contract with the city they are entitled to all the water of the Los Angeles river. A suit will probably be brought by the city to test the matter.

The nomination of Richard Melrose as postmaster at Anaheim was confirmed by the senate on Wednesday. It is said that the postoffice will be located in a new brick building to be built immediately on the lot adjoining the bank of Anaheim.

Both of our very excellent hotels have been taxed to the utmost for several weeks to provide accommodations for their guests who arrive daily. A year ago there was not business enough for one hotel. This evidence that "things are moving."

A barometer of the times is the awakened energy of the nurseryman. They know that these rains mean new vineyards and orchards, and each is striving to secure the patronage of purchasers.

When the wind blows from the direction of those snow-capped mountains, the blow from the East will lose his homesickness. The keen air will remind him of home, sweet home.

The Los Angeles Turn Verein will be in Anaheim in force this evening, the occasion being a ball at the Anaheim hotel. Mr. Deitzel is making extensive preparations to insure a good time to everybody.

The engagement of Mr. Fred Hartung of Anaheim and Miss Matilda Beckman of Alameda is announced. We wait congratulations to our friend.

The delinquent tax list of the Town of Anaheim is less than \$15. As it would cost much more than that sum to publish it, there will probably be no publication this year.

THIS WEEK IN WASHINGTON

By spending a few thousand millions less than the United States spent for the Great War, President Roosevelt hopes and expects to re-establish the economic balance at the same time to establish a "planned social-economic order" which will insure the nation against future booms as well as future depressions and make a recurrence of widespread distress, financial loss and general unemployment impossible.

That is, in essence, what is behind the budget which he submitted to Congress. When he laid figures before the Senate and House of Representatives which contemplated the borrowing by the United States of another ten billions of dollars in the next year and a half, the size of the sum proposed to spend to carry out the purposes of the New Deal staggered those who were not prepared for it. It set the computers to work to figure out what would be the size of the National Debt when this money shall have been borrowed. And the total, any way it is figured, comes to nearly 32 billions of dollars.

Other View of Debt. To owe 32 thousand millions is incomprehensible to the average person. Few people, even great financiers, can think in such terms. Only a government, and a very strong government, can even contemplate it. But governments do not think of debts as something pressing for payment; they have to think of them as something to pay interest on. So what such a debt will cost, if the interest is figured as high as five percent, will be less than a thousand million a year, or only about a third of the ordinary expenses of the government. And, when it is looked at that way, and the further thought is kept in mind that a great deal of the money that has been borrowed so far, and that it is proposed to borrow, to make up the grand total of the public debt of 32 billions, has been and will be lent to farmers, home-owners, municipalities, states and banks, and will come back, in time, from these sources, it doesn't seem so much like something to worry about.

Even Senator Reed of Pennsylvania, who is certainly no friend of the New Deal, admits that the burden proposed does not seem excessive. It is barely half of the cost of the public debt, which is borne by fewer than half as many people. It is ten billion dollars less than the United States spent during and after the Great War, for war purposes, not counting the money we lent to our Allies.

For "Constructive" Purposes. The high peak of the American national debt was in 1919, when Uncle Sam owed almost 26 billions. Eleven billion of that had been paid off in the past fourteen years. As the Treasury figures it, the proposed 32 billions of debt will figure out at only about \$250 per head for the entire population, so the cost of carrying it, at 3 percent, will be about \$7.50 a year for every man, woman and child in the United States. And, naturally, it is strongly believed that it will improve everybody's economic condition by a great deal more than that to have this huge volume of money put into use, to employ labor, purchase materials and improve the physical condition of the nation. The money raised for war was expended, thrown away, wasted. This money will be used for constructive, not destructive purposes.

That is the way the President, the Treasury and the Administration generally look at the program; but beyond the matter of dollars, the Administration is looking ahead to the "more abundant life," which is the avowed aim of the New Deal, and which it is hoped to bring about by Federal aid in the next two or three years.

The New Deal Aims. As it defines itself through day-to-day developments, the aim of the New Deal is neither outright Socialism nor a return to uncontrolled Capitalism. It is, rather, controlled Capitalism. Controlled in that it is conceived to be the duty of Government, not to prevent business from making profits, but to keep the accumulation of those profits from becoming a menace to the ordinary citizen, at whose welfare the whole program is aimed.

The purpose is to give every citizen more security in his employment, shorter working hours to earn the necessities of life, protection against exploitation by those who would swindle him out of his earnings, government work to turn to for employment if there is no chance to work for private employers, retirement on a pension after a given age or years of service, whether for public or private employers, controlled living costs, and opportunity for independence on a self-sustaining rural home of his own if that is what he seeks.

There is no thought of guaranteeing to every citizen a "chicken in every pot" or two cars—or even one car—in every garage. There is a definite thought that poverty can be greatly reduced, and abolished entirely for those who are able and willing to work. Those are the objectives, now made clear, to which President Roosevelt is looking in his plans for immense Government borrowings and spendings. And there is no question that he has his overwhelming party majority in Congress with him.

NOTICE OF SALE OF REAL PROPERTY BY TRUSTEE UNDER DEED OF TRUST TRUST NO. 487

WHEREAS, JACOB E. SCHUMACHER and BERTHA W. SCHUMACHER, husband and wife, by Deed of Trust, dated October 10th, 1930, recorded October 14th, 1930, in Book 426, page 215 of Official Records of Orange County, California, and registered October 14th, 1930 as Document No. 11714 on Certificate No. 3712 in the office of the Registrar of said Orange County, California, did grant and convey the property therein and hereinafter described, to the Orange County Title Company, as Trustee, to secure, among other obligations, the payment of one promissory note, dated October 10th, 1930, payable to Home Mutual Building and Loan Association or order, for the principal sum of \$12,000.00, with interest at the rate of 7.5% per annum, principal and interest due in monthly installments of \$150.00 each on the 1st day of each month beginning November 1st, 1930; and

WHEREAS, default has occurred in that the installment of principal and interest due on said note on January 1st, 1932, has not been paid; and

WHEREAS, Pacific States Savings and Loan Company, owner and holder of said note heretofore demanded that said Trustee sell said property; and on October 13th, 1932, duly recorded in the office of the County Recorder of said County, in Book 635, page 147 of Official Records thereof, a notice of said default and of its election to cause said property to be sold and more than three months have now elapsed since the recording of said notice. The sum of \$11,039.51 principal less credit from installment share of \$5.07, and interest thereon from December 31st, 1931 is now due, owing and unpaid on said note and there is also secured by said Deed of Trust the Trustee's fee and expenses of sale, estimated at \$152.00, together with \$724.88 paid and advanced by the owner of said note in accordance with the provisions of said Deed of Trust, with interest on said last mentioned sum;

NOW THEREFORE, NOTICE IS HEREBY GIVEN that the said Orange County Title Company, by virtue of the authority vested in it as Trustee under said Deed of Trust, will sell at public auction, to the highest bidder for cash, lawful money of the United States, on the 5th day of February, 1934, at the hour of eleven o'clock A. M. of said day, at the North entrance of the Hall of Records in the City of Santa Ana, California, all of the interest conveyed to it by said Deed of Trust in and to all the following described property situated in the County of Orange, State of California, described as follows, to-wit:—

That portion of Lot Two (2) of "Tract 11" as shown on a Map recorded in Book 10, page 22 of Miscellaneous Maps, records of Orange County, California, described as follows:

Beginning at the point of intersection of the South line of Lot One (1) of said Tract 11 extended Westwardly and the center line of the Cali-

fornia State Highway, as originally laid out and improved; thence North 40° 49' 30" West along said center line 934.8 feet to the true point of beginning of the land hereinafter described; thence continuing along said center line North 40° 49' 30" West 250 feet; thence at right angles North-easterly 175 feet; thence at right angles South-easterly 250 feet; thence at right angles South-westerly 175 feet to the true point of beginning.

Subject to easements and rights of way of record.

The above described property has been re-subdivided as a portion of Tract No. 964, and is now shown as Lots 15 and 16, the South-westerly 125 feet of the North-westerly 113.49 feet of Lot 17 and the South-easterly 55.51 feet of Lot 14 of Tract No. 964 on a map recorded in Book 31, pages 46 and 47 of Miscellaneous Maps, records of Orange County, California;

or so much of said property as shall be necessary to be sold to provide a sum sufficient to pay the total amount secured by said Deed of Trust.

Dated this 11th day of January, 1934. (Corporate Seal)

ORANGE COUNTY TITLE COMPANY
By H. A. GARDNER, President
By GEO. A. PARKER, Secretary.

CRYSTAL GAZING ON WATER PROBLEMS

The point has arrived in Orange county's water problems when hocus pocus solutions must be abandoned for something concrete and tangible. For a number of years there has been a tendency on the part of factions in this county to gaze into the crystal and see their fears enlarged. Similarly, Riverside and San Bernardino county officials cast apprehensive eyes toward those of us who make loud demands but fail to follow up with concerted action. To the upper counties, however, goes credit for trying to do something, while only one group of water users in this county—the Anaheim Union Water company and the Santa Ana Irrigation company—proceeded to take any move looking toward protection of water rights in the Santa Ana basin. This was done through joining the Water Conservation association, with the result that its filings are made for the benefit of San Bernardino, Riverside and Orange counties, with each county entitled to a proportion of flood water under those filings.

The only question admissible under the facts of the case is: To what proportion of flood waters along the upper Santa Ana river is Orange county entitled?

This is the gist of the whole issue. Certain rather noisy interests in Orange county haul out their crystals on every state occasion, peer into them and announce to the whole world that San Bernardino and Riverside are establishing prior rights to flood waters, forever depriving Orange county of its rightful benefits therefrom. Every time a roar develops below the coast range, there is a answering barrage from the upper counties. Then verbal warfare begins anew. Most of the ammunition has been with the upper counties in past garrulous conflicts, while most of the noise was raised in this basin. There is just enough truth in the crystal gazers' contentions to make the conflict, under present conditions, endless.

So far as we are aware, there never has been any attempt to settle definitely the proportions of flood water to which each of the three interested counties are entitled. The longer the issue hangs fire, the more involved it becomes, the more difficult its eventual solution. Until the definite proportion of flood water to which each of the counties is established, the selfish interests of both San Bernardino and Riverside counties, as in the past, dictate turning the question aside with their ace in the hole—the unanswerable fact that water which runs into the ocean is wasted.

As long as this county does nothing, either with negotiations, looking toward division of flood waters, or construction of spreading laterals and check dams in the Santa Ana river which will lead to the same question, so long will Francis Cottle and his associates parry with: "When and if Orange county completes its plans for conservation of flood water, we believe that there is no doubt but what representatives of the upper two counties will be willing to concede to Orange county its fair proportion of flood water."

Let us take the water problem off of the hot water stage.

THE PRESIDENT AND CONGRESS

The situation in Washington, in which the congress of the United States has abandoned its constitutional functions and seems to be content to leave the entire direction of the nation's affairs, legislative as well as executive, in the hands of the president, is not without parallel in our political history.

Three times before has congress abdicated, in effect. Andrew Jackson was the first to take its powers away from it, which he did with threat and violence rather than by persuasion or consent. In the war between the states congress was, as now substantially all of one political party, and President Lincoln had his own way, as far as war measures were concerned. And in the Great war congress, like the rest of the United States, was content to leave leadership to President Wilson.

President Roosevelt, however, is the first to propose, in so many words, that congress leave everything to him. In his message, delivered at the opening of the session, he said to congress, in effect, that while the legislative constitution provides for a division of powers, as between the legislative, the executive and the judicial branches of government, "the impulse of a common purpose declares a union." And not a single voice, able to make itself heard, protested.

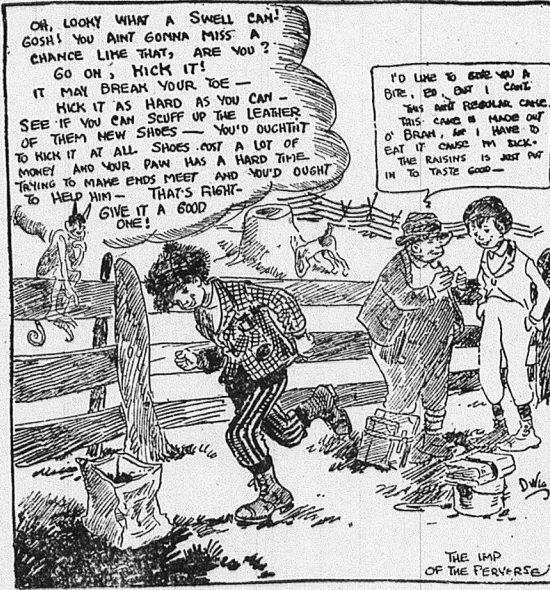

The president may be right. It may be that the people of the United States, represented in congress, are unanimously with him. It is our understanding however, that a member of congress represents everybody in his district, not those of his own party alone. How many of them, we wonder, have gone to the pains to find out whether congress is getting ready to abdicate.

MAKING BANKS SAFE

Every bank account of \$2,500 or less in the United States, except, of course, those in banks which have not been reopened because of unsoundness, is now insured against loss to the depositor. How this will work out for the banks is as yet uncertain. Some people think it will make bankers careless with other people's money, since they have the nationwide insurance fund to fall back on in case they make mistakes. Our idea is that it, among other things, will make banks a great deal more careful than many of them were up to a year ago. When ten thousand out of thirty thousand banks fail or temporarily have to close down because they have been involved, directly or indirectly, in careless or risky use of their deposits, there isn't much to brag about in the matter of careful banking in the past.

We believe that the banks of the nation, generally speaking, are in a sounder position than they have been for many years. We know that there is no risk to any small depositor now in placing his money in any bank which the government allows to stay open. We think there is still a good deal to be done before the banking system of the United States can function in all respects as efficiently as it ought to. There are still too many small banks, insufficiently capitalized to meet the needs of their communities. We do not believe there are many degenerate crooks in control of banks any longer, but we are not sure that every set of bank officials is as competent and filled with the sense of responsibility as they ought to be.

What has shaken public confidence in banks and bankers is not only the thousands of failures of small banks, but the shocking disclosures in the senate committee investigation, of the way in which the heads of some of the big banks enriched themselves at the expense of the public. We realize that a sound banking system is essential to the conduct of business, and we do not think that bankers generally are in a good position to protest against being regulated and restricted.

History of Anaheim

Officially Recorded In Minutes of Anaheim Water Company.

Which are Copyrighted, 1932, by Anaheim Gazette, and Printed In Weekly Installments

Nov. 27, 1875. Members all present. Minutes of last meeting were read and approved. Treasurer reports cash on hand, \$170.14.

Zanzer's bill, two men one day working on old adobe building, \$2.50. Bill of Mr. Stoppelenberg for work on adobe building and lumber furnished approved and ordered paid out of the original fund.

TODAY AND TOMORROW

By FRANK PARKER STOCKBRIDGE

JEZEBEL beds of ivory
It was like looking back into the Bible to read of the discovery of the ruins of the palace of King Ahab and Queen Jezebel, by an exploring expedition from Harvard University. They brought back to Cambridge ancient pieces of carved ivory which once were the decorations and ornaments of the "ivory house" of Ahab and his "painted queen."

"The houses of ivory shall perish and the great houses shall have an end," as the Prophet Amos wrote. "Woe to them that are at ease in Zion and that lie upon beds of ivory and stretch themselves upon their couches."

Since the year 850 B. C. these ivories which are now in America have been lying there. Their discovery makes the First Book of Kings seem alive and real.

THRIFT In spending "National Thrift Week," which began Jan. 17, is doubtless a useful institution. But just what bearing the question "How often do you bathe every week?" has to do with thrift, I fail to understand. It would seem, at first glance, that real thrift would include economy of soap!

The promoters of "National Thrift Week" are asking a lot of queer questions of "prominent citizens" among them that about bathing, the evident purpose being to show that other things besides saving money have to do with success in the world. It is my observation that the really thrifty persons are those who make sure that they get value for their money and do not spend more than their incomes. But too many folk think that thrift is a synonym of "miserliness." There are times when it is thrifty to spend, and I think this is one of them.

I would rather have my capital in securities and commodities—where it is, as far as it exists—than in money at this time. For if there is anything in New Deal it will mean higher value for commodities and lower value for money.

LIQUOR same old racket

One of my New York friends complained the other day that the "legal" whiskey now being sold is of no better quality than that which he used to buy from his bootlegger. I asked him why he should be surprised at that. There never was a time when more than a static, as if there were no change, was known the difference between good liquor and bad, anyway; and so little pure whiskey has been available the past few years that very few today did think it is so different.

Why should the legitimate liquor dealers make an effort to sell something that wouldn't be appreciated by the business men who find the moral and civil of employees impaired by drink. I think the public, which was so eager to repeal the 18th Amendment, will find that it is against the same old abuse as before.

Pretty soon, I think, we shall see another popular wave of revolution against the sale of liquor. And it will come, not from abroad, as some business men who find the moral and civil of employees impaired by drink. I think the public, which was so eager to repeal the 18th Amendment, will find that it is against the same old abuse as before.

February 19, 1876. Meeting called to order of trustees of the Anaheim Water company. Meeting called to order by the president. Members all present, except R. W. Scott. Zanzer absent.

Treasurer reports \$70 cash balance on hand.

The president requested to instruct the ranger to have the ditches in order by the first of March A. D. 1876. The meeting adjourned.

F. A. Korn, Secretary.

February 26, 1876. Meeting called to order by the president. Absent, Theo. Reiser and R. W. Scott. Minutes of the last meeting were read and approved.

No reports. The contract with the zanzer was read, approved and a copy ordered to be made by the secretary and submitted to the next regular meeting.

Water sold, \$3.

F. A. Korn, Secretary.

March 4, 1876. Meeting called to order by the president. Absent, R. W. Scott. Zanzer reports having cleaned out the main ditch from Anaheim to river; the ranger to have the ditches in order by the first of March A. D. 1876. The meeting adjourned.

Members all present. Minutes of last meeting were read and approved. Treasurer reports cash balance on hand, \$141.25. Bill of Mr. Stoppelenberg for work on adobe building and lumber furnished approved and ordered paid out of the original fund.

Members all present. Minutes of last meeting were read and approved. Treasurer reports cash balance on hand, \$141.25. Bill of Mr. Stoppelenberg for work on adobe building and lumber furnished approved and ordered paid out of the original fund.

Members all present. Minutes of last meeting were read and approved. Treasurer reports cash balance on hand, \$141.25. Bill of Mr. Stoppelenberg for work on adobe building and lumber furnished approved and ordered paid out of the original fund.

GAMBLING then and now
There is considerable talk going around that some sort of a Government lottery may be set up, not only to give people a chance to gamble but to provide revenues for the nation. I hear many people denounce such a scheme, on the ground of morality. I hear others, among them some of the highest and character, say they see no great objection to it. It all depends upon the point of view.

When I was a boy moralists used to denounce playing marble "for less" as one of the most vicious of sins. I find it difficult to regard either that, or playing cards for reasonable stakes, or taking a chance in a raffle at a church fair, as evidence of a degraded and immoral character. I think the great wave of protest which made lotteries illegal in this country, more than forty years ago, was due to the belief that they were not conducted honestly.

Regardless, however, of the rights and wrongs of the matter, I am of the opinion that, before very long, we shall see some sort of lotteries either by the government or under government supervision, established in this country.

DAVIS untangling job

In picking my friend Norman H. Davis to head the international committee which is trying to salvage whatever remains of the wreck of the fortune of Ivan Krugger, for the benefit of those who invested money in the Swedish financier's schemes, the men of affairs who are interested have picked the one American who has the best reputation in Europe as a financial adviser.

Hundreds of millions of dollars are involved. The financial structure which Samuel Insull erected in Chicago, with interlocking and holding companies whose interests overlapped, was simple compared with the great world-wide tangle of Krugger's affairs, disclosed only after he had committed suicide in a Paris hotel. There is hardly a government which is not in some way involved, no country in which great numbers of investors are concerned in getting the mess straightened out.

I am betting that Norman Davis will untangle it.

WEALTH and the man

The current talk of "a more equal distribution of wealth" doesn't worry me. Communists talk as if wealth were static, as if there were no change, and it, so that to give the poor more meant taking from the rich. They forget that a hundred years ago we were all poor, and got rich not by robbery but by creating more wealth.

Money is not wealth, neither is raw land. Wealth is the product of labor applied to land and its products; money is merely a convenient form of storing and transmitting ownership of wealth. If any man has the capacity to create wealth, he is entitled to what he creates. But if he has to call on others to direct his energies into profitable channels, to risk their wealth in the effort to help him create more, then they, too, are entitled to their share.

I have lived more than 60 years, and I have never observed that any really competent man did not get all of the wealth to which his competence entitled him, nor have I seen any incompetent man benefit by well-meant schemes to make everybody rich.

The distance from Egypt to the Promised Land is no longer than the trip from New York to Buffalo. Moses might easily have led his people over the route in a few weeks, instead of which the wanderings occupied forty years. Guided by divine wisdom, he saw the necessity for a long period of isolated discipline. They were slaves when he started with them; they were an organized self-governing nation when, at length, he climbed to the pinnacle of Mount Pisgah and looked across into the Promised Land, which he was permitted to see but not to enter.

So Moses, the servant of the Lord, led his people into the land of Moab, according to the word of the Lord. And he (the Lord) buried him in a valley in the land of Moab, over against Beth-peor, but no man knows of his sepulchre unto this day.

"How well he had done his work was immediately apparent. Joshua, whom he had chosen to succeed him, took the time to wait a hitch and completed the journey into Canaan. He, too, was a man of vision. As a young man, he had been sent by Moses with eleven others to spy out the Promised Land. Ten of the twelve came back with a faint-hearted report.

It is a land that eateth up the inhabitants thereof; and all the people who are in it are of great stature, and there we saw the giants, the sons of Anak, which come of the giants; and we were in our own sight as grasshoppers, and so we were in their sight. Thus you can always get a majority

Baptists to Hold Missions School

First of six School of Missions classes to be equipted at the Calvary Baptist church will open at 6:15 o'clock, Rev. Virgil K. Ledbetter announces.

The first quarter hour will feature stereopticon slides of home and foreign missionary work, with the following hour being devoted to class work under three general classifications, with R. J. Daugle presiding over the adult class; R. J. Orange over the young people's class; and Mrs. Florence Kerr over the junior and intermediate classes.

A general assembly will follow the class work with a visiting missionary as speaker. Dr. Walter E. Woodbury of Los Angeles, field secretary of the Southern California Baptist convention, will speak at the concluding assembly on March 4.

Confirmation Class at St. Michael's Now

Classes for preparation for the confirmation at St. Michael's Episcopal church now are under way. Rev. D. Howard Dow, rector, announces. Adults meet Sunday evenings at 7:30 o'clock and children Monday afternoons at 4 o'clock in the Parish hall. Anyone interested is invited. The bishop will confirm early in Lent.

The rector will preach a series of sermons beginning Sunday, the first entitled "The Rector, as Administrator, as Priest, as Pastor, as Preacher."

Demonstration Car Here Friday P. M.

Paul Davidson, owner of Superior Radio Service on West Center street, announced Thursday that a Crosby demonstration car will be in front of his store Friday afternoon, for the convenience of persons wishing to see a complete line of radios and refrigerators.

P-E-R-S-O-N-A-L-S

Mrs. C. E. Holcomb and her sister, Miss Doris Zeyn, were in town from Pullerton a few days ago and spent the afternoon with friends.

James Rimsau came down from Hollywood yesterday and visited with his sister, Miss Sophia Rimsau. James believes in replenishing the earth, and has three children and four grandchildren. He is a leading businessman at Hollywood and is doing very well.

Dutch Plate, Beer at the Pickwick.

Among Anaheim guests at the formal dinner-dance given Saturday evening at the 16th Infantry officers' club in Los Angeles in honor of General Walter Perry Story were Major and Mrs. Donald L. Winans.

Mrs. Marcella Newton and Bobby Lee Morecraft were weekend guests of their brother, Oliver Edwards, in Los Angeles, returning Sunday evening to the home of their parents, Mr. and Mrs. Carl Morecraft of North Jones street.

A son was born Monday morning to Mr. and Mrs. Sydney George Jackson of North Claudina street.

Anahelm Flower Shop, Phone 3224. Mrs. E. A. Abbott.

Mrs. J. C. Smith of South Citron street was hostess at an informal Sunday evening party enjoyed by Mr. and Mrs. R. H. Moore, Mr. and Mrs. J. Rivers, of Los Angeles; Dr. and Mrs. Louis Swagar of Whittier; and Mr. and Mrs. C. H. Hersey of San Jose.

Sticks and chops at the Pickwick.

Anahelm friends of Mrs. Richard Minor (nee Ruth Grimm) of San Francisco this week received word that she became the mother of twins, a son and daughter, a few days ago.

Costs no more for quality at Anaheim Cleaners and Dryers, 305 East Center street, Phone 4416.

Dr. Charles V. Schütz was honored at a birthday dinner Sunday by Mrs. Schütz, who used Valentine decorations in their home at 722 North Clementine street. Guests included the honored guest's parents, Mr. and Mrs. A. L. Schütz of Burton avenue; the hostess' parents, Dr. and Mrs. P. J. Harvey, and grandmother, Mrs. Eleanor Harvey; Mr. and Mrs. Ted Payne and their three children.

SEEKS \$50,000 DAMAGES
C. C. Carico, burned severely by a live electric wire blown down near his home at the Orange county park during a storm on November 3, Wednesday filed suit seeking \$50,000 damages from the Southern California Edison company.

AVOCADO GROWERS TO MEET
Avocado growers are invited by Chairman A. R. Marshburn of the farm bureau avocado department to attend a mass meeting to be held at the bureau office, Santa Ana, Monday at 10 a. m. Purpose is to select representatives to a Southern California avocado committee.

Scouts Plan Honor Court Friday Eve

Anaheim's five regular Boy Scout troops and one Cub troop will take part in the court of honor to be held Friday evening at 7:30 o'clock from the Freeport theatre in Long Beach, according to announcement of Commissioner E. W. Walz this week. The troops will parade from the city hall to the auditorium, with the Anaheim Legion drum and bugle corps leading. An elaborate program has been arranged.

Executive committee include: Dr. Walz, commissioner; M. A. Gauer, chairman of executive board; Judge Frank Tausch, J. W. Newton, Ed Miller, Harold Keisley, W. P. Webb, Kenneth Peck, Rudolph Boyson, M. W. Martens, Art Shipley, E. R. Deering, Harry Pearson, Clyde Childress, and Fred Weisel.

Chas. King Players At Capitol In L. B.

Orange county drama patrons welcome the announcement of the advent of the popular Chas. King Players, who begin an indefinite engagement at the Capitol theatre in Long Beach, Wednesday evening, January 31.

The company, the principal players of which are now in rehearsal, is headed by Ben Erway, young leading man who registered a recent hit with the Duffy Players of Los Angeles; Laurene Tuttle, titian-haired leading lady also formerly with Duffy and Morosco; Katherine Wayne, for long a favorite character woman in Pacific coast circles, and Virginia Thornton, Fredric Storm, Arthur Loeff, and Howard McNear. The opening play will be "Your Uncle Dudley."

The stage plays will be presented each night at 8:00 P. M. and will be given in conjunction with a full program of first run screen entertainment. One show will be given nightly, the doors open at 6:45. Selected short subjects will be shown from 7 until 8 p. m. The Chas. King Stage show then goes on to be followed by a first run feature picture. All seats will be reserved and are now on sale.

Matinee performances will be given on Thursdays, Saturdays, and Sundays. Gazette readers who wish to make reservations may do so by calling the Fox Theatre in Anaheim, telephone 3602.

Mr. and Mrs. Louis Danz of 514 North Zeyn street have a house guests Mr. and Mrs. J. E. Spence of McConnelville, Ohio.

Radio Association Meeting February 1

Next meeting of the Northern Orange County Radio Sales and Service association will be held February 1 at 7:30 p. m. at the Anaheim Electric store on West Center street. President Paul Davidson announced this week. The organization was formed ten days ago for the purpose of improving the ethics and service of radio and electric stores in this district. All radio and electric dealers and salesmen are invited to attend.

Lauretta Shoppe Opens on Saturday

Mrs. Lauretta Hain Wulf, well known former employee of the Anaheim J. C. Penney store, will open the Lauretta Dress Shoppe at 116 West Center street Saturday.

"It is my desire to afford the women of this community the opportunity of selecting their wearing apparel from the newest materials and latest fashions obtainable," Mrs. Wulf announces. "An the new stock is Spring styled and made of newest fabrics. I shall be happy to meet my friends in the new store."

Rev. I. N. Demy says:
"I have found nothing in the past 20 years that can take the place of Dr. Miles Anti-Pain Pills. They are a sure relief for my headache."

Sufferers from Headache, Neuralgia, Toothache, Backache, Sciatica, Rheumatism, Lumbago, Neuritis, Muscular Pains, Periodic Pains, write that they have used Dr. Miles Anti-Pain Pills, with better results than they had even hoped for.

Countless American housewives would no more think of keeping house without Dr. Miles Anti-Pain Pills than without flour or sugar. Keep a package in your medicine cabinet and save yourself needless suffering.

At Drug Stores—25c and \$1.00
